Roman. Black Letter. Script.

M, m, 1 em; 2 ēm, n. [ems, M's, or Ms, 1 emz; 2 ēmz, pl.] 1. A letter: the thirteenth in the English alphabet. Its sound is made by sending the speech-current through the nose while the lips are closed and the vocal cords vibrating. It is called the 'labial nasal.' The sound of *b* is made in the same way, except that the nasal passage is closed.

Before *n* in Greek words *m* is silent, as in *mnemonic*. In French words an *m* following a vowel and not followed by a vowel is not a consonant, but only a sign that the preceding vowel is 'nasal,' i. e., pronounced with the soft palate raised so as to leave the nasal passage open. French *n* is used in the same way; so that *champ* and *chant* are pronounced alike, namely, as chañ.

Like *l*, *n*, and *r* (see under *L*), *m* may form a syllable by the continuation of the vocal murmur while the lips are closed. This vocal murmur lacks the distinctness of a clear vowel, but is nearest to *a*. In the ordinary spelling 'syllabic *m*' is sometimes denoted by *m* alone, as in *chasm*, *prism*; more often, however, by *m* with preceding unressed vowel, as in *madam*, *bottom*. Phoneticians denote it by 'm', 'm', or the like. In this dictionary the weakest stage of the vocal murmur is ignored, and the sound denoted by simple *m*. For the least weak stages *a* is employed.

M is eighth in frequency of the consonants and twelfth of all the single sounds in English, averaging 3.06 per cent. of the sounds on the pages of English literature. WHITNEY *Ortinal and Linguistic Studies* second series, p. 274. [s. 1874.]

Capital *M* is from Lat. Gr. *M* < Early Greek *μ* < Phœnician *𐤌* < Egyptian hieratic *𓆎* < hieroglyph *𓆎*. The hieroglyph represented an owl. The runic *𐌖* = *M* is called *mann*, man. It is the twentieth letter of the futhorc. For the lower-case, black letter, and dates and the like, see *A*.

The history of the character is represented as below:

Hieroglyphic Owl. Egyptian Hieratic. Phœnician. Early Greek. Ro-man. English Script.

mack'er-el, 1 mak'er-el; 2 mäch'er-él, vi. To go on a voyage for mackerel; fish for or catch mackerel.
mack'er-el, n. 1. A scombroid fish of the genus *Scomber*. The common *Scomber scombrus* of the North Atlantic is from 12 to 18 inches long, steel-blue above, striped with blackish bands, and silvery beneath. Mackerel move in great schools, are carnivorous and predatory, and are among the most important of food-fishes.
The mackerel feeds upon the small crustaceans and other small animals which swarm in the sea, and is, in turn, fed upon by other fishes, birds, and cetaceans. One of the surface-swimming ceceods, known as "red feed" or "cayenne," is a favorite food; when mackerel have been feeding freely on it they spoil very quickly after being caught, owing to their sides rotting or "burning." Among the fish which the mackerel eat may be named herring, anchovy, sand lance, menhaden, and silversides. Among fishes, sharks are, perhaps, the worst enemies of the mackerel. Other fish-enemies are the bluefish and cod. Porpoises and whales are often seen feeding on the mackerel schools. Large squid do great damage to small mackerel and, among birds, the gannet is especially destructive. Small mackerel are known among fishermen as "spikey," "blinkers," and "tinkers." Spikeys are the smallest caught by the commercial fishermen, they being 5 or 6 inches long and 5 to 7 months old, or younger. Tinkers are under 9 inches in length and are supposed to be about 2 years old. Blinkers are intermediate in size and age. Maturity is probably attained in the fourth year. D. FRANK JORDAN AND HARTON W. EVERMANN *American Food and Game Fishes* pp. 274-5. [p. x. & co., '05.]

mac-ro'-blast, *n.* Same as MEGALOBlast. — **mac'-ro-bra'-chi-a**, *n.* The condition of having abnormally long or large arms. — **mac'-ro-bran'-chi-ate**, *a.* Large-gilled; relating or pertaining to large gills; as, the *macrobranchiate* segment in the body of the nautilus. — **Mac'-ro-bran'-chi-er**, *n. pl. Spong.* A tribe or subtribe of a larger sponge-group with large chambers. — **mac'-ro-bran'-chi-er-ate**, *a.* 1. Large-chambered. 2. Of or pertaining to the *Macrocamere*. — **mac'-ro-car'-pin**, *n. Chem.* A yellow crystalline compound present in the root of *Thalictrum macrocarpum*. — **mac'-ro-car'-pous**, *a.* Large-fruited. — **mac'-ro-cent'-ro-some**, *n. Cytol.* A centrosome having a granule in the center; possibly the equivalent of the centrosome.
Mac'-ro-cent'-rus, 1 mak-rō'-sen-trus; 2 mē'-ro'-cēn-trūs, *n. Entom.* An important genus of hymenopterous parasites of the family *Braconidae*, typical of the subfamily *Macrocentrinae*, of European and North-American distribution. [*Gr. makrocentrus*, with a long string].
mac'-ro-ce-phal'a, 1 mak-rō'-se-fā'-l-a; 2 mē'-ro'-ce-fā'-l-a, *n. Med.* The quality or state of being macrocephalous: said especially of a fetus.
mac'-ro-ce-phal'ic, 1 mak-rō'-se-fā'-l-ik; 2 mē'-ro'-ce-fā'-l-ic, *a.* 1. Having an unusually large head or brain; speil', having a cranium of a capacity of over 1,950 cubic centimeters. 2. *Ant. Pros.* Same as PROCEPHALIC. [*Gr. makrocephalos*, < *makros*, large, + *kephalē*, head].
mac'-ro-ceph'a-lism, 1 mak-rō'-se-fā'-l-izm; 2 mē'-ro'-cēfā'-l-izm, *n.* The state or quality of being macrocephalic.
mac'-ro-ceph'a-lyt', **mac'-ro-ceph'a-lous**, *a.* 1. Macrocephalic. 2. *Bot.* Large-headed: said of dicotyledonous embryo when the cotyledons are confluent into a larger head-like mass. — **mac'-ro-ceph'a-lus**, *n. 1. Pathol.* One having an unusually large head; also, a macrocephalic skull. 2. *Zool.* Same as PHACOCARUS.
mac'-ro-che'ta, *n. Entom.* One of certain bristles, or large stiff setae, on the thorax and legs of some *Diptera*. — **mac'-ro-chel'i-l-a**, *n.* The state of being macrochellous. **mac'-ro-chel'i-l-at'**, **mac'-ro-chel'i-lous**, *a.* Having large or enlarged lips. — **mac'-ro-chel'i-rous**, *a.* Same as MACROCHIROUS. — **mac'-ro-chem'i-cal**, *a.* Of or pertaining to macrochemistry. — **mac'-ro-chem'is-try**, *n.* The chemistry that has to do with the properties and relations of compounds other than those which are considered through the microscope: opposed to *microchemistry*. — **mac'-ro-chi'-ra**, *n. 1. Terat.* Excessive development or abnormal size of the hands. **mac'-ro-chel'rat**; **mac'-ro-chel'ri-at**; **mac'-ro-chel'ri-at**. 2. [*M.*] *Zool.* A monotypic genus of the family *Inachidae*, consisting of the giant crab of Japan. — **mac'-ro-chi'-ran**, *a. & n.* — **Mac'-ro-chi'-res**, *n. pl. Ornith.* An order or suborder of egithognathous birds with the terminal or hand portion of the wing longer than the proximal, as in swifts and hummingbirds. — **Mac'-ro-chi'-rop'ter-a**, *n. pl. Mam.* The *Prugivora*. — **mac'-ro-chi'-rop'ter**, *n.* — **mac'-ro-chi'-rop'ter-an**, *a. & n.* — **mac'-ro-chi'-rop'ter-ous**, *a.* Having large hands. — **Mac'-ro-cho'-a-n'ies**, *n. pl. Conch.* A group of nautiloid cephalopods with long septal funnels. — **mac'-ro-cho'-a-nite**, *a. & n.* — **mac'-roc-ne'mic**, *a.* Having long legs. — **mac'-ro-coe'-tus**, *n.* One of certain large bacteria or cocci. — **mac'-ro-coe'-l-a**, *n.* The state of being macrocolous. — **mac'-ro-coe'-lous**, *a.* Characterized by long limbs. — **mac'-ro-co-nid'i-um**, *n. Bot.* A large conidium. Compare MICROCONIDIUM.
mac'-ro-cosm, 1 mak-rō'-kezm; 2 mē'-ro'-cōsm (XIII), *n. 1.* The great world; the universe or cosmos exterior to man, as opposed to the *microcosm*, man.
Matter in particle and planet, mind and *macrocosm*, is quick with spirit. A. BRONSON Alcott *Table-Talk*, *Conscience* bk. II, p. 159. [a. broos. 1877.]
2. The whole of any sphere or department of nature or knowledge to which man is related, or of which he forms a part. [*Gr. makro* + *Gr. kosmos*, world.] — **-cos'-mic**, *a.*

mac'-ro-cos-mol'o-gy, *n.* A description of the macrocosm.
mac'-ro-crys'tal-line, *a. Petrol.* Composed of crystals large enough to be detected by the naked eye or a simple lens.
mac'-ro-cyst, *n. 1.* A large cyst or spore-case. 2. An intercalated resting-stage assumed in the young plasmodia of *Myxomycetes* by swarm-spores under unfavorable conditions, such as lack of warmth and moisture. Compare MICROCYST. — **Mac'-ro-cys'tis**, *n. Bot. 1.* A genus of gigantic laminaraceous seaweeds, the only species being *M. pyritera*, of the southern hemisphere, which often attains a length of several hundred feet. 2. [*M.*] A plant of this genus. — **mac'-ro-cy'tase**, *n.* A cytase derived from the large lymphocytes of the lymph-nodes. — **ac'-ro-cy'te**, *n.* A giant red blood-corpuscle, present especially in pernicious anemia. — **mac'-ro-cy-the'mi-a**, *n.* A condition characterized by the presence of macrocytes in the blood. — **mac'-ro-cy-to'sis**, *n.* The formation of macrocytes in the blood from disease of the marrow of long bones. — **mac'-ro-dac'tyl**, *n. 1.* Macrodiactylous. *II. n.* One of the *Macrodiactyla* or of the *Macrodiactylus*. — **Mac'-ro-dac'tyl-a**, *n. pl. Entom.* A tribe of clavicorn beetles with long tarsi. — **Mac'-ro-dac'tyl-ii**, *n. pl. 1. Ornith.* A former division of gnatatorial birds with long toes, as in jacobins, rails, etc. 2. *Entom.* The *Macrodiactyla*. — **mac'-ro-dac'tyl'i-a**, *n.* The condition of having long fingers and toes. **mac'-ro-dac'tyl-ism**. — **mac'-ro-dac'tyl-ous**, *a.* Having long fingers and toes. **mac'-ro-dac'tyl-ict**. — **mac'-ro-di-ag'o-nal**, *n. 1. a.* Of, pertaining to, or parallel to the long diagonal. *II. n. Crystal.* The longer lateral axis in the orthorhombic and triclinic systems. — **mac'-ro-dome**, *n. Crystal.* A dome parallel to the macrodiagonal. See *illus.* under BRACHYDOME. — **mac'-ro-do-mat'ic**, *a.* — **mac'-ro-dont**, *n. 1. a.* Having large teeth: said of animals. *II. n.* A large-toothed animal. — **mac'-ro-dont-ism**, *n.* **mac'-ro-dont'i-at**. — **mac'-ro-dont'ic**, *a.* Same as MEGADONT. — **mac'-ro-er'gate**, *n. Entom.* A very large ergatid ant. — **mac'-ro-es-the'si-a**, *n. Pathol.* An abnormal condition of the tactile sense which makes objects appear of greater size than they are in reality. **mac'-ro-es-the'si-at**. — **mac'-ro-gam'ete**, *n. Bot.* The female of two conjugating gametes: so called from its being the larger one. Compare MICROGAMETE. — **mac'-ro-gam'e-to-cy'te**, *n.* The oöcyte of a macrogamete. — **mac'-ro-gas'ter**, *n.* An individual having a large belly. — **mac'-ro-glos'sate**, *a.* Having a long tongue or tongue-like organ. — **mac'-ro-glos'si-a**, *n. Pathol.* Excessive development or abnormal size of the tongue; hypertrophy of the tongue. — **mac'-ro-glos'si-ne**, *n. pl. Mam.* A subfamily of pteropodoid bats with a very long tongue and low narrow molars. **Mac'-ro-glos'sus**, *n. (t. g.)* — **mac'-ro-glos'sin**(es), *a. & n.* — **Mac'-ro-glos'sini**, *n. pl. Entom.* The hummingbird hawk-moths, a tribe distinguished by an unusually long proboscis. — **mac'-ro-glos'si-ty**, *a.* Having unusually long jaws; prognathous. **mac'-ro-glos'si-ty**. — **mac'-ro-glos'si-ty**, *n.* The condition of being macrognathic. — **mac'-ro-glos'si-ty**, *n.* — **mac'-ro-go-nid'i-um**, 1 mak-rō'-go-nid'i-um; 2 mē'-ro'-gō-nid'i-um, *n. 1. Bot.* A large gonidium. 2. *Protol.* An individual of normal size regarded as equivalent to an egg-cell, as in certain flagellate infusorians.
mac'-ro-graph, *n.* A drawing or illustration of an object as seen with the unaided eye: opposed to *micrograph*. — **mac'-ro-graphy**, *n. 1.* Examination with the unaided eye: opposed to *micrography*. 2. Extremely large writing, often indicative of some nervous malady. — **mac'-ro-graph'ic**, *a.* — **mac'-ro-graph'ies**, *n.* The science of macrography. — **mac'-ro-gy'n**, *n. 1.* A female, or queen, of a larger size than the average female of the species. — **mac'-ro-hem'o'-zo'ite**, *n.* A hemogregarine (*Drepanidium serpentinum*) in a large schizont stage parasitic in snakes. **mac'-ro-hem'o'-zo'ite**. — **mac'-ro-hi-lu-mi-na'tor**, *n.* A lens used with a microscope for illuminating large objects under low powers. — **mac'-ro-lec'i-thal**, *a.* Containing an unusual quantity of food-yolk, as certain eggs. — **Mac'-ro-lep'ti-dop'ter-a**, *n. pl. Entom.* A division of lepidopteres, including the butterflies and larger moths: opposed to *Tineina* or *Microlepidoptera*. — **mac'-ro-lep'ti-dop'ter**, *n.* — **mac'-ro-lep'ti-dop'ter-ous**, *a.* — **mac'-ro-lep'ti-dop'ter-ist**, *n.* A student of the *Macrolepidoptera*.
ma-cro'l'o-gy, 1 ma-kre'l'o-gi; 2 ma-rō'l'o-gy, *n.* Long speech with little sense. [*Gr. makros*, long, + *-logos*].
mac'-ro-lop'hic, *a. Craniol.* Having a high incisor crest (anterior nasal spine); said of skulls. — **mac'-ro-ma'ni-a**, *n. Pathol.* The persistent delusion that physical objects, including one's own body, are swollen to an immense size. — **mac'-ro-ma'ni-a-cal**, *a.* — **mac'-ro-mas'ti-a**, *n. Pathol.* Abnormal enlargement of the breasts. — **mac'-ro-me'ti-a**, *n. Terat.* The condition of having some member unusually developed. — **ma-crom'e-ism**. — **ma-crom'e-lus**, *n. Pathol.* A person afflicted with macromelia.
mac'-ro-mere, 1 mak-rō'-mēr; 2 mē'-ro'-mēr, *n.* One of the larger of the two kinds of cells resulting from the division of teloclethial eggs: opposed to *micromere*. [*Gr. makro* + *Gr. meros*, part.] — **mac'-ro-me'tal**, *a.* — **mac'-ro-me'tic**, *a.* — **mac'-ro-me'tic**, *a.* Of or pertaining to a granitoid structure of rocks that is discernible to the naked eye: opposed to *micromeritic*. — **mac'-ro-me'to-zo'ite**, *n.* A large spo zoöite occurring among sporezoans: opposed to *micromerozoöite*. — **mac'-ro-mes'en-ter-y**, *n.* A mesentery bearing gonads and filaments; a large complete type observed among anthozoans: opposed to *micromesenter-y*.
ma-crom'e-ter, 1 ma-kre'm'tēr; 2 ma-erō'm'e-tēr, *n.* An instrument like a sextant, for measuring distant objects by means of two telescopes. [*Gr. makro* + *-meter*].
mac'-ro-mol'e-cule, *n.* A compound or multiple molecule. — **mac'-ro-my'e-lon**, *n.* The medulla oblongata. — **-lo-nal**, *a.* **ma'cron**, 1 mē'-kron; 2 mā'-eron, *n.* In orthoepy, a straight line (—) placed over a vowel to show that it is long: opposed to *breve* (˘). [*Gr. makron*, neut. s. of *makros*, long].
Ma'cron, *n. Bib.* (Apocrypha). 2 *Mac*, x. 12.
mac'-ro-no'si-a, *n. Pathol.* Any chronic or prolonged disease. — **mac'-ro-nu'-cle-us**, *n. Biol.* A large nucleus, especially the larger of two nuclei, as in infusorians. — **mac'-ro-nych'i-a**, *n.* Unusual size of the nails. — **mac'-ro-pet'a-lous**, *a. Bot.* Having large petals. — **mac'-ro-phage**, *n. Biol.* A very large phagocyte that devours small phagocytes. — **mac'-ro-phage-cy'te**. — **ma-croph'o-nois**, *a. Loud*; voiced; stentorian. **mac'-ro-pho'-to-graph**, *n.* The photographic reproduction of negatives on an enlarged scale. — **mac'-roph-thal'mic**, *a.* Having large eyes. **mac'-roph-thal'moust**. — **Mac'-roph-thal'mi-dæ**, *n. pl. Crust.* The *Ocyropsidae*. — **Mac'-roph-thal'mus**, *n. (t. g.)* — **mac'-roph-thal'mid**, *n.* — **mac'-roph-thal'moid**, *a.* — **mac'-ro-phyl'in**(es), *a. Bot.* Consisting of extended leaflets or leaf-like expansions. — **mac'-ro-phyl'ous**, *a.* *Bot.* Large-leaved. — **mac'-ro-phys'ic**, *n.* The physics of masses, or of large bodies, without taking finer or molecular structure into account. — **mac'-ro-phys'i-cal**, *a.* — **ma-cro'-pi-a**, *n. Pathol.* An abnormal condition of vision in which objects appear magnified. — **Mac'-ro-pi'na**, *n. pl. Mam.* The *Macropodidae*. — **mac'-ro-pin**(es), *a.* — **mac'-ro-pin'a-cold**, *n. Crystal.* A pinacoid parallel to the vertical and macrodiagonal axes.

See *illus.* under BRACHYDOME. — **mac'-ro-plin'a-col'dal**, *a.* — **Mac'-ro-pl'per**, *n.* A small genus of Pacific island shrubs of the pepper family. The root of *M. mathysticum* is the ava or kava of the Polynesians. — **mac'-ro-pla'si-a**, *n.* Hypertrophy. — **mac'-ro-plie'ral**, *a.* Having long plicra, as certain trilobites.
mac'-ro-pod, 1 mak-rō'-pōd; 2 mē'-ro'-pōd. *I. a.* Having large or long legs or feet. *II. n.* A macropod animal, especially a spider-crab. [*Gr. makropous*, < *makros*, large, + *pous*, foot.] **mac'-rop'o-dant**. — **mac'-ro-po'di-a**, *n.* The macropodous condition. — **Mac'-ro-po-di'a-dæ**, *n. pl. Crust.* The *Leptopodidae*. — **Mac'-ro-po'di-dæ**, *n. (t. g.)* — **mac'-ro-po'di-an**, *a. & n.* — **Mac'-ro-po'di-dæ**, *n. pl. Mam.* A family of diprotodont marsupials, especially those having 6 sharp upper incisors and 2 larger lower ones, enlarged saltatorial hind legs, and long tail; including kangaroos, etc. **Mac'-ro-pus**, *n. (t. g.)* — **ma-crop'o-did**, *n.* — **ma-crop'o-doid**, *a. & n.* — **Mac'-ro-po-di'nae**, *n. pl. Mam.* A subfamily of *Macropodidae*, especially those of large size with upper incisors nearly level; kangaroos and wallabies. — **ma-crop'o-din**(es), *a. & n.* — **ma-crop'o-dous**, *a.* Having abnormally large feet; large-footed, as a plant-embryo in which the hypocotyl is greatly enlarged, or a lent that has a long footstalk. — **ma-crop'o-dai**; **mac'-ro-pous**.
mac'-ro-prism, 1 mak-rō'-pri-sm; 2 mē'-ro'-pri-sm, *n. Crystal.* A prism whose intercept on the macrodiagonal is greater than unity. See *illus.* under BRACHYDOME.
mac'-ro-pro-so'pi-a, 1 mak-rō'-pro-sō'-pi-a; 2 mē'-ro'-pro-sō'-pi-a, *n.* Monstrosity characterized by excessive size of face. [*Gr. makroprosōpos*, long-faced, < *makros*, long, + *prosōpon*, face.] — **mac'-ro-pros'o-pous**, *a.* Having an abnormally large face. — **mac'-ro-pros'o-pus**, *n.* One having a great face; speil', in the cabalistic system, a name of Kether, the Crown, the first Sephira, father of all. See SEPHIRA.
ma-crop'si-a, *n.* Same as MACROPIA. — **ma-crop'ter**, *n.* An animal having long fins or wings. — **Mac'-rop'ter-es**, *n. pl.* The *Longipennes*. — **ma-crop'ter-ous**, *a.* Having long wings. — **ma-crop'ter-an**. — **Mac'-rop'ter-yg'i-dæ**, *n. pl.* A family of cypseliform birds of southeastern Asia with very soft plumage, downy feathers on the flanks, and a deeply forked tail; the tree swifts. — **Mac'-rop'ter-yx**, *n. (t. g.)* — **mac'-rop'ter-ygid**, *a. & n.* — **Mac'-ro-pyg'i-a**, *n. Zool.* A large genus of the long-tailed pigeons, including the cuckoo-dove. — **mac'-ro-pyr'a-mid**, *n. Crystal.* A pyramid whose intercept on the macrodiagonal is greater than unity. — **Mac'-ro-rham-phos'i-dæ**, *n. pl. Ich.* A family of hemibranchiate fishes with a compressed body, bony plates anteriorly, a tubiform snout, and a short spinous dorsal; trumpet-fishes or snipefishes. **Mac'-ro-rham-pho'sus**, *n. (t. g.)* — **mac'-ro-rham-pho'sid**, *n.* — **mac'-ro-rham-pho'soid**, *a. & n.* — **mac'-ro-rhin**(es), *a.* Having a long or large nose. **mac'-ro-rh'noust**, **mac'-ror-rhin**(es), *a.* — **mac'-ror-rh'noust**. — **mac'-ro-rhin'i-a**, *n.* The condition of possessing a nose of abnormal size. — **ma-cros'ce-les**, *n.* An individual having long legs. — **mac'-ro-scel'i-a**, *n. Terat.* The condition of having long or large legs. — **mac'-ro-scel'ic**, *a.* — **Mac'-ro-scel'i-dæ**, *n. pl. Magie coincides in great part with witchcraft. It is divided according to the means employed into *demonistic* (operating with the aid of spirits), *religious* (regulated by the priesthood and the cult), and *natural* (working simply through hidden powers of nature, as by hypnotism and mind-reading). Considered with regard to its objects, it is divided into *white* (when beneficent, and applied to the aid of spirits) and *black* magie (when maleficent). The term *black magic* is applied to the practise of those occult sciences which profess to invoke the aid of evil spirits or to make a compact with the devil. *White*

magic was the name given to the occult arts by certain scholars who professed to produce supernatural results either by the aid of good spirits or by peculiar gifts and powers of the human soul. The name of this form of *magic* was reached by Agrippa von Nettesheim's 'De occulta philosophia' (1510) which distinguished between natural *magic*, celestial *magic* (astrology and the casting of nativities), and religious *magic* (meditation and purification of the heart). *New Schaff-Herzog Encyc. of Rel. Knowledge* vol. vii, pp. 124-127, [v. & w. '10.]

Specif.: (1) The art which pretends or is believed to put into action the power of spirits, especially that of producing preternatural effects by bringing into play the action of supernatural or spiritual beings, of departed spirits, or of the occult powers of nature.

In primitive times, the laws of nature being little known, effects were assigned to the most arbitrary causes; and in medicine the cures effected were attributed to most mysterious powers, so that the connection between medicine and magic was most intimate. In most pagan religions man's groping after truth and the supernatural led to a mass of superstitions, involving resort to departed spirits, etc., which are slowly being overthrown. Witchcraft, sorcery, talismans, necromancy belong to what is known as *black magic*, which includes divination and thaumaturgy. Compare DIVINATION; THAUMATURGY; WITCHCRAFT.

But while *magic* was used primarily to denote the study of the more sublime parts of knowledge, it came at length to signify a science of which the cultivators, by the help of demons or departed souls, could perform things miraculous.

The collapse of *magic* becomes complete when every one sees that the southeast trade wind blows at its appointed time whether the magic rites are performed or not. . . . Science slowly shows that *magic* as a means to any end is superfluous and silly. F. B. Jevons *Intro. to the Study of Comparative Religion* p. 101. [MACM. CO. '08.]

(2) The practices, ceremonies, etc., connected with this art. (3) The practice of the black art; dealings with the devil; sorcery; black magic; necromancy.

2. Sleight of hand; legerdemain. 3. Any agency that works with wonderful effect; the enchantment of beauty, art, or the like; as, the *magic* of her glance. [*< OF. magique, < LL. magica, prop. f. of L. magicus; see MAGIC, a. mag'ky; mag'kyet, -superstitious or goetic magic, incantation of demons in accordance with a supposed express or implied compact with them. -sympathetic m., the belief that results may be effected through invoking similarities, as by using some part of a person, as hair, to cast a spell.*]

mag'i-cal, 1 *mag'i-kal*; 2 *mag'i-cal*, *a.* Of or pertaining to magic; produced by or as by magic; magic.

Syn.: *magic*. *Magie* is applied more commonly to the powers, influences, or practices, while *magical* is more frequently used of the effects of magic; we speak of *magic arts*, a *magic wand*, but of *magical effect*, a *magical result*; the *magic art* of Circe produced *magical transformations* of her victims. In many cases, the choice between the two words is determined by euphony, or, in poetry, by meter.

mag-ne'si-a, 1 *mag-ni'shi-a*; 2 *mag-ni'shi-a* (XIII), *n.* *Chem.* A light, white, earthy powder, used in medicine as an antacid and as a laxative, consisting of magnesium oxid. It can be made by burning magnesium or by igniting certain of the magnesium salts. [*L.L., < L. Magnēsius, Magnesian, < Gr. Magnēsios, < Magnēsia, district in Thessaly, whence the mineral was brought.*] - *magnesia alba*, a light, white, hydrous magnesium carbonate prepared by pulverizing the mineral magnesite, or by chemical means; used in medicine as an antacid. *magnesi carbonat*. - *m. bleach-liquor*, magnesium hypochlorite. - *m. mixture* (*Analytical Chem.*), a reagent consisting of a solution of a salt of magnesium, ammonium chloride, and ammonium hydroxid; used in testing for arsenates and phosphates. - *m. nigra*, same as PYROLUSITE. - *milk of m.*, milk-white water containing hydrate of magnesia in suspension. - *Sorel's m. cement*, see CEMENT.

Mag-ne'si-a, 1 *mag-ni'shi-a*; 2 *mag-ni'shi-a* (XIII), *n.* 1. A town of Lydia, Greece; scene of the defeat of Antiochus the Great by the two Scipios, 190 B. C.: now MANISSA. *Magnesia ad Sipylum*. 2. An ancient city of Ionia. *Magnesia ad Mæandrum*. 3. A coast district of E. Thessaly, part of which now forms a nome of Greece.

mag-ne'sian, 1 *mag-ni'shan*; 2 *mag-ni'shan*, *a.* Of, pertaining to, or containing magnesium. *mag-ne'si-ic*, -*magnesian limestone*, same as DOLOMITE. - *magnesi oxychlorid*, magnesium oxychlorid.

mag-ne'site, 1 *mag-ni'sit*; 2 *mag-ni'sit*, *n.* *Mineral.* A massive, granular, compact, vitreous, white to brown magnesium carbonate (MgCO₃), crystallizing in the hexagonal system.

mag-ne'si-um, 1 *mag-ni'shi-um*; 2 *mag-ni'shi-um*, *n.* A light, malleable, ductile, silver-white, metallic element.

o-staltes, n. A branch of magnetism dealing with stationary magnetic fields.—**mag-net-o-stric-tion, n.** *Physics.* Alteration of the dimensions of a body by magnetization. **mag-net-o-stric-ture, n.** **mag-net-o-tel-e-graph, n.** Same as MAGNETO-ELECTRIC TELEGRAPH.—**mag-net-o-tel-e-phone, n.** A telephone in which a magnet is used: the ordinary form. See TELEPHONE.—**magneto testing bell (Elec.),** a device for electrical testing purposes consisting of a small hand magnet-generator and bell.—**mag-net-o-ther-a-py, n.** A method of treating disease by applying magnets.—**mag-net-o-trans-mit-ter, n.** 1. A magneto-telephone. 2. A magneto-electric machine for producing currents used in telegraphy.

mag-net-ro-plism, 1 mag-net-ro-plizm; 2 mäg-nät-ro-plizm, n. A change said to take place under the influence of a magnet in the direction of the growth of organisms.

mag-ni-cau-date, 1 mag-ni-kä-dät; 2 mäg-ni-ca-dät, a. Zool. Long-tailed. [*L. magnus, great, + CAUDATE.*]

mag-ni-fi-a-bil(e), 1 mag-ni-fai-a-bil; 2 mäg-ni-fi-a-bil, a. Capable or worthy of being magnified or exalted.

mag-nif-ic, a. [Rare.] 1. Illustrious; magnificent; sumptuous. 2. Strikingly vast or dignified. [*L. magnificus, < magnus, great, + facio, make.*]

4. Astron. The brightness of a star expressed on a scale in which the brightest are numbered one, and the faintest visible to the naked eye six.

The quantity of light given by a star of any one magnitude is taken as being 2.512 times brighter than that given by a star of the next lower degree of brilliancy; this factor is so chosen that 100 stars of the 6th magnitude give a brightness equal to 1 star of the 1st magnitude, or $\sqrt[100]{2.512}$, of which the logarithm is 0.4, which admits of the exact brightness being calculated to tenths and hundredths. See STAR. The photometry of the stars remains at present, however, a matter of uncertainty.

5. Largeness in respect to relation or effect; consequence; as, the magnitude of the crisis alarmed him.

Some crimes, by their magnitude, have a touch of the sublime. CHANNING Works, Annex. of Texas p. 759. [A. U. A. 1843.]

Ma-ha-bha-ra-ta, 1 mē-hā-bhā-rā-tā; 2 mē-hā-bhā-rā-tā, n. [Sansk.] An ancient Hindu epic or collection of poems of 110,000 couplets, reciting the dynastic wars of the Pandava and Kaurava of northern India, with extensive interpolations of legendary religious, moral, and scientific dissertations, supposed to date from 500 B. C., and ascribed with Puranas and Vedas to the mythical author Vyasa.

Through constant additions it became a sort of encyclopedia of India. Its main subject is the rivalry and war between the descendants of Bharata for the rulership of the country around Delhi, which town was built as a consequence of this quarrel. The story of the combat extends through several books, and is interspersed with episodes of a didactic or dogmatic character. The complete text of the poem has been printed and portions have been translated. See BHAGAVAD-GITA. **Ma-ha-bha-ra-ta-nt**.

The quality or state of a person or thing that inspires reverence or awe in the beholder; exalted dignity of character or mien; grandeur; sublimity; as, the *majesty* of his presence. 2. A title of address or dignity given to reigning monarchs; current in England since the time of Henry VIII., hence, royal state or rank. **ma-jes'ty-ship**. In England the King is directly addressed as "Your Majesty," or "Sir"; letters are addressed "To the King's Most Excellent (or Gracious) Majesty" or "To His Britannic Majesty"; the attribute "Imperial" is never applied to the King of England outside the Indian Empire, where he uses the ancient title of the Mogul Emperors, "Kaisar-e-Hind." It is used throughout Europe instead of a personal pronoun in addressing sovereigns. The King of Spain is styled "His Most Catholic Majesty"; the former Emperor of Austria was "His Imperial Royal Majesty," and as King of Hungary "His Apostolic Majesty"; the King of Portugal was "His Most Faithful Majesty"; and the King of France, "His Most Christian Majesty." The first ruler to assume the title was the Emperor Charles V. Sovereigns up to that time had used the style of "Highness" or "Grace." They who jest with *Majesty*, even in its gayest mood, are but toying with the lion's whelp, which, on slight provocation, uses both fangs and claws. SCOTT *Islands* vol. ii, p. 288. [w. M. & CO.]

Mam'-ma'-li'-a, 1 mā-mē'-lī-ā; 2 mā-mē'-lī-ā, *n. pl.* Zool. A class of vertebrates whose females have milk-secreting mammae to nourish their young, embracing man, all warm-blooded quadrupeds, bats, seals, cetaceans, and sirenia.

The skull is peculiar, on account of the lower jaw being composed of simple rami articulating directly with the cranium, the brain is highly developed and its hemispheres united by commissures, and generally the body is clothed with hair. The heart is divided into two auricles and two ventricles, and is separated from the lungs by a diaphragm. The general structure and appearance varies with the habits, as is exemplified by the partial replacement of the normal four legs in certain mammals by wings (see BAT) or paddles (see WHALE). The skin is composed of two layers, the *dermis* and the *epidermis*; the teeth occur in definite numbers, and develop in two sets, the *milk* and *permanent* teeth. The sense of touch exists over the entire skin, but is stronger at certain extremities, especially the nose. The other organs of sense are situated in the head. The *Mammalia* contain about 600 genera and 5,000 known species, not including fossils. The earliest fossil forms occur in the Triassic formations, and are supposed to have originated from the *Theromorphs*. The *Mammalia* are widely distributed, especially the aquatic orders. Of the terrestrial orders, the rodents are found on every continent. The *Mammalia* are divided into subclasses *Prototheria* or *Ornithodelphia*, the monotremes, and *Eutheria*, including the *Didelphia* (marsupials) and the *Monodelphia* (placentals). [*< L. mammalis*; see MAMMAL.]

mam'-ma'-li'-an, 1 mā-mē'-lī-an; 2 mā-mē'-lī-an, *n.* *I. a.* Of or pertaining to the *Mammalia*. *II. n.* A mammal.

mam'-ma'-li'-er-ous, 1 mām'-ā-lī'-er-us; 2 mām'-ā-lī'-er-is, *a.* Containing remains of mammals, as various geological strata. [*of being mammalian.*]

mam'-ma'-li'-ty, 1 mā-mā-lī'-tī; 2 mām'-mā-lī'-tī, *n.* The quality

mam'-ma'-lo'-gy, 1 mā-mā-lō'-jī; 2 mā-mā-lō'-jī, *n.* The branch of zoology that treats of the *Mammalia*; therology. See ZOOLOGY and MAMMALIA. [*< MAMMALIA* + *-logy*.]

mam'-ma'-log'-i-cal, *a.* Of or pertaining to mammalogy. — **mam'-ma'-lo'-gist**, *n.* A student of mammals.

mam'-ma'-ry, 1 mām'-ā-rī; 2 mām'-ā-rī, *a.* Of, pertaining to, or of the nature of a mamma or breast, or the mammae. — **mammary fetus**, the undeveloped young of a marsupial while yet undetached from the mamma. — **mam'-ma'-ry**, *n.* The nourishment and development, by means of the mammae, of the fetus after its transference into the pouch. — **m. gland**, the milk-gland, which in a woman forms the bulk of the breast or mamma. The mammary glands occur in both the male and female in all mammals; but with the male they are imperfectly developed, the secretory power being limited to the females, who thus nourish their young. They usually occur in pairs, the total number of glands being even. According to their situation they are designated as *axillary* (in the vicinity of the armpits), *inguinal* (near the groin), *pectoral* (in the chest), and *ventral* (on the abdomen).

mam'-mate, 1 mām'-ēt; 2 mām'-āt, *a.* Having mammae or breasts. [*< L. mammatus*, < *mamma*, breast.]

mam'-me-at'-ed.

mam'-ma'-to'-cu'-mu'-lus, 1 mā-mā'-tō-kū'-mīu-lūs; 2 mā-mā'-tō-kū'-mīu-lūs, *n.* A cumulous cloud the base of which hangs in festoons, indicating rain. [*< L. mam-matus* (see MAMMATE) + *CUMULUS*.]

mam'-me, 1 mām'-mē; 2 mām'-mē, *n.* [*It.*] A season's last harvest of figs.

Mam'-mē', 1 mā-mē'; 2 mā-mē', *n.* Bot. A genus of clusaceous trees, natives of the tropical parts of America and Asia, and distinguished by a globular calyx opening in 2 valvate sepals, an ovary containing 4 ovules, distributed in 2 or 4 cells, and by its indehiscent drupaceous fruit. The seeds, often as large as hens' eggs, are used as anthelmintics, and a resinous gum exuded from the bark is employed as an insecticide. [*< MAMEY*.]

mam'-mee', 1 mā-mē'; 2 mā-mē', *n.* The mamey. **mam'-mel'-lière**, 1 mām'-ēl'-yār'; 2 mām'-ēl'-yār', *n.* *Ar. heol.* 1. A steel plate in two pieces attached to the hauberk to protect the breast. 2. A circular piece on the breastplate, to which the helmet, sword, etc., were secured by a chain. [*< F. mammellière*, *sword*, etc., were secured by a chain.]

mam'-mer, *vt.* To stagger; hesitate. **mam'-mer-ing**, *n.* A state of doubt or perplexity. **mam'-mer-y**.

mam'-met, *etc.* Same as MAUMET, etc.

mam'-mey, *n.* Same as MAMEY.

mam'-mi'-chog, *n.* Same as MUMMYCHOG. **mam'-mi'-chug**.

mam'-mi', *n.* Same as MAMMY.

mam'-mi'-fer, 1 mām'-fēr; 2 mām'-fēr, *n.* A mammal.

[*< L. mamma*, breast, + *fero*, bear.] — **Mam'-mifer-a**, *n.* *pl.* Zool. The *Mammalia*. — **mam'-mifer-ous**, *a.* Having mammae or breasts; mammalian.

mam'-mī'-form, 1 mām'-fōrm; 2 mām'-fōrm, *a.* Shaped like a breast or nipple. **mam'-mī'-formed**.

mam'-mil'-la, 1 mā-mī'-ā; 2 mā-mī'-ā, *n.* [*-l-ē*, 1-7; 2-ē, pl.] 1. *Anal.* A nipple or teat. 2. Any nipple-like or teat-shaped structure or protuberance. 3. Bot. (1) A nipple-like protuberance on the surface of a plant, as in the nipplecactus (*Mamillaria*). (2) The apex of the nucleus of an ovule. [*L.*, dim. of *mamma*, breast.] — **spin'-ning-mam'-mil'-la**, *n.* One of a spider's mammilliform spinnerets.

mam'-mil'-la-plas'-ty, 1 mā-mī'-ā-plas'-tī; 2 mā-mī'-ā-plas'-tī, *n.* Surg. A plastic operation for elevating a depressed nipple.

Mam'-mil'-la'-ri-a, 1 mām'-lī'-rī-ā; 2 mām'-lī'-rī-ā, *n.* 1. Bot. Same as CACTUS. 2. [*un-*] Hort. Any tuberculate plant of the genus *Cactus*. The mammillaria cacti vary greatly in size and form, and the flowers range in color from red to yellow.

mam'-mil'-la-ry, 1 mām'-lī-ry; 2 mām'-lī-ry, *a.* 1. Of, pertaining to, or resembling a mamilla or a mamma.

2. Studded with or composed of breast-shaped or rounded projections, protuberances, elevations, concretions, or the like; as, a *mammillary* mineral; a *mammillary* prairie. [*< L. mammilla*; see MAMMILLA.] **mam'-mil'-lar-t**, — **mammillary process** or **tubercle**, a metapophysis.

mam'-mil'-late, 1 mām'-lēt; 2 mām'-lāt, *vt.* [*-LAT'*ED; *-LAT'*ING.] To shape like a breast or a nipple.

By the effects of ice-grinding, rocks are smoothed and polished, rounded and *mammillated*.

G. F. WAUGH in *Edinburgh Review* Apr., 1892, p. 303.

mam'-mil'-late, *a.* 1. Having a mamilla, mamilla, or nipple-like processes, as the palp of an insect or the apex of a univalve shell. 2. Mammillated. [*< L. mamilla*; see MAMMILLA.] — **mam'-mil'-lat'-ed**, *pa.* 1. Furnished with rounded protuberances or with wart-like projections; as, a *mammillated* plant. 2. Shaped like a nipple; as, a *mammillated* projection. — **mam'-mil'-la-tion**, *n.*

mam'-mil'-li-form, 1 mā-mī'-lī-fōrm; 2 mā-mī'-lī-fōrm, *a.* Shaped like or resembling a mamilla; papilliform. [*< L. mamilla* (see MAMMILLA) + *-form*.]

mam'-mil'-loid.

mam'-mī'-tis, 1 mā-mī'-tis or mī'-tis; 2 mā-mī'-tis or mī'-tis, *n.* *Pathol.* Inflammation of the female breasts; mastitis.

mam'-mockt, *vt.* To tear as with the teeth; munch; mangle.

mam'-mock, 1 mām'-ōk; 2 mām'-ōk, *n.* [Prov. Eng. or Obs.] A shapeless or broken piece; fragment; chunk; scrap.

I say cut him to mammoths on the spot!

SCOTT *Fair Maid of Perth* vol. ii, p. 99. [n. & s. 1853.]

* The striking analogy between the bodily structure of man and that of the nearest of the anthropoid apes lends color to the theory held by some scientists that man became differentiated from the common ancestral type in the Pliocene period. The most important fossil remains bearing on this theory are: (1) the *Java skull* found in the Upper Pliocene of the island of Java in 1891, and supposed to belong to an animal (*Pithecanthropus erectus*) partly human and partly simian; (2) the *Neanderthal skull* found in 1857 in a cave near a ravine called Neanderthal on the Düssel river and declared by Huxley to be "the most brutal of known human skulls"; (3) *les hommes de Spy*, two skeletons discovered in 1886 near Namur, Belgium, associated with flints of the Mousterian epoch; (4) the *Naulette jaw*, discovered in 1885 near Dinant among debris of Quaternary fauna; (5) the *skull of the old man of Cro-magnon* found in the Dordogne district, France, and associated with the Magdalenian period; (6) other skulls supposed to date back to the Quaternary are those of the *Grotte des Enfants*, near Mentone, that of *Canstadt*, near Stuttgart, and those of *Furfooz*, in the Ardennes. As all these skulls are dolichocephalic, and the brachycephalic races do not appear in Europe until the Neolithic period, it has been asserted that as the race of man advanced in intelligence the prognathism which man inherited from his simian-like ancestors became gradually smaller until the face assumed the almost straight and classic profile of modern times. The *Ipswich man*, discovered in 1912 near Ipswich, England, is supposed to date back to the Quaternary, and to represent the earliest remains of man yet found in Europe.

 broad oval tail, and the fore limbs in the form of flippers or swimming-paws, of which the bones usually terminate in small flat nails; a sea-cow; specif., *Manatus americanus*, of tropical America. The manatee is said to leave the water at night, but the creature's discomfort when kept out of the water in captivity suggests that it is entirely aquatic. The Orinoco manatee (*Manatus trunquiti*) is a separate species in that it is devoid of finger-nails. Compare dugong.
 The exact number of species of manatee which occur on the coasts of the New World is a matter of some doubt, but it is pretty certain that the Florida manatee is different from the Caribbean manatee of South America. Unlike the whales, manatees are not lovers of the open ocean, but remain close along shore.

mandrill, 1 mán'drill; 2 män'drill, *n.* A large and ferocious West-African baboon (*Cynocephalus nutum*), having enormous canine teeth and bony prominences on the cheeks, covered with a longitudinally ribbed naked skin, deep-blue with a central scarlet line. He is often larger than a mastiff and is one of the most feared animals of the Kongo forests. Compare **CHACMA**.

Large adult mandrills are seldom seen in Europe. They grow to a great size, and are probably the most hideous of all beasts. The frightful nose, high cheek-bones, and pig-like eyes are the basis of the horrible heads of devils and goblins which Albert Dürer and other German or Dutch medieval painters sometimes put on canvas. Add to the figure the misplaced bright colours—cobalt-blue on the cheeks, which are scarred, as if by a rake, with scarlet furrows, and scarlet on the buttocks—and it will be admitted that nature has invested this massive, powerful, and ferocious baboon with a repulsiveness equaling in completeness the extremes of grace and beauty manifested in the roe deer or the bird of paradise. [*< L. manducatus, pp. of manduco, < mandu, chev.*] — **man'du-ca-bile** (*cl.*), [*Rare.*] That may be chewed or eaten. — **man'du-ca-tion**, *n.* 1. (1) Mastication. (2) [*Rare.*] Eating. 2. *Ecol.* The act of consuming. See **COMMUNE**, *cl.* — **man'du-ca-to-ry**, *a.* Pertaining to or used in chewing.

man'du-cus, 1 mán'du-cus; 2 män'du-cus, *n.* *Rom. Antig.* A comic actor or character wearing a mask that could be made to represent a person chewing or grimacing; also, the mask itself. [*L.*, *< mando, chev.*]

man-du-ra, 1 mán-du-ra; 2 män-du-ra, *n.* Same as **MANDOLA**.

mand'vi, 1 mán'dvi; 2 män'dvi, *n.* Same as **MANDAVEE**.

mand'ya, 1 mán'dya; 2 män'dya, *n.* [*Gr.*] *Gr. Ch.* A long loose mantle, worn by members of monastic orders.

mane, 1 mán; 2 män, *cl.* [*Scott.*] To bemoan. — **mane**, *n.* *Moan.*

mane, *n.* 1. The long hair growing upon and about the neck of certain animals, as the horse and the lion. 2. A line of stubble left by mowers. [*< AS. manv.*] — **mane-faire**, *n.* Armor for a horse's mane. — **mane-sheet**, *n.* A covering for the upper part of a horse's head. — **maned**, *a.* 1. Having a mane; jubate. 2. *Her.* Having a mane different in tincture from the rest of the body. — **maned sheep**, the aucland. — **maned wolf**, the South-American fox-wolf (*Canis jubatus*). — **maneless**, *a.* Having no mane.

man'eat'er, 1 mán'eat'er; 2 män'eat'er, *n.* 1. An animal that devours, or is supposed to devour, human beings. Especially: (1) A tiger or a lion. See quotation under **PIG**. (2) A large shark with trenchant teeth, especially an isurid (*Carcharodon carcharias*). 2. A cannibal. 3. [*Local. U. S.*] (1) The hellgrammite. (2) A hellbender or mud-puppy.

Ma-nee-pur, 1 mán'nee-pur; 2 män'nee-pur, *n.* Same as **MANIPUR**.

Ma-nee-sa, 1 mán'nee-sa; 2 män'nee-sa, *n.* Same as **MANESSA**.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

ma-né-gé, 1 mán-né-gé; 2 män-né-gé, *n.* [*MA-NÉ-GÉ*]; *MA-NÉ-GÉ-ING*. To train, as a horse.

Andalusite containing some manganese: found at Vestana, Sweden.—**man'gan-ap'a-tite**, *n.* A variety of apatite in which manganese replaces calcium.

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

man'ga-nate, 1 *man'ga-nat*; 2 *mā'ga-nāt*, *n.* A salt of manganese acid, such as those of sodium, potassium, and barium. **man'ga-ne-sate**.

man'gan-ber-ze-llite, *n.* *Mineral*. A variety of berzelite containing much manganese and some sodium: found in Langban, Sweden.—**man'gan-blende**, *n.* Alabandite.—**man'gan-bru-cite**, *n.* A yellow variety of brucite containing manganese that is found massive.—**man'gan-el-sen**, *n.* [G.] Same as FERROMANGANESE.

man'ga-nese, 1 *man'ga-nis* or *niz*; 2 *mā'ga-nēs* or *nēs* (XIII), *n.* A hard, brittle, grayish-white metallic element. See ELEMENT. Manganese occurs abundantly in nature, chiefly as oxides, of which the dioxide (pyrolusite) is the most common. It is used in the manufacture of glass and alloys, and in chemical manufactures.

Black oxide of manganese, a substance long used to decolorize glass, and called *magnesia nigra*, from its resemblance to the loadstone, was formerly included among the ores of iron.

WATTS Dict. Chem.

[< F. *manganèse*, < It. *manganese*, < L. *magnes*, MAGNET.]

man'ga-ne'si-um; **man-ga-ni-um**; **manganese** *alum*, same as *apophite*.—**m. blist**, manganese brown.

—**m. bronze** (*Metall.*), an alloy containing copper, tin, iron, and manganese in small amounts: used largely for the propellers of steamships.—**m. copper**, manganese bronze.

—**m. dioxide**, same as *pyrolusite*.—**m. epide**, nickel montite.—**m. glaze**, a dark-gray or black glaze for pottery which receives its color from an oxide of manganese.—**m. heptoxid** (*Chem.*), a dark-green, oily, explosive liquid (Mn₂O₇) obtained from permanganates by the action of concentrated sulfuric acid.—**m. peroxid** (*Chem.*), dioxide of manganese.—**m. spar**, rhodochrosite; also, occasionally, rhodochrosite.—**m. vitriol**, fauserite.—**needle m.**, the bluish oxide of manganese.—**red m.**, rhodochrosite.—**man'ga-ne'si-an**, *n.* Containing or consisting of manganese.—**man'ga-ne'sious**, *n.* Same as *MANGANESE*.—**man'ga-ne'sous**.

man'gan-hed'en-berg-lite, *n.* *Mineral*. A calcium-iron pyroxene or hedenbergite (Ca(Fe,Mn)(SiO₃)₂) that contains manganese.

man-gan'ic, 1 *man-gan'ik*; 2 *mā'gan'ie*, *a.* Of, pertaining to, or obtained from manganese in its highest valence. **man'ga-ne'sic**.—**manganic acid**, a hypothetical compound (FMnO₃) known chiefly by its salts, as potassium manganate.—**m. hydroxid** (*Chem.*), a white gelatinous, easily oxidizable compound (Mn(OH)₂), obtained by treating a manganese salt in aqueous solution with a caustic alkali.—**m. oxid**, a compound (Mn₂O₃) found native as braunite and obtained in the form of black powder by heating manganese oxides and hydroxides in the air.

man'ga-nif'er-ous, 1 *man'ga-nif'er-us*; 2 *mā'ga-nif'er-us*, *a.* Of, pertaining to, or containing manganese. [fero, bear.] **man'ga-net'ic**.

man'ga-nit, 1 *man'ga-nin*; 2 *mā'ga-nit*, *n.* *Metal*. An alloy in which manganese and nickel are compounded in somewhat small proportions with copper, the ratio of manganese to nickel being as 3 or 4 to 1. This alloy is used in the construction of standards of electrical resistance, the temperature coefficient being practically zero.

man-ga-nite, 1 *man'ga-nit*; 2 *mā'ga-nit*, *n.* *Mineral*. 1. A submetallic dark steel-gray to iron-black manganese hydroxid (HMnO₂), crystallizing in the orthorhombic system. 2. *Chem.* Any salt obtained from certain hydroxides of manganese, and regarded as an acid.—**calcium manganites**, the products of combining in varied proportions manganese dioxide and lime, by which manganese is recovered in useful form from the still-liquor when chloride of lime is manufactured.—**man'ga-nit'ic**, *a.* [Manganese]

man-ga-nize, *v.* [Rare.] To prepare, treat, or alloy with **man'ga-no**, 1 *man'ga-no*; 2 *mā'ga-no*. A combining form having the same signification as *MANGAN*.—**man'ga-no-cal'cite**, *n.* *Mineral*. A variety of calcite that contains manganese carbonate and is closely related to rhodochrosite.—**man'ga-no-col'um-bite**, *n.* *Mineral*. A variety of columbite (Mn₂Os₂), in which the iron is replaced by manganese.—**man'ga-no-man-gan'ic**, *a.* *Chem.* Indicating a manganese oxide, Mn₂O₃, indigenous in hausmannite and not considered as much a true oxide as a salt.—**man'ga-noph'y-lite**, *n.* *Mineral*. A variety of biotite containing manganese partially replacing the iron.—**man'ga-no-sil'ite**, *n.* A rhodochrosite containing much ferrous carbonate.—**man'ga-no'site**, *n.* A vitreous emerald-green manganese oxide (Mn₂O₃), crystallizing in the isometric system.—**man'ga-no-sil'ite**, *n.* A small, granular, greasy, black manganese-arsene antimonate (Mn₂(Sb,As)₂O₇), crystallizing in the orthorhombic system.—**man'ga-no-tan'ta-lite**, *n.* A variety of tantalite (MnTa₂O₆), in which the iron is replaced by manganese.

man'ga-nous, 1 *man'ga-nus*; 2 *mā'ga-nūs*, *a.* Of, pertaining to, or containing manganese in its lowest valence; as, *manganous acid*, *manganous hydroxid*, etc.

man'gan-pec-to-lite, *n.* *Mineral*. A variety of pectolite containing manganese.

Man'gar, 1 *man'gar*; 2 *mā'gar*, *n.* A tribe of Nepal, India, from which the Gorkha regiments are recruited; also, the language of such tribe.

man'ga-roo, 1 *man'ga-rū*; 2 *mā'ga-rō*, *n.* [Austral.] A flying phalanger (*Petaurus scituens* or *P. breviceps*) with fine soft fur.

man'gas, 1 *man'gas*; 2 *mā'gas*, *n.* A mango.

man'gor, 1 *man'gor*; 2 *mā'gor*, *n.* [Dial., Eng.] Mixed grain, especially wheat and rye.

mange, 1 *mēn*; 2 *mān*, *n.* A skin-disease resembling itch, affecting the dog, horse, cow, etc., and sometimes man; usually caused by parasitic mites of such genera as *Sarcoptes*, *Psoroptes*, *Chorioptes*, which burrow in or live on the skin, and *Demodex*, which infest the hair-glands. [mangue, itch, < LL. *manducatus*, what is eaten, < L. *manduco*; see MANDUCATE.]—**foot-mange**, *n.* Vet. A disease of horses, cattle, sheep, etc., generally attacking the fetlock and never spreading above the knees or hocks, due to infection by the parasite *Chorioptes symbiotus*.—**mange's mite**, *n.* A mite that burrows in the skin and causes mange, as a demodid. **m. insect**.—**Texas m.**, same as **WINTER ITCH**.

man'gel-wur-zel, 1 *man'gel-wür-zel*; 2 *mā'gel-wür-zel*, *n.* A large-rooted variety of the common beet (*Beta vulgaris*, var. *marcorhiza*): cultivated for feeding stock.

Mangel wurzel, . . . having been obtained by the improvement of the Sea-Beet (*Beta Maritima*) . . . preserves some of its original peculiarities even under a cultivation which has materially modified its form.

H. TANNER *Science Agric. Practice* ch. 53, p. 238. [MANG. 1837.] [G., < *mangula*, beet, < *wurzel*, root, < *wurz*, wort, plant.]

man'gel [Prov., Eng.]

man'ger, 1 *mēn'jer*; 2 *mā'n'ger*, *n.* 1. A feeding-trough or box for horses or cattle, in a stable or the like. 2. *Naut.* A space at the forward end of a vessel partitioned

off by the so-called **manger-board** to prevent the water that enters the hawse-holes from washing air over the deck. [mangeoire, < *manger*, eat, < L. *manduco*; see MANDUCATE.]

mange'y, *a.* [Rare.] Mangy.

man'gi, 1 *man'gi*; 2 *mā'gi*, *n.* [Maori.] A New Zealand tree (*Litsea calcaris*) of the family *Lauraceae*, yielding a very compact and tough wood used for sheaves.

Man-gif'er-a, 1 *man-gif'er-a*; 2 *mān-gif'er-a*, *n.* *Bot.* A genus of Asiatic trees of the family *Anacardiaceae*, with alternate entire leathery leaves and terminal panicles of small flowers. *M. indica* is the mango-tree, which furnishes one of the most highly esteemed of Indian fruits. [fero, bear.]

Man'gin, 1 *man'gin*; 2 *mā'n'zhān*, *Alphonse F. E.* (1825-1885). A French officer and inventor.—**Mangin mirror or reflector**, a double spherical aplanatic mirror whose surfaces are non-concentric.

man-gi-la'te, 1 *man-gi-lā'te*; 2 *māng-lā'te*, *n.* The battinan.

man'gi (e), 1 *man'gi*; 2 *mā'gi*, *vt.* [MAN'GLED, MAN'GL'ed; MAN'GLING.] 1. To disfigure or mutilate, as by cutting, bruising, and crushing; make torn or ragged wounds in; lacerate; as, a *mangled corpse*. 2. Figuratively, to make a blundering performance or treatment of; mar in beauty, form, or effect; botch; ruin; as, he *mangled his part in the play*; a *mangled essay*.

It is not uncommon to see a good cause *mangled* by advocates who do not know the real strength of it.

JOHN LUTHER vol. i, p. 104. [n. v. 1851.]

[Mf. *manglen*, freq. of *manken*, < AS. **manctan*, mutilate < L. *mancus*, maimed.] SYN.: see BOTCH; RUIN.

man'gle, *vt.* [MAN'GLED; MAN'GLING.] 1. To smooth with a mangle; calender. 2. To flatten, as lead, by beating on a roller with a plumber's mallet.

man'gle, *n.* 1. A machine for smoothing or pressing fabrics, articles of clothing, etc., by passing them between rollers.

In its original form, the mangle was a wooden chest or table weighted with stones which pressed it down upon two cylinders, and was operated by hand by means of a wheel and pinion.

2. In stereotypy, cylinder for delivering cloth; *r.* pressure machine with rolls, covered with wool to absorb moisture; cylinders by means of a steam-roller for heating internal cylinder; of which dry flong, *r.* receiving-table.

carefully prepared, is molded on the form. [mangel, < LL. *manganum*, < Gr. *manganon*, a war-engine.]

man-gle-pad'ded, *a.* *Calico-printing*. Descriptive of cloth that has been soaked or padded in a mangle with color or a mordant.—**m. rack**, *n.* A rack having two opposing faces with which a toothed pinion meshes, first against one side, then the other, imparting reciprocating motion to the rack: so called because the mechanical principle involved was first made familiar in the mangle.—**m. wheel**, *n.* A wheel having on its face a rack-like arrangement of teeth in a double curve so that it may receive alternating rotary motion from a pinion: originally used in the old-fashioned clothes-mangle. [STRACHTON.]

man'gle, *n.* Same as STRAIGHTENING-MACHINE. See under **man'gle**, *n.* (Sp.) *Bot.* The mangrove; also, any one of various shrubs or trees resembling it.—**man'gle-oak**, *n.* The bark of this tree.

man'gler, 1 *man'gler*; 2 *mā'gler*, *n.* One who or that which mangles; specif., a meat-chopping machine.

man'gler, *n.* One who works with a mangle.

man'go, 1 *man'go*; 2 *mā'go*, *n.* [GOES or GOES, 1 GOZ; 2 GOZ, pl.] 1. The fruit of *Mangifera indica*. See MANGIFERA. Like the apple of the temperate zones, it varies greatly in shape, size, color, and flavor, being sometimes large, fleshy, and luscious, at other times small, tough, stringy, and tasting like turpentine.

The mango in some of its many varieties, is esteemed as one of the most delicious of tropical fruits. W. SANDERS in *Rep. Sec. Agric.*, 1889, *Plants* p. 133. [GOV. REG. OFF.]

2. The tree producing the fruit. 3. The tree from whose seed-kernels dika bread is made. See DIKA. 4. A pickled green muskmelon, pepper, etc., stuffed with chowchow or the like. 5. Same as MANGO-BIRD. 2. 6. A bleaching-powder and bleaching-liquor: the name used in the linen districts of Ireland. 7. [Maori.] The dogfish. [mangga.]

—**man-go-bird**, *n.* 1. The yellow oriole (*Oriolus kundoo*) of India. 2. A humming-bird (*Lampornis mangro*).—**m. fish**, *n.* A small Indian golden-colored polymorph food-fish (*Polynemus paradoxus*) having the pectoral rays free and filamentous. It appears in rivers to spawn at the time of the ripening of the mango-fruit (April and May).—**m. fool** (*Cookery*), mangoes beaten to a pulp and mixed with milk or cream.—**m. ginger**, *n.* The dried tubers of a zinziberaceous plant (*Curcuma amada*) found in the East Indies. When powdered it is used as a food-flavorer.—**m. showers**, *n. pl.* Showers of rain in March and April when mangoes begin to ripen: a Madras term.—**m. tope**, *n.* See TOPE.—**m. tree**, *n.* An Indian juggler's trick, of causing a mango-tree to appear to spring up and bear fruit within an hour or two.—**mountain or wild m.**, the fruit of a large tropical American evergreen tree (*Clusia flava*).

Man-go-la, 1 *man-go-lā*; 2 *mān-gō-lā*, *n.* One of the Sula Islands in the Malay Archipelago; 60 by 10 m.

man'gold, *m. wurzel*, *n.* Same as MANGEL-WURZEL.

man'go-nel, 1 *man'go-nel*; 2 *mā'go-nēl*, *n.* A military engine formerly used for throwing stones, etc.

The *manopole* and petraries, and other implements for battering walls, . . . were ready.

JANE FORTER *Scottish Chiefs* p. 283. [p. a. c.]

[OF, < LL. *manganellus*, dim. of *manganum*, < Gr. *manganon*, a war-engine.] **man'go-nit**.

man'go-nism, *n.* Artificial forcing of a plant's growth.

Man'goo, 1 *man'goo*; 2 *mā'n'gō*, *n.* [MANGOO, 1 MANGOO, 2 MANGOO, pl.] A Mongul emperor who subdued Tibet and captured Bagdad.

man'goose, *n.* Same as MONGOOSE.

man-go-steen, 1 *man-go-stēn*; 2 *mā'go-stēn*, *n.* 1. An East-Indian tree (*Garcinia mangostana*), about 20 feet high, with opposite, nearly horizontal branches. 2. The reddish-brown fruit of this tree, about the size of an apple, having a thick, fleshy rind, and a white, juicy pulp of a delicate sweet and acid flavor. [mangusta.] **man'go-stine**.—**false mangosteen**, an East-Indian tree (*Diospyros embryopteris*).—**wild m.**, the fruit of a tall East-Indian tree (*Embryopteris glutinifera*).

man'go-stin, 1 *man'go-stin*; 2 *mā'n'go-stin*, *n.* *Chem.* A gold-yellow tasteless compound (C₁₂H₂O₈), obtained from the husk of the fruit of *Garcinia mangostana*.

Man'gots-field, 1 *man'gots-fild*; 2 *mā'n'gots-fild*, *n.* A parish and village in Gloucestershire, England.

man'grove, 1 *man'grōv*; 2 *mā'n'grōv* (XIII), *n.* 1. A tropical tree of the genus *Rhizophora*, of the family *Rhizophoraceae*, especially *Rhizophora mangle*, which grows in muddy places on low coasts. Residues throwing out numerous roots from the lower part of the stem, it sends down long, slender, aerial roots from the branches, like the banana-tree, and even roots from germinating seeds still hanging to the tree.

2. A shrub of the genus *Avicennia*, of the family *Verbenaceae*. Its two principal species are *a.* flower; *b.* fruit; *c.* a spray of leaves.

the black mangrove (*A. nitida*) and the white m. (*A. tomentosa*). [manggi-manggi, mangrove.]

—**man'grove-cas'ca-bel**, *n.* A rattlesnake of South America.—**m. cuckoo**, *n.* A cuckoo (*Coccyzus minor*) of the West Indies, Florida, etc.—**m. family**, the *Rhizophoraceae*.—**m. fly**, *n.* A tsetse-fly.—**m. hen**, *n.* [W. Ind.] The clapper-rail.—**m. minnow**, *n.* A minnow (*Fundulus bernardus*) of the Bermudas.—**m. myrtle**, *n.* An East-Indian tree (*Barringtonia acutangula*) of the family *Myrtaceae*, found also in Australia, yielding a durable wood. The leaves and seeds are used in various medicinal preparations.—**m. oyster**, *n.* An oyster that grows upon mangroves, as in Florida and the West Indies; tree-oyster.—**m. snapper**, *n.* A sparoid fish (*Lutjanus riseus*), dark-green above and reddish below, common along shore near the mangroves of the West Indies, etc.—**m. tannin**, *n.* A soluble extract obtained from mangrove-bark.—**milky m.** [Austral.], a small tree (*Eccocaria agallochum*) of the family *Euphorbiaceae*. See BRIND-ROSE-TREE.—**native m.** [Tasmania], the boobyalia (*Acacia longifolia*).—**olive m.**, the black mangrove.—**red m.** 1. A species of mangrove (*Rhizophora racemosa*): so called in Upper Guinea. 2. [Austral.] Either of two trees, one (*Bruguiera rheedii*) of the mangrove family, the other, a looking-glass tree (*Hericitria littoralis*).—**river m.**, *n.* A small tree (*Agave majus*) of the family *Myrsinaceae*, growing on swampy tropical shores of India, the Indian Archipelago, and Australia. They form impenetrable thickets in a way similar to that of the common mangrove.

Man'gts, 1 *man'gts*; 2 *māng'gts*, *n.* Same as MENCUS.

Man'guang-a-o, 1 *man'wan'g-o*; 2 *māng'wāng'g-o*, *n.* One of a Malay people of the upper Rio Salug, Mindanao.

man'guay, 1 *man'gwā*; 2 *mā'gwā*, *n.* The bay-lynx.

mangue, 1 *magg*; 2 *māng*, *n.* *Zool.* The kusimanse.

mangue, *n.* Same as MANGO.

Man-gue'ra, 1 *man-gū'ra*; 2 *mān-gū'ra*, *n.* A lake in Rio Grande do Sul state, Brazil, 60 by 4 m.

Man'gul-an, 1 *man'gi-an*; 2 *mān'gū'an*, *n.* [P. I.] A member of one of the heathen tribes inhabiting the interior of Mindoro, Romblon, and Tablas.

Man'gum, 1 *man'gum*; 2 *mā'gūm*, *Willie Person* (1792-1861). An American lawyer and statesman.

man'gy, 1 *mēn'gi*; 2 *mā'gy*, *a.* [MAN'G-ER; MAN'G-EST.] Affected with the mange; scabby; hence, unkempt; untidy.—**man'gi-ly**, *adv.*—**man'giness**, *n.*

Man'gysh-lak, 1 *man'gish-lāk*; 2 *mā'n'gish-lāk*, *n.* A peninsula on the E. coast of the Caspian sea, lat. 44° 30' N.

man-ha'den, *n.* Same as MENHADEN.

man'han'dle, *vt.* See under MAN.

Man-hat'tan, 1 *man-hat'en*; 2 *mān-hāt'an*, *n.* 1. A town-ship and city; county-seat of Riley county, Kan.; seat of Kansas State Agricultural College (non-sectarian), founded in 1863. 2. A borough of New York city consisting of Manhattan Island (the original city of New York), Governor's, Bedloe's, Ellis, Blackwell's, Randall's, Ward's, and Oyster Islands; area 22 sq. m. [Kings county, N. Y.]

Man-hat'tan Beach. A seaside resort on Coney Island.

Man-hat'tan-ese, 1 *man-hat'en-ēs*; 2 *mān-hāt'an-ēs*, *n.* *a.* Relating to Manhattan or New York city. *b.* *n.* 1. A New-Yorker. 2. The idiomatic expressions peculiar to New York city.

Man-hat'tan Island. An island at the mouth of the Hudson river about 13 1/2 by 2 1/4 miles, on which the central portion and original city of New York is built; it contains also part of the county of New York.

man'head, *n.* 1. Manhood. 2. Human nature.

Man'heim, 1 *man'haim*; 2 *mā'n'hīm*, *n.* Same as MANHEIM.

Man'heim, *n.* 1. A borough in Lancaster county, Pa. 2. A town. Same as MANHEIM.

man'hole, 1 *man'hōl*; 2 *mā'n'hōl*, *n.* 1. An opening by which to enter a boiler, tank, sewer, aqueduct, or the like, for cleaning, repairing, or inspecting. 2. A chamber in an electric subway entered by such an opening. 3. A niche for refuge, as in the side of a railway tunnel. 4. In Pennsylvania coal-mines, a small passage furnishing ingress and egress to miners. 5. The hole in a covered canoe or other craft in which the paddler or rower sits. 6. The hatch in a vessel of less size than a scuttle.—**man'hole-plate**, *n.* A covering for a manhole.—**m. ring**, *n.* A ring of steel or wrought-iron, riveted to the boiler-shell round a manhole to stiffen it and afford a flat surface for fitting the plate or cover.

man'hood, 1 *man'hud*; 2 *mān'hōd*, *n.* 1. Manly qualities collectively, as courage, resolution, honor, and the like; manliness; as, intemperance destroys *manhood*. It is only from Christ's most perfect *manhood* that we rise to the best thought of his divinity.

TAYLER LEWIS *The Divine Human* p. 6. [c. a. 1800.]

2. The state of being of age; man's estate; as, to arrive at *manhood*. 3. The state of being man, or a human being as distinguished from other animals or beings. 4. The qualities befitting a man; valor; courage. **man'hood**.

man'hunt'er, *n.* See MAN.

ma'ni, 1 *mā'n*; 2 *mā'n*, *n.* [Tibet.] The six-syllable prayer continually repeated by Buddhists: so called from its most prominent word.

Mangrove-tree.

Mangle for Laundry Use.

Manhole in an Electric Subway, New York.

M

man'oid, 1 man'oid; 2 män'oid. I. a. Of or pertaining to the *Manidae*. II. n. One of the *Manidae*. [*< MANIS + -oid*]

ma-no'jo, 1 ma-nö'ho; 2 mä-nö'ho, n. [P. I.] A handful of zaate or grass-odder. [*< Sp. mano, hand, < L. manipulus, a handful of young shoots*]

man'-me-tab'o-la, 1 man'o-mi-tab'o-la; 2 män'o-metab'o-la, n. pl. *Entom.* A division of Packard's heterometabola which numbers such insects as undergo gradual or slight changes, but are always active. [*< Gr. manos, rare, + metabole, change*]

ma-nom'e-ter, 1 ma-nöm'i-ter; 2 ma-nöm'e-ter, n. 1. An instrument for measuring the elastic pressure of gases; an accurate pressure-gage. The simplest form of manometer consists of a U tube having one limb open and the other connected with the vessel in which is the fluid, the pressure of which is to be measured. 2. *Surg.* An instrument for measuring the pressure of blood in the vessels, capable of being applied to the cut end of a divided artery. [*< Gr. manos, rare, + metron, measure*]

flume manometer, same as MANOMETRIC FLAMES.

Regnault m., a style of manometer in which a three-way cock adjusts the mercury to suit.

man'o-met'ric, 1 man'o-met'rik; 2 män'o-met'ric, a. Of, pertaining to, or made with the manometer or some similar device; as, *manometric* experiments, *man'o-met'ric* calt.

man'o-met'ric calt., *man'o-met'ric calt.*, an apparatus for analyzing sounds by means of variations in the form of flames produced by aerial vibrations acting on a capsule controlling the gas supply. - m. fl. ues, long res of the ne seen on viewing in a rotating mirror a gas-flame pulsating by rapid alternation of pressure due to the action of sound-waves on the gas that supplies it. Ma'non' Les'caut, 1 ma'nön' les'köt; 2 mä'nön' les'köt. In the Abbé Prevost's *Histoire du Chevalier Des Grieux et de Manon Lescaut*, the heroine. On leaving Amiens, where he had been educated, Des Grieux met in a hotel Manon Lescaut, who was about to become a nun, and, falling in love at first sight, they fled together to Paris. Here Manon embarked upon a course of faithlessness, accepting attentions indiscriminately from those who could surround her with comforts and luxuries which Des Grieux could not afford. At last with other women of ill repute she was transported to New Orleans whither Des Grieux followed her. Later they fled to the desert, where Manon died of exposure. The story is replete with pathos, and is considered one of the greatest of French novels. It has been the theme of operas by Balfe (1836), Auber (1856), Massenet (1884), and Puccini (1893).

man'or, 1 man'ar or -er; 2 män'or, n. 1. [Eng.] The landed estate of a lord or nobleman. Specif.: (1) In old English law, a tract or district of land granted by the king to one as lord, with authority to exercise jurisdiction over it by a court-baron. (2) In Anglo-Saxon times, a thane's or lord's estate, composed of the land and of a part of the agricultural capital employed to till it, as well as the laborers, beasts, implements, etc., and having on it a community of sorts or villeins.

mar'quis, 1 mār'kwis; 2 mār'kwis, n. 1. A title of rank or honor, applied to a nobleman next in rank below a duke, and above an earl, count, or graf. Marquises were originally commanders of the marches, the first one in England to bear the title being Robert de Vere, Earl of Oxford, created Marquis of Dublin by Richard II. in 1385. When a duke has also the title of marquis, this title is given by courtesy to his eldest son, as in the case of the Duke of Marlborough, whose eldest son bears the title of Marquis of Blandford. The wife of a marquis is a *marquise*.

The persons who had command there were called lords marchers, or *marquesses*, whose authority was abolished . . . [A. D. 1536] though the title had long before been made a mere ensign of honour.

BLACKSTONE Commentaries bk. i, ch. 12, p. 397.

2. A three-cornered hat worn by women. 3. A female title equivalent to the modern *marquess*, used during the 16th and 17th centuries in England, generally with the prefix *lady*; as, the *Lady Marquis* Dorset; usually spelled *marquess* in this sense. Compare **MARQUESS**. [marquis, < LL. *marquis*, < *marca* (< OHG. *marka*), border.] **mar'quess**, < **mar'quis**-al, a. mar'reset, n. Same as **MARISH**.

mar'ri-a-ble, a. Marriageable.

mar'riage, 1 mar'ij; 2 mār'ag, n. 1. The act of marrying, or the state of being married; ethically considered, in Christian countries, a mutual and voluntary compact, properly based on mutual regard and affection and suitably ratified, to live together as husband and wife until separated by death. Its main design is to constitute the family, for the preservation of moral and social purity, the continuance of the race, the training of the young for the duties of life, etc.

Marriages are generally considered as belonging to two general types: (1) *monogamous*, the mating of two individuals for life; and (2) *polygamous*, the mating of one or more individuals with several of the opposite sex, usually occurring as *polygamy* or *polyandry*. Monogamy is the rule among civilized nations not under the influence of Islam, and is very largely the rule even in polygamous countries among the poorer classes. The spread of civilization and the influence of Christian missionaries are gradually increasing the practice of monogamy throughout the world. Marriage by capture or purchase still exists among certain savage peoples, but the almost universal tendency is to look upon it as a religious rite or sacrament, although civil marriages are now recognized by all nations.

Marriage . . . is only the seal which marks the vowed transition of temporary union into service, and of fitful into eternal love. *Ruskin Sesame and Lilies* lect. ii, p. 100. [w. & s. 1880.]

2. *Law*. (1) The civil status of a man and a woman lawfully united in the relation of husband and wife; wedlock.

In law, marriage is a civil contract to which the consent of the parties making it is necessary, but such consent must be followed by solemnization or by a mutual assumption of marital rights or duties. It affects the legal status of the contracting parties and can not be terminated at their option. By the majority of nations the husband and wife are considered as one for most purposes, the property rights of the wife, as a rule, being merged in those of the husband; but recent legislation, both in England and the United States, has conferred upon the wife practically equal rights. As to the ceremony, each nation or state, broadly speaking, recognizes the laws of the others, a marriage solemnized in accordance with local usage being everywhere held as valid. Compare **COMMUNITY**, **COURTESY**, **DOROS**, **POWER**, etc.

(2) The act, ceremony, or procedure by which the legal relationship of husband and wife is constituted; the lawful joining together of a man and a woman who mutually agree to live together as husband and wife so long as both shall live. 3. Same as **MARITAGIUM**. 4. A wedding; nuptial celebration; as, I was invited to her marriage. 5. Sexual transactions of plants.

The marriage of the flowers spots the meadows and fringes the hedgerows with pearls and diamonds. *Thoreau Early Spring in Mass.*, Mar. 4, 1840 p. 25. [w. & c. 1881.]

6. In card-games, as bezique and pinochle, the combination of a king and queen of the same suit in one hand; when these are of a trump suit it is a *royal marriage*. 7. Figuratively, any close union.

Beauty is the happiest marriage between the invisible and the visible. It may be termed the joyful look of God. G. H. CALVERT *Essays Metaphysical* p. 20. [w. & s. 1876.]

8. A marriage vow. 9. A man or woman regarded as a prospective husband or wife; as, she was a good marriage. [marriage, < LL. *maritalium*, < *maritus*; see **MARRY**.] SYN. conjugal union, matrimony, nuptials, union, wedding, wedlock. *Matrimony* denotes the state of those united in the marriage relation; *marriage* denotes primarily the act of so uniting, but is much used also for the state. *Wedlock*, a word of specific legal use, is the Saxon term for the state or relation denoted by *matrimony*. *Wedding* denotes the ceremony, with any attendant festivities, by which two persons are united as husband and wife, *nuptials* being the more formal and stately term to express the same idea. ANT. bachelorhood, celibacy, divorce, maidenhood, virginity, widowhood. PROP. marriage of or between two persons; of one person to or with another; among the Greeks, — **baal marriage** [Ar.], a marriage among the desert tribes in which the husband has absolute authority; perhaps arising from the former custom of wife-capture. Compare **BEENA MARRIAGE**. — **beena m.** [Ar.], a marriage where the husband comes into his wife's family group, and has no marital authority; a practise under a patriarchal organization, as among certain Saharan tribes. — **civil m.**, a marriage solemnized as a civil contract, as distinguished from an ecclesiastical marriage considered as a sacrament. — **common-law m.**, marriage by mutual consent, without ecclesiastical or civil ceremonies, such consent being evidenced by the writings, declarations, or conduct of the parties; consensual marriage. — **communal m.** (*Anthrop.*), a system by which the women of a given group are the common property of all the men. — **crim'nal marriage**, [Archaic, Eng.] Marriage by a man of the sister of his sister's husband. — **group m.**, same as **COMMUNAL MARRIAGE**. — **left-hand m.**, see **LEFT-HANDED**; 5. also, **MORGANATIC**. — **M. Act.** *Eng. Law*. 1. The deceased wife's sister bill. See under **WIFE**. 2. The ceremony, in its earliest form, dated from the conquest of Dalmatia by the Doge Pietro Orseolo II. in 1000, and assumed its later and more magnificent form with the presentation of a ring to the Doge Sebastiano Ziani by Pope Alexander III. in honor of the victory of the republic over the imperial fleet in 1177, which gave Venice command of the Adriatic. — **m. portion**, property given to a woman at marriage. — **m. ring**, same as **WEDDING-RING**. — **m. settlement**, an arrangement made by persons intending marriage, and in consideration thereof, whereby certain property is secured as a provision for the wife, or the children (if any) of the intended marriage, and sometimes for the husband. — **mixed m.** 1. A marriage between persons of different religions; specif., in the Roman Catholic Church, one between a Catholic and a non-Catholic Christian, which must be performed by a priest. Marriages between Catholics and non-Christians, or unbaptized persons, except under special dispensation, are null and void. 2. *Law*. A marriage between persons of different nationalities or races. — **prohibited degrees of m.**, the degrees of consanguinity or affinity between persons within which their marriage is prohibited by law. — **restraint of m.** (*Law*), a stipulation attached to gifts, bequests, etc., by which, to secure the gift, or bequest, the beneficiary's free choice of marriage is limited. Such restraint is held to be legal when directed against marriage with a particular class of persons, as those professing a certain religion, but is void if aimed at marriage in general or if attempting to restrict it to a union with one particular person. — **royal m.**, see **MARRIAGE**. 6. — **Scotch m.**, same as **COMMON-LAW MARRIAGE**.

mar'riage-a-bl(e), 1 mar'ij-a-bl; 2 mār'ag-a-bl, a. Fitted by age, physical condition, and mental capacity, and under no legal disability for entering the married state; capable of marriage. The common law recognizes the age of 14 years in the male and 12 years in the female as marriageable age; but the matter is specifically regulated by local statute. In England marriages of persons under 21 years of age can not be celebrated without the consent of parents or guardians, and in the United States the age has been raised in most States to 16 and in some to 18 years. — **mar'riage-a-blif-ty**, n. Mars, 1 mārz; 2 mār, n. 1. *Rom. Myth.* The god of war, one of the most ancient and important of the gods worshiped at Rome. His temple and oldest altar were situated in the Campus Martius. His sacred emblems, preserved in the temple, were the spear and shield, which it was believed had fallen from heaven. These were carried by the priests of the god, the Salii, in their festivals, the chief of which, *Agonium Martiale*, *Equitia*, and *Tubilustrium*, held in March, and the *Arminustrium* and *Equus October*, held in October, marked the opening and closing of the campaigning season. The lustrum was also held in his honor. See **LUSTRUM**. 1. Mars was identified with the Greek Ares, although they originally had no connection, and was associated in cult with Venus. In later religious ceremonies he was worshiped as the protector of fields and harvests.

2. *Astron.* The fourth planet in order of distance from the sun, from which its mean distance is 141,500,000 miles, its least distance from the earth being 35,000,000 miles, as in the years 1909 and 1924. Mars has a diameter of about 4,230 miles, a diurnal rotation of 24 hours, 37 minutes, 22.67 seconds, and a year of 686.9 days. Its density is 0.71, that of the earth being unity, and its surface extent is about one-quarter that of the earth. The light of Mars is of a pronounced red color. It has two very small satellites, discovered by Hall in 1877; *Phobos*, revolving about it in 7 hours and 39 minutes, and *Deimos*, revolving in

mas'sa-cre, *n.* 1. The unnecessary and indiscriminate killing of human beings, without due process of civil or military law, as for revenge or in savage warfare, and especially where much resistance is impossible; wholesale murder; as, the massacre of St. Bartholomew's day. 2. By extension, the reckless slaughter of a great number of animals; as, the massacre of buffaloes. 3. *Her.* A bearing consisting of deer's antlers with a portion of the skull attached. [*< L.G. matsken, hev.*]

Syn. butchery, carnage, havoc, slaughter. A massacre is the indiscriminate killing in numbers of the unresisting or defenseless; butchery is the killing of men rudely and ruthlessly as cattle are killed in the shambles. *Havoc* may not be so complete as massacre, nor so coldly brutal as butchery, but is more widely spread and furious; it is destruction let loose, and may be applied to organizations, interests, etc., as well as to human life. *Carnage* (Latin *curo, curis*, flesh) refers to widely scattered or heaped up corpses of the slain; slaughter is similar in meaning, but refers more to the process, as carnage does to the result; these two words only of the group may be used of great destruction of life in open and honorable battle, as when we say the enemy was repulsed with great slaughter, or the carnage was terrible.

The more important massacres in the history of the world are massacre of Antwerp, Aug. 4, 1788 (when Joseph II. closed the university of Antwerp); m. of Belgrade, 1095 (by Peter the Hermit and the Crusaders); m. of Berwick, 1296 (when Edward I. burnt alive the Flemish traders); m. of Drogheda, Aug. 13, 1649 (Cromwell and his soldiers set fire to a church in which were 1,000 persons); m. of Glencoe, Feb. 13, 1692 (the MacDonalds of Glencoe were put to death because they had not taken the oath of allegiance to William and Mary); m. of St. Bartholomew's, Aug. 24, 1572 (the Huguenots of France were slaughtered by the orders of Catherine de Medici in the reign of her son, Charles IX.); m. of St. George's Fields, 1788 (during the Wilkes riots, when a man with a red waistcoat was shot by the soldiers and the mob became frantic); m. of September, Sept. 2, 3, 4, 5, 1792 (when 10,000 persons were put to death in the prisons of Paris by order of Danton); m. of the Albigenes, 1208-1224 (by Simon de Montfort under Philippe II.); 1545-1547 (by John of Oplid under Louis VIII.); massacres of Armenia, April-May, 1908 (slaughter of the Christians by the Moslems at Adana, Aleppo, and Antioch); m. of the Benjamites (when the Israelites slew 25,100 Benjamites. *Judges xx*); m. of the Helots, 424 B. C. (during the Peloponnesian war by the Lacedaemonians); m. of the Innocents (the massacre of the children of Bethlehem. *Matt. ii, 16*); m. of the Magi, 519 B. C. (when Darius Hystaspes discovered the conspiracy to put the pretender Smerdis on the throne of Persia); m. of the Maronites, May-June, 1860 (slaughter of the Christians of Syria by the Druses). Massacres of the Jews are of sporadic occurrence in Russia, the most violent within recent years being those of Nizhni-Novgorod, July 7, 1884; Kishinev and Homel, 1904.

There are four chief forms of massage in use: (1) *Stroking*; (2) *kneading*; (3) *percussion*; (4) *circular rubbing*. *Stroking* promotes the circulation of the blood and of the tissue-juices. *Kneading* strengthens the muscles and increases their blood-supply. *Percussion* and *vibration* harden the muscles, relieve nervous pains, and strengthen wearied nerves. *Rubbing* tends to remove remnants of inflammatory processes, and to distribute blood exuded under the

skin after injuries, facilitating their absorption by the lymphatics. Massage produces a combined tonic and sedative effect on the nervous system. It is of great therapeutic value in nervous disorders, as neuralgia, neurasthenia, chorea, etc., and in dispelling the crippling effects of muscular rheumatism, cramp, and the stiffening after-effects of fractures and sprains. See *ILLUS.* below.

The term *massage* is used as the generic name for external manipulations which are employed for the purpose of affecting the nervous and muscular systems and the general circulation.

mast, *vt.* To cause to feed on mast, as hogs.

mast, *n.* 1. A stick or spar of round timber or tubular iron or steel, set upright in a vessel to sustain the yards, booms, sails, etc. Lower masts are usually stepped on the keelson of a vessel, and set slightly raking toward the stern: sometimes they are made in one piece, but more commonly in several pieces bound together, being then called **made**, **built**, or **built-up masts**. The principal parts of a mast are the head, bounding, housing, neck, and heel. Above the lower mast of a sailing ship comes the topmast, and above that again the topgallantmast and royalmast, the two latter generally on one pole. The position of each mast is further indicated by a prefix, as foremast, foretopmast, foretopgallantmast, foreroyalmast; mainmast, maintopmast, etc.; mizzenmast, mizzen-topmast, etc. The foremast, as its name indicates, is in the fore part of the ship, the mainmast is in the center, and the mizzenmast is nearest the stern. Trysailmasts are sometimes attached to the lower foremast and lower mainmast of a sailing ship. See *ILLUS.* under **SHIP**.

the index being put in parentheses to distinguish it from that of a power.] ± Plus or minus. × or . Multiplied by; indicating a product, more commonly denoted by simple juxtaposition; as, $a \times b$, $a \cdot b$, or ab (read "a multiplied by b"); "a into b"; or, in the last instance, simply "ab". ÷ (or rarely /) Divided by; indicating the quotient of the first quantity by the second; more often denoted as a fraction; as, $a \div b$, a/b , or $\frac{a}{b}$ (read "a divided by b," or, in the last case, "a over b"). : To: denoting the ratio of the first quantity to the second; often denoted by a fraction, as in the last case; as, $a:b$ or $\frac{a}{b}$ (read, "the ratio of a to b").

~ (or rarely -) The difference between: used in cases where it is uncertain or unimportant which quantity is the greater. $\sqrt{}$, $\sqrt[3]{}$, etc. The second, third, fourth, etc., root of: commonly called the radical sign. When no number is written above it, 2 is understood; as, $\sqrt{36}=6$; $\sqrt[3]{32}=2$. Roots are denoted also by the denominators of fractional exponents; thus, $a^{1/2}=\sqrt{a}$; $a^{1/3}=\sqrt[3]{a}$. 2, 3, 4, etc. The second, third, fourth, etc., power of: superior characters, commonly called *exponents* or *indices*; as, $6^2=36$; $2^5=32$. When fractional, the numerators indicate powers, the denominators roots (see above); as, $4^{3/2}$ (the square root of the third power of 4) = 8. For negative exponents, see note under - (minus). When applied to operators, superior figures indicate usually the repetition of the operation; thus, d^2x means the differential of the differential of x , while d^2x means the square of the differential of x . The differential of the square of x would be written $d(x^2)$. With the symbol of a trigonometrical function, however, these figures indicate a power of the whole function; thus, $\sin^2 x$ means the square of the sine of x (read "sine-square x "), while $\sin x^2$ means the sine of x^2 . The sine of the sine of x is written $\sin \sin x$. These discrepancies of usage are entirely arbitrary, and are to be deplored as confusing. — (), or [] Inclusion: indicating no operation by itself, but that the quantities included are affected alike by the same operation; thus, $2(a+b)$, $2(a+b)$, or $2a+2b$ indicates twice the sum of a and b , while $2a+b$ indicates the result of adding b to twice a . / or F Function of: some unspecified function of, the following quantity being generally enclosed in parentheses; as, $y=f(x)$. [When several different but undetermined functions are to be noted, the sign may be primed, or other symbols (generally Greek letters, as ϕ , ψ , or χ) may be used. The same notation is used as an abbreviation for functions whose nature is known and completely specified elsewhere; as, when $\phi(x)=\frac{x^2+2x+x}{x^2-4}$, $\phi(a+b)$ is the

quantity obtained by substituting $a+b$ for x in the fraction. Other Greek letters are used for particular functions defined and treated of at length in mathematical works.] d The differential of; as, dx . δ The variation or change of; as, δx . Δ The finite difference of. D The derivative of. The variable with respect to which the derivative is taken is denoted by an inferior character; thus, $D_x(x^2+4x+1)=2x+4$ (written above a function) The fluxion of; in modern use, the derivative of with respect to the time; thus, $\dot{y}=D_y$ or $\frac{dy}{dt}$. If y is a coordinate, \dot{y} is a velocity.

(written above a function) The second derivative of, with respect to the time; thus, $\ddot{y}=D^2y$ or $\frac{d^2y}{dt^2}$. If y is a coordinate, \ddot{y} is an acceleration. \int The integral of. The sign is repeated when successive integrations are to be performed, except when these are too numerous; when they exceed 3, the number is usually written as an exponent. The variable with respect to which the integration is to be performed is sometimes written as an inferior character. The limits of the integration are written as superior and inferior characters; thus, $\int_a^b x dx$ indicates that x is to be integrated from the point where $x=a$ to the point where $x=b$. Σ The sum of; the sum of all terms of the form following: a symbol whose exact meaning is often more definitely fixed by the context. The limits of the summation may be written above and below the sign Σ . Π The product of: used similarly to Σ . Ω The quant whose literal coefficients and facients are given, the numerical coefficients and the exponents being the same as those obtained by raising the sum of the facients to the indicated power; thus, $(a, b, c, d) \Omega x, y) = ax^2+3bxy+3cy^2+dy^3$. \circ Same as the above with the omission of the numerical coefficients; thus, $(a, b, c, d) \circ x, y) = ax^2+bx^2y+cy^2y+dy^3$. ! or L Factorial (see FACTORIAL); thus, $5!$ or $L 5$ (read "factorial 5") = $1 \times 2 \times 3 \times 4 \times 5 = 120$. ∇ The space-variation of (see NABLA). S The scalar part of (a quaternion). V The vector part of (a quaternion). ∇ The tensor of (a quaternion). U The versor of (a quaternion). ∇ For symbols of trigonometrical functions, see TRIGONOMETRICAL.

Common and Important Constants. ∞ Infinity (see INFINITY). 0 Zero; also, a quantity infinitely small. π The ratio of the circumference of a circle to its diameter (3.141592+); also, in circular measure, an angle of 180° . e or e (1) The base of the Napierian system of logarithms (2.71828+). (2) The eccentricity of a conic. M The modulus of a system of logarithms, especially that of the common system (0.43429448+). g The acceleration of gravity (32.17076 feet per second, multiplied by the difference between unity and 0.00269 times the cosine of double the latitude); for ordinary practical purposes, 32.2. R . The radius of a circle in degrees of its arc ($57^\circ.29578$). R' , R'' The radius in minutes and seconds of arc. [For other constants, see tables under UNIT.]

Simple Abbreviations, used chiefly in geometrical demonstration. \therefore Therefore. \dots And so on. \square (1) Square; the square; as, $\square ABCD$. (2) In geography, square miles. Δ Rectangle. \triangle Triangle. \circ Circumference; circle; also, 360° . \cap Arc. \angle The angle. \perp or \bot Right angle.

— **math'e-mat'i-cal-ly**, *adv.* — **math'e-mat'i-cian**, *n.* 1. One who has a thorough knowledge of mathematics. 2. An astrologer. — **math'e-mat'i-cize**, *vt. & vi.* To subject to mathematical treatment; perform mathematical calculations. **math'e-mat-i-ze**, *n.*

math'e-mat'i-co, 1 *math'i-mat'i-ko*; 2 *math'e-mat'i-co*. An entertainment (especially theatrical) or reception held in the daytime, formerly early in the day, but now usually in the afternoon. 2. A negligée gown designed for wear during the morning. [*F., < matin; see MATIN', n.*]

mat'-ing, 1 *mat'-ing*; 2 *māt'-ing*, *n.* 1. The act of pairing or taking a mate, as birds; hence, marriage. 2. *Fishing.* The uniting of the crews of two vessels, as for the capture of a whale as joint property.—**apolegamic mating** (*Biol.*), mating through preference; sexual selection made with conscious purpose.—**assortative m.**, the mating of animals that have some common and peculiar feature; sexual selection.—**autogamic m.**, the sexual union of two closely similar organisms.—**cross-assortative m.**, the reciprocal mating of two pairs in which the males and females respectively have opposite characteristics.—**endogamic m.** or **breeding**, mating or breeding restricted to those of the same tribe or family.—**heterogamic m.**, the pairing or mating of dissimilar individuals, as opposed to *homogamic mating*.—**homogamic m.**, same as *ASSORTATIVE MATING*.—**mating-time'**, *n.* The season when animals mate; the breeding-season.—**pan-gamic m.**, chance mating, within the race, without selection of any kind.—**preferential m.**, pairing by sexual selection; choice of some particular individual of the opposite sex as a mate in preference to others.—**selective m.**, same as *ASSORTATIVE MATING*.

Mat'-lock, 1 *mat'-lock*; 2 *māt'-lōk*, *n.* A town in Derbyshire, England; famed for its hydropathic establishments. **mat'-lock-ite**, 1 *mat'-lock-ite*; 2 *māt'-lōk-it*, *n.* *Mineral.* An adamantine, yellowish, transparent to translucent lead oxychloride (Pb₂OCl₂), crystallizing in the tetragonal system. [*< Matlock, in Derbyshire, England.*]

ma-to, 1 *ma-to*; 2 *mā-to*, *n.* [*Porto Rico.*] 1. Any of the roundish beanlike seeds, red or gray in color, of several shrubs and small trees of the genus *Cassipouia*; also, the red-and-black beans yielded by the fabaceous tree *Ormosia krugii*. 2. A game played with the seeds of these plants.

Ma-to'-ni-a, 1 *ma-to'-ni-a*; 2 *ma-tō'-ni-a*, *n.* *Bot.* A small genus of Malaysian leptosporangiate ferns, the only living genus of the family *Matoniaceae*. *M. pectinata* is the most widely distributed species. [*< Dr. Maton, London physician.*]

Ma-to'-ni-a'-ce-ae, 1 *ma-tō'-ni-ē-si-ē*; 2 *ma-tō'-ni-a'-ce-ae*, *n. pl.* *Bot.* A family of leptosporangiate ferns consisting of several fossil genera and one living genus, *Matonia*.

Ma-tot'-sh-kin' *Strait*, 1 *ma-tōt'-sh-kin'*; 2 *mā-tōt'-sh-kin'*. A strait, 45 by 3 m., dividing Nova Zembla. **Ma-tot'-sh-kin'** *Shari*.

Mā'-tra, 1 *mā'-tra*; 2 *mā'-tra*, *n.* A mountain range in Hun-gary; length, 36 m.; height, 3,500 ft.

Ma-tra'-li-a, 1 *ma-trā'-li-a*; 2 *ma-trā'-li-a*, *n. pl.* [*L.*] *Rom. Antiq.* A festival celebrated annually on June 11, in honor of the goddess Mater Matuta.

ma-tras', 1 *ma-trās'*; 2 *ma-trīs'*, *n.* *Mit.* A species of Celtic javelin or war-bolt used by the arbalistors of medieval Europe. [*< L. matoris, Celtic javelin.*]

mat-rass, 1 *mat-rās*; 2 *māt-ras*, *n.* 1. *Chem.* A long-necked round-bodied glass vessel for distilling and digesting; a cucurbit; bolt-head; sometimes small, of hard glass, for blowpipe analysis.

It was a small *matras*, as one of the elder chemists would have called it, containing a fluid, and emitting several small bubbles. HENRY POPE *at the Breakfast-Table* p. 205. [*fr. m. & co. 1890.*]

2†. A glass vessel inverted over plants to protect them from the weather. [*< F. matras, < L. matra, pike.*]

ma-tri'-arch, 1 *mā-tri'-ārk*; 2 *mā-tri'-āre*, *n.* 1. *Anthrop.* Among primitive peoples, one who is at once the mother and ruler of a tribe or race; corresponding to *patriarch*. 2. The wife of a patriarch. 3. [*U. S.*] A stately old woman; humorous term. [*< L. mater, mother, + Gr. archos, ruler, < archō, rule.*]

—**ma-tri'-ar'-chal**, *a.* Of or peculiar to a matriarch or matriarchy; derived from or based on descent in the female line.—**ma-tri'-ar'-chal-ism**, *n.* Government by a matriarch; the foundation of a social system on descent in a female line.—**ma-tri'-ar'-chal-ist**, *n.* One who favors matriarchal-ism.—**ma-tri'-ar'-chate**, *n.* Matriarchal government; a system of matriarchalism.

Here it must be observed that *matriarchate* is a misleading term... for the custom of deducing descent on the spindle side. Women among totemistic and exogamous savages are in a degraded position, nor does the deriving and inheriting of the kinship name, or anything else on the spindle side, imply any ignorance of paternal relations. *Encyc. Brit.* 11th ed., vol. x, p. 189. —**ma-tri'-ar'-chy**, *n.* A social organization having the mother as the head of the family, in which descent, kinship, and succession are reckoned through the mother, instead of the father.

ma-tri'-e, 1 *ma-trik'*; 2 *ma-triē'*, *n.* [*Colloq., Eng.*] The matriculation examination.

mat'-ri-cal, 1 *mat'-ri-kal*; 2 *māt'-ri-cal*, *a.* Relating to the **Mat'-ri-ca'-ri-a**, 1 *mat'-ri-kā'-ri-a*; 2 *māt'-ri-kā'-ri-a*, *n.* *Bot.* A genus of widely distributed herbs of the aster family. *M. chamomilla* is the wild camomile, a name by which the two or three introduced species are known in the United States. [*< L. matris (matric-), womb; see MATRIX.*]

mat'-ri-ces, 1 *mat'-ri-siz*; 2 *māt'-ri-sēs*, *n.* Plural of **MATRIX**. **mat'-ri-cide**, 1 *mat'-ri-sid*; 2 *māt'-ri-gid*, *n.* *Law*. 1. The killing, especially the murdering, of one's mother.

It was the Senators of Rome who thronged forth to meet with adoring congratulations the miserable youth who came to them with his hands reeking with the blood of *matricide*. FARRAR *Early Days of Christianity* p. 7. [*fr. p. v.*]

2. One who kills his mother. [*Def. 1 < L. matricida. Def. 2 < L. matricidium. Both < L. mater, mother, + cido, kill.*]

—**mat'-ri-cl'-dal**, *a.* **ma-tri'-e-ua**, 1 *ma-trik'-yu-lā*; 2 *ma-triē'-yu-lā*, *n.* [*L.-E.* 1-i; 2-lē, pl.] 1. A register or roll, especially that of a college or university. 2. *R. C. Ch.* A roll of the clergy connected with a religious institution. 3. Specif., in Germany, a list of the contingents of men and money which the different states are required to furnish to the empire. [*L.L., dim. of matris (matric-), public register; see MATRIX.*]

ma-tri'-e-u-lant, 1 *ma-trik'-yu-lent*; 2 *ma-triē'-yu-lant*, *n.* An applicant for matriculation; a candidate entering the membership of a university, society, or the like.

ma-tri'-e-u-lar, 1 *ma-trik'-yu-ler*; 2 *ma-triē'-yu-lar*, *a.* 1. Pertaining to the matricula or register. 2. Pertaining

to the womb. 3. Pertaining to the German matricula.

4. *Math.* Expressed by or relating to a matrix. **ma-tri'-e-u-late**, 1 *ma-trik'-yu-lēt*; 2 *ma-triē'-yu-lāt*, *v.* [*-LAT'ED; -LAT'ING.*] 1. *t.* 1. To admit to membership, as in a society or college, by enrolment; as, to matriculate students.

He [Hugo da Groot] was matriculated at Leyden at the age of eleven. MOWLEY *John of Barneveld* vol. II, p. 402. [*fr. 1874.*]

2. To admit to naturalization, as a foreigner: used of admission to citizenship in the countries constituting the German Reich. 3†. To adopt, as a child, foreign custom, etc.

II. *t.* To gain admittance to membership, as in a university or society, by entry on the roll.

Tom Brown... went up to matriculate at St. Ambrose's College. T. HUGHES *Tom Brown at Oxford* intro., p. 13. [*fr. & co.*]

[*< L.L. matriculatus, pp. of matriculo, < matricula, dim. of matris, public register, < L. matris; see MATRIX.*]

—**ma-tri'-e-u-lat-ed**, *a.* Admitted by enrolment.—**ma-tri'-e-u-lat-ion**, *n.* 1. The act of matriculating, or the state of being matriculated. 2. *Her.* The registering of armorial bearings.—**ma-tri'-e-u-lat-or**, *n.*—**ma-tri'-e-u-lat-ory**, *a.*

ma-tri'-e-u-late. I. *a.* Enrolled or admitted to membership, as in a college or society; as, a matriculate student. II. *n.* One who is so enrolled. [*< L.L. matriculatus; see MATRICULATE, v.*]

mat'-ri-her'-i-tage, 1 *mat'-ri-her'-i-tij*; 2 *māt'-ri-her'-i-tāg*, *n.* Inheritance on the mother's side. [*< L. mater, mother, + HERITAGE.*]

—**mat'-ri-her'-i-tal**, *a.*

mat'-ri-lin'-e-ar, 1 *mat'-ri-lin'-e-ar*; 2 *māt'-ri-lin'-e-ar*, *a.* Pertaining or relating to descent traced through a line of female ancestors. [*< L. mater, mother, + LINEAR.*]

their representative ideas. With Kant, a sort of combination of the Aristotelian and the Lockian view was attempted; but the form given to the substance, in order to constitute matter, as known by the human mind, was derived from the a priori constitution of mind itself. At present philosophy either refers the problem to the metaphysics of physics, or merges it in the fundamental problem as discussed between the adherents of realism and idealism.

5. The essential part of anything; that which constitutes the essence, pith, theme, or subject-matter or substance of a particular thing; as, the *matter* of a discourse.
 6. Something indefinitely or approximately conceived of; of an amount not exactly stated; as, it sold for a *matter* of fifty dollars.
 7. Something thought of indefinitely that is or may be an object of or material for thought; as, a *matter* of form; household *matters*.
 8. Hence, any subject that occupies the attention; a subject for discussion or feeling; as, a *matter* of dispute; a sorrowful *matter*.

The duldest street of the most prosaic town has *matter* in it for more smiles, more tears, more intense excitement, than ever were written in story or sung in song.

-**may'er**, n. A participator in the May-day festivities; one who goes a-maying. -**may'ing**, n. The celebrating of May-day by the gathering of flowers, or otherwise.

may', v. [MIGHT, imp.] [This verb, which is irregular and defective, having no participles or infinitive, is usually classed as a purely auxiliary verb, but in many senses it has a quasi-auxiliary and in some an independent force. 1. To have permission; be allowed; have the physical or moral opportunity; as, you *may* go; you *might* have seen his love in what he did. When a poor wretch was under the ban of the Church, no tradesman might sell him clothes or food - no friend might relieve him - no human voice might address him. FAUCON *Short Studies*, Erasmus and Luther in first series, p. 55. [s. 1872.] 2. To be contingently possible; as, it *may* be; you *may* get off, altho you do not deserve it. In this contingent sense of the word *may*, it is frequently used to form the compound tenses of the subjunctive or potential modes of other verbs. (1) In substantive clauses, preceded by *that*; as, I feared that he *might* have met with an accident. (2) [Rare.] In conditional clauses; as, I care not what the cost, so you *may* live. (3) In concessive clauses; as, you *may* possess the skill, for all I know. (4) In clauses expressing a purpose; as, he died that we *might* live. (5) In exclamatory use, expressing a benediction, wish, etc.; as, *may* you live long! *Might* is often used colloquially to express a complaint of omission, neglect, or avoidance of some act of duty or courtesy; as, they *might*, at least, have come to meet us. 3. To chance, or be by chance; used elliptically; as, be the pain what it *may* (or *may* happen to be), the operation must still proceed. In this use the word is often employed to soften the bluntness of a direct remark or question; as, what *may* be your name? 4. To have power or ability; be competent; used in this sense with the meaning *can*, a word frequently substituted; as, fight as best you *may*, the victory will be his; *might* I but tell you as a friend! Lander *might* have constructed a grand historical romance, or a respectable novel, but he never attempted either. 5. To desire earnestly; used in apostrophes and exclamations; as, *may* success be yours! Oh, *may* I join the choir invisible Of those immortal dead who live again In minds made better by their presence. GEORGE ELIOT *Oh, May I Join* l. 1. 6. *Law.* To have liberty or power to; often (in the construction of statutes) held to mean *must*, as imposing obligation, tho in every other use *may* has only a permissive or discretionary connotation. Now States *may* be admitted by the Congress into this Union. It is objected that the word '*may*' imparts power, not obligation; a right to decide; a discretion to grant or refuse. FENNER in *Am. Orator*, *Massachusetts Question* p. 320. [s. 4 n. 1898.] [*< AS. mag, be strong.*] - *may* be, or it may be, same as MAYBE, adv.

Same as BY ALL MEANS.—**by no means** of means, most certainly not; not for any consideration; on no account whatever. **by no means**—**general m.** (*Math.*), an arithmetical mean of unequally weighted observations, or other magnitudes.—**geometrical or geometrical m.**, the square root of the product of two given numbers.—**golden m.**, a wise moderation; the avoidance of extremes.—**great m.** (*Mus.*), the D string of a violin.—**m. of the altitudes**, in navigation, an average of a series of altitudes.—**m. of the latitudes**, in navigation, middle latitude. See under LATITUDE.—**m. of the tides**, the average height to which the tides rise at some single place within a given period, as a year.—**means of grace**, means of securing God's favor or gaining knowledge of him.—**quadratic m.**, the square root of the arithmetical mean of the squares of the given quantities.—**weighted m.**, the mean value of a series of observations, taking into account the weight or importance of each.

meander, *v.* 1. *me-an-der*; 2. *me-an-der*, *v.* 1. *t.* [*Rare.*] 1. To wind about; turn or flow round. 2. To make tortuous; form into meanders. 3. To survey roughly, as a district, by noting the bearings, distances, etc., of prominent points with respect to the path followed. **II. t.** To wind and turn while proceeding in a course; flow circuitously.
We speak of meandering streams, and find a new interest in a common word when we discover that the crooked river Meander, in yonder valley, gave it to our dictionary.
MAZE TWAIN (*Innocents Abroad*) p. 422. [*Am. v. co.* 1871.]
—**me-an-dered**, *pa.* Formed into mazy passages; of labyrinthine character; also, ornamented with meander.—**me-an-der-er**, *n.*—**me-an-der-ing-ly**, *adv.* **me-an-dri-cal-ly**;—**me-an-dri-an**, *a.* Winding; full of turns. **me-an-droust**.

me-an-der, *n.* 1. A tortuous or winding course; a zig-zag or rambling movement; hence, a maze; labyrinth; perplexity; as, the *meanders* of the law.
Her journey back was rather a *meander* than a march. It had no spiritlessness, no purpose.
HAWKES Toss of the D'Orberville p. 315. [*n.* 1892.]
2. An intricate variety of fretwork; the fret or key pattern of Greek border-decoration; often seen on classic robes, vases, cornices, etc. 3. The path followed in making an approximate survey of a plot. [*< L. meander, < Gr. meandros, < Matandros, a river in Asia Minor.*]—**incised meander**, a deep tortuous valley cut by a rejuvenated stream, the meandering course having been acquired in a former cycle.—**m. belt**, a belt or strip of alluvial flood-plain upon which a stream meanders back and forth.—**me-an-der-line**, *n.* **Sura**. A line forming the course of a meander in surveying.

Me-an-der, *n.* In ancient geography, a river, proverbial for its windings, which rose near Celenae, Asia Minor, and flowed into the Aegean sea near Samos. Its modern name is *Menderes*. See MEANDER, *v.* & *n.*
me-an-dri-form, *1 m-an-dri-form*; 2 *me-an-dri-form*, *a.* Characterized by a winding form.
Me-an-dri-na, *1 m'an-dri-na*; 2 *m'an-dri-na*, *n.* 1. The genus *Meandrina*. 2. [*m.*] A coral of this genus.
me-an-drine, [*1 m-an-drin*; 2 *me-an-drin*, *a.* 1. Mean-dri-nid, *n.* One of the *Meandrinae*.—**Me-an-drin-i-die**, *n. pl.* Zooph. Same as MEANDRINIDAE.—**me-an-drin-i-form**, *a.* Having the appearance of a meandrina.—**me-an-dri-noid**, *a.* Of or pertaining to the *Meandrinae*.
me-an-drite, *1 m-an-drit*; 2 *me-an-drit*, *n.* A brain-coral. See CORAL. [*< MEANDRINA.*]
mean-el, *1 m'an-el*; 2 *m'an-el*, *n.* A colored spot on a white horse.
Me-an-el, *1 m'an-el*; 2 *m'an-el*, *n.* *Bib.* (Apocrypha). 1 *Esd.* v. 31.

mean-ing, *1 m'in-ing*; 2 *m'en-ing*, *pa.* Significant; expressive; suggestive.—**mean-ing-ly**, *adv.*—**mean-ing-ness**, *n.* **mean-ing**, *n.* 1. That which is intended; object; purport; intention; aim; end; as, good *meanings*. 2. That which is signified; the sense of any observation or utterance; signification; force; acceptance; import.
Look for the artist's *meaning* in his picture; strive to find out what he is saying to you. J. C. VAN DYKE *How to Judge a Picture* ch. 9, p. 112. [*CHAUT.* 1889.]
3. Significance; interpretation; sense; as, the *mean-ing* of the dream.
Two *meanings* have our lightest fantasies,—
One of the flesh, and of the spirit one.
JAMES RUSSELL LOWELL, *Sonnets* xxiv.

4. Astron. The sun's motion in mean longitude. 5. *†* Power of thinking; knowledge; remembrance.
syn.: see *mean*.—**mean-ing-ful**, *a.* Full of meaning.—**mean-ing-ful-ly**, *adv.*—**mean-ing-less**, *a.* Having no meaning.—**ly**, *adv.*—**ness**, *n.*
mean-less, *a.* Done without means or instrumentality.
mean-ly, *1 m'in-ly*; 2 *m'en-ly*, *adv.* 1. In a manner in-

extent; as, the table *measures* 6 by 4. 3. To vie in measurement; compare favorably; as, they would *measure* with the best in the land. 4. To give measure; be capable of being measured. 5. To use a measuring instrument. [*< F. mesurer, < LL. mensuro, < L. mensura; see MEASURE, n. 1.*]—**to measure back**, to retrace one's steps.—**to m. one's length**, to fall prostrate at full length.—**to m. swords**, to compare swords, as before a duel; hence, to fight with swords; figuratively, to enter into rivalry.

mea-sure, *n.* 1. The extent, quantity, capacity, volume, or dimensions in general of anything, as ascertained by a certain rule or standard. 2. A standard of measurement. 3. Hence, any standard of criticism, comparison, judgment, or award; as, let him be judged by his own *measure*.
Where money is the *measure* of worth the wrong persons are always uppermost. *FRANCIS Short Studies, Reciprocal Duties* in second series, p. 232. [*Am. v. co.* 1872.]

4. A system of measurements; a series of measure-units determined by law or fixed by custom; as, apothecaries' *measure*; cloth-measure. 5. An instrument or vessel of measurement; as, a yard *measure*; a pint *measure*. 6. The act of measuring or making a number of measure-units for a definite purpose; measurement.
She [Mrs. Mill] was in nothing more valuable to my mental development than by her just *measure* of the relative importance of different considerations.

7. A quantity determined by a fixed standard, or an indefinite amount capable of measurement; as, a *measure* of zeal; the *measure* of my skill, my strength, my life.
Lord, make me to know mine end and
The *measure* of my days, what it is;
That I may know how frail I am. *Ps. xxxix. 4.*

8. A quantity noted out, in relation to the standard of measurement; as, full *measure*. *Measure* itself, in this use, is sometimes used to indicate a definite standard. 9. Known or ascertainable extent or degree; reasonable limits; moderation; as, beyond *measure*; within *measure*. 10. A certain proportion; relative extent, amount, or intensity; degree; as, a *measure* of allowance should be made. 11. A specific act or course of procedure designed as a means to an end; an expedient; method; step; specif., a legislative bill; as, foolish *measures*; a party *measure*. 12. That which makes up a sum or total; the full or sufficient quantity; as, the *measure* of our desires; he glutted the *measure* of his hate.

13. Math. Any quantity regarded as a unit and standard of comparison with other quantities; a quantity of which some other given quantity forms an exact multiple; as, the greatest common *measure*. 14. *Mus.* (1) That division of time, containing a specified number of beats, by which the air and motion of music are regulated. (2) The portion of music lying between two bar-lines. (3) Rate of movement; time; rhythm. 15. *Pros.* (1) A poetical rhythm determined by quantity or accent, or both. (2) A single metrical group or period in such a rhythm. [*C.*] 16. *Dancing.* (1) A slow and stately dance, with measured step, such as the minuet. (2) [*Rare.*] Any graceful succession of steps proceeding by regular interval, especially if to the accompaniment of music. 17. *pl. Geol.* A series of related strata, having some common feature; scarcely used except in such terms as *coal-measures*, *lead-measures*. 18. *Fencing.* The separating distance between fencers, as determined by the length of reach. 19. In organ-building, specif., the ratio of the diameter of the flue-pipes or stops to their length. 20. *Print.* The width of a page or column, usually given in ems; as, the *measure* was 22 ems pica. [*< F. mesure, < L. mensura, < mensus, pp. of metior, measure.*]

syn.: see CIRCUMFERENCE; METER.—**above or beyond measure**, to an inexpressible extent; excessively.—**ale-measure**, *n.* Same as ALE-MEASURE. See ALE.—**angular m.**, the system of measuring angles or arcs. The circumference of a circle of which the vertex of the angle to be measured is the center, is regarded as being divided into 360 equal parts or degrees (360°), each degree as divided into 60 minutes (60'), and each minute into 60 seconds (60"). See CIRCULAR MEASURE, below.—**apothecaries' m.**, a fluid measure of which the fluid ounce is the unit, and the other denominations the minim or drop, drachm, and pint. See table on next page.—**barren measures**, coal-measures without workable seams.—**blade m.** (*Tailoring*), the measure taken from a point under the arm and in front of the scye, to the middle of the back.—**circular m.** 1. The measure of angles used in trigonometry, in which the unit is the angle subtended by an arc equal to the radius. 2. Same as ANGULAR MEASURE.—**cloth-m.**, *n.* See CLOTH.—**common m.** 1. Same as COMMON DIVISOR. 2. *Mus.* Double and quadruple rhythm; common time. See *illus.* on next page.—**compound m., rhythm, or time** (*Mus.*), a measure consisting of 2, 3, or 4 groups of accents. See def. 14 (1), above.—**cube m.**, the system adopted for measuring volume, especially of solids, of which the unit is the cube of the linear unit.—**decimal m.**, any measure expressed in terms of a decimal system.—**double m.** 1. *Mus.* A common measure. See *illus.* on next page. 2. *Building.* The quality of being molded on both faces; said of a window or door.—**dry m.**, a measure for such goods as corn, fruit, salt, etc.; its unit is a gallon of 231.8 cubic inches. See table on next page.—**fluid m.**, same as APOTHECARIES' MEASURE.—**greatest common m.**, same as GREATEST COMMON DIVISOR.—**height-m.**, *n.* Same as HYPSOMETER. 2.—**imperfect m., rhythm, or time** (*Mus.*), formerly, all measures not triple.—**in a m.**, to some degree.—**in m.**, in moderation.—**liquid m.**, the system of units for the measurement of liquids, a gallon being the standard, and the pint being divided into gills, and not ounces. See table on next page.—**long or linear m.**, a system of measures of length, especially that of which the unit is the yard: 12 lines = 1 inch; 12 inches = 1 foot; 3 feet = 1 yard; 5 1/2 yards or 16 1/2 feet = 1 rod or pole; 4 rods = 1 furlong; 8 furlongs or 3.2 rods or 5,280 feet = 1 mile; 3 miles = 1 league.—**mea-sure-and-a-half**, *n.* *Building.* The quality of being molded on one side only; said of a door or window.—**mea-sure-moth**, *n.* A geometrid.—**m. of a number or quantity**. *Math.* 1. An exact divisor of any other given number or quantity. 2. Any quantity whose parts are or may be made proportional to the parts of another.—**m. of capacity**, dry or liquid measure, or any measure of content. See table on next page.—**m. of curvature**, the average curvature at any given portion of a curve or surface.—**m. of solidity**, same as CUBIC MEASURE.—**m. sign**, *n.* *Mus.* Figures in the form of a fraction following the signature of a piece, the upper figure indicating the kind of measure and the lower figure the value of the note regarded as a unit. See *illus.* on next page.

mea-sure, *n.* 1. The extent, quantity, capacity, volume, or dimensions in general of anything, as ascertained by a certain rule or standard. 2. A standard of measurement. 3. Hence, any standard of criticism, comparison, judgment, or award; as, let him be judged by his own *measure*.

measured, 1 me'z'urd; 2 mezh'urd, *n.* 1. Ascertained **me'zured**, or computed by rule or standard; determined, adjusted, or proportioned by rule. 2. Hence, uniform; slow and stately; rhythmic; as, *measured steps*. You can hear him swing his heavy sledge.

With measured beat and slow.

LONGFELLOW *Village Blacksmith* st. 3.

3. Restrained within bounds; moderated; limited; as, to speak in *measured tones*.—**measured-ly**, *adv.* [Rare.] **measured-ness**, 1 me'z'ur-ness; 2 mezh'ur-ness, *n.* Incapable of measurement; unlimited; immense.—**ly**, *adv.*—**ness**, *n.* **measured-ly**, *adv.* [Rare.] Moderate. **measured-ment**, 1 me'z'ur-ment or -ment; 2 mezh'ur-ment, *n.* 1. The act of measuring; mensuration; hence, computation; determination by judgment or comparison.

The principle of compensation is that which lies at the foundation of the common law measurement of damages.

PARSONS *Contracts* vol. II, p. 442. [L. N. & CO.]

2. The ascertained result of measuring; the dimensions, size, capacity, or amount, as determined by measuring; as, its *measurement* is two acres.

De Nonville, with an eye of skill.

Took measurement of slope and hill.

W. H. C. HOMER *Yonnondio* can. 1, st. 12.

3. A system of measures or measuring, as applied to any district or trade; as, the distance by Irish *measurement*.—**builders' measurement** (*Naut.*), the shipbuilders' system of computing tonnage: giving results about double the legal or registered tonnage.—**m. cargo** or **m. goods**, light goods which in transit are charged by bulk, as opposed to heavy goods which are charged by weight.—**new m.** (*Naut.*), a system adopted by the United States Congress in 1834 for computing the cargo-carrying capacity of a vessel.

measuring-machine, 1 me'z'ur-er; 2 mezh'ur-er, *n.* One who or that which measures. Specif.: (1) One who measures commodities in market. (2) One who measures work on buildings with a view to determining a contractor's compensation. (3) An officer, 1. Cloth-measuring machine, known as the *meter*, who for showing dial connected with merely measured coal and woolen a toothed wheel below. 2. The and other goods in the city of same mounted for use. As the London. (4) A measuring cloth is rolled up it rotates the worm. (5) An instrument spe- toothed wheel and the length dially adapted for measuring. rolled is shown on the dial.

measuring, 1 me'z'ur-ing; 2 mezh'ur-ing, *ppr.* & verbal *n.* of MEASURE, *v.*—**measuring-east**, *n.* A cast or throw that so nearly equals a predecessor that exact measurements only can tell which is the better.—**m. day**, *n.* The day

when any stated measuring is done, as of work by contract miners, railway-graders, and the like.—**m. machine**, *n.* A machine for measuring lengths, as a cloth-measuring machine.—**m. motion**, *n.* An attachment to a machine for measuring its product.—**m. point**, *n.* A rod with adjustable points for ascertaining depth of cavities, etc.—**m. roller**, *n.* A small roller attached to a loom designed to measure the yarn produced.—**m. spout**, *n.* A chute which delivers a regulated quantity of coal before the fire-doors from overhead bunkers.—**m. weir**, *n.* A water-meter set in a dam.—**m. worm**, *n.* Any geometrical caterpillar that progresses by alternately looping and straightening its body as if measuring.

Measuring is the first element of many compounds, partially self-explaining; as, **measuring-chain** (a surveyor's or engineer's chain), **m. faucet**, **m. funnel**, **m. glass** (graduated), **m. pump**, **m. stage**, **m. wheel** (a wheelwright's circumferenter, or an odometer), etc.—**measuring-ly**, *adv.* **meat**, 1 mit; 2 met, *u.* [Old Eng. & Scot.] To furnish with food; feed.

His shield well lined, his horses well fed.

HOWARD *Ilud* tr. by Chapman, bk. II, l. 136.

meat, *n.* 1. The flesh of vertebrate animals used as food: sometimes limited, colloquially, to the flesh of mammals, as opposed to poultry, game, fish, frogs, turtles, and the like; as, butchers' *meat*. 2. Anything eaten for nourishment; solid food of any kind; victuals; hence, figuratively, that which sustains and comforts; as, *meat and drink*; "my *meat* is to do the will of him that sent me."

Labour not for the *meat* which perisheth, but for that *meat* which endureth unto everlasting life.

John vi, 27.

3. The edible part of anything, especially of food that has to be picked out or detached, as from a shell: sometimes used in the plural; as, the *meat* of an oyster; walnut-*meats*; the *meat* of an egg; used also figuratively, as the *meat* of an essay. 4. The act of taking a meal: partaking of food or meat; as, labor first, then rest and *meat*. And David said unto Jonathan, Behold to-morrow . . . I should not fail to sit with the king at *meat*.

1 Sam. x, 5.

5. [Local.] Animals collectively, regarded as food; as, *meat* is killed every Friday. 6. [Archaic.] Meal; flour; as, a *meat*-offering. 7. Dinner, regarded as the chief meal, and typical of food in general. [*AS. mete, meat.*]

—**dark or red meat**, such part of the flesh of poultry and some game, as the legs of chickens and turkeys, as, on being cooked, does not become white.—**light or white m.**, the flesh of the breast and wings of some kinds of poultry or game, which, after being cooked, appears white, as in the case of chickens, turkeys, partridges, and some grouse.—**meat-bird**, *n.* [U. S.] The Canada jay.—**m. chopper**, *n.* An implement adapted for chopping or mincing meat.—**m. crusher**, *n.* An instrument for making meat tender by passing it between corrugated rollers.—**m. earth**, *n.* [Prov. Eng.] Soil.—**m. flour**, *n.* A powder of desiccated flesh.—**m. fly**, *n.* A flesh-fly.—**m. form**, *n.* A form adapted for the accommodation of several at table.—**m. fruit**, *n.* The melon-shaped fruit of the breadfruit-tree (*Artocarpus incisa*).—**m. hunter**, *n.* A pothunter.—**m. knife**, *n.* A knife with a tang of the full width of the handle, the latter being formed by two flat wooden pieces riveted to the tang.—**m. maggot**, *n.* The larva of a flesh-fly.—**m. offering**, *n.* A Hebrew sacrificial offering of fine flour or first-fruits with oil and frankincense. **meal**, *of*—**fer-ing**, *m. pie*. 1. A pie of which the chief ingredient is meat. 2. [Local, New Eng.] A mince pie.—**m. pudding**, a pudding of which the chief ingredient is meat.—**m. rocker**, *n.* A curved-bladed meat-mincing knife, having a handle at each end, and used with a rocking motion.—**m. safe**, *n.* A receptacle for storing meat: walled with perforated zinc or wire gauze.—**m. salesman**, *n.* A vender of meat; speck, an agent for the sale of carcasses from cattle-raisers to retail butchers.—**m. screen**, *n.* A screen for reflecting the heat upon the back of meat that is roasting before a fire.—**m. tea**, *n.* A high tea, or substantial tea at which meat is served.—**m. tub**, *n.* A pickling-tub, used in salting meat.—**to hang up m.** [Colloq., U. S.] (*Hunting*), to kill game, it being usual to let it hang for a time before cooking.—**to sit at m.** to sit at table.

meat, 1 mit; 2 met, *u.* *Anal.* Of or pertaining to meat; of the nature of or like a meat, or open duct.

meat-ed, 1 mit'ed; 2 met'ed, *a.* 1. Having meat; chiefly used in composition; as, a coarse-*meated* fish. 2. Fed; fattened; foddered.

Meath, 1 mit; 2 meth, *n.* A county in Leinster province, Ireland; 906 sq. m.; capital, Trim.

meat-ness, 1 mit'nes; 2 met'nes, *n.* The state or quality of being meaty or like meat, especially of abounding in nourishment or food, intellectual or physical; hence, pithiness.

meatless, 1 mit'les; 2 met'les, *a.* Lacking meat; foodless.

me-at-us, 1 mi-et-us; 2 me-at-us, *n.* [*rus* or *rus-es, pl.*] A conspicuous passage or canal; as, the auditory or the urethral *meatus*. [*L.* passage, *< meo, go*].—**meatuses** of the nose, longitudinal passages through the nasal fossae determined by the turbinate bones.—**me-a-to-m'e-ter**, *n.* *Surp.* An instrument for measuring the diameter of the urethral *meatus*.—**me-at'o-scope**, *n.* *Med.* A spectrum used in examination of the urethral or other *meatus*.

me-at'u-scope, *n.* *Med.* The examination of any *meatus*; applied particularly to the specular inspection of the wall of the urethra and the vesicular orifices of the ureters.—**me-at'o-tome**, *n.* A surgical instrument used in enlarging the urethra and like operations.—**me-a-to'o-my**, *n.* *Surp.* Incision of the angle of the urinary *meatus* for purpose of enlargement.

meat'y, 1 mit'y; 2 met'y, *a.* [*MEAT-ER*; *MEAT-EST*.] 1. Full of meat; having meat-flesh but no fat. 2. Having the characteristics of or a resemblance to meat. 3. Fig., having the essence of the meat; nourishing; hence, pithy.

Meaux, 1 mō; 2 mō, *n.* A manufacturing town in Seine-et-Marne department, France; 27 m. N. E. of Paris.

mech, 1 me'ch; 2 me'ch, *adv.* [*Dial.*] Maybe.

me'bu, 1 me'bū; 2 me'bū, *n.* [*F.*] An underground gun emplacement of reinforced concrete; pill-box.

Me-bun'al, 1 mi-bun'al or -al; 2 me-bun'al or -al, *n.* [*Bib.* *Sam. xxii*, 27. [*Heb.* built up.]]

M. E. C., *abbr.* Member Executive Council.

Me-cap'ter-a, *n. pl.* *Entom.* Same as MEOPHTERA.

me-ca'te, 1 me-kā'te; 2 me-cā'te, *n.* [*Mex. Sp.*] 1. [*S. W. U. S.*] A hair rope, or one made of the fiber of maguery: used for tying animals, etc. 2. A square measure, about one-tenth of an acre.

Me-cā, 1 me'cā; 2 me'cā, *n.* Same as MECCA. **Me-cā-wee't**, *n.* **Me-cā**, *n.* & *n.*

me-cā'te, 1 mi-sen'te; 2 me-gē'te, *a.* Noting a colorless acid, HOCSHO(COOH), produced from meconic acid, which forms crystals melting at 148° C. [*< MECONIC*.]

Me-ch, 1 me'ch; 2 me'ch, *n.* One of a race of nomadic mongoloids, living in the forest of Nepal and Bhutan.

mech, *abbr.* Mechanical; mechanics.

Me'chain, 1 me'shāā; 2 me'shāā, *n.* Pierre François André (1744-1818). A French astronomer who discovered several comets.

mech'alt, *a.* Adulterous; base.

mech'a-mech, 1 mech'a-mek; 2 mech'a-mek, *n.* [*N. Am. Ind.*] The wild potato-vine (*Ipomoea pandurata*).

me-chan'ic, 1 mi-kan'ik; 2 me-cān'ic, *a.* 1. Mechanical; machinal; as, the *mechanic arts*. A brain which, without being slow or *mechanic*, does more than a larger less drilled, more volcanic.

LOWELL *Fable for Critics* st. 36.

2. Supporting the materialistic view of the universe; atomistic. 3. Pertaining to the artisan class. 4. [*Archaic.*] Like or pertaining to a mechanic; hence, common; vulgar. 5. Skilled in the mechanical arts. [*< OP. mechanicus, < L. mechanicus, < Gr. mechanikos, < mēchanō, machine.*]

me-chan'ic, *n.* 1. One skilled in the mechanic arts or exercising a mechanical employment; one who has the art of using tools in shaping wood, metal, etc.; a handicraftsman; an artisan. 2. One who works as if he were a machine, by force of habit, and without intelligence; used contemptuously. 3. [*Slang.*] A professional card-dealer. 4. Mechanism. 5. Mechanics. 6. A low, common person. Syn.: see ARTIZAN.

me-chan'i-cal, 1 mi-kan'ti-cal; 2 me-cān'i-cal, *a.* 1. Of or pertaining to mechanics on the physical side; in accordance with the laws of physics. 1. Relating to or of the nature of mechanics or mechanism; in accordance with the laws of mechanics; as, *mechanical arts*. It is certain that the power which has provided intelligence and conscience cannot be the ordinary *mechanical* or the *chemical*, or even the *vital* powers.

McCOSH *Realistic Philos.* vol. I, p. 185. [s. 1890.]

2. Produced by machine or machinery; as, *mechanical* products. 3. Resulting from the employment of mechanism; operated by machinery; as, a *mechanical* sweeper. 4. Recognizing only physical forces and laws; materialistic, as a theory or philosophy.

Lotze for a quarter of a century has opposed the *mechanical* theory of life. JOD. COOK *Heredity* p. 90. [in *U. S. & CO.* 1882.]

5. Noting merely quantitative, not molecular or atomic, change in matter: opposed to *physical* or *chemical*.

Mechanical philosophy teaches that all the simple Mechanical powers are six in number. A. MACANRUS *Education and Manual Industry* p. 259. [A. 1884.]

6. Depending upon trial or experiment, as opposed to theory or scientific authority, as a geometrical construction obtained by instruments alone.

II. Of or pertaining to mechanics with reference to the human agency involved or considered. 1. Having inventive or constructive talent; skilled in mechanics; as, a *mechanical* genius. 2. Doing the work of a mechanic; having to do with tools or machines; as, a *mechanical* dentist. 3. Operating as if a machine or machinery; doing or done involuntarily, by mere force of habit; not instinct with life; artificial; also, failing to show independence of thought; slavish; as, *mechanical* acting; *mechanical* instruction. 4. [*Archaic.*] Of or relating to the working class; common; vulgar.—**mechanical advantage**, the ratio of power to resistance in a machine.—**m. arithmetic**, computations effected by computing-machines.—**m. construction** (*Math.*), the construction of a figure or design by the aid of any mechanical device as distinguished from geometrical construction, in which only the ruler and compasses are employed.—**m. construction of a curve**, a construction due to a mechanical contrivance.—**m. curve**, same as TRANSCENDENTAL CURVE. See under TRANSCENDENTAL.—**m. effect**, an effect produced by mechanical contrivance; work produced with the regularity and effective power of a machine.—**m. philosophy**, same as CORPUSCULAR PHILOSOPHY.—**m. powers**, the mechanical contrivances that enter into the composition or formation of all machines—the lever (with its derivatives, the balance, wheel and axle, funicular machine, and pulley) and the inclined plane (with its modifications, the screw and the wedge); as originally used excluding the balance and the funicular machine.—**m. solution**. 1. *Math.* The solution of any problem with the aid of mechanical devices or instruments. 2. *Physics.* Dissolution of a substance in a liquid without altering the chemical qualities of either.—**m. work**, the work of moving a body through space against the resistance of a force.—**me-chan'i-cal-ty**, *n.*

me-chan'i-cal, *n.* 1. *pl.* India-rubber goods used about machinery. 2. [*Rare.*] A mechanic.

me-chan'i-cal-ism, 1 mi-kan'ti-cal-izm; 2 me-cān'i-cal-izm, *n.* 1. Routine or mechanical action. 2. *Philos.* The doctrine that the material universe is the result of the mechanical laws of matter independently of a creator. Compare MATERIALISM.—**me-chan'i-cal-ist**, *n.* [*More machine of*]

me-chan'i-cal-ize, *v.* [*-ize*; *-iz'ing*.] [*Rare.*] To make a **me-chan'i-cal-ly**, 1 mi-kan'ti-cal-ly; 2 me-cān'i-cal-ly, *adv.* 1. According to the rules of mechanics; as, work *mechanically* good. 2. By mechanical power; as, *mechanically* elevated. 3. Automatically; by rule; without thought or purpose; as, he spoke *mechanically*. 4. In a manner denoting change of position without change in structure or chemical constitution; as, *mechanically* mixed.

me-chan'i-cal-ness, 1 mi-kan'ti-cal-nes; 2 me-cān'i-cal-nēs, *n.* The state or quality of being mechanical.

mech'a-ni'cian, 1 mek'a-nish'an; 2 me'e-a-nish'an, *n.* One who understands and applies the principles of mechanics; a designer of machinery; hence, a mechanic. No man probably ever bought a watch without looking into its works with an air of great intelligence, though none but a *mechanician* is any wiser for his survey.

COOPER *Redskins* p. 139. [s. & t. 1857.]

me-chan'i-cize, *v.* [*Rare.*] To make a machine of.

me-chan'i-co-chem'i-cal, 1 mi-kan'ti-ko-chem'i-cal; 2 me-cān'i-co-chem'i-cal, *a.* Of or relating to both mechanics and chemistry; said especially of those phenomena that necessitate in their explanation the application of the laws of both mechanics and chemistry, as electricity, magnetism, and galvanism.

me-chan'i-co-phys'i-cal, 1 mi-kan'ti-ko-fiz'i-cal; 2 me-cān'i-co-fiz'i-cal, *a.* Relating to or dependent on mechanics and physics.

me-chan'i-co-ther'a-peu'tics, 1 mi-kan'ti-ko-ther'a-piū'tiks; 2 me-cān'i-co-ther'a-piū'ties, *n. Med.* The treatment of disease by vibration, gymnastics, or other mechanical means. **me-chan'i-co-ther'a-py**, *n.*

me-chan'ies, 1 mi-kan'ies; 2 me-cān'ies, *n.* 1. The branch of physics that treats of the phenomena caused by the action of forces on material bodies. It is subdivided into (1) statics and (2) dynamics or kinetics, according as the forces do or do not so balance each other as to

Measuring-machine.

produce no motion of the body on which they act; or into (1) the mechanics of rigid bodies and (2) hydromechanics (including hydrostatics and hydrodynamics), according as they act upon rigid bodies or fluids. The special branch of hydromechanics that treats of gases is called *pneumatics*. The branch of mechanics dealing with liquids in motion, especially with their practical use, is called *hydraulics*. Properly mechanics also includes *acoustics*.

The laws of mechanics show that the sum total of rotary motion in a system can never be increased or diminished by the mutual action of its separate parts.

3. *Newcomen's Popular Astronomy* pt. iv, p. 506. [n. 1887.] 2†. The branch of knowledge, both theoretical and practical, which is concerned with the inventing and constructing of machines, explaining their operation, and calculating their efficiency. *Mechanics* is sometimes popularly used in this sense today.

Analytic mechanics, mechanics treated by algebraic formulas.—*animal m.*, the branch of mechanics that treats of the laws of equilibrium and motion as applied to the human body. For example, the principle of the lever is applied to the arms, powers and fulcrum being respectively represented by bones, contractile muscles, and joints, while the weight or resistance is referred to the weight of the body or of individual limbs.—*applied m.*, the principles of mechanics as applied to the construction of machinery (*practical m.*) and to art generally.—*celestial m.*, the science of the motions of the heavenly bodies as deduced from their mutual gravitation.—*developmental m.*, the study by experiment of the development of embryos and eggs under artificial conditions.—*non-Euclidean m.*, rational mechanics in which non-Euclidean geometry is interwoven.—*rational m.*, the mechanics of all natural phenomena assuming them to be conditioned solely by motions.—*abstract m.*; *pure m.*; *theoretical m.*—*social m.*, that section of sociology dealing with social forces and their operations, so far as they act mechanically or of themselves.—*statistical m.*, the mechanics of similar bodies or systems (such as the molecules of a gas) so numerous that they may be dealt with by the methods of statistics, altho not individually.—*technical m.*, the mechanics of manufacture and construction.

Me-chān'ic-burg, 1 mi-kan'iks-burg; 2 me-cān'ies-burg, n. 1. A borough in Cumberland county, Pa. 2. A village in Champaign county, O.

Me-chān'ic-ville, 1 mi-kan'iks-vil; 2 me-cān'ies-vil, n. A locality in Hanover county, Va.; 7. m. N. E. of Richmond; near the Chickahominy river and Beaverdam Creek; site of the second of the seven days' battles (June 26, 1862), in which Fitz-John Porter repulsed the Confederate force under Gen. D. H. Hill.

Me-chān'ic-ville, 1 mi-kan'iks-vil; 2 me-cān'ies-vil, n. A village in Saratoga county, N. Y.
mech'a-nip'yu-late, 1 mek'a-nip'yu-lät; 2 me-c'a-nip'yu-lät, vt. [*LAT'IN*; *LAT'ING*.] To seize, convey, release, or in any way operate (an object) by mechanical means and without the assistance of the hands. HENRY A. WISE, *Wood Sc. Am. Supplement*, 1793 p. 318, May 14, 1910. [*Gr. mechanē, machine, + MANIPULATE*.]

mech'a-nism, 1 mek'a-nizm; 2 me-c'a-nizm, n. 1. The structure or means of action of any mechanical contrivance; the sum and arrangement of interdependent parts in a machine of any kind; machinery, or a system of machinery.

A human organism with all its parts perfect, and all its parts in harmonious action, is a splendid mechanism.

WINGFIELD, *Wales and Wales* p. 306. [CHART. 1890.] 2. *Kinematics*. A theoretical machine in which only the relative movements of its moving parts are considered; an ideal machine.

Such a machine may be regarded as a kinematic chain in which a fixed part limits and defines the movements of all the other parts.

3. A system of means and appliances which constitute a working agency; as, the mechanism of an engine; the mechanism of society; the mechanism of mind.

Mechanism (of mind or ideas): . . . That explanation of mental process which traces it to the uniform behaviour of certain relatively simple and homogeneous elements, after analogy with particles of matter in motion. The term was given currency by Herbert, who essayed to work out a 'Mechanik der Vorstellungen', in which the rise and fall (Steigen und Sinken) of ideas were accounted for in terms of physical and mechanical principles. The term is not good, since it lends itself to interpretation in terms of physical analogy. JAMES M. BALDWIN, *Diet. of Philos. and Psychol.* vol. ii, p. 59. [MACM. '02.]

4. Technique; the mechanical execution of a work of art, as a sculpture, painting, etc., apart from its style or expression. 5†. Action according to mechanical principles. [*LL. mechanisma, < Gr. mechanē, machine*.] SYN.: see APPLIANCE.—*reduced mechanism* (*Kinematics*), a relatively simple mechanism, derived from one of greater complexity in such a manner as to make no change in its specific method of operation.

mech'a-nist, 1 mek'a-nist; 2 me-c'a-nist, n. 1. A designer or constructor of machines, or an expert in the mechanic arts; a mechanician. 2. *Philos.* A believer in the mechanical philosophy.—*mech'a-nist'ic*, a. Relating to mechanism; of the nature of mechanism.

mech'a-nize, 1 mek'a-niz; 2 me-c'a-niz, vt. [*-NIZE*; *-NIZ'ING*.] To make mechanical; construct mechanically; work out the mechanical details of (a design or idea). **mech'a-nize**—**mech'a-niz'or** [*-sa'tion*, n.]. The artisan is restless and dissatisfied, he is mechanized, he finds no interest in his work.

BARING-GOULD, *Germany, Present and Past* p. 93. [n. m. & co.] **mech'a-niz'er**, 1 mek'a-niz'er; 2 me-c'a-niz'er, n. 1. One who constructs mechanically. 2. One who makes mechanical order or system the basis of his theories. **mech'a-niz'er**.

mech'a-no-graph, 1 mek'a-no-graf or mi-kan'o-graf; 2 me-c'a-no-graf or me-cān'o-graf, n. A copy, especially of a work of art, produced by mechanical process on a machine. [*Gr. mechanē, machine, + graphō, write*.]—**mech'a-no-graph'ic**, a. 1. Relating to mechanography; copied or reproduced by mechanical process. 2. [*RARE*.] Pertaining to mechanics.—**mech'a-no-graph'ist**, n. A maker of mechanographs.—**mech'a-no-graphy**, n. The art of copying or reproducing a writing or work of art by mechanical process on a machine.

mech'a-nol'o-gy, n. [*RARE*.] The knowledge of or a treatise on mechanics or mechanism.

The science of style, considered as a machine, in which words act upon words, and through a particular grammar, might be called the *mechanology* of style. DE QUINCY, *Hist. and Crit. Essays*, style vol. ii, pt. ii, p. 102. [n. & p. 1853.]

mech'a-no-mor'phic, a. [*RARE*.] Resembling a mechanism or setting forth such resemblance; as, a *mechanomorphic* god. It is still a more curious notion of dignity that rejects the anthropomorphic, and substitutes therefor a *mechanomorphic* theory. WILSON, *Essays*, Haeckel's *Atheism* p. 265. [n. & p. 1887.] [*Gr. mechanē, machine, + morphē, form*.]

mech'a-no-ther'a-py, 1 mek'a-no-ther'a-pi; 2 me-c'a-no-ther'a-pi, n. *Pathol.* Mechanotherapy. [*Gr. mechanē, machine, + therapia, treatment*.] **mech'a-nur'gy**, n. [*RARE*.] The department of mechanics that treats of machines in motion. [*Gr. mechanourgia, < mechanē, machine, + ergon, work*.]

Me-che'ra-th-ite, 1 mi-k'ra-th-it; 2 me-c'ra-th-it, n. *Bib.* 1 Chron. xi, 36. [FUMI.]

Me'che-r'i-no, 1 mē-k'ē-r'i-no; 2 me-c'ē-r'i-no, n. See BECCA-Mech'lar-ist, n. Same as MEKHITARIST.

Mech'lin, 1 mek'lin; 2 me-c'lin, n. 1. A commercial city in Antwerp province, Belgium. 2. A lace with bobbin ground and designs outlined by thread or flat cord. See LACE. **Mechlin embroidery**—**Mechlin black**, a black cloth woven at Mechlin.

mech-lo'ic, 1 mek-lō'ik; 2 mē-lō'ie, a. *Chem.* Of, pertaining to, or derived from meconium. [*Gr. MECONIUM + CHLORIN*.] **mech'lo-ri-a'let**—**mechlole acid**, a crystalline compound obtained by the action of chlorine on meconium. [*-ba-l, n. Bib.* (Donal).]

Mech'na-de'bal, 1 mek'na-dē'bal or -bi-al; 2 me-c'na-dē'bal or -bi-al, n. An inferior kind of jalap obtained from the tuberous roots of a species of the bindweed family (*Convolvulaceae*), variously said to be *Batisia jalapa*, *Ipomoea jalapa*, and *Convolvulus mechoacan*. The roots are called *Mechoacan roots*, from Mechoacan, Mexico, near which they are found.

me-cis'to-ceph'a-lis, 1 mi-sis'to-sef'a-lis; 2 me-cis'to-cef'a-lis, n. *Anthrop.* Persons having a cephalic index below 69. **me-cis'to-ceph'a-lous**, 1 mi-sis'to-sef'a-lus; 2 me-cis'to-cef'a-lus, a. Having a cephalic index of 69 and under. [*Gr. mekistos, superl. of makros, long, + kephalē, head*.]

me-cis'to-ceph'a-ly, 1 mi-sis'to-sef'a-li; 2 me-cis'to-cef'a-ly, n. The condition of having a cephalic index less than 69. **meck**, 1 mek; 2 mek, n. [*D*.] A notched piece of wood in a whale-boat, used as a harpoon-rest.

Meck'el, 1 mek'el; 2 mek'el, n. Any one of several French surgeons and anatomists: (1) Jean Frédéric (1724-1793), surgeon to Louis XV. from 1773. (2) Jean Frédéric (1717-1818), grandson of the preceding; one of the founders of the science of teratology; *Traité de Comparative Anatomie*. (3) Philippe Frédéric Théodore (1750-1830), son of Jean F. (1) and father of Jean F. (2).—**Meckel's cartilage**, the Meckellian bar.—**Meckel's diverticulum**, a diverticulum from the ileum, resulting from a vestige of the vitelline duct of the embryo.—**Meckel's ganglion**, the Meckellian ganglion.

meck'el-to-my, 1 mek'el-tō-mi; 2 mek'el-tō-mi, n. *Surg.* An operation for the removal of the sphenopalatine or Meckell's ganglion. [*Gr. Meckel + Gr. ektomē, excision*.]

Meck'e-li-an, 1 mek'ē-li-an; 2 mek'ē-li-an, a. Of, pertaining to, or discovered by J. F. Meckel (1781-1833), an anatomist of Halle, Germany.—**Meckellian bar**, the cartilaginous bar that temporarily forms the skeleton of the mandibular arch in the fetus. In the later stages of many vertebrates membrane-bones replace this bar wholly or in part; but in the elasmobranchs it serves as the bone of the lower jaw. **M. arch**; **M. rod**.—**M. ganglion**, the sphenopalatine ganglion.

meck'le-as, 1 mek'lē-as; 2 mek'lē-as, n. [*Ar*.] A measuring instrument, particularly the theodolite at Roudhah. **meg'y-ast**.

Mecklen-burg, n. 1. 1 mek'lēn-burg; 2 mek'lēn-burg. See MECKLENBURG-SCHWERIN and MECKLENBURG-STRELITZ. 2. 1 mek'lēn-burg; 2 mek'lēn-burg. A county in S. North Carolina; 500 sq. m.; county-seat, Charlotte. 3. A county in S. Virginia; 640 sq. m.; county-seat, Boydton.—**Mecklenburg Declaration of Independence**, a declaration of independence claimed to have been made by citizens of Mecklenburg county, at Charlotte, N. C., in May, 1775.

Mecklen-burg'ian, 1 mek'lēn-burg'ian; 2 mek'lēn-burg'ian, a. Of or pertaining to Mecklenburg.—**Mecklenburgian stage**, see GEOLOGY.

Mecklen-burg'ian, 1 mek'lēn-burg'ian; 2 mek'lēn-burg'ian, n. A former German grand duchy; a republic since Nov. 1, 1918; 5,117 sq. m.; capital, Schwerin.

Mecklen-burg-Strelitz, 1 -strelitz; 2 -strelitz, n. A former grand duchy of Germany; proclaimed a republic Nov. 1, 1918; 1,126 sq. m.; capital, Neustrelitz.

M. E. C. L., *abbr.* Mistress of English and Classical Literature; a degree considered equivalent to B. A.

me-co-ce-phal'ic, 1 mi'ko-sē-fal'ik; 2 me-co-ce-fal'ic, a. Dolichocephalic. [*Gr. mekos, length, + kephalē, head*.]

Me-co-don'ta, 1 mi'ko-dōn'ta; 2 me-co-dōn'ta, n. *Zool.* A division of the *Salamandridae*, with the palatal teeth on the inner sides of the palatal processes, forming two longitudinal rows diverging backward. [*Gr. mekos, length, + odous, tooth*.]

me-co-graph-y, 1 mi'ko-graf-i; 2 me-co-graf-i, n. *Anthrop.* A graphic representation of the varying dimensions and weight of the human body at different ages. [*Gr. mekos, length, + GRAPHY*.]

me-con'ter, 1 mi-kēm'ter; 2 me-cōm'ter, n. *Surg.* A graduated compass for measuring the length of newborn infants. [*Gr. mekos, length, + metron, measure*.]—**me-con'ter-y**, n.

Me-co-nah, 1 mi'kō-nā; 2 me-cō'na, n. *Bib.* (R. V.). *Neh.* **Me-co-nel'ia**, 1 mek'o-nē-lā; 2 me-cō-nē-lā, n. *Bot.* A small genus of plants of the poppy family (*Papaveraceae*), of western North America. *M. oreana*, a dwarf annual, is the best-known species. [*Gr. mekon, poppy*.]

me-co-ni-al, 1 mi'kō-ni-al; 2 me-cō'ni-al, a. *Physiol.* Pertaining to the meconium.

me-con'ic, 1 mi-kōn'ik; 2 me-cōn'ic, a. Of, pertaining to, or obtained from poppy. [*Gr. mekonikos, of a poppy, < mekon, poppy*.]—**meconic acid** (*Chem.*), a white crystalline compound (*C₁₂H₁₂O₇*) with which morphin and other alkaloids are combined in poppy-juice; obtained as a by-product in the preparation of such alkaloids.—**me-co-nate**, n. *Chem.* A salt of meconic acid.

me-con't-din, 1 mi-kēm't-din; 2 me-cōm't-din, n. *Surg.* A graduated compass for measuring the length of newborn infants. [*Gr. mekos, length, + metron, measure*.]—**me-con't-dine**, n. An amorphous alkaline unstable alkaloid (*C₁₂H₁₂NO₄*) contained in opium. [*Gr. MECONIC*.]

me-co-nid'i-um, 1 mek'o-nid'i-um; 2 me-cō'ni-d'i-um, n. [*-A*, *pl.* *Zooph.*] A peculiar sporozoan resembling a poppy-capsule on the summit of the gonangium in some hydroids. [*Dim. Meconidia* of a Hy-droid.].

me-co-nin, 1 mek'o-nin; 2 me-cō'ni-n, n. *Chem.* A colorless, crystalline, phos- in process of neutral compound (*C₁₂H₁₂O₄*) con-development.

me-co-ni-at; **me-co-ni-at**—**me-co-ni-at**, a. *Physiol.* Pertaining to the meconium.

Of or obtained from poppy-juice.—**meconic acid**, a compound known only by its salts, which are formed by decomposing meconium.

me-co-ni-oid, 1 mi'kō-ni-oid; 2 me-cō'ni-oid, a. Of, pertaining to, or obtained from meconium. [*Gr. MECONIUM + -oid*.]

me-co-nism, 1 mek'o-nizm; 2 me-cō'ni-sm, n. The habit of taking opium. [*Gr. mekon, poppy*.]

me-co-ni-um, 1 mi'kō-ni-um; 2 me-cō'ni-um, n. 1. The first feces of a newborn child, dark-green in color and consisting of mucin secretions from the liver, and cuticle shed from the bowels. 2†. Opium. [*Gr. mekon, < mekon, poppy*.]—**me-co-ni-or-rhe-a**, n. A morbidly large discharge of meconium.

me-co-nol'o-sin, 1 mek'o-lor mi'ko-jnef'o-sin; 2 me-cō'no-lor me-cō-jnef'o-sin, n. *Chem.* A white crystalline constituent of opium. **me-co-nol'sini**.

me-co-nol'o-gy, 1 mek'o-lor mi'ko-jnef'o-gi; 2 me-cō'no-lor me-cō-jnef'o-gi, n. The study of opium and its effects. [*Gr. mekon, poppy, + -LOGY*.]

me-co-noph'a-gism, 1 mek'o-nēf'a-jizm; 2 me-cō'no-ph'a-gism, n. The act or practice of eating opium; the opium habit. [*Gr. mekon, poppy, + phagein, eat*.]—**me-co-noph'a-gist**, n. An opium-eater.

Me-cop'ter-a, 1 mi-kōp'ter-a; 2 me-cōp'ter-a, n. *pl. Entom.* A small order of carnivorous insects characterized by a head prolonged into a beak; the *Panorpata*. It includes a single family, the *Panorpidae*, of which the most common member is the scorpion-fly. Its larvae resemble the caterpillar in the form of the body, and the abdomen is equipped with eight pairs of fleshy prolegs. [*Gr. mekos, length, + pteron, wing, < pterma, fly*.]

Me-cop'ter-at—**me-cop'ter**, n.—**me-cop'terous**, a.

Me-cos'ta, 1 mi-kēs'ta; 2 me-cōs'ta, n. A county in Michigan; 567 sq. m.; county-seat, Big Rapids.

Me-cu'ba-list, 1 mi-kūf'a-list; 2 me-cūf'a-list, n. One who has extensive knowledge of Jewish traditions.

M. E. D., *abbr.* Master of Elementary Didactics.

med, *abbr.* Medical; medicine; medieval; medallist; medium.

Me'da, 1 mē'dā; 2 mē'dā, n. A commune in Milan prov. It.

Me'da-ba, 1 mē'dā-ba; 2 mē'dā-ba, n. *Bib.* (Donal).

Me'dad, 1 mē'dād; 2 mē'dād, n. *Bib.* Num. xi, 26. [Heb. love.]

Me'dad'ly-bush, 1 mi-dād'ly-bush; 2 me-dād'ly-bush, n. The American fly-honey-suckle (*Lonicera ciliata*).

Me'da-ter-at—**me-dater**, n.—**me-daterous**, a.

med'al, 1 mē'dāl; 2 mē'dāl, n. [*RARE*.] To dignify with the gift of a medal; confer a medal upon.

med'al, n. 1. A small disk of metal, bearing a device, usually commemorative of some event or some deed of bravery, scientific research or literary production, etc.

2. An ancient coin, especially any large Greek silver coin of notable beauty, such as the 4th-century decadrachm of Syracuse. See plate of coins, fig. 15. [*Gr. medallē, < L. metallum; see METAL, n.*]

3. **Distinguished Service Medal** [U. S.], a medal awarded by the United States to a person serving in any capacity with the Army for meritorious service.—**M. of Honor** [U. S.], a medal awarded by the United States to members of the Services for individual acts of heroism in battle.—**med'al-machine**, n. A carving-machine for copying on an enlarged or reduced scale medals or similar art-works in relief.

—**m. play**, see GOIF.—**med'al-et**, n. A somewhat diminutive medal. **med'al-let**—**med'al-lary**, n. [*RARE*.] A group of medals.—**me-dal'ic**, a.—**me-dal'ic-ly**, adv.—**med'al-ur'gy**, n. [*RARE*.] The art of designing, engraving, and striking medals and coins. **med'al-ur'gy**.

med'al, *pp.* Medaled.

med'al-ist, 1 mē'dāl-ist; 2 mē'dāl-ist, n. 1. A collector of or dealer in medals; a person skilled or curious in medals.

The sculptor, however, to distinguish him from the rest of the gods, gave him (Mars) what the *medallist* calls his proper attributes, a spear in one hand, and a shield in the other.

ADDISON, *Works*, Remarks on Italy in vol. v, p. 271. [SWAN 1804.]

2. A designer or engraver of medals. 3. The recipient of a medal awarded for services or merit. **med'al-ist**.

med'al-ize, 1 mē'dāl-iz; 2 mē'dāl-iz, vt. [*RARE*.] 1. To represent or portray on a medal or medallion. 2†. To prove or illustrate by the use of medals as evidence.

me-dal'ion, 1 mi-dāl'yan; 2 me-dāl'yon, n. To make in the form of a medallion; decorate as with a medallion.—**me-dal'ioned**, a.

me-dal'ion, n. 1. A large medal; applied also to subjects painted, drawn, engraved, or sculptured, and set in circular or oval frames, or to architectural ornaments of this character decorating an entablature or a facade.

2. Hence, sometimes, a coin. Compare MEDAL, 2. See plate of coins, fig. 5.

The term *medallion* in numismatics is applied to those productions of the mint of ancient Rome, or struck in the provinces under the empire, which, if gold, exceed the aureus in size; if silver, the denarius; and if copper, the first or large brass.

ENCYC. AMERICANA vol. x.

3. Any ornamental design resembling a medallion, as a figure in a carpet; a medallion window, a pattern on a wall, book-cover, etc.; also, an ornament of lace inserted in a woman's costume. [*Gr. medallion, < medallē*; see MEDAL.]—**me-dal'ion-car'pet**, n. A carpet containing a prominent central design of medallion pattern.

me-dal'ion-ist, 1 mi-dāl'yan-ist; 2 me-dāl'yon-ist, n. One who designs, makes, or engraves medallions.

Me'dan, 1 mē'dān; 2 mē'dān, n. *Bib.* A son of Abraham. 1 Chron. i, 32. [Heb., Judgment.]

me-da-no, 1 mē'dā-no; 2 mē'dā-no, n. [Sp. Am.] A sand-hill or dune; also, a dune of barren shore dotted with mounds of sand.

Med. Dir., *abbr.* Medical Director.

med'dle, 1 mē'dl; 2 mē'dl, n. [*MEB'DLED, MEB'LD*; *med'dle*, *med'dling*.] 1. To participate or interfere officiously; interpose imperceptibly in the affairs of another; touch or handle a thing or the concerns of others unnecessarily and without request; frequently followed by *in* or *with*. 2†. To take kindly concern; take part or notice; usually followed by *with*. 3†. To mix; mingle; be mixed. 4†. To engage in contest; fight; contend. 5†. To have carnal intercourse.

Med't, *abbr.* To mix; mingle. [*Gr. medter, mesler, < L. misceo, mix*.] SYN.: see INTERPOSE; MIX.—**med'dlecome**, n. [*Prov. Eng.*] An interfering, meddling person.—*to m. or make* [*Colloq.*], to have concern; be engaged; as, do not meddle or make with them.

med'die-ment, n. The act of meddling.

One of the Me-cop'ter-a.
1. Scorpion-fly. 1/2. 2. Head. 1/2. 3. Tail. 1/2.

med'ler, 1 med'lar; 2 med'ler, *n.* One who meddles; an officious busybody; an intruder.

med'le-some, 1 med'l-som; 2 med'l-som, *a.* Given **med'l-some**, 1 to meddling; officiously inclined; interfering; intrusive.

There is a certain *meddlesome* spirit, which, in the garb of learned research, goes prying about the traces of history, casting down its monuments, and marring and mutilating its fairest trophies. *Living Columbus* vol. i, p. 50. [G. P. 1861.]

Syn.: intrusive, meddling, obtrusive, officious. The *meddlesome* person interferes unasked in the affairs of others; the *intrusive* person thrusts himself uninvited into their company or conversation; the *obtrusive* person thrusts himself or his opinions conceitedly and undesirably upon their notice; the *officious* person thrusts his services, unasked and undesired, upon others. *Obtrusive* is oftener applied to words, qualities, actions, etc., than to persons; *intrusive* is used chiefly of persons, as is *officious*, tho we speak of *officious* attentions, *intrusive* remarks; *meddlesome* is used indifferently of persons, or of words, qualities, actions, etc. See *INQUISITIVE*. Compare synonyms for *INTERPOSE*.—**Ant.**: modest, reserved, retiring, unassuming, unobtrusive.—**Adv.**:—*ness*, *n.*

med'ling, 1 med'ling; 2 med'ling, *1. pa.* Interfering; officious; meddlesome. **II. n.** 1. Interference with business not one's own; impertinent busying of oneself with other people's affairs. 2. Mingling in close conflict; fighting. 3. Intermixture; blending or combining.

Mede, 1 mid; 2 med, *n.* A member of the ancient Aryan race who founded the Medo-Persian empire, ruled at Ecbatana, and conquered Babylon. They praised Magism. [*L. Medus*, < Gr. *Mēdos*, < Zend *Māda*.]

Me-de'a, 1 mī'dē'a; 2 mē'dē'a, *n.* Gr. *Myth.* The daughter of the king of Colchis and sister of Clree, who aided Jason to obtain the golden fleece and fled with him to Thessaly. On her arrival she rejuvenated Æson, her father-in-law, by drawing all the blood from his veins, replacing it by the juices of magic herbs. Medea thereafter fled, with Jason, to Corinth, only to be deserted by him for Glauca, the king's daughter. She revenged herself by sending to her rival a poisoned cloak and crown, the violence of which destroyed not only the princess, but also her father. After killing the children she had borne by Jason, she fled to Athens in a chariot drawn by dragons which she had received from the god Helios. Here she married the aged King Ægeus, by whom she had a son, Medos. After many wanderings with her son, she finally returned to Colchis. Æschylus, Sophocles, and Ovid wrote tragedies upon this theme, but only those of Euripides and Seneca are extant. Compare *JASON*.

Me'dé'a, 1 mē'dē'a; 2 mē'dē'a, *n.* A town in Algiers department, Algeria, N. Africa.

mem'o-ry, 1 mem'o-ri; 2 mēm'o-ry, n. [*-RIES, 1 -riz; 2 -ris, pl.*] 1. The act, process, or faculty of representing in consciousness any impression, event, or other experience, accompanied by recognition of the fact that it belongs to time past; conscious reproduction, with recognition of previous experiences; remembrance; recollection. The older psychology analyzed memory into the four processes of (1) *retention*, (2) *reproduction*, (3) *representation*, (4) *recognition*, but it is plain that *retention* is not a conscious mental process, much less a storing away of ideas in an entity called mind; it is, rather, a property or tendency of the psychophysical mechanism, akin to that assumed in accounting for the formation of all manner of associations and of bodily and mental habits. Nor is *reproduction*, altho permissible, altogether adapted to express the facts, for past experiences are seldom or never reproduced in their entirety. *Representation*, however, accurately describes the activity and form of memory as belonging to the imagining or ideating faculty, in the widest meaning of the words. But it is *recognition* which distinguishes memory from all other forms of representative processes and faculty. In a complete act of developed memory the present psychos is consciously related to the past of my experience as representative of that past. G. T. LADD *Psychol. Descriptive and Explanatory* p. 397 [*s. 1894.*]

Memory proper . . . is the knowledge of an event or fact, of which meantime we have not been thinking, with the additional consciousness that we have thought or experienced it before. WATKINS *Principles of Psychol.* vol. i, p. 688. [*fr. m. & co. 1890.*]

2. The experiences of the mind taken in the aggregate, and the accuracy and ease with which a person can call forth single experiences from it; as, a well-filled and reliable memory. 3. That which is remembered, as an act, event, person, or thing; a reminiscence. Ye blessed memories of my early day! WITTNER *Chalkley Hall* st. 3.

4. The period of time covered by the faculty of remembrance; as, beyond the memory of man. 5. The state of being remembered; a living continuously in the minds of men; posthumous reputation; commemoration, as, the memory of Washington will endure. They erected to his [Socrates'] memory a brazen statue. JOHN LORD *Beacon Lights* vol. i, p. 95. [*fr. n. & n. 1885.*]

6. That which reminds; a memorial; a memento. 7. A memorial act or service, as for the dead. 8. Same as MEMORIA. [*< OF. memorie, < L. memoria, < memor, mindful.*] **mem'ol-ret**; **mem'o-riet**.

Syn.: recollection, remembrance, reminiscence, retrospect, retrospection. In the more popular usage, by memory we designate all that is involved in the ability to know, or know about, anything which belongs to the past; while *remembrance* may be applied to the concrete fact that some particular experience recurs in consciousness, and is recognized as belonging to some particular portion of past time. *Remembrance* may be voluntary or involuntary; a thing is brought to remembrance or we call it to remembrance; the same is true of memory. *Recollection* involves volition, the mind making a distinct effort to recall something, or fixing the attention actively upon it when recalled. *Reminiscence* is a half-dreamy memory of scenes or events long past; *retrospection* is a distinct turning of the mind back upon the past, bringing long periods under survey. *Retrospection* is to reminiscence much what recollection is to remembrance.

Full of mercy; not exacting or revengeful toward offenders; disposed to pity and forgive; tenderly forbearing; compassionate; as, a *merciful* judge. 2. Characterized by or indicating mercy; as, *merciful* deeds. **mer'cy-ful. *Syn.* benignant, clement, compassionate, forgiving, gentle, gracious, humane, pitiful, pitying, tender, tenderhearted. The *humane* man will not necessarily predict pain upon the misdeeds of another. If *he* is a *merciful* man, he is disposed to withhold or mitigate the suffering even of the guilty. The *compassionate* man sympathizes with and desires to relieve actual suffering, while one who is *humane* would forestall and prevent the suffering which he sees to be possible. *See* *HUMANE*; *PROPTIOUS*.—**ly, adv.**—**-ness, n.****

mer'ci-ty, n. To pity.

mer'ci-less, 1 mür'si-less; 2. *mër*'ci-lës, *a.* Having or showing no mercy or pity; relentless; cruel; as, a *merciless* foe. *Syn.* *See* *BARBAROUS*; *IMPLACABLE*.—ly, adv.**—**-ness, n.****

Mer'cur, 1 mür'kür; 2. *mër*'cür, *n.* A city in Tooele county, Utah; S. W. of Salt Lake City.

mer'cur-am-mo-ni-um, 1 mür'kiur-a-mö-ni-um; 2. *mër*'dür-a-mö-ni-um, *n.* *Chem.* A compound of mercury and ammonium formed by the substitution of mercury for aluminum in the hydride of ammonia. It acts like a base, uniting with acids to form salts. [*<* MERCURY, 1, + AMMONIUM.] **mer'cur-am'Int.**

Mer'cu-re-an, 1 mür'kü-r'-an; 2. *mër*'cür'-re-an. **I. a. Same as *MERCURIAN*. **II. n.** A dweller on the planet Mercury.**

**mer'cu-ri-al, 1 mür'kü-ri-al; 2. *mër*'cür'-ri-al, *a.* 1. Of or pertaining to the god Mercury; hence, lively or quick to respond to impressions or influences from without; light-hearted; fickle; volatile; tricky.
They [Brobdignagian laws] are expressed in the most plain and simple terms, wherein those people are not merciful enough to discover above one interpretation. [*Swift's Works, Gulliver* pt. ii, p. 158. [w. p. x. 1871.]**

2. Of, pertaining to, containing, or caused by mercury or quicksilver, or any of its compounds; as, *mercurial* poisoning; a *mercurial* preparation; the *mercurial* column (as in a barometer). 3. [M-] Relating to the planet Mercury; specif., in astrology, pertaining to qualities of character peculiar to Mercurians. 4. Relating to Mercury as herald, or as god of trade.—**mercur'ial ointment,** an ointment containing crude mercury.

mer'cu-ri-al, n. 1. A preparation containing mercury. 2. A person of a mercurial temperament; also, a rogue or a thiet.—**mer'cu-ri-al-in, n.** *Chem.* A volatile oily compound of chlorine obtained when the acids of various varieties of *Mercuria* (see *MERCURY*, 3) are distilled. It is identical with methylamin.—**mer'cu-ri-al-ism, n.** *Poison.* The condition produced by excessive use of mercurial medicine; salivation.—**mer'cu-ri-al-ist, n.** 1. *Med.* A phy-

sielan given to prescribing mercurials in disease. 2. One who is fickle, like Mercury, or one born under the planet Mercury. 3. An eloquent person; sharper; thief.—*mer-cu'ri-al-iz*, *v.* 1. To stain or taint; or quality of being mercurial. 2. Liveliness.—*mer-cu'ri-al-iz*, *adj.* 1. In a mercurial manner. 2. By the agency of mercury.

mer-cu'ri-al-ize, *v.* 1. *mer-cu'ri-al-aiz*; 2. *mér-cu'ri-al-iz*, *v.* [*-IZED*; *-IZ'ING*.] 1. *l. Med.* To bring under the influence of mercurial medicine; salivate; as, to *mer-cu'ri-alize* a patient. 2. To make mercurial in temper.

3. *Phot.* To treat with mercury for the purpose of developing, as a daguerreotype.

II. i. To be sprightly or fickle. **mer-cu'ri-al-ize**, *v.*—*mer-cu'ri-al-iz-a* [*for -sa*] (*tion*, *n.*) The act or process of mercurializing, or the state of being mercurialized.

Mer-cu'ri-an, *l.* *mer-kú'ri-an*; 2. *mér-cu'ri-an*. 1. *a.* Of or pertaining to Mercury, either the planet or the god. 2. *n.* *Astrol.* A person born under the influence of Mercury or possessing a mercurial temperament.

mer-cu'ric, *l.* *mer-kú'rik*; 2. *mer-cú'ric*, *a.* *Chem.* Of, pertaining to, or containing mercury in its highest valence.—**mercuric chlorid**, corrosive sublimate. —**mer-cyanid**, a compound, $Hg(CN)_2$, formed by dissolving mercuric acid in hydrocyanic acid. —**m. iodid**, a compound (HgI_2) assuming two forms as a scarlet-red amorphous or crystalline powder at low temperature and in diffused daylight, and as a yellow rhombic crystalline powder under the influence of sunlight or heat. —**m. nitrate**, a crystalline compound, $Hg(NO_3)_2$, obtained by dissolving mercury in excess of nitric acid; used in making ointments for the skin. —**m. oxid**, a compound, HgO , obtained from mercuric nitrate by heat or an intimate mixture of molecular quantities of mercuric nitrate and mercury. Both a red and a yellow powder are formed, which are used with lard in making ointments for certain skin-diseases.—**m. sulfid**, a compound (HgS), found native as cinnabar, or artificially produced as a black or a vermilion powder by the action of hydrogen sulfid on mercury salts.—**m. sulfoacetylate** or **thioacetylate**, see **PRUSSIAN BLUE**.

mer-cu'ri-fy, *v.* 1. *mer-kú'ri-fid*; 2. *mer-cú'ri-fy*, *vt.* [*-FIED*; *-FY'ING*.] 1. To extract mercury from (its ores) by volatilization and subsequent condensation of the metal. 2. To mix with mercury; mercurialize. [*< MERCURY + -FY.*]—**mer-cu'ri-fica-tion**, *n.* 1. The process by which mercury is extracted from its ores. 2. The act, method, or state of being compounded with mercury.

mer-cu'ri-o-syph', *l.* *mer-kú'ri-ó-sif'*; 2. *mer-cú'ri-ó-syf'*, *l.* *n.* *Pathol.* Mercurial poisoning combined with syphilis, resulting from the use of mercury as a curative agent.—**mer-cu'ri-o-syph'** [*-lit'*], *a.*

mer-cu-rism't, *n.* An announcement of news.

mer-cu-rus, *l.* *mér-kú'rus*; 2. *mér-cú'rus*, *a.* Of, pertaining to, or containing mercury in its lowest valence; as *mer-cu'rous* chlorid, oxid, etc.

mer-cu'-ry, *vt.* To wash with a solution of mercury.

mer-cu'ry, *l.* *mér-kú'ri*; 2. *mér-cú'ry*, *v.* [*a.* *Chem.* A silver-white metal, liquid at ordinary temperatures. See **ELEMENT**. Called colloquially *quicksilver*. Mercury is used chiefly for obtaining gold and silver from their ores (see **AMALGAMATION**) and in the barometer and thermometer. Its most useful compounds are mercuric chlorid (corrosive sublimate), mercurous chlorid (calomel), and the sulfid (cinnabar). It dissolves most metals. See **AMALGAM**. The antidotes for poisoning by mercury are milk, white of eggs and flour.

3. [*Colloq.*] The quicksilver in the tube of a barometer or thermometer, especially as marking atmospheric conditions; as, the *mercury* stands 95° in the shade. 4. [*M.*] The planet of our system nearest the sun, its mean distance being 35,958,000 miles; the smallest of all the major planets, having a diameter of about 3,000 miles and revolving about the sun in 88 of our days. It is thought to revolve on its axis only once during its sidereal year.

The nearness of *Mercury* to the Sun prevents us from obtaining any very accurate knowledge of its surface.

—*N. C. C.* Elements of Astronomy p. 137. [*A.* 1899.]

4. *Rom. Myth.* [*M.*] The god of commerce; identified with the Greek *Hermes*, as herald and messenger of the gods, conductor of souls to the lower world, and god of eloquence. Mercury was honored with a yearly festival May 15. He was the special patron of heralds and messengers, of the corn-trade, of merchant-gilds, and of thieves. Compare **HERMES**.

5. A statue of Mercury; a sign-post. See **HERMES**.

6. *Bib.* (R. V.) Acts xiv. 12. 7. [*M.* or *m.*] [*Archaic.*] A messenger or purveyor of news; a newsboy; also, a newspaper; in the last sense now only as the name of some specific journal. 8. An Old World plant of the genus *Mercurialis*, of the spurge family (*Euphorbiaceae*), especially *M. annua*, the annual or French mercury, or mercury-weed, which has been employed medicinally from the earliest times, and is sometimes used as a potherb, and *M. perennis*, the perennial or dog's mercury, which is poisonous. 9. [*M.*] *Medieval Theosophy.* The Holy Ghost in the Godhead, or in man the conscience (sometimes the intelligence); also, the male principle. 10. [*Local*, U. S.] The poison-ivy (*Rhus toxicodendron*). 11. *Her.* In blazoning by planets, the tincture purple. 12. Mercurial temperament. 13. A sprightly or nimble person; a clever thief. [*< F. Mercure*, *< L. mercury, a contrivance for alternately making and breaking an electrical circuit by means of a solid conductor and mercury. — *m.-cup*, *n.* 1. The cistern of a mercury-barometer. 2. A cup containing mercury for making an electric connection, as by dipping the ends of two wires in it. — *m.-holder*, *n.* *Dent.* A small receptacle for holding mercury, provided with a very small opening for the extension of the metal in making amalgams. — *m.-pump*, *n.* An air-pump without a piston, acting by the fall of mercury through a tube. Such pumps are of two types, the *Geissler*, in which mercury alternately fills and is drawn off from a globe connecting with the vessel to be exhausted, and the *Sprengel*, where mercury-drops in a descending column carry off the air between them. The first type is more rapid, but the second gives higher vacuums. — *m.-spark*, *n.* An electric spark that gives in its spectrum the bright mercury-lines. — *m.-tube*, *n.* A glass tube in which a faint flash of light is caused by the fall of mercury within it, which generates electricity by friction against the sides of the tube. — *m.-valve*, *n.* A valve which is closed by the immersion of the edge of a disk or an inverted cup in a body of mercury. — *Scotch m.*, the purple foxglove (*Digitalis purpurea*). — *three-seed m.*, an American weed (*Acalypha virginica*) of the same family as the English mercury.

Mercury-holder. A, plunger; B, screw-cap.

Mer-eu-ry islands. A group of islands, N. E. of New Zealand, including Great Mercury and Red Mercury Islands. — *Mer-eu-ti-o*, 1 *mēr-kū-ti-o*; 2 *mēr-kū-ti-o*, *n.* In Shakespeare's *Romeo and Juliet*, a sprightly young nobleman attached to Romeo. He is killed in a quarrel by Tybalt. — *mer-oy*, 1 *mūr's*; 2 *mēr'oy*, *n.* [*mēr'oy*, 1 -s; 2 -cis, pl.] 1. The act of treating or the disposition to treat an offender or an enemy with less severity than he deserves in strict justice or might legally receive; compassion; in a wider sense, forbearance to injure others when it is in one's power to do it; forbearance.

That Mercy I to others show. That Mercy show to me. *Poem Universal Prayer* st. 10.

2. The act of relieving suffering, or the disposition to relieve it; benevolence shown in relieving suffering.

Mrs. Fry had formed the resolution of entering upon this work of mercy. *T. Tinsion Elizabeth Fry* p. 31. [*s.* & *s.* 1847.]

3. An undeserved or unexpected act or expression of clemency, pity, or good will, especially at a critical time of need, peril, or suffering; a providential blessing; friendly interposition. 4. Unrestricted power or disposal, as to punish or spare; full control; as the men were at the mercy of their captors.

He is at the mercy of his informants, and is compelled to repeat their statements, even where he does not believe them. *Rawlinson Herodotus* vol. 1, p. 56. [*s.* 1859.]

5. Amercement. 6. Thanks; favor. [*< F. merci*, *< L. merces*, reward, LL. pity, *< merx* (merc-), merchandise, *< mereo*, gain.]

Syn.: benevolence, benignity, blessing, clemency, compassion, favor, forbearance, forgiveness, gentleness, grace, kindness, lenience, leniency, lenity, mildness, pardon, pity, tenderness.

Mercy is the exercise of less severity than one deserves, or in a more extended sense, the granting of kindness or favor beyond what one may rightly claim. *Clemency* is a colder word than *mercy*, and without its religious associations, signifying mildness and moderation in the use of power where severity would have legal or military, rather than moral, sanction; it often denotes a habitual mildness of disposition on the part of the powerful, and is matter rather of good nature or policy than of principle. *Leniency* or *lenity* denotes an easy-going avoidance of severity; these words are more general and less magisterial than *clemency*; we should speak of the leniency of a parent, the clemency of a conqueror. *Grace* is favor, kindness, or blessing shown to the undeserving; *forgiveness*, *mercy*, and *pardon* are extended toward the ill-deserving. *Pardon* remits the outward penalty which the offender deserves; *forgiveness* dismisses resentment or displeasure from the heart of the one offended; *mercy* seeks the highest possible good of the offender. There may be *mercy* without *pardon*, as in the mitigation of sentence, or in all possible alleviation of necessary severity; there may be cases where *pardon* would not be *mercy*, since it would encourage to repetition of the offense, from which timely punishment might have saved. *Mercy* is also used in the wider sense of refraining from harshness or cruelty toward those who are in one's power without fault of their own; as, they besought the robber to have mercy. See *SAVORY*.

Ant.: cruelty, hardness, harshness, implacability, justice, penalty, punishment, revenge, rigor, severity, sternness, vengeance. — *Prep.*: the mercy of God to or toward sinners; have mercy on or upon one. — *covenanted mercies*, special divine mercies promised by reason of a covenant relation with God, as sealed by baptism. — *Fathers or Priests of Mercy*, a Roman Catholic society of missionary priests, founded in France in 1806 by Jean Baptiste Rauzan, chaplain to Louis XVIII., and planted in the United States in 1839. In 1834 the Pope approved of the order under the name of "The Society of the Priests of Mercy." The chief duties of the members are acts of mercy and mission preaching. — *for mercy! for mercy's sake!* an exclamation making appeal for pity or expressing great surprise. — *mer-ey-seat'*, *n.* 1. The place where mercy is dispensed. 2. The golden lid of the ark of the covenant whence God gave his oracles to the high priest, and upon which was sprinkled the blood of the yearly atonement. According to Josephus the *mercy-seat* was only a lid; but the New Testament writers claim that the term implied propitiation. 3. Figuratively, the throne of grace. — *m.-tablet*, *n.* — *m.-stock*, *n.* A prostration. — *m.-stroke*, *n.* A death-stroke, putting an end to suffering. — *coup de grâce*. — *Sisters of M.*, a Roman Catholic society of nuns, bound together by a life vow of chastity, poverty, and obedience, and devoted to works of mercy; founded in Dublin in 1827. — *to be in m.* (*Eng. Law*), to be in the status of a convict liable to punishment at the judge's discretion.

merd', *n.* *Ordure*.

mer de glace, 1 *mēr dē glās*; 2 *mēr dē glās*. [*F.*] Literally, sea of ice; specif., the great glacier beyond Chamonix in the Alps, directly north of Mont Blanc.

mer-div'o-rous, 1 *mēr-div'o-rus*; 2 *mēr-div'o-rūs*, *a.* Feeding upon dung, as some flies; scotophagous. [*< L. merda*, excrement, + *vorō*, devour.]

mere, 1 *mūr*; 2 *mēr*, *a.* [*mēr'ēr* (seldom used); *mēr'ēt*.]

1. Such (as is mentioned) and no more; nothing but; sheer; simple; as, a mere child.

What mereest whim. Seems all this poor endeavor after fame! *Kaars Endymion* bk. 1, st. 26.

2. *Law*. Executed by specified persons, entirely unaided. 3. Absolute; entire; unqualified. 4. Pure; unmixed. [*< L. merus*, unmixed, bare.]

Syn.: absolute, bare, clear, nothing but, only, pure, sheer, simple, unadulterated, unmixed, unmitigated, unmixed. See *PURE*. *Bare* and *mere* are often used interchangeably, but whereas the idea expressed by *mere* is that the thing to which it is applied is simply what it is, without regard to degree, *bare* conveys the signification that were the degree diminished in the slightest amount, something different would be the result; as, for example, *mere* politeness is simply politeness, while *bare* politeness is just removed from rudeness.

mere, *n.* 1. [*Rare* in U. S.] A pond, pool, or lakelet. 2. [*Scott.*] The sea. 3. A marsh or bog.

mere', *n.* [*Eng.*] 1. A boundary-line. 2. In Derbyshire Peak, a measure of mining-claims of 29 or 31 yards.

3. [*Prov.*] A private carriage-drive. 4. [*Prov.* or *Obs.*] A furrow used as a boundary-line; also, a boundary-stone. [*< AS. gemæra*, boundary.]

— *meres'man*, *n.* [*Local* or *Obs.*] One who locates boundaries. — *mere'stake'*, *n.* A tree used as a boundary-mark between bits of wood or coppices. — *mere-tree'*, *n.* A farm. — *mere'stone*, *n.* A stone used as a boundary; also, figuratively, a boundary.

me're, 1 *mēr'ē*; 2 *mēr'ē*, *n.* 1. [*Maori*] A stone battle-dore-shaped war-club, the emblem of the power of the Maori chief. 2. A miniature of the war-club, made of greenstone and worn as an article of jewelry. — *me'ri*.

Me'rga-net'ta, *n.* (*t. g.*) [*< L. mergus*, diver, + *Gr. nitus*, duck.] — *me'rga-net'tin* (*es*, & *n.*)

mer-gan'-ser, 1 *mār-gān'sēr*; 2 *mār-gān'sēr*, *n.* A mergine duck-like water-bird with tooth-like processes along the upper edge of the bill.

The Old World merganser (*Mergus americanus*) has the head and neck rich dark-green, the upper parts mostly pied black and white, and the lower parts creamy-white. The American merganser (*M. americanus*) is similar, with a black bar across the white of the wing-coverts. *M. serrator* is the red-breasted merganser; *Lophodytes cucullatus* is the hooded merganser. [*< L. mergus* (see *MERGUS*), *anser*, goose.]

merge, 1 *mūr*; 2 *mēr*, *v.*

[*MERGE*; *MERG'ING*.] I. *t.* To sink the identity or individuality of; cause to disappear, be combined, or be swallowed up; with *in* or *into*. II. *i.* To lose identity or individuality; be lost to view or absorbed into something else; with *in* or *into*.

The twilight had deepened, merging into such night as the summer in that part of Scotland knows — a sweet, pale memory of the past day. *MACDONALD* in *Cheerful Words* xxxix, p. 48. [*s.* L. *co.*] [*< OF. merger*, *< L. mergo*, dip.]

merge, *n.* An act of merging.

Me'rgen-tha-ler, 1 *mūr'-gēn-tā'ler*; 2 *mūr'-gēn-tā'ler*, *Ott-mar* (?; 1854-1899). A German-American inventor of the linotype typesetting-machine.

mer'ger, 1 *mūr'jēr*; 2 *mēr'jēr*, *n.* 1. *Law*. The extinguishment by operation of law of a lesser estate, right, or liability in a greater one, as where a leaseholder acquires the freehold, where a lower is replaced by a higher form of security, or where a private is swallowed up in a public wrong or a lesser crime in a greater.

In contracts, oral agreements or negotiations carried on by correspondence merge in a written contract written subsequently, and the acceptance of a greater security or obligation in lieu of a lesser one has been held to extinguish the lesser.

In real property, the meeting of a greater and lesser estate in one and the same person results in the merging of the lesser, that is, the sinking of it, in the greater, but the two estates must meet in one and the same person and at the same time. In criminal law *merger* can exist only when a misdemeanor is a constituent part of a felony; thus, for a

Mere.

conspiracy to commit a felony to be merged in the felony the latter must actually have been committed. *Merge* must not be confounded with *surrender* or *extinguishment*, tho in its effects it resembles both.

2. One who merges. 3. A commercial combination of a number of interests or companies in one; a trust.

mergh, 1 *mūr*; 2 *mēr*, *n.* [*Dial.* or *Obs.*] Marrow.

Mer-gi-nā, 1 *mēr-jā'nā*; 2 *mēr-jā'nā*, *n.* *pl.* *Ornith.* A subfamily of anatoid birds; mergansers. *Mer'gus*, *n.* (*t. g.*)

[*L.*, *< mergo*, dive.] — *mer'gin* (*es*, & *n.*)

Mer-gul', 1 *mēr-gū'*; 2 *mēr-gū'*, *n.* 1. A district in Tennessee division, Lower Burma. 2. Its capital. — *Mer-gul't*.

Mer-gul' Ar'ehl-pe'l'a-go. A group of islands in the Gulf of Bengal, S. of Burma.

Me'rgu-lus, 1 *mūr-gū-lus*; 2 *mūr-gū-lūs*, *n.* Same as *ALLE*.

me'ri-a-um, 1 *mēr-i-um*; 2 *mēr-i-um*, *n.* [*L.*, *< mēria*, *pl.* *Entom.* A posterior infected part of the metasternum of beetles. *< Gr. mēriaton*, neut. s. of *meriatos*, belonging to the thigh, *< mēros*, thigh.]

Mer'i-bah, 1 *mēr'-ba* or *mēr'-bā*; 2 *mēr'-ba* or *mēr'-bā*, *n.* *Bib.* *Ez.* xvii, 7. [*Heb.*, strife.] [*Chron.* viii, 34.]

Mer'ib-ba'al, 1 *mēr'-bē'al*; 2 *mēr'-bē'al*, *n.* *Bib.* 1 — *mer'ic*, *suff.* See *MEROUS*.

mer'l-carp, 1 *mēr'-kār*; 2 *mēr'-kār*, *n.* One of the two carpels that compose the fruit of a plant of the parsley family. [*< Gr. meros*, part, + *karpōs*, fruit.]

Me-r'i-el, 1 *mēr'-rēl*; 2 *mēr'-rēl*, *St. Angela de* (?; 1474-1540). An Italian religious teacher; foundress of the Ursulines; canonized, 1807.

Me'ri-da, 1 *mēr'-dā*; 2 *mēr'-dā*, *n.* 1. A city in Badajoz province, Spain; it has many Roman remains. 2. A city; capital of Yucatán state, Mexico. 3. A state in Venezuela, South America. [*of part* of an empire.]

mer'i-darch, 1 *mēr'-dār*; 2 *mēr'-dār*, *n.* *Hist.* The ruler mer'ide, 1 *mēr'id*; 2 *mēr'id*, *n.* *Biol.* A permanent colony of cells or plastids. [*< Gr. meros*, part, *< merōmat*, share.]

Mer'i-den, 1 *mēr'-den*; 2 *mēr'-den*, *n.* A city in New Haven county, Conn.

me-rid'-ian, 1 *m-rid'-ēn*; 2 *m-rid'-ēn*, *a.* 1. Of, pertaining to, or passing the highest point attained by the sun in its daily course; noonday; as, meridian heat.

The meridian moon shone full into the hovel, and shed a broad light upon their victims. *JANE PORTER* *Scottish Chiefs* p. 679. [*s.* & *n.* 1874.]

2. Being at or pertaining to the highest or culminating point; brightest; as, meridian fame or glory.

Meridian happiness is poured around us. *Young* *The Brothers* act v, sc. 3.

Heraldic Mermaid.

town in Essex county, Mass. 3. A war-ship abandoned by the Federals, April 20, 1861; converted by the Confederates into an ironclad with a powerful ram. She did great damage to the Federal ships in Hampton Roads, where she was met in an indecisive engagement by the Federal ironclad "Monitor," Mar. 9, 1862, after which she retired. She was destroyed May 11 of that year, on the evacuation of the Norfolk Navy Yard by the Confederates. The "Monitor" sank on her way to Charleston. Dec. 31, 1862.

A mechanical contrivance consisting of a set of rectangles that slide over one another, for finding the mean proportional of magnitudes; invented by Eratosthenes, 200 B.C.—*mes'ole'n*, *n.* *Mitral*. Thomsomite.—*mes'o-lec'h-thal*, *a.* *Embryol*. Having the food-yolk located medianly.—*mes'o-lic*, *n.* *Mitral*. A vitreous, colorless or white, fragile, transparent to translucent zeolite, crystallizing in the monoclinic system.—*mes'o-lith'ic*, *a.* Between the paleolithic and neolithic stages.—*mes'o-log'i-cal*, *a.* Of or pertaining to environment in its effects on organisms or races.—*mes'o-log'ic*, *a.* *mes'o-o-gy*, *n.* The study of environment in its effects on organisms.—*mes'-ness*, *n.* *Ecology*.—*mes'o-mac-ga'-ra-nah'*, *n.* *Cranium*. Having a capacity, in males, of 1,810 to 1,950 cubic centimeters; in females, of 1,610 to 1,730 cubic centimeters; said of a skull.—*mes'o-meg-a-pros'o-pous*, *a.* *Cranium*. Having a capacity of the face, in males, of 580 to 640 cubic centimeters; in females, of 450 to 530 cubic centimeters; said of a skull.—*mes'o-men'tal*, *a.* Of, pertaining to, or situated in the middle of the omentum.—*mes'o-mere*, *n.* A protovertebra.—*mes'o-met'a-tar'sus*, *n.* The metatarsal bone of the third toe.—*mes'o-met'a-target*, *n.* *mes'o-met-tris'tis*, *n.* *Pathol*. Inflammation of the middle of the womb.—*mes'o-metric*, *a.* Concerning the body of the womb.—*mes'o-me'tri-um*, *n.* The fold of the peritoneum that supports the uterus; the broad ligament.—*mes'o-me'try*, *n.* *mes'o-me'tric*, *a.* *mes'o-mu'la*, *n.* That form of the embryo of an animal that consists of a collection of mesenchyme between two primary gum-layers.—*Mes'o-my-ce'tes*, *n. pl.* *Bot.* A former class of fungi, a group occurring between the lower or algal fungi, *Phycocetes*, and the higher or fungal fungi, *Mycomycetes*. Compare HEMIASIDIOMYCETES.—*mes'o-my-ce'tous*, *ta.* *mes'o-my-o'di*, *n. pl.* *Ornith*. A division of passerine birds with the intrinsic muscles of the voice organ affixed at or near the middle of the bronchial semi-ring, including the non-singing passerines.—*mes'o-myce'tic*, *a.* *mes'o-my-coph'ron*, *n.* Having the intrinsic muscles of the voice organ affixed at or near the middle of the bronchial semi-rings.—*mes'o-my-o'goust*. II. *n.* A mesomyodian bird.
mes'on, 1 *mes'on*; 2 *més'on*. I. *n.* The plane that divides the body longitudinally into two symmetrical halves; the median or mesial plane. 2. *Mus*. The middle tetrachord in the Greek greater or perfect scale system. [*G. meson*, neut. of *mesos*, middle].
mes'o-na'al, *a.* *Anat*. Of, pertaining to, or situated in the middle portion of the nasal region.—*mes'o-neph'ric*, *a.* *Anat*. Of or pertaining to the mesonephros or mesonephron.—*mes'o-ne-phrit'ic*, *n.* *mes'o-ne-phrit'id*, *n.* *Zool*. A nephridium developed from the mesoderm.—*mes'o-ph'ron*, *n.* Any 1. fold of peritoneum, sometimes seen, by which the kidney is attached to the body-wall. 2. The mesonephros.—*mes'o-neph'ros*, *n.* The middle one of three tubular organs found in connection with the primitive genito-urinary apparatus and formed later than the pronephros; the mid-kidney or Wolffian body. It is the permanent kidney in some animals, as amphibians.—*mes'o-nen'r-it'is*, *n.* *Pathol*. Inflammation of the connective tissue of nerves.—*mes'o-no'tum*, *n.* *Entom*. The dorsal surface of the mesothorax.—*mes'o-no'tal*, *a.* *mes'o-nychi-dae*, *n. pl.* *Mam*. An Eocene family of woodrats with terminal phalanges deeply serrated.—*mes'o-on'ycho'id*, *a.* *mes'o-on'y-chio*, *n.* *S.* *mes'o-on'y-chio*, *n.* *Chem*. Any one of a class of paraffins intermediate between neo- and isoparaffins.—*mes'o-op-a-par'ter-on*, *n.* [*R.A.*] *Entom*. The mesothoracic parapteron.—*mes'o-o-pa-par'ter-al*, *a.* *mes'o-o-pa-ta-gl-i-um*, *n.* *Mam*. The patagium or wing-membrane of a bat between the elbow and the fifth digit.—*mes'o-pec'tus*, *n.* Same as MESOSTERNUM.—*mes'o-pe'fic*, *a.* Same as MESAPELGIC.—*mes'o-pet'a-lum*, *n.* [*Rare*]. The lip of an orchid.—*mes'o-phile*, *a.* *Phytogeo*. Same as MESOPHYLLIC.—*mes'o-phle'u-m*, *n.* *Bot*. One of the most important layers of moisture; especially denoting bacteria which flourish best in cultures maintained in a medium temperature.—*mes'o-ph'lous*, *a.* *Phytogeo*. Same as MESOPHYLIC.—*mes'o-phle-b'tis*, *n.* *Pathol*. Inflammation of the middle coat in veins.—*mes'o-phle'u-m*, *n.* *Bot*. The middle layer of the bark of exogens; the green bark, the most conspicuous in the young shoot.—*mes'o-phragm*, *n.* *Entom*. An internal chitinous prolongation of the metaprasutum of an insect, affording attachment to some of the wing-muscles.—*mes'o-phrag'm*, *n.* *mes'o-phrag'mal*, *a.* *mes'o-phry-on*, *n.* *Anat*. The glabella.—*mes'o-phyl*, *a.* The soft, fleshy part of a mass.—*mes'o-phyl'ic*, *a.* Cellular, relating between the upper and the lower epidermis.—*mes'o-phyll'it*; *mes'o-phyl'lum*.—*mes'o-phyl'ic*, *a.* *Bot*. Being in the middle of a leaf or frond. COOKE'S Fresh-Water Algae p. 329.—*mes'o-phyte*, *n.* *Bot*. A plant requiring medium conditions of moisture and dryness, intermediate between a hydrophyte and a xerophyte.—*mes'o-phyl'ic*, *a.* *mes'o-phyl'ti-um*, *n.* A mesophytic formation.—*mes'o-phyl'tum*, *n.* *Bot*. The boundary between intermode and petiole.—*mes-op'ic*, *a.* *Cranium*. Having a face of moderate breadth across the malar bones, as the negro.—*mes-op'ion*, *n.* *Geol*. A geological species of a trilobite, between the depths of 100 and 500 fathoms; as opposed to *eplankton* and *hypoplankton*.—*mes'o-plank-ton'ic*, *a.* *mes'o-plasm*, *n.* *Protoz*. An intermediate layer in some sporozoans, between the endoplasm and the ectoplasm.—*mes'o-plast*, *n.* A cell-nucleus.—*mes'o-plas'tic*, *a.* *mes'o-plas'tron*, *n.* *Herp*. A plate of the chelonian carapace between the hyoplatron and hypoplostron.—*mes'o-plas'tral*, *a.* *mes'o-plax*, *n.* *Conch*. A median shelly plate of a pholidad bivalve above the beaks of the opposite valves.—*mes'o-plen'ta-ra*, *n.* [*R.A.*, *pl.*] *Anat*. Theseptum between the lungs of mammals.—*mes'o-pleu'ron*, *n.* *Entom*. The lateral pleuralia of the mesothorax.—*mes'o-plou'ron*, *n.* *mes'o-po-lo'nt*, *a.* *Zool*. Having a tooth in the middle of each side of the lower jaw, as certain ziphioid whales (genus *Mesoplodon*).—*mes'o-pod*, *a.* *But*. Having a short stalk in the center.—*mes'o-po'd'al*, *i.* *a.* Of or pertaining to a mesopodial or mesopodiform. II. *n.* A mesopodiale.—*mes'o-po'd'al'e*, *n.* [*L.A.*, *pl.*] One of the bones constituting the third segment of a limb, as those of the wrist or ankle.—*mes'o-po'd'i-um*, *n.* *Conch*. The middle portion of the foot, as in gastropods and pteropods.—*mes'o-podi*; *mes'o-pode'te*, *mes'o-pore'te*, *n.* *Helmint*. One of the irregular cells of the mesenteric spaces of a Ctenophore or polyzoon.—*mes'o-post-seu'tel'tum*, *n.* *Entom*. The postscutellum of the mesonotum.—*mes'o-post-seu'tel'tar*, *a.*
mes'o-po-ta'mi-a, 1 *mes'o-po-to-té-mi-a*; 2 *més'o-po-to-té-mi-a*, *n.* [*Rare*]. A country, region, or district between two rivers.—*mes'o-po-tam'ic*, *a.*
Mes'o-po-ta'mi-a', *n.* 1. The country between the rivers Tigris and Euphrates; in a restricted sense, that part of it N.W. of Babylon and S.W. of Assyria. 2. An Asiatic kingdom of Arabs consisting of the vilayets of Bagdad, Baera, and Mosul; proclaimed, Aug. 23, 1921, capital Bagdad. **Ira'ki**. [*G. Mesopotamia*, *potamos*, *creek*, *mesos*, middle, + *potamos*, river.]

mes/o-po-ta/-ti-an, 1 mes/o-po-tē/mr-an; 2 mēs'ō-po-tā'-mi-an, *a.* Of or pertaining to Mesopotamia; 2. **Mesopotamian architecture**, see ASSYRIAN; BARY-
LONIAN.—**M. art**, the art that flourished on and between the Euphrates and the Tigris in Asia Minor, specialized as Chaldean, Babylonian, and Assyrian art (see these words).

mes/o-præ-scu'tum, *n. Entom.* The prescutum of the mesonotum.—**mes'/o-præ-scu'tal**, *a.*—**mes'/o-pro-sop'ic**, *a.* Having a face of average width.—**mes'/op-sy'che**, *n.* The mesencephalon.—**mes'/o-psy'chic**, *a. Psychol.* Relating to the middle period of mental growth; following the analogy of geology, the term is opposed to *encephalic* and *paleopsychic*.—**mes'/op-sy'chic**, *a. Zool.* Relating to the middle portion of the body wall, consisting of the elements of a pectoral fin, as in sharks.—**mes'/op-ter-yg'i-al**, *a.*—**mes'/op-ter-ygoid**, *i. a. Zool.* Situated at the middle of the pterygoid bone; as, a mesopterygoid process. **II. n.** A mesopterygoid element, bone, or process; in teleost fishes, the posterior of the three pterygoid elements, articulating behind with the metapterygoid, and laterally with the pterygoid; in birds, a part or process articulating with the palatine of the same side or with the basipterygoid process of the sphenoid; sometimes, with both.—**mes'/op-tych'i-al**, *a. Herp.* Relating to the fold across the throat of a lizard, as the scutellary fold.—**mes'/o-tych'i-um**, *n. Embryol.* The peritoneal fold that attaches the testis to the body-wall.—**mes/or'chist'**,—**mes/or'chi-al**, *a.*—**mes'/o-rec'tum**, *n. Embryol.* The fold of peritoneum that encloses the rectum.—**mes'/o-rec'tal**, *a.*—**Mes'/o-re'o-don**, *n. Paleon.* A genus of extinct clovenhoofed Miocene ungulates of the family *Miocolidodontidae*, of North America.—**mes'/o-ret'i-na**, *n.* The middle portion of the retina, consisting of the rod-and-cone and the nuclear layers.—**mes'/o-rhi'n'al**, *a.* Situated between the nostrils.—**mes'/o-rhin'(e)**, *a.* Having a nose of medium width; specif., in craniometry, having a nasal index between 68 and 70.—**mes'/o-rhin'y**, *n.*—**mes'/o-rhin'i-fa**, *n.* Medium width of nose.—**mes'/o-rhin'i-um**, *n. Ornith.* That part of the beak between the nostrils.—**mes'/o-rhin-y**, *n. Anthropol.* The character or state of being mesorhine.—**mes'/o-ro'stral**, *a. 1.* Located on the median line of the beak. **2.** Relating to the beak, or extension of the head, as of the dolphin and other marine mammals.—**mes'/o-sal'pinx**, *n. Anat.* The fold of the peritoneum (part of the broad ligament) that attaches the oviduct to the body-wall.—**Mes'/o-saur'i-a**, *n. pl.* The *Mosasauroia*.—**Mes'/o-saur'i-dæ**, *n. pl. Paleon.* A Carboniferous family of proganosaurian reptiles with an elongate skull, numerous sharp slender teeth, and a narrow jaw.—**Mes'/o-saur'i-e**, *s. g.*—**Mes'/o-saur'i-fa**, *n.*—**mes'/o-sauroid**, *a.*—**mes'/o-scap'u-lar**, *a.*—**Mes'/o-scap'u-lar**, *a.*—**mes'/o-seel'e-cele**, *n. Pathol.* Perineal hernia.—**mes'/o-scle-rom'e-ter**, *n. Mech.* A sclerometer which indicates the hardness of the material tested by the depth of penetration of a weighted rotating stylus.—**mes'/o-scu'tellum**, *n. Entom.* The scutellum of the mesonotum.—**mes'/o-scu'tel-lar**, *a.*—**mes'/o-scu'tum**, *n. Entom.* The scutum of the mesonotum.—**mes'/o-scu'tal**, *a.*—**mes'/o-sci'm'al**, *a.* Relating to the center of intensity of an earthquake.—**mes'/o-sci'm-ing**, *v.* To bring orbits to the eyes at the center of medium dimensions; specif., in craniometry, giving an orbital index between 84 and 89.—**mes'/o-se'm'l-a**, *n.*—**mes'/o-sid'er-i-le**, *n.* A variety of meteorite.—**mes'/o-sig'mold**, *n. Anat.* The fold of peritoneum that is attached to the sigmoid flexure of the colon.—**mes'/o-skie-rom'e-ter**, *n.* Same as MESOSCLEROMETER.—**mes'/o-some**, *n. Conch.* The middle region of the body of a bivalve.—**mes'/o-so'mat'**,—**mes'/o-so-mat'ic**, *a.*—**mes'/o-sperm**, *n. Bot.* An intermediate layer in the testa of some seeds; sarcoderm.—**Mes'/o-sphe'r-um**, *n. Bot.* A large genus of tropical American nymphaeaceae herbs.—**Mes'/o-spor'angium**, *n. Bot.* Same as MESOANGIUM.—**Mes'/o-spo're**, *n. Bot.* The middle membrane of the coat of a spore when it is possible to differentiate three.—**Mes'/o-spo'r-i-um**;—**mes'/o-spo'r'ic**, *a.*—**mes'/o-staph'y-lin(e)**, *a.* Having a palatal index of medium width; specif., in craniometry, having a palatal index of 80.1 to 85.—**mes'/o-staph'y-lin'i-a**, *n.*—**mes'/o-state**, *n. Biol.* A product of a metabolic process; an anastate or a catastate.—**mes'/o-ster'nal**, *a. Anat.* Of or pertaining to the mesosternum.—**mes'/o-ster-neber**, *n.* One of the segments of the gladioli or body of the sternum.—**mes'/o-ster'ne-brat'**,—**mes'/o-ster'ne-bral**, *a.*—**mes'/o-ster'num**, *n. Anat.* The middle portion of the sternum.—**Mes'/o-ste'thorax**, *n. Anat.* The ventral sclerite of the mesothorax.—**mes'/o-ste'thium**, *n. Entom.* The metepisternum.—**mes'/o-sthen'ic**, *a. 1.* Possessing medium strength. **2.** Strong in the middle.—**Mes'/o-stomi'dæ**, *n. pl. Hémint'h.* A family of rhabdocoelous worms having the pharynx complicated, mouth submedian, and efferent duct of ovary serving as a chamber for semen.—**Mes-os'to-mat'i-dat'**.—**Mes-os'to-ma**, *n. (t. g.) Mes'/o-stom'i-dat'.—**mes-os'to-m'id**, *n.*—**mes-os'to-moid**, *a.*—**mes'/o-stome**, *n.* Any worm of the genus *Mesostoma*.—**mes'/o-style**, *n. Bot.* A style intermediate in length between two.—**mes'/o-styl'ous**, *a.* Same as MIDSTYLIOUS.—**Mes'/o-su'ch'i-**, *a.*—**mes'/o-sys'tolic**, *a.*—**mes'/o-sys'tolic**, *a. Pathol.* Pertaining to or occurring in the middle of the systole.—**mes'/o-tan**, *n. Chem.* A clear, oily liquid, CaH₄(OH)COO CH₃OCH₃, employed as an antihemialtic.—**mes'/o-tar'sal**, *a.* Same as MEDITARSAL.—**mes'/o-tar'sus**, *n. Entom.* The tarsus of the second or middle leg.—**mes'/o-tar-tar'ic**, *a. Chem.* Of or pertaining to a variety of tartaric acid.—**mesotartaric acid**, an isomeric variety of tartaric acid that does not deflect the plane of polarization to either the right or left.—**Mesotarsus**, *n.* A synzygal membrane that passes to a tendon from the wall of myometrium.—**Mes'-o-the'ca**, *n. Zooph.* The middle of three laminae of a hydroid perigonium.—**mes'/o-the'ci-um**, *n. Bot.* A layer of comparatively high cells with annular thickenings, formed immediately beneath the epidermis of the wall of a pollen sac; the so-called fibrous layer.—**mes'/o-the'lli-um**, *n. Anat. & Embryol.* **1.** The portion of the mesoderm and the tissues derived from it that in vertebrates forms two principal layers, visceral and parietal, and produces the epithelium of the peritoneum and pleura, the striated muscles, etc. **2.** Epithelium when mesoblastic in origin.—**mes'/o-th'e'i'al**, *a.*—**mes'/o-th'e-rm**, *n. Bot.* A plant of De Candolle's third naturalized class, growing under a moderate degree of heat, from 59° to 68° Fahr. Such plants embrace the great mass of those of the warmer parts of the temperate zones.—**mes'/o-ther'mal**, *a.* Possessing or pertaining to medium warmth.—**mes'/o-th'er'met'**.—**mes'-oth'e-sis**, *n.* [Rare.] That which is placed in the middle or is intermediate; also, the act of placing in the middle.
The Trinity is the idea: the Incarnation, which implies the Fall, is the work; the redemption is the *mesothesis* of the two.—*Theosophical Quarterly*, Vol. 7, No. 2, 1933.*

Mes'-o-thett'.—**mes'/o-th'e'fic**, *a.* In a central location.—**mes'/o-th'e'f'ic**.—**mes'/o-th'o-ra'c'**, *a.* In a central position.—**mes'/o-th'o-ra'ce**, *a.*—**mes'/o-th'o-ra'ce'a**, *n. Entom.* The portion of the pupal skin that covers the mesothorax.—**mes'/o-th'o'rax**, *n. Entom.* The middle one of

the three segments of the thorax, bearing the anterior wings and the middle legs. See *illus.* under COLEOPTERA.—**mes'-o-tro'i-um**, *n.* Chem. A product resulting from the disintegration of thorium, intermediate between radiothorium and thorium.—**mes'-o-ton'ic**, *a.* Of or pertaining to the mean (or intermediate) tone. See TONE.—**mes'-o-troch**, *n.* Helminth. In the larvæ of some marine worms (anellids), a band of ciliated cells encircling the body.—**mes'-ot-ro-cha**, *n.* Helminth. A larval chaetopodous annelid with one or more rings of cilia in the middle of the body.—**mes'-ot-ro-chal**, *n.* Mes'-ot-ro-chous, *a.*—**mes'-o-turbi-nal**, *n.* Anat. Turbid turbinate bone, the lower one of two scroll-like processes forming a portion of the ethmoid bone of the skull.—**mes'-o-tym-pa-nic**, *Jch. i.* 1. Situated in the middle of the bones forming the tympanic pedicle, as the symplectic bone. II. *n.* The symplectic bone.—**mes'-o-type**, *n.* Mineral. Any one of several zeolites, as (1) soda mesotype, same as NATROLITE; (2) lime mesotype, same as SCOLCITE; (3) lime-soda mesotype, same as MESOLITE; and (4) thomsonite.—**mes'-o-var'i-um**, *n.* Anat. The fold of peritoneum by which the ovary is attached to the body-wall.—**mes'-o-var-i-an**, *adj.*—**mes'-o-tral**, *adj.* Median or ventral.—**mes'-o-fra'l-adn'**.—**mes'-o-ven-trie'u-lar**, *n.* Anat. The fold of peritoneum that passes from the stomach to the liver; the gastrophatic omentum.—**mes'-ox-a-late**, *n.* Chem. A salt of mesoxalic acid.—**mes'-ox-al'ic**, *a.* Denoting a deliquescent crystalline acid ($C_2H_2O_6$) formed when alloxan is boiled with barium hydroxid.—**mes'-ox-aly'l**, *n.* Chem. A radical ($C(OH)(CO)_2$) occurring in the structural formula of mesoxalic acid.

Mes'-o-zo'a, 1, mes'-o-zô's; 2, mēs'-o-zō'a, *n. pl.* Zool. A primary division of the animal kingdom, intermediate between protozoans and metazoans, based upon the characters of the *Dipentana*, but usually included in the *Ectozoa*. The animals are vermiform and wormlike, and the without mesoderm, develop metazoic embryos. [**MESO-** + Gr. *zōon*, animal, < *zōos*, living].—**mes'-o-zo'an**, *a.* & *n.*—**mes'-o-zo'on**, *n.*

Mes'-o-zo'ic, 1, mes'-o-zô'ik; 2, mēs'-o-zō'ie, *n.* Geol. The era between the Paleozoic and the Cenozoic; remarkable for the great and maximum development of *Reptilia*, hence called the age of reptiles. It was formerly called the Secondary age. See GEOLOGY. [**MESO-** + Gr. *zōē*, life, < *zao*, live].—**Mes'-o-zo'ic**, *a.*

Mes'-pha-rath, 1, mes'-phā-rath; 2, mēs'-fa-rath, *n.* Bib. (Douai).

Mes'-pil, 1, mes'pil; 2, mēs'pil, *n.* Bot. A medlar.

Mes'-pi-lus, 1, mes'pi-lus; 2, mēs'pi-lūs, *n.* [L.] Bot. A genus of Old World trees of the family Malacaceæ, distinguished by the hard endocarp. *M. germanica* is the medlar.

mes-quit'e, 1, mes-kī'te; 2, mēs-kīt'ē, *n.* Either of two shrubs or small trees of the bean family (*Mimosaceæ*), found in the southwestern United States, and southward to Peru. The larger and better-known is the honey-mesquite (*Prosopis glandulosa*), yielding the sweetish alkaloid gossypin and wormlike caterpillars. The other (*Prosopis pubescens*), the serewah or, or grev-bean as torrilla, has spiral pods. [**MESQ-**, < Mex. Ind. *mex-quitt*; mex-'quitt'; mex-kīt'.—**mes-quit'ā**, < Mex. Ind. *bean*?]. The fruit of the mesquite.

Mes-quite' Pass. A pass in Colorado; elevation, 13,308 ft.

Mes'-ra-ab, 1, mes'rā-ab; 2, mēs'rā-ab, *n.* Bib. (Douai).

Mes'-ra-im, 1, mes'rā-im; 2, mēs'rā-im, *n.* Bib. (Douai).

Mes-ro'b, 1, mes-rōb'; 2, mēs-rōb', *n.* An Armenian monk (367?-44?), the reputed inventor of the Armenian alphabet.

Mes-ro'p't.—**Mes-ro'bi-an**, **Mes-ro'pi-an**, *a.*

mess', 1, mes; 2, mēs, *v. i.* 1. To give a mess to; feed; as, to mess horses. 2. To provide meals for; as, to mess a club. 3. To make into messes; as, to mess vegetables. II. *t.* To take a meal or meals with another or with others; especially, to eat regularly in company, as with a club; belong to a mess, as in the army or navy. The commandant of all his officers messed together, and I was admitted among them.

G. O. TREVELYAN *Macaulay vol. i.* p. 32. [fr. 1877].

mess', *v.* [Colloq.] I. *t.* 1. To mix up together in a disorderly way; make messy and unattractive; as, to mess one's food. 2. To make dirty; befoul; as, to mess one's dress. 3. To throw into hopeless confusion; make a mess of; jumble; as, to mess matters. II. *t.* To make a mess or mixture; intermeddle.

Syn.: see BOTCH.—to mess about. [Slang, Eng.] 1. To treat roughly; tumble about; disorder. 2. To potter about without definite object or result.—to m. and mell, to m. or mell [Scott.], to mix or associate with; be familiar with.

mess', *n.* 1. A quantity of food, or of one particular dish sufficient for one meal or for a particular occasion; as, a mess of pottage; a mess of corn for a horse. She opened de gate, en vid dat, Brer Rabbit, he hop in, en got in a mess er greens, en hop out agin.

J. C. HARRIS *Nights with Uncle Remus* p. 12. [ix. m. & co. 1890.]

2. A number of persons who habitually take their meals together: especially used on board ship and in the army; as, he belongs to my mess. In the United States navy, the chief master-at-arms' mess is the mess of the chief petty officers, the mess of whom is the master-at-arms, who presides. The washmen's mess is the stateroom mess. The commissioned officers' mess is the wardroom mess, while the mess of the boatswain, gunner, carpenter, sailmaker, and machinists is the warrant officers' n.

The term mess is applied either to a family or a number of officers who for convenience live together, engaging one cook and each of the mess taking his turn in the domestic details and providing the supplies.

ELIZABETH B. CUSTER *Following the Guidon* p. 248. [n. 1890.]

3. A set of four persons or things: from the custom of thus subdividing a large dinner-company, still retained in the London inns of court, where parties of four benchers or four students dine together during term; also, the dinners eaten together by judges and barristers when on circuit. 4. Fishing. The sum or total of a haul of fish. 5. [U. S.] The milk given by one cow at a milking. —OF MEAT.—*L. missus*; see MESSAGE.—lower mess, formally, those persons below the salt at table.—mess-boy', *n.* Naut. On a merchant steamer, a boy who waits on the officers' mess.—m.-chest, *n.* Naut. A covered chest in which each mess of a man-of-war's crew keeps small mess-gear.—m.-cloth, *n.* Naut. A tarpaulin laid on the deck and on which meals are spread.—m.-deck, *n.* Naut. The deck where the crew mess; usually the berth-deck.—m.-gear, *n.* The cooking- and table-outfit of a mess.—m.-trap, & m.-kid, *n.* Same as KID.—m.-kit, *n.* The cooking-utensils of a camp-equipage, and the chests containing them.—m.-locker, *n.* A locker for holding mess-gear.—m.-mess, *n.* The act of clubbing together for meals.—m.-stable, *n.* The dining-table of a mess aboard ship.—m.-tin, *n.* A metal vessel in which a soldier receives his food.—m.-whistle, *n.* Naut. The boatswain's pipe to meals.

mess', *n.* [Colloq.] 1. A state of bungling disorder or of dirty confusion.

OD AND WORD METHOD.—**apagoge m.**, same as **REDUCTIO AD ABSURDUM**.—**Apostoll's m.** (*Pathol.*), the use of electricity for treatment of fibroid tumors of the uterus.—**Argelander's m.** (*Astron.*), a method of observing the light fluctuations of a variable star by visual comparisons with stars nearly of the same brightness, near the variable.—**Bradley's m.**, a method of measuring the speed of light by the aberration of the fixed stars, the two extremities of the earth's orbit in a plane at right angles to the direction of these stars being the two points of observation.—**Brand's m.** (*Pathol.*), the use of cold baths to reduce temperature in typhoid and other fevers.—**Brandt's m.** (*Pathol.*), the expulsion of pus, etc., from the Fallopian tubes by pressing them into the uterus by external massage.—**cascade m.**, in the liquefaction of gases, the employment of a refrigerant, such as carbon dioxide, to produce continuous cooling.—**clean-cutting m.** (*Forestry*), a method of conservative lumbering in which the entire stand is cut at one time and reproduction is secured by sowing or planting. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**coppice m.**, same as **SPROUT METHOD**.—**Crédé's m.** (*Pathol.*), 1. A method for prevention of gonorrheal ophthalmia, by disinfection of the vagina of the mother and the instillation into the eyes of a newborn infant of a weak solution of nitrate of silver. 2. Forcing out the placenta after the birth of a child by compressing the uterus with the hand through the abdominal wall.—**Deslandre's spectrographic m.** (*Astron.*), a method of determining the rate of rotation of a planet by comparing the inclination of the lines in its spectrum, as photographed, to those of a standard spectrum.—**double-slit m.**, the method used in the spectroheliograph. See **SPECTROHELIOGRAPH**.—**Dumas's m.** (*Chem.*), a process for the determination of vapor-densities by weighing vapor in a sealed glass bulb, due to the French chemist Dumas.—**error methods** (*Psychophys.*), a name to include the methods of average error and of right and wrong cases; introduced by Wundt in 1883.—**Eulerian m.**, in hydrodynamics, the method that considers the changes of pressure, density, and velocity at a point of space; the statistical method: distinguished from *Lagrangian method*.—**Fizeau-Cornu m.** (*Optics*), the method used for measuring the velocity of light first used by Fizeau and afterward by Cornu.—**Fleisch's myelination m.**, the determination of nerve paths from close observation of the period at which the myelin sheath of the nerve-fibers develops.—**Foucault's m.** (*Optics*), a method of measuring the velocity of light by means of a revolving mirror, from which light is reflected to a distant mirror, and back again, the change in position of the revolving mirror in the interval being indicated on a scale, and furnishing the data for the computation.—**Frobenius's m.** (*Math.*), see **FROBENIUS**.—**Gallton's m.** (*Psychophys.*), a term sometimes applied to the questionnaire method because Gallton made conspicuous use of it in the study of visualization.—**Gibb's vector m.** (*Physics*), a method of computing orbits by the employment of Gibb's vector-analysis.—**Golgi m.** (*Histol.*), a method in which the nerve-cells and their branches are stained with bichromate of silver to distinguish them.—**gradation methods** (*Psychophys.*), a name to include the methods of minimal changes and of mean gradations: introduced by Wundt in 1883.—**Grafflin m.** (*Phot.*), a process invented by Mgr. Grafflin, of Paris, particularly adapted to photographing writings and documents, in which the letters of the original appear in white against a dark background. Only one copy can be made, but the manuscript can be photographed while lying on a table.—**Gram's m.** (*Bacteriol.*), a staining method, founded on the principle that some bacteria after being stained with anilin dyes are decolorized after being treated with a solution of iodopotas- sio iodid, while others retain their color.—**group m.** (*Forestry*), a method of utilizing groups of young forest-trees which have grown up in openings made by lumbering, insect damage, windfall, snowbreak, or other agency, by making them the nuclei for future forests. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**group-seed m.** (*Forestry*), a method of conservative lumbering in which a forest is reproduced after a single cutting, by leaving in groups seed-trees of the kind desired. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**Hampe's m.** (*Chem.*), a method for the estimation of oxygen, based upon the reduction of finely divided copper oxid in the presence of hydrogen.—**Hehner m.** (*Chem.*), an analytical process applied to oils and fats, especially butter, which decides the percentage of insoluble fatty acids that can be obtained from a fat.—**indirect m. of difference** (*Logic*), the use in combination of the methods of agreement and difference. See **INDUCTIVE METHOD**, under **INDUCTIVE**, *a.*—**inductive m.** (*Logic*), see **INDUCTIVE**, *a.*—**interferential m.** (*Physics*), the system of utilizing the phenomena resulting from the interference of light to measure limited distances. See **REFRACTOMETER**.—**inverse m. of fluxions** (*Math.*), the treatment of problems of integration by means of fluxions.—**Isthmus m.**, a method of testing the magnetic permeability of a sample of iron by causing it to form a magnetic bridge or isthmus between the poles of an electromagnet.—**Keeler's spectrographic m.** (*Astron.*), a method of determining the rate of rotation of a planet by ascertaining the apparent inclination of the lines in its spectrum to those in the sky-spectrum as photographed immediately afterward on the same plate.—**Kjeldahl m.** (*Chem.*), a method first suggested by Kjeldahl for estimating nitrogen in organic compounds, based upon a treatment of the substance with concentrated boiling sulfuric acid with or without mercuric oxid, copper, or p. tassium sulfate. The ammonia formed during the oxidation is expelled by alkali and titrated: applied to fertilizers, etc.—**Kristeller's m. of expression** (*Obstet.*), a method of assisting childbirth by means of external manual pressure and friction.—**Laborde's m.** (*Med.*), a method of inducing respiration by drawing the tongue forward and allowing it to fall back, repeated rhythmically: a means of resuscitation in asphyxia.—**Littrow's m.** (*Naut.*), a method for determining longitude by circum-meridian altitudes: unreliable outside the tropics.—**loss-supply m.** (*Elec.*), a method of testing two electric machines of similar size by simultaneously furnishing power to the one and taking it from the other, the active power-consumption representing the combined power-losses of the two machines.—**meth'od-less, a.** Without system or order; irregular.—**m. of agreement**, see **INDUCTIVE METHOD**, under **INDUCTIVE**, *a.*—**m. of average error** (*Psychophys.*), a method of sensation-measurement in which, of two stimuli, one is adjusted until it appears to be the same as the other, and the average error of observation is calculated from a series of such trials.—**m. of characteristics**, a geometric method (established by Chasles on his correspondence principle, 1864) at the basis of enumerative geometry.—**M. of Clement and Desormes** (*Physics*), a method for determining the ratio of the two specific heats of a gas, by sudden compression with a piston.—**m. of concomitant variations**, see **INDUCTIVE METHOD**, under **INDUCTIVE**, *a.*—**m. of difference**, see **INDUCTIVE METHOD**, under **INDUCTIVE**, *a.*—**m. of divisors** (*Math.*), a method of finding the commensurable roots of an equation

from the factors of the absolute term of an equivalent equation with integral roots.—**m. of equivalents** (*Psychophys.*), a modification of Fechner's method of average error, in which the stimuli are applied to different parts of the sense-organ, with a view to equalizing their values as thus applied.—**m. of extinction** (*Astron.*), a method of determining the magnitude of stars by observation through a wedge of neutral tinted optical glass. The point at which the light of the star is totally extinguished to the observer, as the relation between the eye and the wedge is gradually changed, will exactly indicate the magnitude of the star.—**m. of infinitesimals** (*Math.*), Leibnitz's method for the infinitesimal calculus.—**m. of isoperimeters** (*Geom.*), a method, devised by Descartes, but often attributed to Schwab, of finding the diameter of a circle whose circumference is equal in length to a given straight line, by taking one-fourth of this line and describing a square on it, and then finding an infinite series of points on the extended diagonal of such square of such a nature that perpendiculars dropped from them to such straight line form with the segments of it so created in each case two sides of a rectangular geometrical figure whose area is equal to one-fourth of that immediately preceding. The diameter sought will be that portion of the given straight line marked off by the bases of all these figures.—**m. of just noticeable, least, or minimal differences**, see under **DIFFERENCE**, *n.*—**m. of mean gradations** (*Psychophys.*), a method of sensation-measurement, in which two widely separated stimuli are applied and a third and intermediate stimulus is varied by small changes of intensity until it seems to divide the total sensation into two equal halves.—**m. of minimal changes or limits** (*Psychophys.*), later forms of the method of just noticeable differences, as developed by Wundt and Mueller. See **DIFFERENCE**, *n.*—**m. of passage** (*Bacteriol.*), a means by which the virulence of disease-producing bacteria is augmented by inoculation of a series of animals, one from the other.—**m. of quadratives** (*Math.*), a method for the approximate integration of any expression by the summation of parts in which the difference between the limits is so small that the integral for each is practically the equivalent of some known integral.—**m. of reaction** (*Metall.*), a method of freeing a metal from its compounds by bringing about the combination of the non-metallic constituent of one with the non-metallic constituent of another, as by the formation of sulfur dioxide from lead sulfid and lead oxid, thus freeing the lead.—**m. of reciprocal polars** (*Geom.*), a method employed systematically by Poncelet of duplicating or dualizing all descriptive and many metric properties of curves and surfaces by the consideration of polar reciprocals.—**m. of residues**, see **INDUCTIVE METHOD**, under **INDUCTIVE**, *a.*—**m. of right and wrong cases** (*Psychophys.*), a method of sensation-measurement, in which one or more (usually slight) stimuli, which differ in intensity from a standard stimulus by being either above or below the latter, are presented to the observer and he is asked to judge the intensity-relation of the component stimuli, as second stimulus, greater, less, or doubtful, etc. By distributing the right and wrong judgments in accordance with the theory of probabilities, a measure of precision is secured. A modification of this method, which excludes all doubtful judgments, has been introduced by J. Jastrow and E. Kraepelin, and is termed the **m. of right and wrong answers**.—**m. of Roy and Ramsden** (*Physics*), a method of measuring the linear expansion of metal bars by direct observation through microscopes.—**m. of sections** (*Engin.*), a method of calculating the stresses in the parts of a beam, truss, etc., by utilizing the equations indicating the conditions of equilibrium, etc., of a section cut from such beam or truss.—**m. of substitutions** (*Math.*), a method based on replacing one quantity by another or by a function.—**m. of successive thinnings** (*Forestry*), same as **STAND METHOD**.—**methods of adjustment** (*Psychophys.*), a group of methods for the determination of the relation between stimulus and sensation, in which a variable stimulus is adjusted until it appears equal to a second constant stimulus, as in the method of average error, or to a certain relation with a constant stimulus, as in the method of minimal changes.—**mixed m.**, various processes of etching, mezzotint, line-engraving, combined with rouletting on one printing-plate.—**Montessori m.**, a system of teaching small children by training their sense-perception, and by directing their activity rather than by controlling it: devised by Dr. Maria Montessori, of Rome, Italy, in 1907.—**Newton's m. of approximation** (*Math.*), a method of obtaining the roots of algebraic equations.—**Ogata's m.** (*Pathol.*), a method of mechanical stimulation of respiration, consisting, in the case of a newborn child, of bending the body with the feet toward the head and then suddenly suspending it head downward, and in the case of asphyxiation by an anesthetic, of shaking the lower thorax to stimulate the heart.—**open m.** (*Pathol.*), a method of treating wounds by exposing them freely to the air.—**patch m.** (*Forestry*), the clear-cutting of small patches to invite reproduction by self-sown seed from the surrounding forest.—**point-to-point m.** (*Elec.*), a method of determining the wave-forms of alternating electric currents by finding successive points of the curves separately.—**polygonal m.**, in topographical surveying, a method of determining the relative positions of a number of points by surveying a series of consecutive lines joining such points: an alternative to triangulation.—**pumping-back m.**, same as **LOSS-SUPPLY METHOD**.—**questionary m.** (*Psychophys.*), a method of determining the range of mental variation, in which tables of questions dealing with some psychological topic are sent to a large number of persons and the replies collated and classified.—**reckoning m.** (*Psychophys.*), an enumeration method, of which the method of right and wrong cases is typical.—**reserve-seed m.** (*Forestry*), that method of conservative lumbering in which, in a stand which is being reproduced by self-sown seed, a number of trees are left uncult for a period, usually during a second rotation, after the stand itself is reproduced. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**reserve-sprout m.** (*Forestry*), that method of conservative lumbering in which an overwood composed of seedling trees, or selected sprouts, is maintained above a stand of sprouts.—**Roemer's m.**, a method of estimating the velocity of light: discovered by Olaus Roemer (1673) from observation of Jupiter's moons in eclipse, noted when that planet and the earth were nearest and when farthest apart.—**Rousseau's m.** (*Photom.*), a method for measuring the mean spherical intensity of a source of light.—**Sayre's m.** (*Surg.*), a treatment of Pott's disease, or of lateral curvature of the spine, by holding the patient up by bands under the arms and applying a plaster-of-Paris jacket around the body for spinal support.—**scattered-seed m.** (*Forestry*), that method of conservative lumbering in which reproduction is provided for by leaving, after a single cutting, scattered seed-trees of the kind desired. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**Schleier's m.** (*Med.*), a method of anesthetization, employed (1) for local anesthesia, in the form of a subcutaneous injection of a weak aqueous solution of cocaine, the water being for the purpose of distending the tissues and

diminishing the blood-supply, and (2) for general anesthesia, in the form of an inhalation of small amounts of ether, chloroform, and petroleum ether.—**Schott m.** (*Med.*), the treatment of heart-disease by regulated exercises and baths of effervescent water.—**serial m.**, any method of sensation-measurement which presents a graded series of stimuli to an observer and requires him to pronounce upon their intensity or affective tone, as pleasant, unpleasant, indifferent, the results being then recorded in graphic form.—**single-tree m.** (*Forestry*), that method of conservative lumbering in which reproduction from self-sown seed under the shelter of the old stand is invited by the cutting of single trees. This cutting may be made throughout the forest, as in some woodlots, or in definite portions of the forest in turn. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**sprout m.** (*Forestry*), that method of conservative lumbering in which reproduction is obtained by sprouts. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**stand m.** (*Forestry*), that method of conservative lumbering in which reproduction is secured from self-sown seed by means of successive cuttings made throughout the mature stand, thus leading to the production of a new stand. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**statistical m.**, in statistical mechanics, the method of simultaneous consideration of many similar systems differing in configuration and velocity.—**step-by-step m.**, same as **POINT-TO-POINT METHOD**.—**strip m.** (*Forestry*), a method of conservative lumbering in which reproduction is secured on clear-cut strips by self-sown seed from the adjoining forest. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**strip-stand m.** (*Forestry*), a modification of the stand method, in which reproduction-cuttings are not made simultaneously throughout the stand, but the stand is treated in narrow strips at such intervals that reproduction-cuttings are generally going on in three strips at one time, one strip being in the removal stage, one in the seeding stage, and one in the preparatory stage. GIFFORD PINCHOT *Terms Used in Forestry*, U. S. Dept. of Agr., Bulletin No. 61. [GOV. PTC. OFF. '05.]—**Sylvester's m.** (*Math.*), an algebraic method for discovering how many of an equation's real roots lie between any stated limits.—**Sylvester's dialytic m.** (*Math.*), an algebraic method of elimination. See **DIALYTIC**.—**Sylvester's m.** (*Pathol.*), a method of artificial respiration and resuscitation of the drowned by placing the patient on his back with the shoulders raised, drawing out his tongue and effecting inspiration by extending his arms up to the side of his head and expiration by flexing them across his chest with pressure. This is repeated slowly and regularly sixteen times a minute.—**Thiersch's m. of skin-grafting** (*Surg.*), the application of relatively large pieces of skin to the affected part, as opposed to the employment of minute particles.—**Welsh m. of copper-smelting**, the treatment of copper ore in reverberatory furnaces, originating in Wales, consisting in partial roasting of the ore followed by oxidizing smelting to matte, the process being repeated until crude or blister copper is obtained, which is finally refined by oxidizing melting, followed by poling to refined copper.—**Will and Varrentrapp's m.** (*Chem.*), a method devised for estimating nitrogen in organic substances, based upon heating the substance in question with soda-lime in a hard glass tube, the ammonia formed being expelled and absorbed in hydrochloric acid. The ammonium chloride obtained is estimated either volumetrically or gravimetrically: usually replaced by Kjeldahl's method.

meth'od-as'ter, 1 meth'ad-as'ter; 2 meth'od-as'ter, *n.* [Rare.] One who employs scientific methods ignorantly, or is inclined to overestimate their importance.

meth'od'ic, 1 meth'ed'ik; 2 meth'od'ic, *1. a.* 1. Of or pertaining to the school of methodist physicians. See **METHODIST**, *n.*, 3. 2. Same as **METHODOICAL**. **II. n.** 1. A physician of the methodist school. 2. *pl.* Methodology.

meth'od'ic-al, 1 meth'ed'ik-al; 2 meth'od'ic-al, *a.* 1. Displaying method; given to or characterized by orderly arrangement; having system; regular; orderly; as, a *methodical worker*. 2. Arranged with method; disposed systematically; as, a *methodical report*. 3. Characteristic of the old school of physicians known as *methodists*. [*< LL. methodicus, < Gr. methodikos, < methodos, see METHOD.*] **meth'od'ic-ly**, *adv.*—**meth'od'ic-ness**, *n.*

meth'od-ism, 1 meth'ad-izm; 2 meth'od-ism, *n.* 1. The state of being methodical or characterized by a method; action according to method or system.

Those very men who undertake to tutor the species in virtue apart from godliness, and apart from the *methodism* of the gospel, are rendered harmless by disappointment. *WELSH CHALMERS Lect. on Romans* lect. xxiii, p. 118. [*c.* a. mos. 1874.]

2. [*M.*] The spirit, doctrines, polity, and worship of the Methodists.

Methodism may be variously regarded, as descriptive of a particular religious tendency, or of a great ecclesiastical body. [*1. G. ROSSAS Church Systems of Eng.* lect. xi, p. 847. (*h.* a. 1881.)

Meth'od-ist, 1 meth'ad-ist; 2 meth'od-ist, *n.* 1. A member of any branch of the Protestant Christian church that has grown out of the epochal religious movement begun at Oxford University in the earlier half of the 18th century, and starting in the students' club for religious improvement and study of the Bible, in which John Wesley (1703-1791) as a leader was associated with Charles Wesley, George Whitefield, and others. Nearly all of the followers of Wesley, who mainly constitute the Methodist churches, adhere to Arminianism in theology; nearly all of Whitefield's, to Calvinism. Methodist Church polity ranges all the way from independency through presbytery, to moderate episcopacy. In the United States the prevailing polity is a moderate episcopacy, and the ministry is divided into two orders, the deacons and the elders, or presbyters; in Great Britain and her colonies there is only one, the elders. The title *bishop* expresses superiority in administrative functions, but not in ordination. The members of the church are divided into small groups, known as *classes*, which again form *societies*, corresponding to parishes in other denominations. Several societies form a *circuit*. Among the recognized officers are (1) *exhorters*, who hold meetings for exhortation and prayer; (2) *local preachers*, or laymen, licensed to preach while pursuing their ordinary avocations; and (3) *itinerant preachers*, who are exclusively devoted to the ministry. In some of the American branches the authority over a *district* is in the hands of a *prevailing elder* or *district superintendent*. All these appointments are of a temporary character, except that of bishop, which is for life. The Methodists originally sprang out of the Church of England, as a revolt against the apparent formalism and apathy of the established order, and its neglect of the masses. They have spread over the world and now number many millions. The chief branches of Methodists in Great Britain (extending more or less into its dependencies) are, in the order of their numbers: (1) *Wesleyans*, the original body, founded in 1739; (2) *primitive Methodists*, organized in

Me'tis, 1 mē'tis; 2 mē'tis, *n.* 1. *Gr. Myth.* Zeus's first wife, the daughter of Oceanus and Tethys. She was swallowed during her first month of pregnancy by Zeus, who was afraid that her offspring might excel himself; but the child, Athena was eventually born by springing full-grown from the head of Zeus. 2. *Astron.* See table under PLANET.

me'tis'sage', 1 mē'tis'sāz; 2 mē'tis'sāzh, *n.* [L.] Intermarriage between races; miscegenation.

met-o-che, 1 mē'tō-ki; 2 mē'tō-ō-cē, *n.* *Arch.* An interval between two dentils in a cornice. [*< Gr. metochē*, sharing, *< meta*, with, + *echō*, have.]

met-o-chy, 1 mē'tō-ki; 2 mē'tō-ō-ey, *n.* The interrelation of a host insect and its parasite that is not known to be injurious or disagreeable to the host. [*< Gr. metochē*, sharing.]

met'o-don-ti'a-sis, 1 mē'tō-dōn-ti'ō-sis; 2 mē'tō-dōn-ti'ō-sis, *n.* *Med.* 1. Faulty or irregular development of the teeth. 2. Second dentition. [*< MET-* + *Gr. odous*, tooth.]

Me'te-cl-e, 1 mē'tē-shi; 2 mē'tē-shi-ē, *n. pl.* Same as METEORIC.

me-te-clous, **me-tō-clsm**. *Bot.* Same as HETEROCIOUS, etc. [*< MET-* + *Gr. otikos*, house.]

met'ol, 1 mē'tōl or -ol; 2 mē'tōl or -ōl, *n.* *Phot.* A derivative of cresol used as a photographic developer, and producing soft, well-modulated negatives. [*< METHYL* + *-ol*.]

met'ol-quin'ol, *n.* A photographic developer compounded of metol and hydroquinone; often abbreviated to *M. Q.*

met'o-le'ic, 1 mē'tō-lē'ik; 2 mē'tō-lē'ic, *a.* *Chem.* Of, pertaining to, or obtained from olein.—**metoleic acid**, an insoluble oily compound, probably a mixture, derived from oleic acid by treatment with sulfuric acid.

met'o-ma-ni'a, *n.* Same as METOMANIA.

meton, mē'tōn, *n.* Metonymy.

Me-to-ni'e, 1 mē'tō-ni'e; 2 mē'tō-ni'e, *a.* Relating to or named after Meton, an ancient Athenian astronomer who lived in the 5th century B. C. See CYCLE.

me-ton'o-ma-to'sis, 1 mē'tōn'ō-mā-tō'sis; 2 mē'tōn'ō-mā-tō'sis, *n.* A change or revision of names. [*< MET-* + *Gr. onoma* (-s), name, + *-osis*.]

met'o-nym, 1 mē'tō-nīm; 2 mē'tō-nīm, *n.* A word used as a substitute for another. See METONYMY.

met'o-nym'ic, 1 mē'tō-nīm'ik; 2 mē'tō-nīm'ic, *a.* Relating to metonymy; using one word or name for another. **met'o-nym'ic-ally**, *adv.*

me-ton'y-my, 1 mē'tōn'y-mi; 2 mē'tōn'y-my (XII), *n.* *Rhet.* A figure of speech that consists in the naming of a thing by one of its attributes or accompaniments; as, "the ermine," for "the bench of judges"; "the bottle," for "drunkenness." [*< LL. metonymia*, *< Gr. metōnymia*, *< meta*, after, + *onyma*, name.]

Metonymy is the exchange of names between things related. It is founded not on resemblance but on the relation of, 1. Cause and effect. 2. Progenitor and posterity. 3. Subject and attribute. 4. Place and inhabitant. 5. Container and thing contained. 6. Sign and thing signified. 7. Material and thing made from it. QUACKENBOS *Rhetoric* pt. iii, p. 248. [A. 1882.]

met'o-pan-tral'i-a, 1 mē'tō-pan-trāl'i-a; 2 mē'tō-pan-trāl'i-a, *n.* *Pathol.* Any painful condition of the frontal sinuses. [*< Gr. metopon*, forehead, + *antron*, cavity, + *algos*, pain.]

met'o-pan-tri'tis, 1 mē'tō-pan-trā'tis or -trī'tis; 2 mē'tō-pan-tri'tis or -trī'tis, *n.* *Pathol.* Inflammation of the frontal sinuses.

met'o-pan'trum, 1 mē'tō-pan'trūm; 2 mē'tō-pan'trūm, *n.* [*-TRA*, *pl.*] The frontal sinus. [*< Gr. metopon*, forehead + *antron*, cavity.]

met'o-pe, 1 mē'tō-pē; 2 mē'tō-pē, *n.* *Arch.* 1. A slab, sculptured or plain, between triglyphs in a Doric frieze.

The metopes of the exterior entablature exhibited a succession of ninety-two groups in high relief. SPURGEON AND REYNOLDS *Antiquities of Athens, Parthenon* p. 53. [Tr. & n. 1841.]

2. Originally, the opening supposed to have been left by primitive Greek builders between the ends of adjoining ceiling beams. [*< L. metopa*, *< Gr. metopē*, *< meta*, between, + *opē*, hollow.]

met'o-pe', *n.* 1. The sculptured metope—containing a figure of a Greek. (From the entablature of the Parthenon.)

2. *Zool.* The central front portion of a crab; so called by Huxley. [*< Gr. metopon*, forehead, *< meta*, between + *ops* (-p), eye.]—**Me'to-pl-a**, *n.* *Paleont.* 1. A genus of labyrinthodonts from the Keuper (Upper Trias) of Württemberg, having heavy ribs, large pectoral plates, a triangular skull, and rather weak dentition. 2. A species of Silurian trilobites.—**me-top'le**, *a.* Of or pertaining to the forehead; frontal.—**me'to-pl-on**, *n.* [*-PI-A*, *pl.*] See CRANIOMETRY.—**met'o-plum**, *n.* The condition of having a persistent metopie or frontal suture.—**met'o-po-dyn'i-a**, *n.* *Pathol.* Neuralgia of the forehead and frontal sinuses.—**met'o-po-man'cy**, *n.* [Rare.] Divination by inspection of the physiognomy.—**met'o-po-scop'ic**, *met'o-po-scop'i-cal*, *a.* Pertaining to metoposcopy.—**met'o-pos'co-pist**, *n.* One versed in metoposcopy.—**met'o-pos'co-py**, *n.* The study of physiognomy; the art of judging of character or disposition by inspection of the features.

met'os'te-on, 1 mē'tōs'tē-on; 2 mē'tōs'tē-on, *n.* [*-TE-A*, *pl.*] *Ornith.* The posterior lateral piece of the breast-bone. [*< MET-* + *Gr. ostion*, bone.]—**met'os'te-al**, *a.*

met'o-vum, 1 mē'tō-vūm; 2 mē'tō-vūm, *n.* [*-VA*, *pl.*] A meroblastic egg modified from its primitive condition. [*< MET-* + *L. ovum*, egg.]

met'ox'a-zin, 1 mē'tōks'ā-zin; 2 mē'tōks'ā-zin, *n.* *Chem.* One of the classifications of oxazin, depending on the relative position of atoms of nitrogen and oxygen, certain peroxides entering into the composition of important dyes. **met'ox'a-zin-et**.

met'ox'e-nous, 1 mē'tōks'ē-nūs; 2 mē'tōks'ē-nūs, *a.* *Bot.* Same as METECIOUS or HETEROCIOUS.

me'tr-, 1 mē'tr-; 2 mē'tr-, Same as METRO-; a combining form meaning "womb." The following words are self-explaining by their elements; as, "metranemia," anemia of the womb.

metranemia metrectopia metremphasia
 metratonia (atony) metrectosis metremphysema
 metratonia (atrophy)

Words beginning with this prefix will be found in alphabetical place, either singly or in groups.

met'ra, 1 mē'trā; 2 mē'trā, *n.* A pocket-impliment combining the uses of many instruments, as thermometer, level, plummet, and lens. [*< Gr. metra*, *pl.* of *metron*, measure.]

met'ra-gyr'tes, *n. pl.* See RHEAT.

met'ra-ki-ne'sis, *n.* *Pathol.* Feebleness of labor-pains.—**me'tra-ki-a**, *n.* *Pathol.* Pain in the womb.

met'ran, 1 mē'trān; 2 mē'trān, *n.* Same as ABUNA.—**met'-ran-ate**, *n.*

me'tra-nas'tro-phe, *n.* *Pathol.* Inversion of the womb.—**me'tra-nu-rism**, *n.* *Pathol.* Same as METRECTASIA.

me'tra-term, *n.* *Helminth.* The short, thick-walled terminal part of the uterus in some trematodes.

me'tre, *n.* Same as METER.

met'rec-ta-si-a, *n.* *Pathol.* An enlargement of the non-pregnant womb.—**met'rec-tat'ic**, *a.*—**me'trec-to-my**, *n.* *Surg.* Excision or removal of the uterus.—**me'trec-to-py**, *n.* *Pathol.* Uterine displacement.—**met'rec-top'ic**, *a.*—**me'trec-to'sis**, *n.* *Pathol.* Ulceration of the uterus, particularly the neck.—**me'tre-mi-a**, *n.* *Pathol.* Congestion of the womb.—**me'tre-mi-a-i**; **me'tro-hē-mi-a-i**;—**me'tre-m'or-rhoid**, *n.* *pl.* Uterine varicose veins or hemorrhoids.—**me'tre-m'or-rhoides**;—**me'tre-m'phy-se'ma**, *n.* *Pathol.* Same as PHYOMETRIA.

me'tret, 1 mē'trēt; 2 mē'trēt, *n.* Any decimal subdivision of a meter.

me'tre'fa, 1 mē'trē'fā; 2 mē'trē'fā, *n.* Same as METRETES.

me'tre-rys'ma, *n.* *Pathol.* Morbid dilatation of the womb. [*< METR-* + *Gr. eury*, wide.] **me'tre-rys'must**.

me'tri-a, 1 mē'trī-a; 2 mē'trī-a, *n.* *Pathol.* Puerperal fever.

me'trie, 1 mē'trī; 2 mē'trī, *a.* 1. Of or pertaining to measure or meter; relating to measurement. 2. Of or pertaining to the meter as a unit of measurement, or to the metric system. See METRIC SYSTEM. **me'tri-cal**;—**me'trie geometry**, geometry introducing the axioms of distance and thence determining the extent of geometrical magnitudes, as areas, volumes, angles, and lengths.—**m. horse-power**, same as FRENCH HORSE-POWER. See HORSE-POWER.

—**m. horse-power minute**, the energy represented by one metric horse-power exerted for one minute (32,550 foot-pounds).—**m. property** (*geom.*), a property involving quantity or measurement.—**m. relation**, any relation depending upon quantity or its measurement.—**m. system**, a system of weights and measures depending upon the meter, in which the original factors are derived from the meter. The system includes measures of length, of which the meter is the unit; measures of surface, of which the are is the unit; measures of capacity, of which the liter is the unit; and weights, of which the gram is the unit. Ascending in value from each unit the measure is multiplied by ten, and bears a Greek prefix indicating its value, as decimeter, which is 10 meters; hectometer, which is 100 meters; kilometer, which is 1,000 meters; and myriometer, which is 10,000 meters. Similarly descending in value the terms bear a Latin prefix indicating their relation to the unit, as decimeter, which is 1/10 of a meter; centimeter, which is 1/100 of a meter; and millimeter, which is 1/1,000 of a meter. The prefix *mega-*, when employed, denotes a multiple by one million; the prefix *micro-*, the millionth part. The following tables show the various units with corresponding factors in other systems. For exact definitions of *AMB*, *GRAM*, *LITER*, and *METER*, see these words in their proper vocabulary places. Also compare MEASURES and WEIGHTS and diagram on opposite page.

The metric system originated in France, where it was definitely adopted in 1790. The United States legalized it in 1866, and in 1893 adopted the meter and kilogram as the fundamental standards from which the yard and pound are to be derived. Great Britain also has legalized it, and it is in actual use in every civilized nation except Montenegro.

MEASURES OF LENGTH.

Metric Denomination and Value.	Equivalent in Common Use.
myr'i-a-me'ter.....	10,000 m
kil'o-me'ter.....	1,000 m
hec-to-me'ter.....	100 m
dec'a-me'ter.....	10 m
met'er.....	1 m
dec'i-me'ter.....	1/10 m
cent'i-me'ter.....	1/100 m
mil'l-me'ter.....	1/1,000 m

NOTE: In the United States the value of the meter is legalized at 39.37 inches, while in Great Britain and France its exact value is given as 39.37079 inches.

FACTORS FOR CONVERSION: One inch = 0.0254 meter; one foot = 0.3048 meter; one mile = 1,609.35 meters.

ABBREVIATIONS*: cm = centimeter, dm = decimeter, km = kilometer, m = meter, mm = millimeter.

MEASURES OF SURFACE.

Metric Denomination and Value.	Equivalent in Common Use.
hec'tare.....	10,000 m ²
are.....	100 m ²
cent'are.....	1 m ²

FACTORS FOR CONVERSION: One square inch = 0.0006452 square meter; one square yard = 0.836 square meter; one acre = 4,047 square meters.

ABBREVIATIONS*: a = are, ha = hectare, m² = square meter.

MEASURES OF CAPACITY.

Metric Denomination and Value.		Equivalent in Common Use.
myr'i-a-me'ter.	10,000 m	6,213 miles
kil'o-me'ter.	1,000 m	0.62137 mile (3,280 feet, 10 inches)
hec-to-me'ter.	100 m	328 feet, 1 inch
dec'a-me'ter.	10 m	39.37 inches
me'ter.	1 m	39.37 inches

FACTORS FOR CONVERSION: One cubic inch = 0.0164 liter; one bushel = (U. S.) 35.24 or (British) 36.35 liters; one quart (dry measure) = 1.1011 liters; one peck = (U. S.) 8.81 or (British) 9.09 liters; one cubic yard = 765 liters; one fluid dram = 0.00369 liter; one fluid ounce = 0.0296 liter; one gill = 0.1183 liter; one quart (liquid measure) = 0.9463 liter; one gallon standard (231 cubic inches) = 3.785 liters; one gallon imperial (277 cubic inches) = 4.543 liters.

ABBREVIATIONS*: dl = centiliter, cm³ = cubic centimeter, dal = decaliter, dl = deciliter, dm³ = cubic decimeter, hl = hectoliter, l = liter, m³ = cubic meter, ml = milliliter, mm³ = cubic millimeter.

M

Metronome.

use (1698) of a pendulum to indicate how pieces should be played or sung is credited to Étienne Loulié, a music-teacher. Subsequently, various inventions were patented, but it remained for a mechanist of Amsterdam, Dietrik Nikolaus Winkel, to construct the metronome as we know it to-day, tho the musician Maelzel, who added only the graduated scale, claimed the invention as a whole. [*Gr.* μέτρον + *Gr.* νόμος, law, *nemo*, assign.] *met'ro-nóm'ic*, *a.* Relating to a metronome or to the time marked by it, or to the mark itself. The mark *M.* *J.* = 100, on a sheet of music, indicates that by the metronome (Maelzel's) crotchets are to be beaten at the rate of a hundred in a minute. — *met'ro-nóm'i-cal*, *a.* — *met'ro-nóm'i-cal-ly*, *adv.* — *me-tro-nóm'ny*, *n.* The art, process, or act of measuring time by a metronome.

skinner in the study of microlepidota; 2 ml¹cro-cro²cus, 1 ml¹cro-kok²us; 2 ml¹cro-cō²ūs, n. *Biol.*
1. A genus of *Sphaerobacteria* whose cells are spherical. 2. [m-] cro²ci, pl²mi. A bacterium in this genus. The micrococci are divided into pigment-forming (chromogenic), nonpigment-producing (achromogenic), and fermenting (fermentative) types. See plate BACTERIA. — **Micrococcus lancetolatus**, the pneumococcus. **M. mellitensis**, the minute flagellated organism that causes Maltase fever.

ml¹cro-cro²le-op²ter-a, n. pl. *Entom.* The smaller beetles: a collective name without distinction of class. — **ml¹cro-cro²lum²nar**, a. Characterized by minute columnar construction. — **ml¹cro-cro²nd²um**, n. *Bot.* A conidium of small size when those of a species are noticeably distinguishable into two sizes. — **ml¹cro-cro²sit²u²ent**, n. A constituent of microscopie size. — **ml¹cro-cro²ne-a**, n. Unusual smallness of the cornea.

mi'ero-cosm, 1 mai'kro-kezm; 2 mi'ero-cōsm, *n.* 1. A little world; the world or universe on a small scale; hence [M-], in the theory of Paracelsus, man, as if combining in himself all the elements of the macrocosm or great world: opposed to *macrocosm*.

An organic being is a *microcosm*—a little universe, formed of a host of self-propagating organisms, inconceivably minute and numerous as the stars in heaven.

2. A little community. [\leq F. microcosme, \leq LL. microcosmus, \leq Gr. mikrokosmos, \leq mikros, small, + kosmos, world.] ml'cro-cos-mos, or -mus;— ml'cro-cos-mic, a. Relating to or of the nature of a microcosm; epitomizing the world. ml'cro-cos-mu-ant; ml'cro-cos-mu-cal;— microcosmic salt (*Chem.*), a colorless salt that has been used in the preparation of a reagent in biologic analysis. ml'cro-cos-mug, v. ph. n. The description of a man as the microcosm or little world.— ml'cro-cos-mol-o-gy, n. A treatise on the microcosm.

Mi'cro-co-tyl'i-dae, *n.* *pl.* *Helminth.* A family of poly-stomean monogenic trematodes. **Mi'**cro-co-ty'-le, *n.* (t. g.) — **mi'**cro-co-ty'-lid, *n.* — **mi'**cro-co-ty'-loid, *a.* — **mi'**cro-co-til-jomb', *n.* *Elec.* One-millionth of a coulomb. **Mi'**cro-cous'-tic, *i.* *a.* Adapted to render weak sounds audible. **IK, n.** An instrument serving to augment faint sounds into an audible sound. **mi'**cro-crani-um, *n.* An individual having a small cranium. — **mi'**cro-cra-ni-us, *n.* An individual having a small cranium. — **mi'**cro-cra-nous, *a.* *Cranom.* Having a capacity, in males, of 1,540 to 1,630 cubic centimeters; in females, 1,420 to 1,800 cubic centimeters; of a skull. — **mi'**cro-crith, *n.* *Chem.* The gas of the hydrogen atom; used as a unit in the comparison of molecular weights. **mi'**cro-cryst, *n.* *Min.* A fine, *a.* *Petro.* Consisting of granules that singly are invisible under the microscope, but may be recognized when in mass by their effect on polarized light. — **mi'**cro-crys'-tal, *n.* *Chem.* A crystal that can be seen only by means of a microscope. — **mi'**cro-crys-tal-line, *a.* 1. Cryptocrystal-line. 2. Designating such mineral structure as can be recognized as crystalline but that the crystals and crystals can not be distinguished. — **mi'**cro-crys'-tal-lit'-ic, *a.* Of or pertaining to a metamorphic rock in which the de-

nitrification has continued until the original glassy material has changed into little granules, needles, and hairs.—**mī'cro-erys'-tal-log-ra-phy**, *n.* Microscopic crystallography.
mī'cro-er-cyst, *n.* Biol. An intercalated resting-stage assumed in *Mycomyces* by swarm-spores under unfavorable conditions, such as lack of warmth and moisture. Compare MACROCYST.—**mī'cro-er-cys'tis**, *n.* Bot. A genus of blue-green algae (*Cyanophyceae*) belonging to the family *Chroococcaceae*, having the cells densely crowded in minute spherule-vesicles which often cohere in families surrounded by a single colorless membrane. The colonies range from 1/100 to 1/10 mm. long, and frequently occur abundantly in the crevices of drinking-water, sometimes giving it an odor.—**mī'cro-er-cy-tase**, *n.* Anat. A cytase (complement) derived from polymorphonuclear leucocytes.—**mī'cro-er-cyte**, *n.* Biol. A small cell, as the small blood-corpuscles found in cases of anemia.—**mī'cro-er-cy-the-mi-a**, *n.* Pathol. A vitiated condition of the blood in which are present numerous abnormally small red corpuscles. **mī'cro-er-cy-thē-mia?**—**mī'cro-er-cy-to'sis**, *n.* Pathol. The presence or production of red corpuscles abnormally small in the blood.—**mī'cro-dac-tyl-i-a**, *n.* The condition of livid swollen fingers.—**mī'cro-dac-tyl-is-mi-**.—**mī'cro-dactyl**, *n.* Zool. Having three toes. **mī'cro-dac-tyl-**; **mī'cro-dac-tyl'**.—**mī'cro-de-tee'tor**, *n.* A sensitive galvanoscope.—**mī'cro-di-ac-tine**, *n.* A sensitive diastine sponge-spicule.—**mī'cro-d'i-ene**, *n.* A minute triad sponge-spicule with two rays curved alike.—**mī'ero-di-cho-tri-ene**, *n.* A small dichotriene.—**mī'cro-dis-eus**, *n.* An early Cambrian species of trilobites of the family *Agnostidae*, having slightly segmented cephalon and pygidium.—**mī'cro-dont**, *a.* 1. Having unusually small teeth. 2. Having a dental index below 42.—**mī'cro-don-tous?**—**mī'cro-don'tic**, *a.* **mī'cro-dont-ism**, *n.*
mī'cro-draw'ing, *n.* A drawing executed on a scale large enough to show clearly all the minute or microscopic structure or similar details. **mī'cro-drill**, *n.* *pl.* Helminth. A group or order of lumbricomorph worms without an capillary network of blood-vessels on the nephridium; water-worms.—**mī'cro-dyne**, *n.* Phys. The millionth part of a dyne: a unit of force.—**mī'cro-e-lec'tric**, *a.* Possessed of but infinitesimally small electric properties.—**mī'cro-erg**, *n.* Phys. The millionth part of an erg: a unit of energy.—**mī'cro-er-gate**, *n.* Entom. A worker ant, smaller than the common type of the species. In the first brood hatched the workers raised by a young ant queen.—**mī'cro-fa-na**, *n.* Geol. One of the smallest of the Eocene millions of a larval the pretrial unit of electrical capacity.—**mī'cro-fau-na**, *n.* A fauna whose animals are of minute size.—**mī'cro-fe-si-tic**, *a.* Petrol. Apparently isotropic, but not truly glassy: applied to a probably sub-microscopic granular or fibrous mixture of quartz and feldspar.—**mī'cro-fl'o-ra**, *n.* A flora composed of minute plants.—**mī'cro-fl'u'id-al**, *a.* Petrol. Having a microscopic flow-structure.—**mī'cro-fo'l-i-a'tion**, *n.* Geol. A microscopic foliation in rocks.—**mī'cro-form**, *n.* An extremely minute form of organic life.—**mī'cro-fun-gus**, *n.* A very small fungus.—**mī'cro-gal'va-nom'e-ter**, *n.* An apparatus for measuring weak electrical currents.—**mī'cro-gamete**, *n.* Bot. The male of two conjugating gametes: so called from its being the smaller one. Compare MACROGAMETE.—**mī'cro-gam-te-to-cytet**.—**mī'cro-gam'e-to-phyte**, *n.* The male of dioecious gametophytes.—**mī'cro-gam'e-to-phytic**, *a.*—**mī'cro-gauss**, *n.* Elec. One-millionth of a gauss: a unit for expressing magnetic flux-density.—**mī'cro-ge-mi-a**, *n.* Imperfect development of the chin.—**mī'cro-ge-'o-log'i-cal**, *a.* Pertaining to microgeology.—**mī'cro-ge-o-lo-gy**, *n.* The department of geology that is concerned with the study of microscopic structures.—**mī'cro-germ**, *n.* Pathol. A germ.—**mī'cro-gorn'al**, *n.* Bot. A minute horn.—**mī'cro-gos'sin**, *n.* Elec. A millionth of a gilbert: a unit of magnetomotive force.—**mī'cro-glos'sis**, *n.* Extreme smallness of the tongue.—**mī'cro-glos'si-da**, *n.* *pl.* Ornith. The Caccatiidae.—**mī'cro-glos'si-na**, *n.* (t. g.)—**mī'cro-gossoid**, *a.*—**mī'cro-glos'si-na**, *n.* *pl.* Ornith. The Caccatiidae.—**mī'cro-glos'sin(e)**, *a.* & *n.*—**mī'cro-g-na-thre**, *n.* *pl.* Arach. A division of spiders having the mandibles reduced and maxillae closely surrounding the lip, as in *Seydidiada*, etc.—**mī'cro-gnath-l-a**, *n.* Smallness of the jaws, especially of the lower jaw.—**mī'cro-gna-thism**.—**mī'cro-gna-thous**, *a.* Having small jaws.—**mī'cro-nath'ic**.—**mī'cro-go-ni'd-al**, *n.* Pertaining to a gonidium of small size.—**mī'cro-ni'd-um**, *n.* Bot. A gonidium of small size when those produced by a species are clearly distinguishable into two sizes. Compare MACROGONIDIUM. 2. Protaz. A minute individual formed by division, as in certain flagellate infusorians, and regarded as equivalent to a spermatozoon.—**mī'cro-gram**, *n.* 1. One-millionth part of a gram. 2. Same as MICROGRAPH. 3.—**mī'cro-gran'ite**, *n.* Petrol. A finely crystalline rock consisting of quartz, feldspar, and mica.—**mī'cro-gra-ni'te**, *a.* Petrol. Of or pertaining to micranite.—**mī'cro-gra-ni-li'tic**.—**mī'cro-gran'i-toid**, *a.* Petrol. Having microscopic grunitoid structure.—**mī'cro-gra-ni-u-lar**, *a.* Characterized by minute granule-construction.

mi'cro-graph, 1 *mi'kro-graf*; 2 *mi'cro-gráf*, *n.* 1. A pantograph instrument for minute writing, drawing, or engraving. 2. A microscopic picture. — **mi-cro-gra-pher**, *n.* A specialist in microscopy. — **mi-cro-gra-phist**, — **mi'cro-graph-ic**, *a.* 1. Of or pertaining to a micrograph. 2. *Petrol.* Having the composition and structure of graphic granite on a microscopic scale. **mi'cro-graph-i-cal**, — **mi'cro-graph-i-cal-ly**, *adv.* — **mi-cro-gra-phy**, *n.* The description or study of microscopic objects.

mī'cro-graph o-phon, 1 mī'kro-graf'o-fōn; 2 mī'cro-grāf'o-fōn, *n*. An instrument for recording and reproducing very faint sounds: practically a graphophone with unusually delicate diaphragms.

mi'cro-gyne, *n.* A queen ant, or female smaller than the average type. — **mi'cro-gr'i-a**, *n.* Smallness of the convolutions of the brain. — **mi'cro-hen'ry**, *n.* *Elec.* In the electromagnetic system of measurement, the absolute equivalent of 1,000 centimeters or absolute units of inductance. — **mi'cro-his-to-lo-gy**, *n.* Microhistology. — **mi'cro-his'to-logy**, *n.* The study of minute structures. One who studies them is called a **mi'cro-his'to-logist**. — **mi'cro-his'to-scope**, *n.* *Elec.* A sensitive apparatus for measuring small electrical resistances. — **Mi'cro-hy'me-nop'ter-a**, *n. pl.* *Entom.* Any small insects belonging to the parasitic Hymenoptera, including the families Braconidae, Chalcididae (old sense), Proctotrypidae, and Mymaridae. — **mi'cro-joule**, *n.* The millionth part of a joule. — **mi'cro-kri-ne'tic**, *n.* The study of embryary movements made in early infancy. — **mi'cro-ki-ne'tic**, *n.* — **mi'cro-lec't-thal**, *a.* *Embryol.* Possessing food-yolk in very small amount, as ova of marine worms, echinoderms, sponges, etc.: opposed to *macrolecithal* or *bradylecithal*. — **mi'cro-len'tis**, *n.* The condition of having an unusually small crystalline lens of the eye. — **Mi'cro-lep'h-don'ter-a**, *n.* *Zool.* A genus of small snails. — **mi'cro-lep'h-don'ter-i'**, *n.* — **mi'cro-lep'h-don'ter-i'**, *n.* — **mi'cro-lep'h-don'ter-an**, *a. & n.* — **mi'cro-lep'h-don'ter-ist**, *n.* A student of the Microlept-

doptera. - *ml'*^o-*cro-lep'*^l-*dop'ter-ous*, *a.* Of or pertaining to the *Microleptodoptera*. - *ml'*^o-*cro-lep'*^l-*do'tous*, *a. sch.* Having very small scales. - *ml'*^o-*cro-les'tes*, *a.* A small Triassic mammal (genus *Microlestes*), the first Mesozoic mammal discovered. - *ml'*^o-*cro-lite*, *n.* 1. *Mineral.* A vitreous or resinous pale-yellow to brown, translucent to opaque calcium pyrotantalate ($\text{Ca}_2\text{Ta}_2\text{O}_7$), containing also columbium and other oxides, crystallizing in the isometric system. 2. *Petrol.* A microlith. - *ml'*^o-*cro-lit'er*, *n.* One-millionth of a liter. - *ml'*^o-*cro-lith*, *n.* One of the microscopic isotropic needles and rod-shaped bodies found in vitrophyric rocks. - *ml'*^o-*cro-lith'ic*, *a.* 1. Composed or constructed of small stones: opposed to *megathitic*. 2. *Petrol.* Of the nature of microliths. *ml'*^o-*cro-lit'ic*.

mi-cro'l'o-gy, 1 mi-cro'l'o-jī; 2 mi-cro'l'o-gy, *n.* 1. The branch of science that treats of microscopic objects or is dependent on microscopic investigations. 2. Hence, undue attention to minute and unimportant matters; the more common use of the term. **mi-cro-log'ic**, *mi-cro-log'ic*, *log'i-mi-cro-log'ic*-ally, *adv.*— **mi-cro-lo-g'ist**, *n.* **mi-cro-log**, *mi-cro-logue*, *n.* **mi-cro-loph'ic**, *a. Crantom*. Possessing a low incisor crest, as the anterior nasal aperture, and an indistinct alveolar line. **mi-cro'm**, 1 mi-cro'm; 2 mi-cro'm, *n.* Same as **micron**; the term preferred by Lord Kelvin to avoid confusion with his proposed time-unit, the micron. **mi-cro'met**, *n.*

mi'cro-mag'ne-tom'e-ter, *n.* Any magnetometer for determining very weak magnetic fields, especially one consisting of a horizontal bar with a vertical bar magnet at one end and suspended by a torsion-fiber. — **mi'cro-ma'ni-a**, *n.* *Pathol.* 1. The delusion that certain objects, as parts of the body, have diminished in size. 2. An insane self-disparagement. — **mi'cro-ma'ni-a-e**, *a. & n.* — **mi'cro-ma-nom'e-ter**, *n.* A diminutive, sensitive nanometer for measuring the slightest differences of pressure. — **mi'cro-mas-tic'to-ra**, *n. pl.* *Spong.* A section of sponges with small choanocytes, including the *Silicispongia* and *Myzospouge*. — **mi'cro-ma'zi-a**, *n.* Unusual smallness of the breast or mammary gland. — **mi'cro-me'll-a**, *n.* Unusual smallness of the legs. — **mi'cro-me'ter**, *n.* [*pl.* *pl.*] *Total.* An individual with a micromella. — **mi'cro-me'ter**, *a. & n.* A line or distinguished by micromella. — **mi'cro-mem'brane**, *n.* An exceedingly thin layer of material, having fine pores, used in experiments on osmosis. — **mi'cro-mer'al**, *a.* Of or pertaining to a micromere. — **mi'cro-mer'e**, *n.* *Embryol.* One of the smaller of the two kinds of cells resulting from the division of teleolecithal eggs.

MI'-**cro-me'-ri-a**, 1 mal'kro mi'-ri-a; 2 nu'-cro-me'-ri-a, *n.*
Bot. A genus of fragrant perennial herbs of the family *Mentha*,
thace, with small purple or white flowers in axillary whorls
or terminal spikes. There are about 40 species widely dis-
tributed in warm and temperate regions, mostly in the Old
World. *M. douglasii* is a native of California.

1. An instrument for measuring very small angles or dimensions, generally used in connection with a microscope or telescope. There are a great variety of forms, but in nearly all the measurement is made by turning a very fine screw, which gives motion to a scale, spider-line, lens, prism, or ruled glass plate.

2. A micrometer-caliper or "gauge." [The illustration shows two precision measuring instruments. On the left is a micrometer-screw gauge, featuring a C-shaped frame with a horizontal sleeve and a vertical thimble. The sleeve has a linear scale with markings for millimeters and half-millimeters. The thimble has a circular scale for measuring hundredths of a millimeter. On the right is a vernier caliper, which consists of a main beam with a linear scale and a sliding vernier scale. The vernier scale allows for measurements to be taken to a higher degree of precision than the main scale alone. Both instruments are shown with their respective scales clearly visible.

micro- + Gr. *metron*, measure.]
 --annular, circular, or ring microm-
 eter, an annular glass disk with a meral
 ring cemented on the inside to form a circular
 opening across which are placed parallel
 chords for measuring with great accuracy
 differences of declination of stars from the
 time that they occupy in passing from one
 chord to another.--**dioptric m.**, a form of

double-image micrometer in which the divided lens is in the eye-tube.—**divided object-glass**, or **double-image m.**, a micrometer in which two images are formed in the field by the halves of a bisected lens movable along the line of their segmentation. One form of this micrometer common in astronomical use is the heliometer.—**electric m.**, one in which the contacts are electrically indicated, so that the inaccuracy is less than one micron in the determination: used for the exact measuring of lengths.—**flar m.**, same as **BIFLAR MICROMETER**.—**STYLUS-SCALE LINE**, same as **SCALE MICROMETER**.—**micrometer-balance**, a delicate counter-balance brought to equilibrium by a micrometer-screw.—**m. caliper**, **m. gage**, **n.** A caliper or gage having a micrometer-screw.—**m. microscope**, a microscope having a flar micrometer, employed in geodetic and astronomical observation.—**m. screw**, **n.** A screw with fine and very accurately cut threads, and a circular, graduated head, which shows the amount of advancement or retraction of the screw: used in fine measurements, and often made to measure to .0001 of an inch.—**needle-point m.** (*Mech.*), a micrometer in which two needle-points end, or measure minute distances.—**position m.**, see **POSITION**.—**Repsold's** **transiting or registering m.**, a micrometer attached to a transit instrument, one of the threads of which can be moved with a star passing the meridian, which, when the star is at the meridian, registers the position on a chronograph by electricity. This method is nearly if not quite free of personal error.—**reticulated m.**, a micrometer consisting of a low-power telescope eyepiece, having stretched across it two series of equidistant parallel wires at right angles with each other.—**scale-m.**, **n.** A small and delicately graduated scale of equal parts used for measuring distances by direct comparisons in the field of a microscope or telescope.—**spark-m.**, **n.** An instrument for determining large differences of electrical potential by means of the length of the spark between adjustable metal knobs: devised by Keiss.—**square-bar m.**, an instrument for determining the relative positions of the contacts asked for with respect to some known standard, by placing a square composed of four parallel metal strips in the focus of the eyepiece of a telescope. Unlike the ring-micrometer, it requires the use of an equatorially mounted telescope.

Microscope.

fumes from the object viewed.—**lucernal m.**, one in which the object is illuminated by a lamp.—**metallographical m.**, a microscope for examining opaque objects, as metals and alloys.—**microscope-lamp, m.**, a form of the eye-lamp.—**mill-m., %**. A microscope in which the object is viewed through a series of wave faces in estimating the fineness of texture.—**monocular m.**, one with but a single eyepiece.—**oxyhydrogen m., %**. One in which the object is illuminated by an oxyhydrogen-light; usually for projection.—**projecting m.**, an apparatus for receiving a beam of sun-

[< *L. migratus*, pp. of *migro*, remove.] Syn.: see EMIGRATE.

mi-gra'tion, 1 *mi-grä'shan*; 2 *mi-grä'shan*, *n.* 1. The act of migrating; removal from one region or habitat to another, especially in large bodies; change of abode.

Birds are the most marked migrants; mammals are less so, their movements being restricted by their inability to cross the ocean. Among the regularly migrant mammals are the reindeer and the Arctic fox, which migrate southward to escape the rigors of winter. The polar and other seals and the cetaceans follow the melting ice fields, each species reaching the coast at different times. Among the irregularly migrant animals are the lemmings, the North-American gray squirrel, and the flying fox. The South-African springbok makes irregular migrations, due probably to a scarcity of water and food. With many species of fish the migrations are as regular in their periodicity as those of birds. Among the reptiles the turtle is the only known migrant, while among insects the locust is the most remarkable.

2. The totality of persons or things migrating, or the time occupied in migrating.

mill', *n.* 1. A machine by means of which grain is ground for food. Originally, grain was ground by placing it between two flat stones and rubbing one roughly over the other by hand. This fundamental idea of an upper and a nether stone was contained in all mills and devices for grinding grain until recently, when machines or mills for grinding grain by passing it through rollers were invented. 2. Any one of various kinds of machines that transform raw material by other processes than grinding into some other form; as, a sawmill; planing-mill. 3. A machine that acts by rotary motion, as a lapidary's wheel. 4. A machine for reducing to small or smaller proportions hard substances of any kind: generally compounded with the word denoting the thing to be ground; as, quartz-mill. 5. *Metaphorically*. (1) An establishment for reducing ores by a process other than smelting. (2) An iron-works where the metal in the crude forms is converted into merchant iron. 6. A building fitted up with the machinery requisite for a factory; as, a cotton-mill; woolen-mill. 7. *Bank-note* and *Calico Print*. A hardened steel roller, bearing a design in relief, by which a printing-plate or a die may be made by pressure. 8. *Mining*. An opening through the attle to permit ore to be discharged from the slopes of a mine to the cars or barrows; a pass. 9. A milling-cutter. 10. A screw-press used for coining in the time of Queen Elizabeth. 11. [Slang.] A pugilistic combat; set-to.
And a champion was picked out on each side tacitly, who settled the matter by a good hearty mill.
T. HUGHES *Tom Brown at Rugby* pt. ii, p. 303. [c. co. 1871.]
12. [Colloq.] A treadmill. 13. [Scott.] A snuff-box. 14. A raised or ridged edge or surface made by milling. 15. A machine for crushing or grinding vegetable substances in order to express the juice. [*AS. myln*, *< LL. molina*, *< L. molo*, grind.]
Mills are named (1) from their action on the substance operated upon; as, attrition-mill, boring-m., chopping-m., pearling-m., planing-m., polishing-m., powdering-m., pulverizing-m., rolling-m., scutching-m., smothering-m., spinning-m., stamping-m.; (2) from the material or substance that they operate upon or prepare for use; as, bone-m., cider-m., clay-m., corn-m., cotton-m., cottonseed-m., drug-m., feed-m., fertilizer-m., flour-m., fodder-m., fruit-m., grain-m., grist-m., hominy-m., indigo-m., lead-m., linseed-m., mortar-m., oat-m., oil-m., oil-cake-m., paint-m., pepper-m., plaster-m., powder-m., quartz-m., rice-m., shingle-m., shoddy-m., snuff-m., soap-m., steel-m., stone-m., veneer-m., army mill, a portable grinding-mill supported on a tripod, and arranged with a crank to be driven by two men. — **chaser m.**, same as EDGE-MILL. — **Chilean m.**, a grinding or crushing-machine in which two heavy wheels revolve about a central vertical axis, in a circular trough, while rolling upon the material to be crushed. See ARRASER. — **continuous m.** (*Wire-drawing*), a mill through which a rod passes without interruption between rolls which successively reduce its diameter until the wire is sufficiently attenuated. — **dry-m.**, *n.* A polishing- or grinding-mill employing a

dry abrasive, sometimes steam-heated to drive out moisture. — **edge m.**, a mill in which the crushing or grinding is accomplished by two stone or metal rollers which follow a circular path as the axle-like shaft upon which the turn is rotated. — **gastric m.** (*Zool.*), in some crustacea is a macerating process consisting of movable calcareous particles situated in the pharynx or stomach. — **glacial m.**, same as MOULIN. — **Hungarian m.**, a rotating mill used in Hungary for removing small portions of gold from quartz by mixing with mercury: one of the many forms of pan-amalgamators. See AMALGAMATION. — **looping-m.**, *n.* *Metaphorically*. A mill for rolling small rods or wires in which several rolls are in operation at the same time. — **mill'bar**, *n.* Rough bar iron, as distinguished from merchant bar. — **m. beetle**, *n.* The cockroach. — **m. bill**, *n.* Same as MILL-BUCK. — **m. board**, *n.* Heavy pasteboard used by bookbinders for the covers of books. — **m. bush**, *n.* The iron lining in the eye of a millstone. — **m. cake**, *n.* 1. The by-product left after the oil has been extracted from linseed. 2. The cake formed by mixing and pressing together the materials of gunpowder previous to granulation. — **m. ear**, *n.* [U. S.] *Railroad*. A car without a roof for carrying hoisting-apparatus. — **m. course**, *n.* Same as RACE. 5. — **m. dog**, *n.* Same as DOG, 6 (2). — **m. driver**, *n.* A millstone-driver. See MILLSTONE. — **m. dust**, *n.* Pulverized dust produced by the grinding of corn. — **m. end**, *n.* A remnant of a web of cloth or fabric. — **m. eye**, *n.* An opening in the case of a millstone to permit discharge of the meal or other product. — **m. feeder**, *n.* A horizontal projection from the spindle of a horizontal millstone to cause feed of the material by shaking the hoppers-spout. — **m. fever**, *n.* A low fever prevalent among the younger workers in linen-mills. — **m. file**, *n.* A single-cut flat file used for filing mill-saws, and incidentally for lathe-work and drawing. — **m. finish**, *n.* A glossy finish given to paper by passing it between calender-rolls. — **m. furnace**, *n.* An iron-furnace for reheating iron that is to be re-rolled or welded under the hammer. — **m. gang**, *n.* 1. That part of a loom-warp made by a rising and falling course of the threads around old-style warping-mills. 2. A gang of lumber-saws. — **m. gearing**, *n.* Wheelwork: a collective term. — **m. hand**, *n.* A worker in a mill or factory. — **m. head**, *n.* A head of water for turning a mill-wheel. — **m. horse**, *n.* A horse that turns a mill. — **m. jacket**, *n.* — **m. ink**, *n.* Same as BYND. — **m. lodge**, *n.* [Prov. Eng.] The pond formed by a mill-dam. — **m. man**, *n.* A man employed in a mill or factory. — **m. money**, *n.* 1. Milled money. 2. [Local, U. S.] Paper promises to pay, in goods or in money, issued by owners of factories to employees; shipmasters. — **m. mountain**, *n.* A bitter purgative European flaxwort (*Linum catharticum*). — **m. pick**, *n.* A millstone-pick. — **m. post**, *n.* 1. The post on which a windmill was supported. 2. [Humorous.] A stout leg. — **m. power**, *n.* A water-power unit, varying in value according to locality. — **m. pull**, *n.* [Prov. Eng.] A variety of wool or hair used to stuff mattresses. — **m. ream**, *n.* A ream of handmade paper of which the two outer quires are imperfect. — **m. reck**, *n.* [Prov. Eng.] Lead-polluting from fumes or dust in mills where lead is smelted, corroded, or worked in. — **m. ring**, *n.* 1. The space intervening between the runner, in a mill, and its supporting frame. 2. Mill-dust. — **m. rolls**, *n. pl.* The rolls through which puddled iron is run previous to being marketed. — **m. round**, *n.* A monotonous round of work like that of the mill-horse; dull routine of duty. — **m. run**, *i. n.* To produce a definite percentage at a mill-run. II. n. 1. *Mining*. The work accomplished by an amalgamating mill between two successive clean-ups. 2. Same as MILL-RACE. 3. *Metaphorically*. A test of a definite quantity of ore by specific treatment in a mill. — **m. sail**, *n.* The sail of a windmill. — **m. saw**, *n.* A gate-saw. — **m. scale**, *n.* The scale of ferrous that peels from iron during rolling. Compare FORGE-SCALE. — **m. skate**, *n.* [Eng.] The eagle-ray. — **m. spindle**, *n.* The vertical axis of a horizontal grinding-mill. — **m. stock**, *n.* Filling-stock. — **m. table**, *n.* A roller-table. — **m. tail**, *n.* Same as TAIL-RACE. — **m. tooth**, *n.* A molar. — **m. ward**, *n.* One who keeps a mill. — **m. wheel**, *n.* The water-wheel that drives a mill. — **m. work**, *n.* Mech. 1. Mill or factory machinery. 2. The planning, building, arranging, and setting up of mill or factory machinery. — **m. yard**, *n.* The yard of a mill; specif., the yard or space surrounding a lumber-mill in which the cut or sawed lumber and shingles are piled. — **pharyngeal m.**, a masticating-slabb-mill. — **m. mill**, *n.* A rolling-mill having vertical as well as horizontal rolls. — **universal m.**, *n.* — **to go through the m.**, to acquire a complete experience of a thing. — **tumbling-m.**, *n.* Same as EXHAUST-MILL. — **wet m.**, *n.* A mill in which wet or moist crushing materials can be used.

mime, *n.* 1. A mimic play or farce; a sort of dramatic representation, akin to comedy, travesty, real persons or events; a favorite pastime among the Greeks of ancient Sicily and southern Italy, and of the Romans. They were a favorite amusement of convivial parties, the guests themselves being generally the performers. Sophron of Syracuse, about B. C. 420, composed many in the Doric dialect which were much admired and which Plato was accustomed to read. The Roman mimes were not borrowed from the Greek, but were of native Italian growth. They were not only far ruder and coarser, but in some respects they were essentially different—the dialogue occupying a smaller place, and mere gesture and mimicry predominating. The humor and satire, however, were often genuine, though rough and even indecent. Chambers's *Encyc.* vol. vii, p. 206.

mind, *n.* 1. An abstract, collective term for all forms of conscious intelligence, or for the subject of all conscious states; the entire psychical being of man; especially, the activity or faculty of knowing; in modern psychology used in the wider signification in preference to the synonym *soul*. **2.** Any mental state or activity. (1) Any state or act of the intellect; consciousness; contemplation; consideration; thought; opinion; conclusion; as, changed his mind. The Pope said there should be but one mind, and that should be his own. Luther said there should be as many minds as men. *G. S. Pauline Am. Republic in Prophecy* p. 107. [*1891.*]

(2) The state or act of reckoning; memory; recollection; as, to bear in mind. (3) Any state or act of the feelings; mood; inclination; desire; liking; disposition or mental tendency; as, a cheerful mind; a man of strange mind.

Even the courtly principal deigned to inquire whether he found everything to his mind. *Holland's Sevenoaks* p. 102. [*s. 1875.*]

(4) Any state or act of will; choice; decision; purpose; as, those of contrary mind; to make up one's mind. **3.** The intellect or cognitive faculty, as distinguished from the feelings and will; the power of cognition or thought. **4.** *Philos.* (1) The spirit or intelligence pervading the universe; opposed to matter. (2) [M.] God. In Christian Science, Mind (divine Mind) is a synonym for God. "The basis of all health, sinlessness, and immortality is the great fact that God is the only Mind." *MARY B. Eddy Science and Health with Key to the Scriptures* p. 339. **5.** The renewed nature in man. *Rom. vii, 23.* **6.** The intellect or reason in its normal condition; sanity. **7.** A person regarded chiefly as a unity of mental powers; sometimes used collectively; as, Milton was a lofty mind; the national mind is keen. **8.** Animal mind; regarded by some as imperfectly corresponding with that of man, and by others as sensitiveness and sensation correlated with impulse and retentiveness, plus animal emotions and affections. See MAN.

The word *mind*, as illustrated by its many meanings, is elastic, and may be used to cover all in a sensitive organism that is not manifestly and strictly physical, tho it be an unknown quantity or a simulation of high powers by those of a different order. The nature of intellect and intelligence is revealed only by analysis of the facts given in human consciousness.

In the materialistic evolution hypothesis, advocated by W. K. Clifford and Herbert Spencer, there is attached to every particle of matter in the universe a bit of rudimentary feeling or intelligence which they called *mind-dust*, and when the material molecules containing this dust combine, the dust particles also combine to form *mind-stuff*, or the faint beginnings of sentience, with varying degrees of complexity and perfection, until the human brain attains the highest evolution of which *mind-stuff* is capable. In the *mind-dust theory*, nature is a universal mind scattered in an infinite number of particles throughout the world. **9.** Spirit; courage. **10.** (1) The memory. (2) Remembrance; recollection. (3) The thing remembered. [*< AS. gemynd, < munan, think.*]

Syn. brain, disposition, instinct, intellect, intelligence, reason, sense, soul, spirit, thought, understanding. *Mind*, in a general sense, includes all the powers of sentient being apart from the physical factors in bodily faculties and activities, in a limited sense, *mind* is nearly synonymous with *intellect*, but includes *disposition*, or the tendency toward action, as appears in the phrase "to have a mind to work." As the seat of mental activity, *brain* (colloquially *brains*) is often used as a synonym for *mind*, *intellect*, *intelligence*. *Sense* may be an antonym of *intellect*, as when we speak of the sense of hearing; but *sense* is used also as denoting clear mental action, good judgment, acumen; as, he is a man of sense, or, he showed good sense; *sense*, even in its material signification, must be reckoned among the activities of *mind*, tho dependent on bodily functions; the *mind*, not the eye, really sees; the *mind*, not the ear, really hears. *Consciousness* includes all that a sentient being perceives, knows, thinks, or feels, from whatever source arising and of whatever character, kind, or degree, whether with or without distinct thinking, feeling, or willing; we speak of the consciousness of the brute, of the savage, or of the sage. The *soul* includes the *intellect*, sensibilities, and will; beyond what is expressed by the word *mind*, the *soul* denotes especially the moral, the immortal nature; we say of a dead body, the *soul* (not the *mind*) has fled. *Spirit* is used especially in contradistinction from matter; it may in many cases be substituted for *soul*, but *soul* has always the fuller and more determinate meaning; we can conceive of *spirits* as having no moral nature; the fairies, elves, and brownies of mythology might be termed *spirits*, but not *souls*. In the figurative sense, *spirit* denotes animation, excitability, perhaps impatience; as, a lad of spirit; he sang with spirit; he replied with spirit. *Soul* denotes energy and depth of feeling, as when we speak of *soulful* eyes; or it may denote the very life of anything; as, "the hidden soul of harmony." *MILTON L'Allegro* l. 144. *Thought*, the act, process, or power of thinking, is often used to denote the thinking faculty, and especially the reason. The *instinct* of animals is now held by many philosophers to be of the same nature as the *intellect* of man, but inferior and limited; yet the apparent difference is very great. In this sense we speak of human *instincts*, thus denoting tendencies independent of reasoning or instruction. Compare synonyms for *INTELLECT*.—**Ant.** body, brute force, material, matter, sense, substance.

min' *ni'6'* *is-ter*, *n.* 1. The chief of an executive department of a government; one of the persons collectively constituting a ministry; as, the *minister* of justice. 2. One commissioned to represent his government in diplomatic intercourse with another government.

By the Congress of Vienna, in 1815, three classes of diplomatic representatives were recognized: (1) ambassadors, papal legates, and nuncios; (2) envoys, ministers, and other agents accredited to sovereigns; (3) charges d'affaires, accredited to ministers for foreign affairs. By the Congress of Aix-la-Chapelle, in 1818, it was provided that ministers resident accredited to sovereigns should form a third class between ministers of the second class and charges d'affaires, the latter thus becoming fourth. The distinction between these classes relates to diplomatic precedence and etiquette, not to essential powers and privileges. Before 1893 the United States sent no person as representative with the diplomatic rank of ambassador. See *AMBASSADOR*.

3. One who is authorized to preach the gospel and administer the ordinances of public worship; a clergyman; pastor; in a wider sense, any one in the regular service of the church; also, a person executing priestly duties in a non-Christian church. 4. 2. Wrong in opinion or judgment; being in the wrong or in error; as, you are *mistaken* (regarded by some as an erroneous form for "you mistake"). 3. Taken erroneously; misunderstood; misapprehended.
The anomalous use of *mistaken* has naturally attracted the attention of speech-reformers. We ought to mean, "You are misapprehended or misunderstood," they tell us, when we say, "You are mistaken"; and if we mean "You are in error," we ought to say so. But suppose the alleged misuse of *mistaken* gives rise to no misunderstanding whatever—that everybody, high or low, throughout the English-speaking world, knows what is meant when one says "You are mistaken"—in that case, to let alone seems to be wisdom. The corruption, if it be one, has the sanction not only of universal employment, but of antiquity.
Isakino: Either your unparagoned mistress is dead, or she's outwitted by a tripe.
Posthumus: You are mistaken. *SHAK. Cymbeline* act 1, sc. 5.

[*L. modalis*, < *modus*, mode, manner.] — **mō**'dal-ly, *adv.*

mō'dal, *n.* A modal proposition.

mō'dal-ism, 1 mō'dal-izm; 2 mō'dal-izm, *n.* 1. *Throl.*

(1) Adherence to a mode or manner, or a doctrine advocating a mode; as, *modalism* in baptism. (2) Sabellianism. 2. *Logic.* The doctrine that modal propositions and modal syllogisms are of fundamental importance in the science of rational thought. — **mō**'dal-ist, *n.* One who professes modalism. — **mō**'dal-ist'ic, *a.*

mō'dal-ty, 1 mō-dal'ty; 2 mō-dal'ty, *n.* 1. Modal character; the fact or quality of being modal. 2. *Logic.* The character of a proposition as expressing or asserting a sequence of necessity or of contingency — necessity in the wide sense including impossibility, and contingency in the wide sense including probability and possibility.

In this connection the name 'Modalist,' which has been given to the following treatise, may be mentioned. It is intended to indicate that the re-introduction of *modality* is characteristic of the new logic. E. J. HAMITON *Modalist* p. 4. [c. & co. 1891.]

3. *Psychol.* (1) The total character of a sensation or its stimulus as determined by the class of sensations to which it belongs or appeals. (2) The class of sensations itself (as in the phrase sensations of different modalities): a term proposed by Helmholtz as preferable to the term "quality." (3) In Kantian use, that feature of a judgment which is defined by the class in which it is placed, as either problematic, assertory, or apodictic. 4. *Civ. Law.* A qualification, whether of restriction or enlargement, of the terms of an instrument; specif., a limitation or condition expressed as to time and place of performing a contract. 5. *Mod.* Modalism. [*L. modalitas*, < *modalis*; see **MODAL**.] — **mō**'dal-ize, *vt.*

Mod'der'iv'er, 1 mōd'er; 2 mōd'er, *n.* A tributary of the Vaul between Kimbely and Bloemfontein; length, 186 m. Here the British defeated the Boers, Nov. 23, 1899.

mode, 1 mōd; 2 mōd, *n.* 1. Manner of existence, action, doing, manifestation, etc.; way; method; form; sort; as, a *mode* of living; a *mode* of thought or exertion. I believe that one great charm and beauty of antiquity is, that we view it out of the midst of quite another mode of life; and the more perfectly this can be done, the better. HAWTHORNE *Eng. Notes*, *Forest Abbey* in vol. i. p. 188. [i. m. & co.]

2. Prevailing style or popular custom; common fashion; especially in the phrase *the mode*. A bedstead of the antique mode. SWISS BAUCIS and PHILEMON 1. 68.

3. *Gram.* (1) The manner in which the action, being, or state expressed by a verb is stated or conceived, whether as actual, doubtful, commanded, etc.; denoted by the form of verb. (2) The verb-form expressing action, etc., in a particular manner: less correctly called *mood*.

The English *modus* is, properly, are the *indicative*, *subjunctive*, and *imperative*. Certain verb-phrases are also called *modes*, as *to use* is, *to be* by *may*, *might*, *can*, *could* (*potential*), *should*, *would* (*conditional*), *must*, *ought* (*obligative*).

4. *Logic.* (1) The style of the connection between the antecedent and the consequent of a proposition; modality; as, with respect to *mode* propositions are either apodictic or problematic. (2) In the syllogistic figures of the ancient logicians an arrangement of the propositions of a syllogism according to quantity and quality: the modes of old logic are rapidly falling into disuse. See **MOOD**, 1. 5. *Philos.* An abstract, collective term for the qualities, attributes, or relations of any existing thing, which may be considered apart from the subject or substance to which they belong.

Modus is, therefore, a manner of the existence or behavior of so .e real being, or beings, which is thought of as if it were itself a reality. Thus the ancient metaphysicians held that entities might assume different modes, more or less accidental; but their number and character were limited by the essential nature of the substance whose modes they were. Spinoza regarded thought and extension, which according to the Cartesian philosophy were the essentials, respectively, of mind and matter, as the two modes of the one substance, or ground. Locke designated as *modes* those complex ideas which plainly do not "subsist by themselves, but are considered as dependencies on, or affections of, substances." Modern philosophy recognizes the purely abstract character of the conception as thus applied, and has accordingly abandoned its metaphysical use.

It is the relation of time to space which, in the first instance at least, enables us to think of coexistence as a *mode* of time. CARNE Kant vol. i, bk. i, p. 642. [BACKE, 1889.]

6. *Mus.* A method or system of dividing the intervals of an octave by placing the steps and half steps of which it is composed in varying arbitrary positions. See **GREEK**, **GRECO-IONIAN**, **MAJOR**, and **MINOR** **MODES**, below, and compare **SCALE**. 7. *Math.* (1) The class with greatest frequency. (2) The maximum point of the curve of frequency of occurrence, coinciding with the average in the normal curve. (3) In a table of frequencies, the quantity therein stated as most frequently occurring. 8. *Biol.* That class of individuals, in the

statistical study of biological variation, which shows the greatest frequency in regard to a certain character among a large group of variates taken at random. 9. *Petrol.* An expression of the actual mineral composition of a rock. It may or may not be coincident with **SOHM**. 10. In lace-making: (1) A small decorative piece inserted in a pattern and giving it its distinguishing characteristic. (2) The openwork or other filling between the solid parts of a pattern. 11. A kind of silk. Compare **ALAMODE**, *n.* 12. [Rare.] Gradation; degree; variety. 13. Rhythm; measure; harmony. [F., < *L. modus*, manner.]

— **all the mode**, in general fashion; extremely fashionable. — **conjunctive m.**, same as **SUBJUNCTIVE MODE**. — **Greek modes** (*Modoi*), the modes in use among the ancient Greeks, consisting each of two tetrachords and one whole step. Which the step was between the tetrachords, the mode was named after the tetrachord, when below or above, *hypo-* or *hyper-* was respectively prefixed. The modes were named as follows, the range and dominant in parentheses representing the tones as at present in use in the Gregorian modes: **Dorian** or **Grave** (the range being from D to D, the dominant A, and the mediant F), **Phrygian** or **Mysic** (the range being from E to E, the dominant C, and the mediant G), **Lydian** or **Joyful** (the range being from F to F, the dominant B, and the mediant A), **Hypodorian** or **Eolian** or **Sad** (the range being from A to A, the dominant F or E, and the mediant D or C), **Hypophrygian** or **Ionian** or **Harmonious** (the range being from B to B or from C to C, the dominant A, or G, and the mediant G or E), **Hypolydian** or **Devolian** (the range being from C to C, the dominant A, and the mediant D), **Hyperdorian** or **Mixolydian** or **Angelic** (the range being from G to G, the dominant D, the mediant C), **Hyperphrygian** or **Loerian** (the range being from B to B, the dominant G, and the mediant D). See **MODULATION**. — **Gregorian modes** (*Modoi*), the modes, modeled on the Greek, authorized by St. Ambrose of Milan in the 4th century, and later extended and perfected by Pope Gregory and others. The change consisted in the introduction of the *plagal* modes which already existed in germ in the *hypo-* modes, which were a fourth in pitch lower than the corresponding Greek pure forms. The ecclesiastical plagal modes depended on a corresponding *authentic mode*, in which the dominant keeps up to the old line, while in the plagal mode it is a third lower, the plagal being looked upon as a tetrachord with a pentachord above it, and the authentic as a pentachord with a tetrachord below it. The pentachords and tetrachords embrace the intervals of perfect fifth and fourth in nearly all the modes. They cover in range the modern diatonic scale from A, the first space in the bass, to C, the third space in the treble, and were divided by some authorities into 14 groups or moles — 7 *authentic* (the Dorian, Phrygian, Lydian, Mixolydian, Eolian, Loerian, and Ionian) and 7 *plagal* (the Hypodorian, Hypophrygian, Hypolydian, Hypomixolydian, Hypoeolian, Hypoerian, and Hypoionian). From the fact, however, that the Loerian and Hypolydian modes are impure, the intervals not being perfect, they are entirely rejected by many authorities and by all practically disused. **church m.**; ecclesiastical **m.** — **major m.** (*Modus*), a modern mode equivalent to the Greek Lydian and Gregorian Ionian, consisting of two steps, a half step, three steps, and a half step. See **MAJOR**. — **minor m.** (*Modus*), a modern mode equivalent to the Greek Dorian and Gregorian Eolian. See **MINOR**. — **mixed m.** (*Philos.*), a mode in which different simple ideas are combined. — **mode**'book', *n.* A book of fashions. — **m. color**, a compound color of subdued shade, such as drab or gray, used by textile colorists. — **normative m.**, a typical state of composition in a rock by reason of which it may be used as a standard of classification. — **secular m.** (*Biol.*), the prevailing condition or state of one or more characters of a group of organisms at a given season and place.

Mod'e, 1 mō'dē; 2 mō'dē, *n.* *Norse Myth.* One of Thor's sons who, with his brother Magni, share possession of Thor's hammer after Ragnarok. He symbolizes courage. **Mod**'it, **mod**'el, 1 mōd'el; 2 mōd'el, *n.* [MOD'EL or MOD'ELLED, MOD'ELD; MOD'EL-ING or MOD'EL-LING.] 1. *t.* 1. To fashion after or make in conformity with a model or pattern; form on or over something as a model; make a model of or for; mold; shape; as, to *model* a political constitution; to *model* a garment over a form; to *model* a design in clay. 2. Specif., in drawing and painting, to give an appearance of relief to, as a face or head.

A statue in gilt bronze could not have been *modelled* and cast in Rome in 608.

R. LANCiani in *Century Magazine* Feb., 1887, p. 600.

3. To give a preliminary form to; plan out; as, a book or document. 4. To organize a body of men; as, an army, a parish, etc.

II. *v.* 1. To make a model or pattern; design and execute material forms either original or imitative.

I rough out my thoughts in talk as an artist models in clay. HOLMES *Autocrat* p. 30. [c. & co. 1871.]

2. To assume a form like that of a model; take on the appearance of the natural form. [*F. modeler*, < *OF. modelle*; see **MODEL**, *n.*]

mod'el, *a.* Answering or used as a model; suitable for a model; worthy to be imitated. — **model** *doll*, a figure resembling the human form, used for displaying clothing.

mod'el, *n.* 1. An object, usually in miniature, representing accurately something to be made or already existing; a material pattern of natural size; more rarely, a plan or drawing; as, a *model* of an invention; a *model* of a building; to draw a *model*. 2. Specif.: (1) In sculpture, the plaster or clay original of a work to be executed in stone or metal. (2) A person who does duty as a copy or pattern for painters or sculptors. (3) A work of art intended or considered as a standard for works of its kind; a sculptured canon of art, as that of Lysippus.

3. A thing or person to be imitated or patterned after; that which is taken as a pattern or an example; as, he is a *model* of goodness; his essays are *models* of elegance.

The importance of *models* is not confined to the fine arts. They have their place in every department of human effort where excellence is sought.

JOSEPH ALDEN *Elements Intell. Philos.* p. 255. [A. 1865.]

4. A woman employed by costumers and modistes to display costumes or millinery to customers. 5. A molding-tool used by a plasterer, having an exact reverse pattern of the form to be impressed. 6. The curvature in the back and belly of such instruments as the violin.

7. *Biol.* An unpalatable or otherwise defended species that is imitated by a palatable undefended species, or mimic. See **MIMICRY**. 8. [Colloq.] That which strikingly resembles something else; an approximate copy or image; as, she is the *model* of her mother. 9. A concise or abridged form, as of a treatise. 10. That which

closely encases, as a mold. [*< OF. modellr*, < *L. modellr*, measure, dim. of *modus*, measure.]

Syn.: *archetype*, *copy*, *design*, *ectype*, *example*, *facsimile*, *image*, *mimetic*, *model*, *original*, *pattern*, *prototype*, *replica*, *representation*, *type*. A *pattern* is always, in modern use, that which is to be copied; a *model* may be either the thing to be copied or the copy that has been made from it; as, the *model* in the Patent Office. A *pattern* is commonly superficial; a *model* is usually in relief. A *pattern* must be closely followed in its minutest particulars by a faithful copyist; a *model* may allow a great degree of freedom. A sculptor may idealize his living *model*; his workmen must exactly copy in marble or metal the *model* he has made in clay. The *archetype* is the original form, actual or ideal, in accordance with which existing things are made, especially the original form in the mind of the Creator; a *prototype* is either the original or an authenticated copy that has the authority of the original as a standard to which other objects of its kind must conform, the latter sense is comparatively rare. See **EXEMPLAR**; **TYPE**; **IDEAL**.

— **block**'mod'el, *n.* *Naut.* The small model of a vessel made of flat pieces of wood glued or bolted together, so that the water-lines show on the hull where the pieces join. — **half m.** (*Naut.*), a model of one side of a vessel from the midship line. — **mod**'el-ha'sin, *n.* *Naut.* An establishment designed to determine by experimentation the proper form of hull for a given speed or the power required to obtain a certain speed for a given form of hull. The basin which is filled with water is from 400 to 500 feet long and is provided with a carriage moving above the surface of the water. The model is towed by this carriage at various speeds, and from the data thus obtained a curve of resistance of the model is made. — **m. drawing**, *n.* The drawing in perspective from solid figures. — **m. wood**, *n.* The hard, light-colored wood of *Nauclea* or *Adina cordifolia*, of the madder family (*Rubiaceae*); so called in India.

mod'ern-ism, 1 *mod'ern-izm*; 2 *mod'ern-izm*, n. 1. Something characteristic of modern as distinguished from former or classical times; a modern idiom or practise. 2. [M.] A system or complex of theological and philosophical tenets condemned by Pope Pius X. in the encyclical "Pascendi Gregis," Sept. 8, 1907, as "an alliance between faith and false philosophy," arising from curiosity and "pride, which rouses the spirit of disobedience and demands a compromise between authority and liberty."
Were one to attempt the task of collecting together all the errors that have been broached against the faith and to concentrate the sap and substance of them all into one, he could not better succeed than the modernists have done. . . . Certainly this suffices to show superabundantly by how many roads *modernism* leads to the annihilation of all religion.
Pope Pius X. *Pascendi Gregis* Sept. 8, 1907.
Modernism began as an attempt to break loose from the neo-Scholasticism so ardently patronized both by Pius IX. and Leo XIII., and to supplant the critical methods of the medieval doctors by those of modern scholarship; and its leaders have won special distinction in the fields of Biblical criticism and ecclesiastical history. *Encyc. Brit.* 11th ed., vol. xxiii, p. 436.
3. A movement in Protestant churches that favors the ethical and spiritual in Christianity rather than the creeds and dogmas of the Church. 4. [Rare.] Modern character, methods, or mental attitude.

The voice had lost its fresh and youthful eagerness of tone, though in peculiarity of modulation it was the same. ELIZABETH C. GASKELL *Ruth* vol. ii, ch. 1, p. 19. [tr. 1853.]
2. *Mus.* (1) The change from one key to another in the course of a piece of music.
'Modulation' is another name . . . given to this magical change of musical . . . effect, which, at the call of some single new note characteristically heard as it enters the music, causes all the other sounds to acknowledge a new ruler. Popular Educator, *Lessons in Music* in vol. iv, p. 120. [OAS. CO.]
(2) The strain or passage from another key so introduced. When tones from another key are so introduced as to cause a change of key, a modulation is the result; but when so introduced and used as not to cause a change of key, they become chromatic tones in the key into which they are introduced. See CHROMATIC.
In the Gregorian modes there are four modulations that stand out preeminently: the *final*, which is equivalent to the tonic or keynote; the *dominant*, which is the resting note; the *mediant*, which is midway between the final and the dominant; and the *participiant*, which is an auxiliary note and almost coincides with the mediant in authentic modes and with the dominant in plagal forms.
The real point of difficulty in modulation is not the manner in which the harmonies belonging to different keys can be made to succeed one another, but the establishment of the new key, especially in cases where it is to be permanent. GROVE *Dict. of Music and Musicians* vol. 3, p. 234.
3. Harmonious or melodious versification or prose-writing. 4. *Arch.* Proportion of parts according to a fixed measure-unit or module. 5. [Rare.] Sound modulated; melody. [*F.*, < L. *modulatio* (n-), < *modular*; see MODULATE.]—*abrupt modulation* (*Mus.*), extraneous modulation. See EXTRANEOUS.—*chromatic m. (Mus.)*, a passing from one key to another by means of unrelated keys.—*diatonic or natural m. (Mus.)*, a passing from one key to another by means of relative keys.—*gradual m. (Mus.)*, a change of key by diatonic progression.
mod'u-lä-tives, a. [Rare.] Relating to voice-modulation or to punctuation-marks.
mod'u-lä'tor, 1 *mōj'u-lor* or *mōd'yū-lä'tor* or -*ter*; 2 *mōj'u-lor* or *mōd'yū-lä'tor*, n. 1. One who or that which modulates. 2. A musical chart showing the relations of tones and scales. [*L.*, < *modular*; see MODULATE.]
The modulator in the Tonic sol-fa notation takes the place of the staff in the common notation.
Tonic Sol-fa Music Reader intro., p. 4. [t. & m.]
mod'u-lä-to-ry, 1 *mōj'u-lor* or *mōd'yū-lä-to-ri*; 2 *mōj'u-lor* or *mōd'yū-lä-to-ry*, a. Of or pertaining to modulation.
mod'ule, 1 *mōj'ul* or *mōd'yul*; 2 *mōj'ul* or *mōd'yul*, n. 1. *Arch.* A measure of proportion among the parts of a classical order, the size of the diameter, semidiameter, or third of a diameter of the base of a column-shaft being taken as a unit. When the semidiameter is taken for columns it is divided into parts called minutes, 30 in number. See MINUTE, n. 2. A standard or unit of measurement. 3. In numismatics, the diameter of a coin or medal. 4. *Mech.* (1) A device by which a supply or flow of water is measured or controlled, the outflow being regulated by a gate or other contrivance. (2) The volume of water thus discharged. (3) The quotient obtained by dividing the pitch diameter of a gear-wheel by the number of teeth, expressed in millimeters. 5. [Rare.] *Math.* Same as MODULUS. 6. A small measure or quantity. 7. A model or mold. [*F.*, < L. *modulus*; see MODULUS.]

Mo-du'i-dē, 1 mo-du'i-dē; 2 mo-du'i-dē, *n. pl.* *Conch.* A family of trochoglossate gastropods having a trochiform shell.
Mod'u-lus, *n.* (t. g.) [*L. modulus*; see *MODULUS*].—**mod'u-lid**, *n.*—**mod'u-lid**, *a.*
mod'u-lus, 1 mo-du'i-lus or mod-yu-lus; 2 mōj'u-lūs or mōj'u-lūs, *n.* [*L. 1. lūd; 2. -li, pl.*] *Math., Mech., & Physics.* A number, coefficient, or quantity that measures a force, function, or effect. *Specif.*: (1) The absolute value of a complex number or quantity. (2) *Theory of Numbers.* An integer which leaves the same remainder when serving as the divisor of different numbers. (3) *Geom.* The invariant function of the coefficients of the equation of a curve. [*L., dim. of modulus, measure.*]

—**bulk-mod'u-lus**, *n.* The ratio of a hydrostatic pressure to the diminution in unit volume caused thereby.—**isotropic m.** (*Physics*), the modulus of cubic compressibility.—**isothermal m.** (*Physics*), the modulus of cubic compressibility which corresponds to compression at invariable temperature.—**m. of a complex quantity or number** (*Math.*), the square root of the sum of the squares of its components.—**m. of a curve**, a function of the coefficients of the equation of a curve; an invariant for every birational transformation.—**m. of a machine**, the ratio of the work done in driving a machine to the work done by the machine at its working points, efficiency.—**m. of an imaginary quantity**, the square root of the sum of the squares of the numbers of real and of imaginary units.—**m. of a section** (*Engin.*), a function of the dimensions of the section, proportional to the moment of its resistance.—**m. of a system of logarithms**, a number that, multiplied into the logarithms of one system, especially the Napierian system, gives those of another system.—**m. of compression**, the ratio of a pressure to the resulting change in volume.—**m. of decay**, the time in which a velocity, decreasing in geometrical proportion, becomes smaller than its initial value in the ratio 1:2.783.—**m. of elasticity**, a number determining the extension or change of form (strain) of a body under the influence of a stretching or distorting force (stress), and, in the case of a body whose dimensions are all unity, equal to the ratio of the strain to the stress. *Young's m.*—**m. of periodicity**, the constant difference between the values of an integral on opposite banks of a cross-cut.—**m. of resistance**, a modulus of elasticity or of rupture.—**m. of rupture**, the measure of the force required to break a substance across, as compared with the force required to break a bar of the substance one inch square.—**principal m.**, a modulus of elasticity where stress and strain are of the same type.—**stretch-m.**, *n.* The modulus of elasticity.

mo'dum-ite, 1 mō'dum-ite; 2 mō'dum-ite, *n.* *Mineral.* A metallic cobalt arsenide; skutterudite. [*L. Modum, Norway.*]
mo'dus, 1 mō'dus; 2 mō'dus, *n.* [*L.*] 1. Mode; manner. 2. *Law.* (1) The qualification or modification of the usual terms of an instrument of conveyance either by restriction or enlargement. (2) The narrative portion of an indictment, setting forth the mode in which the crime was committed. (3) A payment of money in place of tithes in kind; any mode whereby the law of tithing is modified and a method of taking tithes is introduced under agreement.

Instead of the payment in kind of a fifth part of the produce, a *modus* . . . was established in the greater part of the districts. *Annals of the History of the County of Devon, vol. 1, p. 431, 1850.*
—**modus decimandi** [*L.*], same as *MODUS*. 2. (3).—**m. operandi** [*L.*], a mode of operation.—**m. ponens** [*L.*] (*Logic*), inference from a hypothetical premise, assumed as true, to the truthfulness of a conclusion.—**m. tollens** [*L.*] (*Logic*), inference from a hypothetical proposition, with a false consequent, to the falsity of the antecedent.—**m. vivendi** [*L.*], literally, a mode of living; in diplomacy, a temporary arrangement between two sovereignties providing for the conduct of certain affairs pending negotiations for a treaty on the same subject-matter.

mod'wal, 1 mōd'wal; 2 mōd'wal, *n.* The bee-eater.

a series of tongue-shaped reliefs.—**cat's-head m.** (*Arch.*), molding decorated with heads of different kinds of animals or with figures of grotesque design.—**dog-tooth m.**, an indented medieval molding bearing a resemblance to a row of dogs' teeth.—**double-cone m.**, see **DOUBLE-CONE**, under **DOUBLE**.—**interpenetrating m.**, any molding interrupted by intersection with other moldings or architectural features, as in late Gothic architecture. Compare **INTERPENETRATION**.—**2.—mold'ing-bed'**, *n.* A machine for cutting moldings in marble.—**m.-board**, *n.* Same as **MOLD-BOARD**.—**m.-box**, *n.* Same as **FLASK**.—**m.-crane**, *n.* A crane constructed for foundry use, and specially adapted for molds and flasks.—**m.-cutter**, *n.* A cutting-tool the edge of which corresponds with the shape of the molding to be made. Molding-cutters were formerly used like a hand-plane, but now are usually rotary, with several cutting-irons, and operated by a machine.—**m.-edge**, *n.* The line or curve which marks the position and outline of a frame in a ship-builders' molding-plane.—**m.-flask**, *n.* Same as **FLASK**.—**m.-former**, *n.* A former consisting of thin pieces of metal held together with a screw and enclosed in a frame. When placed over or against and adjusted to a molding or other surface, it reproduces the form of the surface.—**m.-frame**, *n.* A template to shape a loam-mold.—**m.-hole**, *n.* An excavation in a foundry floor for large castings.—**m.-machine**, *n.* 1. A machine for making wood moldings or for paneling or profiling wood; a wood-molder. 2. A machine for making composition moldings by pressure. 3. A set of rollers for shaping sheet metal, as in cornice-making. 4. *Founding*. A machine for making (1) loam-molds in flasks, from small complete patterns, or (2) gear-wheels and other large symmetrical objects by a radial frame bearing a template, or pattern of a small section of the gear; a gear-molding machine. 5. A machine for working moldings on the surface of stone.—**m.-mill**, *n.* An establishment for making wooden moldings.—**m.-plane**, *n.* See **PLANE**.—**m.-plow**, *n.* A plow shaped for forming ridges, completely turning over the soil.—**m.-sand**, *n.* A mixture of sand and loam used by founders in making sand-molds.—**m.-table**, *n.* A potter's table for shaping their ware.—**open sand-m.**, a process of founding without any cope or top to the mold: used for heavy objects.—**oxeye m.**, a molding of concave section approximately semicircular, hence intermediate between a cavetto and a scotia.

mold'warp', 1 mōld'wārp'; 2 mōld'wārp', *n.* [*Prov. Eng.*] The mole. **mould'warp'**, 1 mōld'wārp'; 2 mōld'wārp', *n.* [*Prov. Eng.*] Covered or filled with mold; hence, old; musty; decaying; as, mouldy books. 2. Earthy. **mole**, 1 mōl; 2 mōl, *n.* [*MOLED*; *MOULING*]. 1. *t.* 1. To burrow in, as a mole. 2. [*Prov. Eng.*] To remove mole-hills from. 2. *l.* 1. [*Prov. Eng.*] To kill moles. **mole**, *n.* 1. A small permanent spot on the skin, slightly protuberant, and often dark and hairy; a birthmark. It may many times happen, that what is censured for a fault, is rather an ornament, as moles often add to the beauty of a face. *Scott Count Robert of Paris* vol. i, intro., p. 16. [*l.* & *m.* 1859.] 2. A stain or spot, as in a garment. 3. A mark, fault, or disfigurement: a figurative use. [*< AS. māl, spot.*]

mole, *n.* 1. A talpine insectivorous mammal having a barrel-shaped body, very broad fore feet adapted for digging, and very short broad clavicular and humeral bones. The eyes are minute and often covered by skin, and the fur is velvety. The moles form extensive underground excavations in pursuit of the earthworms that are their prey. *Talpa europaea* is the common European mole; *Scalops aquaticus*, the Common North American; *Condylyura cristata*, the star-nosed mole, of the same region. 2. A mole-plow. 3. One who burrows or works underground; a miner: a figurative use. 4. [*Slang.*] One having impaired vision, either physical or mental. 5. *pl.* Trousers made of moleskin. 6. Mole-cricket. [*Abbr.* of **MOLDCARP**, *< AS. mōde*, dirt, + *weorpan*, throw].—**Cape mole**, 1. The coast mole-rat. 2. The gold-mole.—**mole-but'**, *n.* A sunfish or moid. **m.-batt.**—**m. cast**, *n.* A mole-hill.—**m.-catcher**, *n.* 1. A professional exterminator of moles. 2. A term of contempt.—**m.-catching**, *a.*—**m.-cricket**, *n.* A gryllid insect (genus *Gryllotalpa*) having the fore legs enlarged and adapted for burrowing, as *G. vulgaris*.—**m.-diver**, *n.* [*Prov. Eng.*] The European diving grebe or dabchick (*Podiceps flavitarsis*).—**m.-eyed**, *a.* Having small eyes and imperfect eyesight like the moles.—**m.-hill**, *n.* A little heap or ridge of earth thrown up by a mole in burrowing. **m.-heap**—**m.-hilly**, *a.*—**m.-hole**, *n.* A mole's burrow.—**m.-mouse**, *n.* A meadow-mouse; specif., the pine-mouse.—**m.-plant**, *n.* The caper-spurge; supposedly obnoxious to moles. **m.-street**—**m.-plow**, *n.* A plow having a deep-seated pointed iron shoe to make a water-conduit in subsoil.—**m.-rat**, *n.* 1. An Old World mole-like spalacoid rodent with small or rudimentary eyes and fore feet adapted for digging. *Spalax typhlus* is the great mole-rat of southeastern Europe. *Bathyrugus maritimus* is the coast mole-rat of South Africa. 2. A mole-like siphneine murid rodent of the Old World. 3. The duckbill.—**m.-shrew**, *n.* 1. An American short-tailed shrew (genus *Eutamias*). 2. A shrew-mole.—**m.-spade**, *n.* A spade used in mole-hunting.—**mole'warp'**, *n.* [*Prov. Eng.*] A mole.

1. American Mole. 2. Burrow of the common mole of east-ern North America; *Condylyura cristata*, the star-nosed mole, of the same region. 3. One who burrows or works underground; a miner: a figurative use. 4. [*Slang.*] One having impaired vision, either physical or mental. 5. *pl.* Trousers made of moleskin. 6. Mole-cricket. Eng.*] The European diving grebe or dabchick (*Podiceps flavitarsis*).—**m.-eyed**, *a.* Having small eyes and imperfect eyesight like the moles.—**m.-hill**, *n.* A little heap or ridge of earth thrown up by a mole in burrowing. **m.-heap**—**m.-hilly**, *a.*—**m.-hole**, *n.* A mole's burrow.—**m.-mouse**, *n.* A meadow-mouse; specif., the pine-mouse.—**m.-plant**, *n.* The caper-spurge; supposedly obnoxious to moles. **m.-street**—**m.-plow**, *n.* A plow having a deep-seated pointed iron shoe to make a water-conduit in subsoil.—**m.-rat**, *n.* 1. An Old World mole-like spalacoid rodent with small or rudimentary eyes and fore feet adapted for digging. *Spalax typhlus* is the great mole-rat of southeastern Europe. *Bathyrugus maritimus* is the coast mole-rat of South Africa. 2. A mole-like siphneine murid rodent of the Old World. 3. The duckbill.—**m.-shrew**, *n.* 1. An American short-tailed shrew (genus *Eutamias*). 2. A shrew-mole.—**m.-spade**, *n.* A spade used in mole-hunting.—**mole'warp'**, *n.* [*Prov. Eng.*] A mole.

When a body is heated, a change of molecular arrangement always occurs, and to produce this change heat is consumed. *Tyndall Fragments of Science* lect. i, p. 28. [*l.* 1871.] 2. Resulting from the action of molecules or primary elements; as, molecular changes.—**molecular compound**, one in which the component molecules may be considered as retaining their identity, as $Al_2(SO_4)_3 \cdot K_2SO_4 \cdot 24H_2O$.—**m. depression**, the degree by which the freezing-point of any liquid is lowered in consequence of dissolving a gram-molecular weight of any soluble substance in 100 grams of the liquid.—**m. latent heat**, the heat absorbed in converting a gram-molecular weight of any liquid into vapor at the same temperature.—**m. magnetic friction**, magnetic hysteresis.—**m. refraction**, the product of the specific refractive energy of a body and its molecular weight.—**mole'cu-lar-ist**, *n.* A specialist in the study of molecules.—**mole'cu-lar-ity**, *n.*—**mole'cu-lar-ly**, *adv.—**mole'cu-lar-um**, 1 mō-lek'yū-l'ri-um; 2 mō-lek'yū-l'ri-um, *n.* [*l.* & *pl.*] An apparatus to illustrate certain electrical phenomena, on the theory of molecular vibrations.*

mole'cule, 1 mōl'e-kiūl; 2 mōl'e-kiūl, *n.* 1. The smallest part of a substance that can exist separately and still retain its composition and properties; the smallest combination of atoms that will form a given chemical compound. 2. *Physics*. The structural unit, as distinguished from the atom, and applied to particles of gases in the kinetic theory independently of their relation to the chemical molecule.

All physical as opposed to chemical changes, as evaporation, freezing, and expansion by heat, are supposed to be due to alterations in position or relations of molecules, while forces of energy like heat and electric energy,

moll-ti-es, 1 mol-ti's-iz; 2 mol-ti's-iz, n. [L.] *Pathol.* A morbid softening of an organ or a tissue: as, *mollities cerebri*, softening of the brain; *mollities ossium*, softening of the bones.—**m. ungulum**, a trophic disease of the nails, causing them to become soft.—**moll-tious**, a. [Rare] Softly luxurious.—**moll-tude**, n. Softness.

moll-use, n. Same as **MOLLUSK**.
Moll-us'-ca, 1 mol-lus'-ka; 2 mol-lus'-ca, n. *pl. Zool.* A division of invertebrates, especially a branch having an unsegmented bilateral body, four nerve-cords arranged in pairs, two visceral and two pedal, with lateral and median abdominal ganglia. It embraces: (1) *Cephalopoda*, cuttlefishes, squids, and the like; (2) *Gastropoda*, snails, slugs, etc.; (3) *Scaphopoda*, tooth-shells; (4) *Isopoda*, chitons, etc.; and (5) *Acephala*, bivalves. See **ANIMAL KINGDOM**, under **ANIMAL**. In the *Mollusca* the body, which is usually held by zoologists to be closely related to that of the worms, is soft and fleshy and as a rule closely molded to a hard shell, bivalve or univalve, by means of muscles. Some have no shell, but instead have a small calcareous slab buried in the mantle. Among those which are not stationary, some have a *foot* developed in the middle of the body, which is used according to the nature of the animal for crawling, leaping, digging, swimming, etc. The *Mollusca* have a nerve-system controlled by nervous centers, and in most of them the organs of touch are composed of lips, or appendages on the head or body. The number of living species of *Mollusca* is said to be about 20,000; the same number are said to be extinct.

When we come to examine the land and fresh-water *Mollusca*, it is found not merely that some *Mollusca* are terrestrial and others fluviatile, but that certain species haunt the hills and others the valleys, some the recesses of woods and others the open meadow sides, some prefer the limestone rocks, others the sandy or clayey districts, some live only in still or gently moving waters, while others are never found except where the current is rapid and powerful. It is within the tropics that the *Mollusca* become most numerous, and assume their finest and queerest forms. A. H. COCKER *Mollusca* p. 3. (n. 1893.)

[< L. *molluscus*; see **MOLLUSK**.]—**moll-us'-can**, a. & n.—**moll-us'-cous**, a.—**moll-us'-cous-ness**, n.
moll-us'-coid, 1 mol-lus'-koid; 2 mol-lus'-koid, n. 1. Like a mollusk.

The lower *molluscoid* animals . . . have no organs of vision. GRANT ALLEN *Colour-Sense* p. 25. (n. m. & co. 1879.)
2. Of or pertaining to the *Molluscoidea*. II. n. One of the *Molluscoidea*. [MOLLUSCA + -OID.]

Moll-us'-col'-de-a, 1 mol-lus'-koid'-e; 2 mol-lus'-koid'-e, n. *pl. Zool.* A division of the animal kingdom, especially a branch embracing the brachiopods and polyzoans, which are now known to have affinities with the worms rather than with mollusks. They are characterized by being lophophoral. **Moll-us'-col'-da**; **Moll-us'-col'-des**;—**moll-us'-col'-dal**, a.—**moll-us'-col'-dan** or **-de-an**, a. & n.

moll-us'-cum, 1 mol-lus'-kum; 2 mol-lus'-kum, n. *Pathol.* A skin-disease manifesting soft tumors of slow growth, commonly around the hair-follicles; literally, a soft substance. [molluscus; see **MOLLUSK**.]—**molluscum contagio-sum**, a formation of pinkish tumors, small and containing a milky substance. **m. epithellale**.

moll-us'-k, 1 mol-lus'-k; 2 mol-lus'-k, n. One of the *Mollusca*. The shells of mollusks generally, and even of the ordinary lamp-shells, are hardened by common limestone or carbonate of lime. J. W. DAWSON *Earth and Man* p. 41. (n. 1887.)

[< F. *mollusque*; < L. *molluscus*, < *mollis*, soft.] **moll-us'-kig'-er-ous**, 1 mol-lus'-kig'-er-us; 2 mol-lus'-kig'-er-us, a. Bearing mollusks; specif. said of certain elongated tubular sacs attached by one end to one of the intestinal vessels of some synapta. [MOLLUSK + L. *gero*, carry.] **moll-us'-kig'-er-ous**.

moll-us'-kite, 1 mol-lus'-kit; 2 mol-lus'-kit, n. The dark-colored carbonaceous matter sometimes found in shell-marbles: due to the petrification of organic portions of mollusks. (ince, Prussia.)

Moll-witz, 1 mol-lits; 2 mol-lits, n. A village in Silesia prov-moll-witz, 1 mol-lits; 2 mol-lits, n. (Prov. Eng.) A wastail, especially the pied wagtail (*Motacilla lugubris*). (Dim. of *Moll*.) **molly washdish**.—**molly cottonball**, same as **COTTONBALL**.

moll-y, n. Same as **MALLENGUCK**. **moll-y-mawik'**.

moll-y's, n. [-LES, 1-iz; 2-iz, n.] [Printers' Slang.] In jefing, a throw of quads in which no nicks are turned up; now nearly obsolete since the advent of machine composition.

moll-y's, n. Among sea-captains, a convivial night; specif., a revolving bout of whaling skippers. **moll-yet**.

moll-y's, n. 1. A basket used for packing fruit for market purposes. 2. (M-) (1) Mary: a pet form. **Moll-yet**. (2) [Slang, Sing.] A girl; lass; wench; occasionally, a harlot. (3) A mollycoddle.

moll-y-cod'-dle, 1 mol-lus'-koid; 2 mol-lus'-koid, n. To coddle; show excess of tenderness toward.

moll-y-cod'-dle, n. [Slang.] An excessively effeminate person; one who is coddled or coddles himself: sometimes abbreviated **moll** and **molly**.

moll-y-cod, 1 mol-lus'-koid; 2 mol-lus'-koid, n. A man or boy who unduly concerns himself in woman's domestic work.

moll-y-gut, 1 mol-lus'-gut; 2 mol-lus'-gut, n. A goosefish.

moll-y-hawk, 1 mol-lus'-hak; 2 mol-lus'-hak, n. A bird, the malleucum. **moll-y-mock**.

Moll-y Ma-guire, 1 mol-lus'-ma-guir; 2 mol-lus'-ma-guir, n. 1. One of an Irish secret society that terrorized the coal-regions of eastern Pennsylvania (1867-77), committing many murders and other outrages, until broken up by the conviction and execution of several of the ringleaders: so called because their warning and threatening letters were signed "Molly Maguire." 2. Originally, one of a secret society in Ireland (1843) organized to prevent evictions by terrorizing process-servers, etc.: so called from their disguising themselves in women's clothes.—**Moll-y-Ma-guire-ism**, n.

moll-y-maw, 1 mol-lus'-maw; 2 mol-lus'-maw, n. [S. Afr.] An albatross (*Diomedea melanophrys*).

moll-man, 1 mol-lus'-man; 2 mol-lus'-man, n. *Frud. Hist.* A villain who held land subject to rent in lieu of services. [malla, agreement, + *MAN*.] [as **MULMUTINE**.]

Moll-mu'-ti-an, 1 mol-lus'-mu-ti-an; 2 mol-lus'-mu-ti-an, a. Same as **MOLLUSCIVOROUS**.

Mol-loch, 1 mol-lus'-loch; 2 mol-lus'-loch, n. 1. *Anc. Myth.* (1) A god of the Phenicians, associated with Baal, probably as a sun-god, but differing from him in being almost totally wanting in benevolent quality. His worship embraced human sacrifice, ordeals by fire, self-mutilation, etc. *Moloch*, horrid king, besmeared with blood. MILTON *P. L.* bk. i, l. 302.

(2) Same as **MILCOM**. 1 *Kings* xi, 7; 2 *Kings* xlii, 13. Hence, figuratively, any pernicious influence or system that causes loss of life or sacrifice of principle. 3. [m.] An Australian agamid lizard (*Moloch horridus*) covered with spines. 4. [m.] A teetee (*Callithrix moloch*). (LL.) the god. < Gr. *Moloch*, < Heb. *moloch*.)—**Mol-loch-ize**, v. [

Mol-lo-ga, 1 mol-lus'-ga; 2 mol-lus'-ga, n. A river in central European Russia; length, 340 m. to the Volga river.

moll-oid, 1 mol-lus'-oid; 2 mol-lus'-oid, n. 1. Of or pertaining to the *Mollusca*. II. n. One of the *Mollusca*. [MOLLA + -OID.] **Moll-o'-ka**, 1 mol-lus'-ka; 2 mol-lus'-ka, n. An island in Hawaii; 201 sq. m.; a leper colony.

Moll-o'-ka, 1 mol-lus'-ka; 2 mol-lus'-ka, n. *pl.* See **RAS-KOLAT**. **Moll-o'-ka-ny**.

moll-er, 1 mol-lus'-er; 2 mol-lus'-er, n. [Slang.] A renovated silk hat. **moll-er-er**.

moll-om'bwa, 1 mol-lus'-bwa; 2 mol-lus'-bwa, n. [Afr.] Cam-wood or barwood. See **BARWOOD**.

The cam-wood (?) is here called *mollumbwa*, and grows very abundantly. The people take the bark, boil, and grind it fine: it is then a splendid blood-red, and they use it extensively as an ornament. LIVINGSTONE *Last Journals* p. 160. (n. 1875.)

moll-om'pl, 1 mol-lus'-pl; 2 mol-lus'-pl, n. [Afr.] African rosewood.

moll-o'-pes, 1 mol-lus'-pes; 2 mol-lus'-pes, n. *pl.* Same as **VIBICES**. [mollips (*mollip*), wool.]

Moll-o'-po-sper'mum, 1 mol-lus'-po-sper'mum; 2 mol-lus'-po-sper'mum, n. *Bot.* A genus of European herbs of the parsley family, the only species being *M. cicuratum*, a tall handsome perennial with finely cut large fern-like leaves. It is frequently planted in large shrubberies. [mollips, a wool, + *sperma*, seed.]

moll-osse, 1 mol-lus'-osse; 2 mol-lus'-osse, n. [F.] Same as **MOLOSSUS**. 1. **Moll-oss'an**, 1 mol-lus'-an; 2 mol-lus'-an, n. 1. A. Pertaining to the *Molossi*, an inland tribe of ancient Epirus. 2. [m.] Of, pertaining to, or like a bulldog. II. n. 1. A member of the *Molossian* tribe. 2. [m.] A molossian.

moll-oss'ic, 1 mol-lus'-ic; 2 mol-lus'-ic, a. *Pros.* Of or pertaining to a molossus.

His [the orator's] action . . . falls into the rhythm of play, where you distinguish . . . the solemn, religious spondee, the swift trochee run of eagerness or fear, the heavy molossic tread of grief or sorrow. BUSHNELL *Work and Play* p. 34. (s. 1864.)

Moll-oss'ic-da, 1 mol-lus'-ic-da; 2 mol-lus'-ic-da, n. *pl. Mam.* The *Molossine* as a family. [MOLOSSUS.]—**moll-oss'ic-d**, a. & n.

Moll-oss'ic-si, 1 mol-lus'-ic-si; 2 mol-lus'-ic-si, n. *pl. Mam.* A subfamily of emballonurid bats, especially those with a thick tail extending beyond the interfemoral membrane. short robust legs, and strong incisors; bulldog or mastiff bats. [MOLOSSUS.]—**moll-oss'ic-sin**, a. & n.—**moll-oss'ic-sold**, a. & n.

moll-oss'us, 1 mol-lus'-us; 2 mol-lus'-us, n. [-si, 1-di; 2-iz, n.] 1. *Gr. Pros.* A foot of three long syllables (— — —); classical usage only. 2. [M-] *Mam.* A genus typical of *Molossine*. [Def. 1 < L. *molluscos*, < Gr. *molluscos*, < *molossos*, Molossian. Def. 2 < L. *Molossus*, Molossian dog, < Gr. *Molossos*, Molossian.]

moll-oss'us, 1 mol-lus'-us; 2 mol-lus'-us, n. [Afr.] An iron hoe, heart-shaped, having a handle from 8 to 10 inches long. In the Upper Nile and lake regions it is used as currency.

The natives are exceedingly particular in the shape of their *molloss*; and invariably prove them by balancing them on their heads and ringing them by a blow with the finger. BAKER *Albert N'yanza* p. 166. (MAGC. 1888.)

Moll-pa'-di'-de, 1 mol-lus'-pa-di'-di; 2 mol-lus'-pa-di'-di, n. *pl. Echid.* A family of pneumonophorous apodal holothurians with cylindrical, clypeate, or digitate tentacles. **Moll-pa'-di-a**, n. (t. g.) [Perhaps < Gr. *mollis*, hardly, + *pous*, foot.]

Moll-pa'-di-det, 1 mol-lus'-pa-di-det; 2 mol-lus'-pa-di-det, a. **moll-rook-en**, 1 mol-lus'-ruk-en; 2 mol-lus'-ruk-en, n. [Local, Ir.] The great crested grebe.

moll, 1 moll; 2 moll, v. *I. t.* To cast or slough off, as **moult**, hair, feathers, etc. *II. t.* 1. To cast or shed the outside integument or its appendages, as skin, feathers, or horns; as, the bird is molting. 2. To be on the point of being shed; as, the bird's feathers are molting. [ME. *moulen*, < L. *mutio*; see **MUTABLE**.]

molt, n. 1. The act or process of molting. 2. The sea-moult, son or period of molting.

molt'en, 1 moll'-en; 2 moll'-en, n. 1. Reduced to the fluid state by heat; melted; fused; as, *molt'en* metal. 2. Made of matter in a state of fusion; cast; as, *molt'en* images. 3. Liquid. [Pp. of MELT, v.]—**molt'en sea** (Bib.), the brazen sea. 2 *Chron.* iv, 2.—**molt'en-ly**, adv.

Molt'eno, 1 mol-lus'-no; 2 mol-lus'-no, n. A town in Cape of Good Hope province, South Africa.

molt'er, 1 mol-lus'-er; 2 mol-lus'-er, n. [Rare.] A bird at the **moult'er**, molting stage.

Molt'ke, 1 mol-lus'-ke; 2 mol-lus'-ke, n. 1. Count **Helmuth Karl Bernhard von** (1791-1857) (1800-1857). A Prussian soldier; field-marshal of the German army and strategist, who planned the campaigns against Austria in 1866 and France in 1870-1871. 2. Count **Helmuth Johannes Ludwig** (1818-1891) (1818-1891), a German strategist and general in Great War; nephew of preceding.

molt'us, 1 mol-lus'-us; 2 mol-lus'-us, n. [L.] *Mus.* Much; very; as, *molt'us* adagio (very slow).

Mol-u'-ca, 1 mol-lus'-ka; 2 mol-lus'-ka, n. Of or pertaining to the Molukka Islands.—**Molucea** bat, the harpy bat of Celebes and Amboyna.—**Mol-u'-ca-ber-ry**, n. 1. A white-flowered tree (*Alseodaphne serrata*), a native of the East Indies. 2. The tree's fruit, about the size and shape of an olive.—**M. crab**, the king-crab.

Mol-u'-cel'-la, 1 mol-lus'-cel-la; 2 mol-lus'-cel-la, n. *Bot.* A small genus of annual herbs of the mint family (*Mentaceae*), natives of the Mediterranean region, with petioled, crenately cut leaves, and densely clustered flowers having a peculiar shallow, bell-shaped calyx, whence *M. lewis* is known in the gardens as the *shellflower*. Called also *Molucea batini*, because formerly thought to have come from the Molukka Islands. [Moluccas, a name of the Spice Islands.]

Mol-uk'-ka Is'-lands. A group of spice-producing islands of the Malay Archipelago, between New Guinea and the island of Celebes; under Dutch control. **Mol-u'-cast**.

moll-u'-la, 1 mol-lus'-u-la; 2 mol-lus'-u-la, n. *Entom.* The head of the tibia when convex and bent. [mola, millstone.]

moll-un'-ghee, 1 mol-lus'-un-gi; 2 mol-lus'-un-gi, n. [Ind.] A salt-maker.

moll-wt., *abbr.* Molecular weight.

moll-y, 1 moll-y; 2 moll-y, a. [Rare.] Mole-like. **moll-yet**.

moll-y, n. 1. A fabled plant of magic virtues, with a white flower and a black root: according to Homer, given by Hermes to Odysseus as an antidote to the enchantments of Circe. 2. A European wild garlic (*Allium moly*). [L. < Gr. *moly*.]—**dwarf moly**, *Allium chinensis*.

moll-yb'-dam'-au-ro'-sis, 1 mol-lus'-dam-a-u-ro-sis; 2 mol-lus'-dam-a-u-ro-sis, n. *Pathol.* Loss of sight due to lead-poisoning.

moll-yb'-date, 1 mol-lus'-dat; 2 mol-lus'-dat, n. *Chem.* A salt of molybdic acid. The common molybdates are the **dimolybdate** (see **MOLYBDIC ACID**, 2) and the **monomolybdate** (see **MOLYBDIC ACID**, 1).—**molybdate of ammonium**, a molybdic acid salt largely used in analysis to determine phosphorus and phosphoric acid.

moll-yb'-de-nite, 1 mol-lus'-di-nit or mol-lus'-di-nait; 2 mol-lus'-di-nit or mol-lus'-di-nait, n. *Mineral.* A scaly, metallic, lead-gray, soft molybdenum sulfid (MoS_2), crystallizing in the hexagonal system.

moll-yb'-de-num, 1 mol-lus'-di-num or mol-lus'-di-num; 2 mol-lus'-di-num or mol-lus'-di-num, n. A hard, silver-white, metallic element. See **ELEMENT**.

Molybdenum is usually found as molybdenite; also as wulfenite; more rarely it occurs as molybdic ochre and paterite. ROSCOE AND SCHROEDER *Chemistry* vol. ii, p. 184. (n. 1880.)

[< L. *molybdæna*, < Gr. *molybdaina*, galeum, < *molybdos*, lead.] **moll-yb'-de-nat**.

—**molybdenum trioxid**, same as **MOLYBDIC ACID**, 3.—**moll-yb'-de-nif'-er-ous**, a. Containing molybdenum.—**moll-yb'-de-nous**, a. Of or pertaining to molybdenum, especially in its lower valence. **moll-yb'-dous**.—**moll-yb'-dic**, a. Of, pertaining to, or containing molybdenum, especially in its higher valence. **moll-yb'-de-nic**.—**moll-yb'-dic acid**, 1. A yellow crystalline compound ($\text{H}_2\text{MoO}_4 \cdot \text{H}_2\text{O}$) which forms upon heating its anhydrous variety (H_2MoO_4), consisting of white crystals. 2. An amorphous compound (H_2MoO_4). 3. A white powder (MoO_3) which becomes yellow when heated.—**molybdic anhydrid**, same as **MOLYBDIC ACID**, 3.

moll-yb'-dite, 1 mol-lus'-dit; 2 mol-lus'-dit, n. *Mineral.* A capillary, earthy, silky, adamantine, straw-yellow molybdenum oxid (MoO_3), crystallizing in the orthorhombic system. **molybdic ochre**; **moll-yb'-diat**.

moll-yb'-do-, 1 mol-lus'-do; 2 mol-lus'-do, n. Derived from Greek *molybdos*, lead: a combining form.—**moll-yb'-do-car**, 1 mol-lus'-do-car; 2 mol-lus'-do-car, n. *Pathol.* Heartburn due to lead-poisoning.—**moll-yb'-do-col'-ic**, n. *Pathol.* Lead-colic; painters' colic.—**moll-yb'-do-dys-pep'-sia**, n. *Pathol.* Chronic indigestion due to lead-poisoning.—**moll-yb'-do-man'-ey**, n. Divination by means of molten lead, the diviner basing his conclusions on the number, form, and motions of the drops that float on the surface.—**moll-yb'-do-mo-nite**, n. *Mineral.* A selenite of lead (PbSeO_4) found in Argentina.—**moll-yb'-don'o-sus**, n. *Pathol.* Lead-poisoning. **moll-yb'-do-sist**.—**moll-yb'-do-par'-e-sis**, n. *Pathol.* Lead-palsy; painters' paralysis. [MOLINE.]

moll-y-né, 1 mol-lus'-né; 2 mol-lus'-né, a. *Her.* Same as **moll-y-site**, 1 mol-lus'-sit; 2 mol-lus'-sit, n. *Mineral.* An interesting, brownish-red, yellow ferric chlorid (FeCl_3), found usually in the vicinity of volcanoes as a deposit on lavas, etc. [molybdēs, delfement, < *molybd*, stain.]

Mom'-bach, 1 mōm'-bax; 2 mōm'-bax, n. A village in Rhein-Hessen province in the republic of Hesse.

Mom'-ba-sa, 1 mōm'-bā-sa; 2 mōm'-bā-sa, n. A seaport of British East Africa; under the Sultan of Zanzibar from 1834 to 1888. **Mom'-ba-si**. [Esd. ix, 34.]

Mom'-dis, 1 mōm'-dis; 2 mōm'-dis, n. *Bib.* (Apocrypha). 1 *mōme*, 1 mōm; 2 mōm, a. [North. Eng.] Soft; smooth. **mōme**, n. 1. [OE.] A bullock or clown; hence, a fool; lout. 2. A carping critic.

Mō-mē-ne', 1 mō-mē-ne; 2 mō-mē-ne, n. A township and city in Kankakee county, Ill.

mō-mēnt, 1 mō-mēnt or -mānt; 2 mō-mēnt, n. 1. A very small period of time; a period too short to be taken into account; also, a point of time; an instant; as, in a *moment* it was done. 2. The present time; with the definite article.

Manners carry the world for the *moment*, character for all time. A. BRONSON ALCOCK *Table-Talk*, p. 44. (n. broos. 1877.)

3. Importance, as in influencing judgment or action; value; consequence; as, matters of great *moment*. 4. The appropriate or suitable occasion or momentary conjunction of circumstances affording an opportunity; with the definite article; as, he seized the *moment* and grew great; also, with the ellipsis of *when*, the instant of action; as, the *moment* I saw him. 5. Same as **MO-MENTUM**. 6. *Philos.* An essential element or constituent; especially, an originating cause or directing principle of the activity or development of anything; a moving force. 7. In the Newtonian mathematics, a differential. 8. *Mech.* The measure of a force by its effect in producing rotation. See below. 9. Tendency or trend, as of pressure, force, or movement; potency. 10. *Statistics.* Influence in determining the center or axis of distribution of the resources, population, etc., of a given area. [F. < L. *momentum*, particle, < *moveo*, move.]

—**bending moment** (*Mech.*), the moment tending to bend a beam, shaft, etc. For any particular section it is equivalent to the algebraic sum of the moments of all the forces bearing upon either side of such section. **m. of flexure**.—**equivalent bending m.** (*Engin. Design*), the bending moment which causes the greater principal stress to occur in a shaft under combined torsion and flexure: numerically equal to one-half the equivalent moment of torsion.—**equivalent twisting m.** (*Engin. Design*), a moment producing in a shaft the greatest direct stress equivalent to combined moments of torsion and flexure, being in practical application not a moment of torsion, but of flexure. It is expressed by $M + \sqrt{M^2 + T^2}$, *M* representing the simple bending moment, and *T* the simple twisting moment, on the shaft.—**inertia turning-moment**, that turning-moment in an engine which is caused by the inertia of the moving portions.—**lorication m.**, same as **DICTYOTIC MOMENT**. See **DICTYOTIC**, a.—**magnetic m.**, the moment of a directive magnetic couple; specif., the product of the strength of one pole of a magnet by the length of the magnet.—**m.-axis of a couple**, a vector parallel to the axis of a couple and proportional to its moment.—**m. of a couple**, the product formed by multiplying either of its forces by the perpendicular distance between them.—**m. of a force**. 1. With regard to a line or axis, the product formed by multiplying the component of the force in the direction perpendicular to the plane passing through the line and the point of application by the shortest distance of the component from that line. 2. As to a point, the product formed by multiplying the force by the least distance of the line in which it acts from the point. 3. With regard to a plane parallel to the force, the product formed by multiplying such force by the perpendicular distance from such plane of its point of application.—**m. of inertia**, in a rotating body, the sum of the products formed by multiplying the mass of each particle by the square of its distance from an axis.—**m. of momentum** (*Mech.*), the product of the mass by the angular velocity.—**m. of population**, a unit used in determining centers of population, produced by multiplying the population of a given area into the distance of the center of population of that area from an assumed parallel or meridian. The areas used for this purpose by the United States Census Office are square degrees.—**m. of resistance** (*Mech.*), the sum of the moments of all the forces within and about the neutral axis of a beam under stress which counterbalance the external moment of flexure.—**m. of stability**, of a body or structure supported at a given plane; the moment of the couple of forces which must be applied in a given vertical plane to that body or structure in addition to its own weight, in order to transfer the center of resistance of the joint to the limiting position consistent with stability.—**statical m.**, same as **MOMENT OF A FORCE**.—**unit m. of inertia**, that of a body given unit angular acceleration by a unit couple.

2. [*Rare.*] To dispose of for money; as, to *money* a cargo. 3. To furnish with money.
mon'ey, n. [*-eys* or *-ies*, 1-*iz*; 2-*is, pl.*] 1. Any material that by agreement serves as a common medium of exchange and measure of value in trade. Among primitive peoples various articles, some having intrinsic value, as cattle, copper wire, or pieces of cloth, others having arbitrary value, as wampum, beads, or cowries, are or have been accepted by custom as money. From early times commercial nations have used gold and silver, current by weight as in Eastern countries, or in stamped pieces, as in Western countries, as either customary or legalized money.
The essential natural functions of money may be stated as including these three: 1. It is a commodity—having a value of its own. 2. It is a common measure of values. 3. It has general exchangeability, and is, hence, a general medium of exchange.
J. M. GILBERT *Political Economy* p. 283. [v. a. s.]
Specif.: (1) A standard of value and medium of payment established by law; legal tender. (2) Coined metal; standard currency national coin, including tokens of restricted legal tender; specie. (3) Paper issued by a government or by a bank or banks on the authority of a government and made redeemable in standard coin. (4) In a wider sense, any notes or tokens that are currently accepted in exchange for commodities; cash; specie, in banking, any paper that is exchanged in settlement of balances, as checks, drafts, and the like.
2. Salable possessions; wealth; property; as, making *money*; a man worth much *money*. 3. *pl.* Cash payments or receipts; individual sums making up an amount. 4. A system of coinage; a denomination of value, coined or nominal; as, in English money; *monies* of all nations; a *money* of account. [*< OF. monie, < L. moneta; see MINT.*]
Syn.: bills, bullion, capital, cash, coin, currency, funds, gold, notes, property, silver, specie. *Money* is the authorized medium of exchange; *money* is called *coin* or *specie*. What are termed in England bank-notes are in the United States commonly called *bills*; as, a five-dollar *bill*. The notes of responsible men are readily transferable in commercial circles, but they are not *money*; as, the stock was sold for \$500 in *money* and the balance in merchantable paper. *Cash* is *specie* or *money* in hand, or paid in hand; as, the cash account; the cash price. In the legal sense, *property* is not *money*, and *money* is not *property*; for *property* is that which has inherent value, while *money*, as such, has but representative value, and may or may not have intrinsic value. *Bullion* is either *gold* or *silver* uncoined or the coined metal considered without reference to its coinage, but simply as merchandise, when its value as *bullion* may be very different from its value as *money*. The word *capital* is used chiefly of accumulated *property* or *money* invested in productive enterprises or available for such investment. Compare *PROPERTY*; *WEALTH*.

M

By extraordinary energy and executive skill, . . . the 'Monitor' was launched . . . one hundred days from the laying of her keel.

Appleton's Annual Cyc. vol. xiv, p. 298.

4. *Car-building*. A monitor-roof. 5. A very large lizard of the genus *Varanus*, found abundantly in tropical Africa, Asia, and Australia, and frequently misnamed *gana* or *ipana* by Europeans; they reach a large size, and have very long tails and necks; the skin is covered with small juxtaposed scales and the teeth are large and pointed. The African monitor (*V. niloticus*) reaches a length of 5 feet, is brownish or greenish-gray above, with yellow lines on the head and neck; the Siamese *m.* (*V. salweeni*) is 7 feet in length, dark brown above, with yellow and black on the neck, swims beneath the surface of the water and uses its tail as a rudder; the *m. exanthematicus* is a spotted variety of the *V. salweeni* and is found in Ceylon; Gould's *m.* (*V. gouldi*) is common in Australia and New Guinea, is 4 feet in length, with yellow spots on the back, and a black streak from the temples along the neck. *m.* lizard.

Australian Monitor. 1/8
(From a specimen in the New York Zoological Park.)

The name of 'Monitor' bestowed upon these creatures has a curious origin owing to a ridiculous etymological mistake. The Arabic term for Lizard is 'Waran'; this has been wrongly taken to mean warning lizard, hence the Latin *Monitor*.
HANS GADOW *Amphibia and Reptiles* p. 542. [MACM. & CO. '01.]

6. In hydraulic mining, a contrivance, consisting of nozzle and holder, whereby the direction of a stream can be readily changed. The nozzle is so arranged as to turn horizontally in a circle, and is much used in fire-extinguishing apparatus, etc. *monitor-nozzle*. [L., *monitus*, pp. of *mones*, warn.] — *monitor-torbug*, *n.* A bug of the genus *Conorhinus*; a cone-nose — *m.-roof*, *n.* A raised lengthwise central structure above a car-roof, having side openings for light and ventilation; a clearestory — *m.-top*, *n.* A clearestory, or the elevated part of a monitor-roof. — *monitor-torship*, *n.* The office of a monitor.

Now it is inborn in the native American to monkey—or this verb would never have been invented. Monkey he must and monkey he will with whatever is new or strange to him. *Puck* (New York) Oct. 14, 1891, p. 114, col. 1.

mon'key, *n.* 1. Any anthropoid quadrumanous mammal, especially one of the smaller arboreal forms, having a long tail and prehensile feet, as distinguished from apes and baboons. According to some classifications the monkeys have been divided into three families: the *Hapalidae*, *Cebidae*, and *Cercopitheidae*. The Old World monkeys, either simiids or cercopitheids, are catarrhine, and include the langurs, mangabays, guerezas, etc.; the New World monkeys, mldids or cebids, are platyrrhine, and include the sakis, spider monkeys, howlers, etc. Monkeys are found mostly in tropical and subtropical regions, being especially abundant in Africa, southern Asia, and the East Indies, and in America from Panama to Brazil. In general, monkeys are characterized by the possession of four nearly equal limbs, one pair of mammary glands, and thumbs and great toes which are opposable to the accompanying digits. The food of the New World monkeys, especially of the family *Hapalidae*, consists of insects and fruit; but the *Cebidae* feed mostly on vegetables. With the Old World monkeys the diet is more varied.

2. Any quadrumanous mammal, whether ape, marmoset, baboon, or lemur; any primate except man. It might . . . be fancied that Satan had perpetrated monkeys, with a malicious purpose of parodying the masterpiece of creation. *Havron's Eng. Notes-Books*, London vol. 1, p. 323. [see 1870.]

3. An epithet applied, as to a child, usually in slight ridicule or derision, or in affected displeasure. A little curly-headed, grumpy-looking, mischievous monkey from his birth. *Byron's Don Juan* can. 1, st. 25.

4. (1) *Mech.* An iron block or ram with a catch, used in pile-driving, etc., raised by ropes and let drop. (2) Same as *TUP*. (3) *Glass-making*. A small glass-melting crucible. 5. A soldering-fluid composed of two parts of hydrochloric acid and one part of zinc. [C.] 6. Same as *MONKEY-TAR*. 7. [Slang.] A certain sum of money in betting; in the United States, \$500; in Great Britain, £500. 8. A small merchant vessel of the 10th century. 9. A diminutive for a smaller object of the same class as one named; used only in composition. See NAUTICAL compounds, below. 10. *Mining*. (1) A device by which a moving cable is gripped or released in the traction of coal- or ore-cars. (2) A block placed between the rails on an incline to prevent the cars from running back. 11. *pl.* (1) [Slang, Austral.] A sheep; a shearer's term. (2) The young of hares. 12. *Metal*. Same as *CINDER-NOTCH*. 13. A person who mimics or performs antics in the manner of a monkey. 14. [Prov. Eng.] A mason's hod. 15. The tray holding the splints in match-making. 16. *Naut.* The vessel in which the allowance of grog was formerly served to a mess. 17. A small bustle. [*OF. monne*, *LL. monna* (cp. *Ö. It. monicchia*, monkey), contr. of *madonna*; see *MADONNA*.]

— *black-crested monkey*, see *SIMPAL*. — *green m.*, an African cercopithecid monkey (*Cercopithecus sabaeus*), or related species. — *mon'key-bag*, *n.* A small bag for containing valuables, to be slung around a sailor's neck. — *m.-pass*, *n.* The piassava obtained from the *Leopoldinia piassaba*. See *PIASSAVA*. — *m.-bear*, *n.* The koala. — *m.-belt*, *n.* The belt to which a monkey-ropes is fastened. — *m.-block*, *n.* A block used in guiding running rigging. — *m.-board*, *n.* [Slang, Eng.] The plate in for an omnibus conductor. — *m.-boat*, *n.* [Eng.] A narrow half-decked river-boat. — *m.-bread*, *n.* The baobab-tree, or its fruit.

The latter is an oblong woody capsule about a foot in length, resembling a gourd, containing 8 or 10 cells, each cell filled with pulp enclosing seeds about the size of peas. The pulp, slightly acid and agreeable, is eaten by the natives as well as by the monkeys. — *m. business* [Slang, U. S.], foolish tricks; sly, pestiferous or mischievous behavior; folly. — *m.-cup*, *n.* An East-Indian pitcher-plant; any species of the genus *Nepenthes*. — *m.-deck*, *n.* The monkey-forecastle. — *m.-drift*, *n.* *Mining*. A small drift for prospecting. — *m.-engine*, *n.* 1. A steam-engine for raising a pile-driving ram. 2. A pile-driving machine. — *m.-face*, *n.* 1. Any face resembling that of a monkey. 2. *Biol.* A unioid mussel (*Quadrula metanerra*) of the Ohio river. — *m.-faced*, *n.* Having a face resembling that of a monkey. — *mon'key-flow*, *n.* Any one of various figworts of the genus *Mimulus*, especially the cultivated species, *M. lewisii* with yellow flowers, and *M. cardinalis* with red; from the gaping or grimacing appearance of the corolla. — *m.-forecastle*, *n.* The short low deck at the bow of a vessel. — *m.-gaff*, *n.* A light gaff attached to the mizentopmast for the display of signals at sea. — *m.-grass*, *n.* Same as *PIASSAVA*. — *m.-hammer*, *n.* A drop-press with a ram which is raised and let drop freely. — *m.-jacket*, *n.* A short pea-jacket worn by sailors. — *m.-jar*, *n.* An earthenware vessel used in tropical countries for cooling drinking-water; a goglet. *water-m.-j.* — *m.-jug*, *n.* A jug of porous pottery for cooling water

Monkey-bread Tree.

by evaporation; sometimes fashioned in imitation of a grotesque human head, with movable eyes and teeth. — *m.-nut*, *n.* Same as *PEANUT*. — *m.-pod*, *n.* [Hawaii.] The genus *(Pithecolobium saman)*. — *m.-pot*, *n.* 1. The hard, woody, pot- or urn-shaped fruit of several species of *Lecythis*, of the family *Lecythidaceae*, especially *L. ollaria* and *L. zabucajo*; also, the plant. The fruit, about 6 inches in diameter, has a circular lid, about 2 inches across, which, when the nut-like seeds inside are ripe, separates from the fruit with a sharp sound, giving a signal to the monkeys to scramble after the falling seeds. The empty seed-vessel is often used for a pot or vase. 2. *Glass-manuf.* A barrel-shaped melting-pot, set with others in arches of fire-brick at a chimney-base, and used in making flint glass. — *m.-press*, *n.* Same as *MONKEY-HAMMER*. — *m.-pump*, *n.* A sucking-tube. — *m.-puzzle*, *n.* A large Chilean tree (*Aracaria imbricata*) of the pine family, yielding a hard, durable, yellowish-white, velvety wood, easily worked and polished, and an abundance of edible seeds constituting a main article of food of the natives. It is called *monkey-puzzle* because its crowded and twisted branches puzzle the monkey to climb. Often cultivated in shrubberies and botanical gardens. — *m.-rail*, *n.* *Naut.* A light rail above the quarter-rail. — *m.-rolls*, *n. pl.* The smaller rollers of a breaker in which lump coal is crushed. — *m.-rope*, *n.* *Naut.* A rope fastened to the waist-belt of a sailor when working in dangerous positions over the side of a vessel, etc., as in cutting a whale. — *mon'key's allowance*, more kicks than pennies. — *mon'key's coconut*, same as *coquito*. — *mon'key's dinner-bell*, the woody capsule of the sand-box tree (*Hura crepitans*) of tropical America, or the tree itself; so called because the loud noise made by the bursting of the capsule when ripe is understood by the monkeys as a signal that a fresh supply of food is ready. — *m.-shine*, *n.* [Slang, U. S.] A frolicsome trick like a monkey's. — *m.-spanner*, *n.* A monkey-wrench. — *m.-tail*, *n.* 1. *Naut.* (1) A short round lever for training car-ronades. (2) A knotted rope by which to attach a hook, to guard the hand from jamming. 2. An L-shaped window-fastening. — *m.-wheel*, *n.* *Naut.* A tackle-block; a hoisting-rope; a whip-gin or gin-block. — *m.-with a long tail* [Slang, Eng.], a mortgage. — *m.-wrench*, *n.* A wrench or spanner having a movable jaw for grasping a nut, bolt, or the like. — *m.-yard*, *n.* *Naut.* A slight yard with which to exercise or train boys on shipboard. — *silly m.*, same as *MARKINA*. — *stump-tailed m.*, an Asiatic cercopithecid, the short-tailed macaque (*Macaca arctoides*). — *Sykes's m.*, an African cercopithecid (*Cercopithecus abrogularis*). — *to have or get one's m. up* [Slang], to be or become angry. — *to suck the m.*, same as *TO TAP THE ADMIRAL*. See *ADMIRAL*. — *white-eyed m.*, the mangabey.

mo-nog'a-my, 1 mo-nög'a-my; 2 mo-nög'a-my, *n.* 1. The principle or practise of single marriage: opposed (1) to *bigamy* and *polygamy*, and (2) to *bigamy*. In the age of the pyramid builders, family life was not wanting in purity; the wife and mother was held in respect; *monogamy* prevailed. G. P. FISHER *Univ. Hist.* pt. i, p. 38. [i. n. & co. 1885.]

2. Zool. The habit of pairing, or having but one mate. [*< LL. monogamia, < Gr. monogamia, < monogamos; see MONOGAMOUS.*]—**double monogamy**, the condition of being doubly monogamous.

mon'o-gan'gl-al, *a. Pathol.* Affecting a single gland, as a tubo.—**mon'o-gan'gl-on'ic**, *a.* Having but one ganglion.—**mon'o-gas'tric**, *a.* 1. Having but one stomach. 2. Of or pertaining to the *Calyconectæ monogastriæ*.—**mon'o-gen**, *n. Chem.* An element which combines only in one proportion.—**mon'o-gene**, *n.* [Rare.] An only-begotten one: said of the Son of God.—**Mon'o-g'e-ne-a**, *n. pl. Hel-minth.* A section of trematodes developing without the mediation of nurse-forms.—**mon'o-gen'e-an**, *a. & n.* **mon'o-g'e-ne'i-tis**, *n. Med.* The state of being monogenic. **mon'o-g'e-ne-ous**, *a.* 1. Of one family or race. 2. Relating to the *Monogenæa*. 3. Same as *MONOGENIC*.

mon'o-gen'e-sis, 1 mon'o-jen'i-sis; 2 mön'o-jën'e-sis, *n.* 1. Oneness of origin; specif., in biology, the doctrine of the descent of all living organisms from a single cell. 2. Biol. (1) Generation from but one parent; asexual reproduction, as by budding, fission, or spore formation. (2) Direct development of an ovum into an organism resembling the parent: opposed to *metagenesis*. 3. The origination of a new form at a single time or place: contrasted with *polygenesis*.—**mon'o-g'e-net'ic**, *a.* 1. Of or pertaining to monogenesis or monogenism; exhibiting monogenesis.

The Appalachians . . . constitute one individual among mountains, because a result of one genetic process, or, in a word, *monogenetic*. DANA *Geology* pt. iv, p. 796. [i. n. & co. 1880.] 2. Biol. Asexual: said of vegetative propagation of organisms. 3. Having a life-history entirely without alternation of generations or, in the case of parasites, of hosts. 4. *Dyeing*. Not giving more than one color, whatever mordant is used.—**Mon'o-g'e-net'ic**, *n. pl. Zool.* An order of trematode worms, mostly external parasites of fishes, crustaceans, and amphibians. They undergo little or no metamorphosis on passing from the embryonic to the adult stage.—**mon'o-gen'ic**, *a.* 1. Of, pertaining to, or exhibiting monogenesis. 2. Zool. Having but one method of reproduction. 3. Biol. Having asexual reproduction: opposed to *dipnetic*. 4. Geol. Having parts all of the same nature: said of certain rocks. 5. Chem. Noting the property of an element to combine in one way only. 6. Math. (1) Having only one derivative. (2) Having a common origin, as referring to a function, employed to indicate the fact of the common origin, *f(x)*, of the various power series that express it in different parts of the plane.—**monogenic algebraic construct, configuration, or surface** (*Math.*), a generalization of the infinite plane used in the consideration of functions of a single variable.—**m. function** (*Math.*),

v3fz, one having the property that $\frac{\Delta y}{\Delta x}$ tends, in general, to a unique finite limit.—**mo-nog'e-nism**, *n.* The doctrine that the whole human race is of one blood or species, or is descended from one original pair: opposed to *polygenism*. **mon'o-gen'e-syt**,—**mo-nog'e-nist**, *i. a.* Of or pertaining to monogenesis or monogenism. **II. n.** One who holds the doctrine of monogenesis or of monogenism: opposed to *polygenist*. **mon'o-gen'e-sist**; **mon'o-genis't**.—**mo-nog'e-nous**, *a.* 1. Involving but one parent, as asexual reproduction by budding, fission, or spore formation. 2. Math. Monogenic. 3. Same as *ENDOGENOUS*. 4. Same as *MONOGENOUS*. 1. *Chem.* Monogenic. 6. Of or pertaining to monogenism.—**mo-nog'e-ny**, *n.* 1. Monogenesis. 2. Monogenism.

mon'o-glot, *i. a.* 1. Speaking or having command of but one language; as, a *monoglot* writer. 2. Composed or published in a single language; as, a *monoglot* dictionary. **II. n.** A person having command of one language only.—**mon'o-go-neu'tic**, *a. Entom.* Having but one brood annually.—**mon'o-go-ni-um**, *n.* The asexual form of the malarial parasite as it appears in human blood.—**Mon'o-go-nop'o-ra**, *n. pl. Helminth.* A section of dendrocoelous planarians with a single sexual aperture.—**mon'o-gon'o-po'tic**, *mon'o-go-nop'o-rous*, *a.*—**mon'o-gon'o-ry**, *n. Biol.* Asexual reproduction from a single individual.—**mon'o-gon'ic**, *a. mo-nog'o-noust*.

mon'o-gram, 1 mon'o-gram; 2 mön'o-gräm, *n.* 1. A character consisting of two or more letters interwoven into one, usually the initials of a name or of several names: used on clothing, jewelry, panels, etc. 2. A single character in writing or a mark representing a word. 3. A sketch in black and white. [*< LL. monogramma, < Gr. monogrammaton, < monos, single, + gramma(-), letter, < graphō, write.*]—**mon'o-gram-ma-chine**, *n.* A foot-press for stamping monograms.—**mon'o-gram-mat'ic**, *a.* In the style or manner of a monogram. **mon'o-gram-is'tic**, *a.*—**mon'o-gram-mat'ic-al**, *a.*—**mon'o-gram-ma-tize**, *vt.* To use combinations of capital letters in writing.—**mon'o-gram-med, *a.* Having a monogram.—**mon'o-gram'mic**, *a.* Of or pertaining to monograms.**

mon'o-graph, 1 mon'o-gräf; 2 mön'o-gräf, *vt.* To discuss in the style of a monograph. **mon'o-graf**, *vt.* Dr. H. Wood has monographed our fresh-water algae. T. GILL in *Harper's Monthly* Jan., 1878, p. 228.

—**mo-nog'ra-pher** or **-phist**, *n.* A writer of monographs. **mon'o-graph**, *n.* A description or systematic exposition of one thing or class of things; a treatise discussing a single subject or branch of a subject, usually much circumscribed and in detail.

Such is the mass of details which historians collect in archives and pour out before us in *monographs*. MAX MÜLLER *India* p. 16. [i. n. & co. 1883.] [*< MONO- + Gr. graphō, writing, < graphō, write.*]

mon'o-graph'ic, *a.* 1. Pertaining to or having the character of a monograph. 2. Of the nature of monography; sketched in lines. 3. Monogrammic. 4. Representing a sphere in one diagram, as the projection of a map. **mon'o-graph'i-cal**,—**mon'o-graph'i-cal-ly**, *adv.*—**mo-nog'ra-phy**, *n.* 1. The act or art of representing by lines without colors; a sketch consisting of lines only. 2. The preparing of monographs. 3. A monograph.

mon'o-gyn, *n. Bot.* A plant having no more than one style or sessile stigma in each flower.—**Mon'o-gyn'i-a**, *n. pl. Bot.* The order in the Linnean system of plants, embracing those with one style or sessile stigma to each flower: now disused.—**mon'o-gyn'i-an**, *a. & n.* Having but one style or sessile stigma; of or pertaining to the *Monogyniæ*.—**mon'o-gy-ne'tal**, *a.* Formed by the gynecium of a single flower: said of fruits.

mo-nog'y-ny, 1 mo-nöj'i-ny; 2 mo-nög'y-ny, *n.* The practise of mating with only one female or with only one wife. Compare *MONANDRY*. [*< MONO- + Gr. gynē, woman.*]—**mo-nog'y-nist**, *n.* One who practises or favors *monogyny*.—**mo-nog'y-nous**, *a.* 1. Married to one wife only; monogamous. 2. Zool. Mated with one female only. 3. Bot. Monogynian. **mon'o-gyn'it**; **mon'o-gyn'i-oust**.

mon'o-hem'er-ous, *a. Med.* Enduring only a day.—**mon'o-hy'brid**, *n. Biol.* A hybrid produced by properitors dissimilar in a single attribute.—**mon'o-hy'brid'ic**, *a.*—**mon'o-hy'drate**, *n. Chem.* The union of a single molecule of water with an element or a compound.—**mon'o-hy'drat'ed**, *a.* Possessing a single molecule of water.—**mon'o-hy'dric**, *a. Chem.* Possessing a single atom of hydrogen. **mon'o-hy'dro-gent**, 2. Containing a single hydroxyl group.—**mo-no'ic**, *a. Biol.* Same as *MONOECIOUS*. **mo-nol'cous**,—**mo-nol'cously**, *adv.*

mon'old, 1 mon'öld; 2 mön'öld, *i. a. Anc. Pros.* Uniform, or composed of feet of one kind. **II. n. Math. A surface having a conical point of the highest order. [*< Gr. monothē, < monos, single, + eidos, form.*]—**mon'o-lal**, *a.*—**mon'o-l'ic**, *a.* 1. Morbid absorption in one idea or subject. 2. A condition in which a hypnotized subject bears all the words of a spoken sentence, but remembers only the last one.—**mon'o-l'ic'it'ic**, *a.*—**mon'o-l'ic'it'ion**, *n. Pathol.* Infection caused by but one infecting agent.—**mon'o-l'ic'one**, *n. Chem.* A chemical substance in which a single ketone group is present.**

mo-nol'a-ter, 1 mo-nöl'a-ter; 2 mo-nöl'a-ter, *n.* A worshiper of one god only, the others may be recognized. **mo-nol'a-try**, 1 mo-nöl'a-try; 2 mo-nöl'a-try, *n.* Worship of some one among the gods: opposed to *monotheism*, the worship of one god. [*< MONO- + Gr. latreia, worship.*]—**mo-nol'a-tric**, *a.* Of or pertaining to monolatry; as, the *monolatric* conception. **mo-nol'a-troust**.

mon'o-lep'sis, *n.* The transmission of the characteristics of one parent only to crossbred offspring.—**mon'o-lep'tic**, *a.*—**mon'o-line**, *n. i. Print.* A form of keyboard-machine for producing solid bar or slug, bearing a printing-face similar to type. 2. Same as *MONORAIL*.—**mon'o-lit'er-al**, *a.* Consisting of a single letter. **mon'o-lith**, 1 mon'o-lith; 2 mön'o-lith, *n.* 1. A single piece or block of stone fashioned or placed by art, particularly one notable for its size; any structure or sculpture in stone formed of a single piece, as a menhir or an obelisk. See *ILLUS*, under *OBELISK*.

The Egyptians appear to have handled these huge *monoliths* as our artisans handle hearthstones and doorsteps. HOLMES *over the Tenebris* p. 102. [i. n. & co. 1891.] 2. A fireproof and waterproof building material which is applied in a plastic condition. [*< LL. monolithus, < Gr. monolithos, < monos, single, + lithos, stone.*]—**mon'o-lith'ic**, 1 mon'o-lith'ic; 2 mön'o-lith'ic, *a.* 1. Of one single piece of stone. 2. Composed of monoliths. 3. Peculiar to a monolith: applied also to structures, pavements, etc., of beton made in one piece. 4. Referring to a kind of stone construction cut from the solid rock. **mon'o-lith'i**; **mon'o-lith'alt** [Rare].

mon'o-lith'ic, *a.* A trilobite with the trilobation of the upper surface obscured, as in the genus *Homonotus*.—**mon'o-lith'ic**, *a.* One-bled.—**mon'o-lith'ic**, *a.* One-chambered.—**Mon'o-loe'u-i-a-tria**, *n. pl. Zool.* A section of vertebrates with a monolocular heart; *Cephalochorda*. **mon'o-log**, 1 mon'o-log; 2 mön'o-lög, *n.* 1. That **mon'o-logue**, which is spoken by one person alone; especially, a dramatic soliloquy, or a story or drama told or performed by one person: a form of representative discourse; also, a lengthy speech in conversation or soliloquy. Compare *DIALOG*, 2.

Dramatic monolog has taken three forms: (1) when the actor tells a continuous story in which he is the chief character, referring to the others as absent; (2) when he assumes the voice or manner of several characters successively; (3) more recently, when he implies that the others are present, leading the audience to imagine what they say by his replies. 2. A literary composition, or a poem, written as a soliloquy. [*E. < Gr. monologos, speaking alone, < monos, alone, + legō, speak.*]—**mo-nol'o-gy**, *n.* The practise of talking in monolog; the monopolizing of conversation. **mon'o-log'ic**, 1 mon'o-loj'ic; 2 mön'o-lög'ic, *a.* Relating to or of the nature of a monolog.—**mon'o-log'i-cal**, *a.* **mo-nol'o-gist**, 1 mo-nöl'o-gist; 2 mo-nöl'o-gist, *n.* 1. One who utters a monolog or soliloquy. 2. One who assumes a monopoly of the conversation. **mon'o-lo'g-ant**; **mon'o-logue-ist**; **mo-nol'o-guist**.

Was Macaulay a fine converser? . . . The name which Sydney Smith gave him—'a book in breeches'—would imply that he was a *monologuist*, not a converser. MATTHEWS *Great Conversers* p. 30. [i. n. & co. 1874.] **mo-nol'o-gize**, 1 mo-nöl'o-jiz; 2 mo-nöl'o-giz, *vt.* [*-GIZED, -GIZING.*] To utter a monolog; soliloquize. **mo-nol'o-giset**; **mo-nol'o-guize** or **-guiset**.

mo-nol'a-chy, 1 mo-nem'a-ki; 2 mön'öm'a-ey, *n.* [Rare.] A combat between two individuals; a duel. These daily *monomachias*, murders, effusion of blood. BRUNNEN *Anat. Melancholy* pt. iii, 2, mem. 1, ubi, 2, p. 448. [i. n. & co. 1887.] [*< F. monomachie, < LL. monomachia, < Gr. monomachia, < monos, single, + machomai, fight.*] **mon'o-ma'chi-a**,—**mo'n'o-mach'ic**, *a.*—**mo-nom'a-chist**, *a.* A duelist. **mon'o-ma'ni-a**, 1 men'o-mä-mä; 2 mön'o-mä-mä, *n.* 1. *Pathol.* Mental derangement or insanity confined to one idea or to a single subject or a limited range of subjects, while the action of the faculties in other directions may be only slightly or not at all impaired: manifested usually in some specific delusion or in impulse to some particular act. Compare *MANIA*; *MELANCHOLIA*.

You are not . . . suffering from *monomania*. Monomaniacs cannot reason about their inferiority or perceive that it is abnormal. J. HAYMONS *Professor's Sister* p. 136. [i. n. & co.] 2. Hence, the unreasonable pursuit of one idea; a craze. [*< MONO- + MANIA.*] SYN.: see *INSANITY*.

mon'o-ma'ni-ac, 1 mon'o-mä-mä; 2 mön'o-mä-mä, *n.* A person affected with monomania. **mon'o-manet'**, **mon'o-ma'ni-a-cal**, 1 men'o-mä-na'i-a-kal; 2 mön'o-mä-nä-cal, *a.* Of or pertaining to monomania. **mon'o-ma'ni-act**; **mon'o-ma'ni-ous**, *syn.* see *INSANE*. **Mon'o-mas'te-ga**, *n. pl. Protoc.* A section of pantostomatous flagellate infusorians with a single flagellum, as in *Monadida*, etc.—**mon'o-mas'te-gate**, *a.* **mon'o-mo-nis'cous**, *a. Zool.* Relating to an eye having a single lens, as the central eyes of a horseshoe crab.—**mon'o-mer'ic**, *a.* Of or pertaining to but a single metamere; as, *monomeric* muscles.—**Mon'o-mer'o-som'a-ta**, *n. pl. Arach.* The *Acaridea*.—**mon'o-mer'o-som'a-tous**, *a.*

mo-nom'er-ous, 1 mo-nöm'er-us; 2 mön'öm'er-üs, *a. i. Bot.* (1) Having only a single member in each whorl or circular series: said of a flower, or part of a flower, constructed on the numerical plan of one. Sometimes written *1-merous*. (2) Having a single carpel. 2. *Zool.* One-jointed, as tarsi; having one-jointed tarsi. [*< Gr. monomēros, < monos, single, + meros, part.*]

mon'o-met'al-ism, 1 mon'o-met'äl-izm; 2 mön'o-mët'äl-izm, *n.* The financial theory or system of a single metallic standard of value in coinage. Gold is the usual standard in monometalism, but silver is used in Bolivia, China, the Straits Settlements, and the Central-American states, except British Honduras and Costa Rica. **mon'o-met'al-ismt**.

Like Germany, we introduced what is called gold *monometalism*. Gold alone was henceforth to be converted into coins for any one who offered it to our mints. H. T. EXR *Intro. to Polit. Econ.* pt. iii, p. 192. [CHART, 1889.] **mon'o-met'al-ist**, 1 mon'o-met'äl-ist; 2 mön'o-mët'äl-ist, *n.* An advocate of monometalism as opposed to bimetalism. **mon'o-met'al-ist**.

mon'o-met'al'ic, 1 mon'o-met'äl'ic; 2 mön'o-mët'äl'ic, *a.* 1. Consisting of a single metal; as, a *monometallic* currency. 2. Using or favoring but one metal as a standard of value; as, a *monometallic* country. **mo-nom'e-ter**, 1 mon'öm'e-ter; 2 mön'öm'e-ter, *Pros.* **I. a.** Containing only one foot or base in a verse. **II. n.** A meter thus composed; as, *daclitic monometer*. **mon'o-meth'yl**, *a.* Monomethylic. **mon'o-meth'y-lat'ed**, *a. Chem.* Monomethylic. **mon'o-mo-thy'lic**, *a. Chem.* Referring to a compound with a single group of methyl, CH₃.

mon'o-met'ric, 1 men'o-met'rük; 2 mön'o-mët'rük, *a. i. Crystal.* Same as *ISOMETRIC*. 2. Monometer. **mon'o-met'ri-cal**, 1 men'o-met'rük-al; 2 mön'o-mët'rük-al, *a.* Pertaining to a monometer; consisting of a single meter. **mo-no'mi-al**, 1 mo-nöm'äl; 2 mön'öm'äl, *i. a.*

1. *Alg.* Consisting of a single term; as, a *monomial* expression. 2. Containing one word. **II. n. Alg. An expression consisting of a single term. [*< MON- + L. nomen, name.*] **mon'omet'**. **mon'o-mi-cro'bic**, *a. Med.* Produced by or containing but a single species of microbe.—**Mon'om'i-dæ**, *n. pl. Entom.* A family of small heteromorous beetles having anterior coxal cavities open behind, middle coxae moderate, and antennae received in grooves. **Mon'om'ma**, *n. (t. g.)*—**mo-nom'mid**, *a. & n.*—**mon'om'mold**, *a.*—**mon'o-mo'dal**, *a.* Of only one mode.—**mon'o-mo-lec'u-lar**, *a.* Relating to a single molecule; as, a *monomolecular transformation*, a rearrangement of the atoms of a molecule, as in the conversion of a compound into an isomer having different optical properties.—**mon'o-mo-lyb'date**, *n.* A salt of molybdic acid.**

Mo-no'mo-nac, 1 mo-nöm'mo-nak; 2 mön'öm'mo-näc, *n.* A lake in Winchenden, Worcester county, Mass. **mon'o-mo'phic**, 1 mon'o-mör'ik; 2 mön'o-mör'ic, *a. i. Zool.* Of the same or an essentially similar type of structure. 2. Having the same form throughout successive stages of development, as *ametabolous* insects. 3. *Bot.* Forming similar spores: said of fungi. [*< MONO- + Gr. morphē, form.*] **mon'o-mor'phous**; **mon'o-mor'phism**, *n.* **Mon'o-moy'Pout**, 1 mon'o-möf; 2 mön'o-möf, *a.* A cape on Maryland Island, S. E. Mass.

mo-nom'pha-lus, *n. Terat.* A double monster united at the umbilicus.—**Mon'o-my-a'ri-a**, *n. pl. Conch.* An order of bivalves with a single adductor muscle, as in oysters. **Mon'o-my'at**; **Mon'o-my'i-a'ri-a**.—**mon'o-my-a'ri-an**, **mon'o-my-a'ry**, *a. & n.* [White county, Ind. **Mo'non**, 1 mön'ön; 2 mön'ön, *n.* A township and town in Mo'no'na, 1 mön'ön; 2 mön'ön, *n.* A county in W. Iowa; 432 sq. m.; county-seat, Onawa. **mon'o-ne'rist**, *n.* One who has only had a single dream experience.—**mon'o-neu'ral**, *a.* Supplied with nerves from one neural segment only. **mon'o-neu'ru-ist**.—**mon'o-neu'rit**, *n.* Inflammation of one nerve only.

Mo-non'gal, 1 mo-nög'äl; 2 mön'ög'äl, *n.* A town in Marion county, W. Va. 9 m. S. W. of Fairmont. **Mo-non'ga-he'la**, 1 mo-nög'ä-lä; 2 mön'ög'ä-lä, *n.* 1. City, a city in Washington county, Pa. 2. A river in West Virginia and W. Pennsylvania; 150 m. to the Allegheny river at Pittsburg. See *GEOLOGY*. **Mo'non-ga'li-a**, 1 mön'ög'älä; 2 mön'ög'älä, *n.* A county in N. West Virginia; 368 sq. m.; county-seat, Morgantown. [Since of Munster, Ireland. **Mo-no'ni-a**, 1 mön'ni-a; 2 mön'ni-a, *n.* [L.] The prov-mon'o-ni'trate, *n. Chem.* A compound containing one NO₃ group to the molecule.—**mon'o-ni'tro**, *Chem.* A combining form expressing the presence of a single nitro group.—**mon'o-nö'mi-al**, *a. Biol.* Monomial. **mon'o-nym'ic**.—**mon'ont**, *n.* A non-sexual cell which by the process of fission produces others.—**mon'o-nu'cle-ar**, *a.* Having a single nucleus; uniauclear. **mon'o-nu'cle-at'ed**.—**mo-non'y-chous**, *a.* Having an entire or undivided claw, as certain insects.—**mon'o-nym**, *a.* A monomial name.—**mon'o-nym'ic**, *a.* Same as *MONOMIAL*.—**mon'o-nym'i-za'tion**, *n.*—**mon'o-nym-ize**, *vt.* To designate by a single word instead of several.—**mo-non'y-my**, *n.* A system using monomial terms.

mon'o-on'ä-ous, 1 mön'o-ä-si-us; 2 mön'o-ä-si-äs, *a.* Being of one essence; as, the *monocousious* nature of Christ and the Father, according to the Sabellian heresy. [*< Late Gr. monocousios, of one essence.*] **mon'o-on'si-ant**.

[*< MONO- + Gr. trem'a hole.*]—**mon'o-trem'a-tous**, *a.* **mon'o-tre-mat'**; **mon'o-tre-mous**, *a.*—**mon'o-trich'ic**, *a.* Bac-

terial. Having a single polar flagellum, as in *Pseudomonas* cells. **mo-not'ri-chous**; **mon'o-tri-glyph**, *n.* A single triglyph over an intercolumniation.—**mon'o-tri-glyph'ic**, *a.* Having but one triglyph over each intercolumniation.—**mon'o-troch**, *n.* A single-wheeled vehicle.—**Mo-not'ro-chia**, *n. pl.* Entom. 1. A section of hymenopterous insects having 1-jointed trochanters, as most families. 2. Helminth. A section of rotifers with a single rotary apparatus.—**mo-not'ro-chia**, *n.* [-CHIA, pl.] Helminth. A larval chaetopodous annelid with a single preoral ring of cilia.—**mo-not'ro-chal**, *a.* 1. Of or pertaining to the *Monotrocha*. 2. Having a single preoral ring of cilia; of or pertaining to a monotrocha.—**mon'o-tro-chi-an**, *a.* Monotrochous.
II. *n.* A monotrochous rotifer.—**mo-not'ro-chous**, *a.* Having a single rotary apparatus.—**mon'o-trol**, *a.* Having one control, as a radio receiving-set.—**Mo-not'ro-pa**, *n.* Bot. A small genus of low fleshy herbs of the family *Monotropaceae*. *M. uniflora* is the Indian pipe. *M. hypopitys*, the pinesap, is referred to a genus *Hypopitys*.—**Mon'o-tro-pa'ce-æ**, *n. pl.* Bot. A family of fleshy gamopetalous herbs—the Indian-pipe family—of the order *Ericales*, saprophytic or parasitic on roots, with leafless stems and Ericoid flowers with free calyx, simple pollens, and loculicidal pod. There are 9 genera and 10 species. **Mon'o-tro-pa'ce-æ**, *a.*—**mon'o-tro-pa'ceous**, *a.*—**mon'o-tro-pe-ous**, *a.*—**mon'o-troph'ic**, *a.* Zool. Feeding on only one kind of food: said of certain parasitic organisms.—**mon'o-tro-p'ic**, *a.* Same as MONOPHAGOUS.—**mon'o-trop'ic**, *a.* Bot. A genus of low herbs of the family *Monotropaceae*, embracing but two species, natives of the southeastern United States. *M. odorata*, the sweet pinesap, resembles the Indian pipe.—**mo-not'ro-py**, *n.* 1. Math. Homogeneity with regard to a system of parallel lines. 2. Phys. Chem. The capability of existing in two forms which can not be reversibly converted one into the other.
mon'o-type, 1 mēn'o-taip; 2 mōn'o-typ. I. *a.* Monotypic. II. *n.* 1. The only representative of its kind, as a species of a genus or the like. 2. A print transferred from a painting on a metal plate: so called because but one transfer can be made. 3. Print. A machine bearing the trade mark "Monotype" and operated automatically by means of a perforated tape guide, which casts and sets single types or logotypes. See CASTING-MACHINE; COMPOSING-MACHINE. [*< MONO- + Gr. typos, type.*]—**mon'o-type'ic**, *a.* 1. Containing but one representative; having only one type; as, a *monotypic* genus. 2. Being a monotype. **mon'o-type'pal**; **mon'o-type'pal**; **mon'o-type'pal**.
mon-o'u's-an, *a.* Same as MONOUCIAN.—**mon'o-va'lence**, *n.* Chem. Univalence. **mon'o-va'lence-ty**; **mon'o-va'lent**, *a.* Chem. Univalent.
Mo-no-vär, 1 mo-nō-vär; 2 mo-nō-vär, *n.* A town in Alicante province, Spain, 28 m. N. W. of Alicante.
mon'o-va'ri-ance, *n.* Same as UNIVARIANCE.—**mo-no'u-lar**, *a.* Containing a single ovum or ovule.

Compare FIGURE; QUANTITY; QUALITY. As every syllogism contains three propositions, each of which may be A, E, I, or O (see PROPOSITION), there are as many moods as the number of permutations of four things taken in groups of three, and allowing repetition; namely, 64. Of these only 19 (*valid moods*) are allowable in reasoning. The *valid moods* have been employed in the following mnemonic devices, of which each word, except those in Italics, represents a mood. The three vowels in each word show the propositions in their order. Certain of the consonants denote the principles by which the moods are to be reduced, or brought to the form of fig. I., which is regarded as the standard figure; *e. g.*, in the last three figures the initial consonant of a word shows that the mood it represents reduces to that mood of the first figure whose symbolic word begins with the same consonant; *e. g.*, Cesare (fig. II.) reduces to Celarent. In addition, the consonant *s* indicates that the proposition symbolized by the preceding vowel is to be converted *simply*, *p*, by *limitation* (*per accidens*), *k*, by *contraposition*; *f*, by *limitation* or *obversion*. See CONVERSION. The letter *m* shows that the premises of the given syllogism are to be transposed (*mutari*), and the *p* in Bramantip shows that after simple conversion the premises warrant a universal conclusion. The other consonants are merely for euphony, or to preserve the meter. All these words were invented for the special mnemonic purpose they serve in the lines. (Fig. I.) Barbara, Celarent, Darii, Ferioque *protis*. (Fig. II.) Cesare, Camestres, Ferison, Baroko (or Fakoto), *secundis*. (Fig. III.) Tertia Darapti, Disamis, Datisi, Felapton, Doka-ton (or Bokardo), Ferison habet, Quarta Insuaper addit. (Fig. IV.) Bramantip, Camenes, Dimaris, Fesapo, Fresison. 2. *Gram. & Mus.* Same as MOOD. The sign of the subjunctive mood is at this very moment perishing in English. TANNON *Eng., Past and Present* p. 11. [k. p. & co.] [Form of MOODS, *n.*] **mood'**, 1 mūd; 2 mōōd, *n.* 1. Phases of the Moon.

When the moon emerges from the sun's rays, after new moon, the hemisphere turned to the earth is dark except for a small disk or crescent which increases in size as the moon moves in its orbit until full moon, when its entire hemisphere is illuminated. Sometimes at new moon the moon comes between the earth and the sun, producing eclipse of the sun, and sometimes at full moon the earth comes between the moon and the sun, producing eclipse of the moon. Eclipses do not occur with every full moon.

The moon's orbit is inclined at an angle of 5° 9' to the ecliptic. Diagram showing A sidereal month, and B sidereal and synodical months compared: when the moon has completed a revolution to *m*, the sun, owing to its apparent course among the stars, seems to have covered 27° toward *n*, which distance the moon must travel before new moon can again occur around the sun. This revolution is known as its sidereal period. As the earth moves round the sun the interval between successive new moons increases to 29 days, 12 hours, 44 minutes. As the inclination of the moon's orbit to the earth's equator varies from 18° to 29½°, the time of the moon's rising also varies; when full moon occurs at the vernal equinox, the moon seems to rise for several nights about the same time, about sunset, and is known as **harvest moon**; the succeeding full moon is known as **hunter's m**. The moon shines with reflected light, and its appearance therefore varies according to the amount of illuminated surface visible to us, which depends on its position relative to the sun. These changing aspects, called **phases**, are repeated monthly. Four are usually distinguished: (1) **new m.**, when none of the bright surface is visible; (2) **the first quarter**, when the visible part of the face has increased to one-half; (3) **full m.**, when the whole face is visible; (4) **the third quarter**, when the visible fraction is reduced again to one-half. Popularly, the moon is said to be *new* when it is seen as a thin crescent. Its diameter is 2,163 miles, and its mean distance from the earth about 238,800 miles. As it revolves on its axis once a month, it turns always very nearly the same side toward the earth, and nearly half of it is therefore never seen by us. It is the largest of the planetary satellites in proportion to its primary. It would require the matter contained in 81 moons to form the earth, and at full moon the light given out by the moon is equal to 1/300,000 that given by the sun at midday. By the aid of the Lick telescope it can be seen as if at a distance of only 100 miles. See MONTH; LIBRATION.

Mormon', *n.* 1. One of a sect officially styled "The Church of Jesus Christ of Latter-day Saints," organized by Joseph Smith April 6, 1830, accepting the Bible together with the Book of Mormon, baptism by immersion, and continuous revelation from God to man through the medium of the priesthood. Polygamy has been one of its tenets, but has been prohibited by act of Congress, and abandoned by vote of the people in general conference, Oct. 6, 1890. The sect originated in western New York, and moved gradually westward under pressure of adverse public sentiment, until it finally established itself in Utah in 1847. The chief executive is the first presidency, consisting of three presiding high priests; standing next in order is a quorum of 12 apostles, then follow patriarchs, high priests, seventies, elders, priests, teachers, and deacons.

The practice of polygamy existed to a limited extent among the Mormons, until it was prohibited by Act of Congress; since then the practice has been abandoned. J. E. TAYLOR, Prof. Univ. of Utah, Salt Lake City Letter to Standard Dec. Jan. 25, 1894.

mor'tal-ize, 1 mör'tal-iz; 2 mör'tal-iz, *vt.* [-IZED; -IZING.] To make mortal. **mor'tal-ize**, 1 mör'tal-iz; 2 mör'tal-iz, *adv.* 1. In a manner that must cause death; fatally; as, *mortally* wounded. 2. After the manner of a mortal; as, *mortally* constituted. 3. Very; exceedingly; as, *mortally* weary. 4. After the manner of mortal sin; as, *mortally* sinning. **mor'tal-ness**, 1 mör'tal-nēs; 2 mör'tal-nēs, *n.* The state or quality of being mortal; mortality. **mor'tar**, 1 mār'ter; 2 mör'tar, *vt.* To close up or in as with mortar or cement.

mor'tar, *n.* To pound in a mortar. **mor'tar**, *n.* 1. A vessel in which substances are crushed or pounded with a pestle; chiefly used in pharmacy and cooking. See *illu.* under *PESTLE*. The basin and bed of this lake [Superior] act as a vast geological mortar, in which the masses of broken and fallen stones are whirled about and ground down, till all the softer ones . . . are brought into the state of pure yellow sand. H. R. Schoolcraft *Ontario* p. 321. [w. & p. 1845] 2. A short piece of ordnance with a large bore for firing large-caliber shells at great angles of elevation (45° or more) so as to drop upon the object aimed at, the desired effect being obtained by the force acquired in their descent and by their explosive power. 3. In a stamp mill, a tub-like cast-iron receptacle with grated sides, having at its bottom a die in which is placed the ore on which the stamp falls. 4. Any of several devices for hurling pyrotechnic shells or bombs and also life-line. 5. A broad-bowled candlestick or its candle, used formerly as a night-light and on tombs or at funerals. [*<* AS. *mortere*, *<* L. *mortarium*, mortar] — **mor'tar-bed**, *n.* 1. The frame in which a mortar rests. — **mor'tar-carriage**, *n.* 2. Mining. The bed of a mortar-box. — **mor'tar-boat**, *n.* A boat carrying generally a single mortar. — **mor'tar-ketch**, *n.* A bomb-ketch. — **mor'tar-gun**, *n.* A short gun with vertical fire for throwing bombs into enemy trenches. **mor'tar**, *n.* 1. A mixture of sand and slaked lime used in building for joining bricks, stones, etc., and for plastering. The proportions ordinarily vary from 3 to 10 of sand to 1 of lime; if it is for brick or stone, about 20 per cent. of cement is usually added, and if for plaster, hair is mixed in. In ordinary practice the proportions in mortar are roughly made by the mixer, and depend on the working quality of the mixture according to the kind of sand used. 2. Loosely, a cement. [*<* OF. *mortier*, *<* L. *mortarium*, mortar] — **hydraulic mortar**, mortar that will harden under water. — **mor'tar-bed**, *n.* 1. A low-sided box used for mixing mortar. 2. *pl. Geol.* Local horizontal sheets of coarse sand and gravel cemented by lime, frequent in the deserts of the western United States. — **mor'tar-board**, *n.* 1. A square board with a handle, on which a mason holds mortar in plastering. See *HAWK*. 2. [Colloq.] Hence, the academic cap, because of the four-cornered piece attached horizontally upon its crown. — **mor'tar-structure**, *n.* *Parol.* A structure of igneous rocks, in which remnants ("nuclei") of the original crystalline grains are surrounded by finer grains which have been dynamically crushed or worn from them. — **mor'tar-less**, *a.* **mor'tar**, *n.* The case, 1 mör'tar; 2 mör'tar. The case of Edgar Mortara, a child of Jewish parents in Bologna, Italy, whose Catholic nurse baptized him in infancy, fearing that he was about to die, and subsequently related the fact to the authorities of the Papal States, who, in order to insure his being brought up in the faith, forcibly removed him from his parents' control (June 23, 1858) and placed him in a convent to be educated. **mor'tared**, 1 mör'tard; 2 mör'tard, *a.* Plastered or spotted with mortar. [*<* *ressembling mortar*.] **mor'tar-y**, 1 mör'tar-y; 2 mör'tar-y, *a.* Having the nature of mortar. — **mor'tar-bleu**, *n.* Same as *MORBLEU*. **mor'tar-bleu**, 1 mör'tar-bleu; 2 mör'tar-bleu, *n.* [Foot.] 1. A funeral pall. 2. A fee paid for the use of a pall. [*<* 1,245. **mor'ter**, *n.* A mortar; a wax-light. CHAUCER *T. & C.* bk. iv, *mor'ter*, 1 mör'ter; 2 mör'ter, *vt.* [*<* *MAKER*; -GAG-ING.] 1. To grant or make over (real or personal property) as security for the performance of some condition, as the payment of money, the conveyance to become void on the performance of the condition. 2. Hence, to pledge; plight; as, to *mortgage* one's life or honor. **mortgage**, *n.* 1. *Law.* (1) An estate in land created by conveyance coupled with a condition of defeasance on the performance of some stipulated condition, as the payment of money. (2) A lien upon land or other property as security for the performance of some obligation, to become void on such performance. (3) The act of conveying or the instrument effecting the conveyance. A concise definition of *mortgage* which should embrace both its equitable and its legal character is virtually impossible. . . . These attempted definitions are all erroneous upon any theory of the instrument; they do not go beyond the literal import of the language in which a *mortgage* is usually expressed, and they utterly ignore all the equitable elements which are as much a part of the constituent parts of the mortgage as the legal elements. Any true definition based upon the original common law and equitable system must embody and express all the double features of the mortgage—that it is both a lien in equity and a conveyance at law. POMEROY *Eq. Jur.* § 1,191. 2. A state or condition of being pledged as security for a debt like that of a mortgage of property. [*<* *dead pledge*, *<* *mort* (see *MORT*); *<* *gage*, OF. *gaige*, *GAUGE*, *n.*] — **cut-throat mortgage**, a mortgage intended to cut off the mortgagor's right of summons or notice and recourse; a popular designation. For other phrases, see *CHattel*, *FORECLOSURE*, *REDEMPTION*, etc. — **equitable m.**, a deposit of title deeds, which is regarded in equity as a mortgage, with a bank or other creditor as security for past or future advances and either with or without a memorandum. — **first m.**, one having precedence as a lien over all other mortgages. — **general m.**, same as *BLANKET MORTGAGE*. See *BLANKET*. — **mortgage-bond**, *n.* A bond which is secured by a mortgage. — **m.-debt**, *n.* A debt secured by a mortgage charge. — **m.-deed**, *n.* A deed held as a mortgage. — **m.-note**, *n.* A note the payment of which is secured by a mortgage given with the note and recited in it. See *BOND*. 4 (1) — **party m.**, *n.* A mortgage held in trust by a third party when owned by two or more persons. **mortgage-a-bi(e)**, *n.* That may be mortgaged. **mortgage-bank**, *n.* A credit bank which bases its financial transactions on real estate. **mort-ga-gee**, 1 mör'ga-jē; 2 mör'ga-jē, *n.* *Law.* The person to whom a mortgage is given. **mort-ga-gor**, 1 mör'ga-jor; 2 mör'ga-jor, *n.* One who mortgages property. **mort-gage-ort**, *n.* **Mort Homm**, Le, 1 mör'tom; 2 mör'tom. [*<* F.] Lit., "the dead man." A hill N.W. of Verdun, held alternately by Germans and French, and scene of severe fighting, Aug., 1917. **mor'tice**, *n.* See *MORTISE*. **mor'ti-clan**, 1 mör'ti-clan; 2 mör'ti-clan, *n.* [Recent.] A funeral director. [*<* L. *mors* (mortalis), death, + -IAN.] **mor'tier**, 1 mör'tyē; 2 mör'tyē, *n.* 1. A cap of state formerly worn in England and still used by law functionaries in France; sometimes used as a charge in heraldry. 2. A medieval head-piece or helmet. 3. Same as *MORTAR*. 5. [*<* L. *mortarium*, mortar]. — **mor'tier-a-cire**, *n.* A mortar-shaped vessel for a floating waxlight. **mor'ti-fer-ous**, *a.* Producing death. **mor'ti-fer**, *n.* **mor'ti-fi-ca-tion**, 1 mör'ti-fi-kā-shan; 2 mör'ti-fi-kā-shon, *n.* 1. The act of mortifying, or the state of being mortified. Specif.: (1) *Pathol.* The death of one part of an animal body while the rest is alive; loss of vitality in a part as the result of gangrene; death of a definite portion of the soft parts of the body. (2) In religion, the act of subduing the passions and appetites by fasting, penance, or painful severities inflicted on the body. Buddhism, by teaching an impossible self-redemption through mortifications of the flesh, casts a gloom over the whole life. SCHAFF *Theological Propaganda* p. 49. [s. 1892.] (3) The act or state of subordinating all natural promptings to the rule or influence of the Divine Spirit. *Rom.* viii, 12, 13. (4) The state of being humbled or depressed by disappointment or chagrin; humiliation; vexation. (5) *Metal.* Destruction of active qualities, as in mercury amalgamation. (6) *Scots Law.* The act of giving land for religious or public uses; also, the lands so given. See *MORTMAIN*. The Blind Asylum had received a great mortification from Mr. Angus's will. *Good Scottish Characteristics* p. 111. [f. & v. 1833.] 2. That which mortifies or causes humiliation. 3. *Al-chemy.* (1) Change in the form of metals. (2) Destruction of the active principles of chemical substances. [*<* F. *mortification* (n.), killing, *<* *mortifico*; see *MORTIFY*.] Syn.: see *CHAGUIN*. — **mor'ti-fi-ca-tion-root**, *n.* The mar-banallow. [*<* *mortification*.] **mor'ti-fi-ness**, *n.* [Rare.] Subjugation of the passions. **mor'ti-fi-y**, 1 mör'ti-fai; 2 mör'ti-fai, *v.* [*<* F.] — **mor'ti-fi-y**, 1 m. 1. To affect with humiliation or vexation; humiliate; as, she was mortified by her mistake. There is nothing more mortifying to a reader of mankind than to be convicted of error in spelling out a character. E. P. Whipple *Character* p. 22. [f. & r. 1866.] 2. To subdue or reduce by fasting, penance, or spiritual elevation, as the passions and desires; render dead and insensible or superior to the influence of passion; as, he mortified the flesh by a seven days' penance. The morality of our Lord's sermon on the mount amounts to this, that the real Christian is mortified to every vile passion, and most completely devoted to God. HINDIN V. J. Charlesworth's *Household* pt. iii, p. 211. [a. t. s.] 3. To destroy the organic texture and vital function of, as a part of the body. 4. *Scots Law.* To give (lands) for religious or public uses. 5. To deprive of characteristic properties, as by chemical action or in a metallurgical process; said of ores or of chemical compounds. II. 1. To lose vitality, as living flesh; gangrene. Where there is any hope for a wound it continues to give pain; but when it has mortified the pain ceases. FARRAR *Silence and Voice* p. 40. [MACM. 1874.] 2. To be subdued. [*<* F. *mortifier*, *<* L. *mortifico*, kill, *<* L. *mors* (see *MORT*); and see -FY.] Syn.: see *ABASE*. — **Prep.** To mortify the flesh with or by fasting; mortified at the failure. — **mor'ti-fi-ed**, *a.* — **mor'ti-fi-er**, *n.* **mor'ti-fi-ly**, 1 mör'ti-fai; 2 mör'ti-fai, *adv.* 1. Humiliating; vexing. 2. Affecting by mortification or gangrene. 3. Tending to subdue the passions or carnal appetites; as, a mortifying penance. — **ly**, *adv.* **Mor'ti-mer**, 1 mör'ti-mēr; 2 mör'ti-mēr, *n.* Roger (1287?-a. 1330), Earl of March; favorite of Isabella, Queen of Edward II. of England. **mor'tise**, 1 mör'tis; 2 mör'tis, *n.* [*<* F.] — **mor'tise**, 1 m. 1. To cut or make a mortise in. 2. To join, as timbers, by a tenon and mortise. 3. *Print.* To cut away (a part of an engraved plate) so as to permit of type-matter being set in the space made thereby. [*<* OF. *mortistier*, *<* *mortise*, mortise.] — **mor'tis-ing-ma-chine**, *n.* A machine for making mortises in wood. See *MORTISE*, *n.* 1. **mor'tise**, *n.* 1. A space hollowed out, as in a timber, to receive a tenon or the like; a slot or hole into which something of corresponding shape is to be fitted. 2. Figuratively, adhesive power; firmness. [*<* F. *mortise*, mortise.] — **mor'tise-block**, *n.* A pulley-block mortised out of the solid wood. — **m.-bolt**, *n.* A bolt whose head is sunk in a mortise. — **m.-s-gage**, *n.* A scribbling-gage adapted to the marking out of mortises. — **m.-gear**, *n.* Same as *MORTISE-WHEEL*. — **m.-joint**, *n.* A joint formed by a mortise and tenon. — **m.-lock**, *n.* A lock designed to be mortised into the edge of a door or the like. — **m.-wheel**, *n.* A wheel having holes in its rim (1) to receive the teeth of a gear, pinion, etc., or (2) to receive wooden cogs. **mor'tised**, 1 mör'tist; 2 mör'tist, *a.* [*<* F.] Same as *ENCLAVE*. **Mortlake**, 1 mör'tlek; 2 mör'tlek, *n.* A village in Surrey, England; once celebrated for its tapestries; the usual finishing-point of the Oxford and Cambridge boat-race. **mor'tling**, *n.* Same as *MORTING*. **mor'tmain**, 1 mör'tmān; 2 mör'tmān, *n.* *Law.* The state of lands and tenements held by "a dead hand," that is, by one that can not alienate them, as a religious corporation; inalienable tenure or possession. The common-law right of corporations to take and hold lands and tenements is restricted in England by the statutes of Mortmain, by which the power to acquire lands is subject to license granted by the crown or Parliament. The term is applied in some of the United States to statutes restricting the right of religious corporations to hold land. Had our forefathers looked up a quarter part of New England in mortmain, to endow it, there was not a community in Christendom to bear witness against them. EVERETT *Orations* vol. i, p. 241. [L. N. & Co. 1865.] [*<* OF. *mortmain*, *<* L. *mortuus* manens; mortuus, 1 s. of mortuus (see *MORT*); manens, hand.] **Mor'ton**, 1 mör'ton; 2 mör'ton, *n.* 1. moss. *n.* 1. A delicate bryophytic plant belonging to the
class *Musci*. Members of this class are
generally low tufted plants, growing on
the ground, decaying wood, rocks, trees,
etc., with stem and distinct leaves, and
producing spore-cases (capsules) which open
by a terminal lid (operculum) and contain
spores unaided with elaters. The name is
also loosely applied to other cryptogamous
plants, especially lichens, and is even ap-
plied to some small unaided flowering plants.
Compare **rock-moss**, **club-moss**, **tree-**
moss, etc. See **ILLUSTRATION** under **HYPER-**

tive of *much*; as, the *most* money. 3. Greatest in de-
gree; as, he has the *most* fear of it.
Most is often used with an adjective, simply as an in-
tensifier, as, "a *most* piercing cry," "the *most* terrible slaugh-
ter," "a *most* unjust decision." The indefinite article seems
to indicate that the superlative sense has dropped out.
Most is used also with adjectives to express supreme qual-
ities; as, *most* complete; *most* intense; *most* perfect; *most* thor-
ough, etc. This practice has the sanction of good usage in
speech and literature. See **PERFECT**, *a.*

moth'eri, *n.* 1. **moth'eri**; 2. **moth'eri**, *n.* [Eng.] A rural English custom of visiting one's parents on Mid-Lent Sunday. Amongst these old customs was a practice of going to see parents, and especially the female one, on the mid Sunday of Lent, taking for them some little present, such as a cake or a trinket. A youth engaged in this amiable act of duty was said to go a *moth'ering*, and thence the day itself came to be called *Mothering* Sunday.

Chambers's Book of Days, Mar. 6 vol. i, p. 337. [conna. 1866.]

moth'eri-in-law, *n.* 1. **moth'eri-in-law**; 2. **moth'eri-in-law**, *n.* 1. The mother of one's spouse; the correlative of *son-in-law* and *daughter-in-law*. 2. [Prov. Eng.] A step-mother. 3. [Eng.] A drink of mixed ales. [mother.]

moth'eri-kin, *n.* 1. **moth'eri-kin**; 2. **moth'eri-kin**, *n.* A little **moth'eri-land**, *n.* 1. **moth'eri-land**; 2. **moth'eri-land**, *n.* The land of one's ancestors; fatherland; mother country.

moth'eri-less, *n.* 1. **moth'eri-less**; 2. **moth'eri-less**, *a.* Having no mother.

moth'eri-ling, *n.* 1. **moth'eri-ling**; 2. **moth'eri-ling**, *n.* A child that needs a mother's care; also, a spoiled child.

moth'eri-ly, *n.* 1. **moth'eri-ly**; 2. **moth'eri-ly**, *a.* 1. Resembling a mother; as, a *moth'eri-ly* woman. 2. Pertaining to or becoming to a mother; as, *moth'eri-ly* authority; *moth'eri-ly* care.—**moth'eri-ness**, *n.*

moth'eri-ly, *adv.* In the manner of a mother.

moth'eri-ship, *n.* Pseudonym of T. Evans Preece, a Welsh prophetess, whose predictions were at one time widely circulated. She predicted the death of Wolsey, Lord Percy, and others, and foretold the end of the world in 1881; she predicted also the steam-engine and the telegraph.

moth'eri-some, *n.* 1. **moth'eri-some**; 2. **moth'eri-some**, *a.* Full of solicitude, like a mother.

moth'eri-well, *n.* 1. **moth'eri-well**; 2. **moth'eri-well**, *n.* 1. William (1797-1835), a Scottish poet and antiquarian. 2. A mining and manufacturing town in Lanarkshire, Scotland.

moth'eri-wort, *n.* 1. **moth'eri-wort**; 2. **moth'eri-wort**, *n.* 1. A tall perennial herb (*Leonurus cardiaca*) of the mint family, with a downy, square, purplish stem, opposite rough leaves in 4 vertical rows, and the flowers in many whorls: used as a domestic medicine for colds. 2. A plant (*Ariemisia vulgaris*) allied to the ragweed; mugwort.

—**golden** **moth'eri-wort**, a slender-stemmed asteraceous perennial, a native of the Old World temperate zone.

—**hoarhound** **m.**, a pubescent, biennial weed (*Leonurus maritimum*), 2-5 feet high, with ovate leaves and white flowers in axillary clusters; introduced from Europe in the United States.

moth'eri-y, *n.* 1. **moth'eri-y**; 2. **moth'eri-y**, *n.* Of the nature or existence of mother; containing mother; as, *moth'eri-y* vinegar.

moth'y, *n.* 1. **moth'y**; 2. **moth'y**, *a.* Infested by moths; **moth'y**, *n.* 1. The leading feature in literary or artistic work, especially music. Compare **LEADER**.

The infinite variety which painters have given to this most simple motif, the Mother and the Child. Mrs. JAMESON *Legends of the Madonna*, Devotional p. 127. [l. a. & co. 1852.]

2. In dress-trimming, an ornamental design as of velvet or lace. 3. Incitement.

moth'eri-ous, *n.* 1. **moth'eri-ous**; 2. **moth'eri-ous**, *a.* Same as **moth'eri**. 1. **moth'eri**; 2. **moth'eri**, *n.* [Rare.] Producing motion. [*< L. motus, motion* (*< moveo, move*), + *facto, make*.]

moth'eri-ha, *n.* 1. **moth'eri-ha**; 2. **moth'eri-ha**, *n.* A town, capital of Champan district, Bengal province, India.

moth'eri, *n.* 1. **moth'eri**; 2. **moth'eri**, *a.* 1. Having or exercising **moth'eri**, powers of spontaneous motion, as certain molecules. 2. Causing motion. [*< L. motus, pp. of moveo, move*.]

From the spore or germination there creeps out a naked motile mass of protoplasm.

H. J. WESSER in *American Naturalist* Apr., 1892, p. 257.

moth'eri, *n.* A person in whose mind motor-images are specially distinct. [tion; capability of moving.]

moth'eri-ty, *n.* 1. **moth'eri-ty**; 2. **moth'eri-ty**, *n.* The power of motion. 1. **moth'eri**; 2. **moth'eri**, *n.* [*< L. motus, motion* (*< moveo, move*), + *facto, make*.]

moth'eri-ha, *n.* 1. **moth'eri-ha**; 2. **moth'eri-ha**, *n.* A town, capital of Champan district, Bengal province, India.

moth'eri, *n.* 1. **moth'eri**; 2. **moth'eri**, *a.* 1. Having or exercising **moth'eri**, powers of spontaneous motion, as certain molecules. 2. Causing motion. [*< L. motus, pp. of moveo, move*.]

From the spore or germination there creeps out a naked motile mass of protoplasm.

H. J. WESSER in *American Naturalist* Apr., 1892, p. 257.

moth'eri, *n.* A person in whose mind motor-images are specially distinct. [tion; capability of moving.]

moth'eri-ty, *n.* 1. **moth'eri-ty**; 2. **moth'eri-ty**, *n.* The power of motion. 1. **moth'eri**; 2. **moth'eri**, *n.* [*< L. motus, motion* (*< moveo, move*), + *facto, make*.]

moth'eri-ha, *n.* 1. **moth'eri-ha**; 2. **moth'eri-ha**, *n.* A town, capital of Champan district, Bengal province, India.

moth'eri, *n.* 1. **moth'eri**; 2. **moth'eri**, *a.* 1. Having or exercising **moth'eri**, powers of spontaneous motion, as certain molecules. 2. Causing motion. [*< L. motus, pp. of moveo, move*.]

From the spore or germination there creeps out a naked motile mass of protoplasm.

H. J. WESSER in *American Naturalist* Apr., 1892, p. 257.

moth'eri, *n.* A person in whose mind motor-images are specially distinct. [tion; capability of moving.]

moth'eri-ty, *n.* 1. **moth'eri-ty**; 2. **moth'eri-ty**, *n.* The power of motion. 1. **moth'eri**; 2. **moth'eri**, *n.* [*< L. motus, motion* (*< moveo, move*), + *facto, make*.]

moth'eri-ha, *n.* 1. **moth'eri-ha**; 2. **moth'eri-ha**, *n.* A town, capital of Champan district, Bengal province, India.

moth'eri, *n.* 1. **moth'eri**; 2. **moth'eri**, *a.* 1. Having or exercising **moth'eri**, powers of spontaneous motion, as certain molecules. 2. Causing motion. [*< L. motus, pp. of moveo, move*.]

From the spore or germination there creeps out a naked motile mass of protoplasm.

sit, transition. *Motion* may be either abstract or concrete, more frequently the former; *movement* is always concrete, that is, considered in connection with the thing that moves or is moved; thus we speak of the *movements* of the planets, but of the laws of planetary *motion*; of military *movements*, but of perpetual *motion*. *Motion* is change of place or position in space; *transition* is a passing from one point or position in space to another. *Move* is used chiefly of contests or competition, as in chess or politics; as, it is your *move*; a shrewd *move* of the opposition. We now rarely speak of mental or spiritual *movements*, but rather of mental or spiritual *acts* or processes, or of the laws of mental *action*, but a formal proposal of *action* in a deliberative assembly is termed a *motion*. *Action* is a more comprehensive word than *motion*. See **ACT**; **DRIFT**.—**Ant.**: quiescence, quiet, repose, rest, etc.

—**accelerated motion**, motion of which the velocity is continually increasing, as the velocity of a freely falling body. —**altitude m.**, the motion of an instrument when revolving about a horizontal axis.—**angular m.**, motion regarded as measured by the increase of the angle made with some standard direction by a line drawn from the moving object to a fixed point; speed, motion as projected on a distant sphere by the eye of an observer at the center. Thus, the angular motion of a body passing the observer at a uniform rate and in a straight line increases till it is opposite him and then decreases.—**boulder m.** [Local, U. S.], a surface quarry worked only in detached masses of rock overlying the solid rock; sometimes contracted to **motion**.—**equating m.**, same as **DIFFERENTIAL MOTION**. See **DIFFERENTIAL**.—**Eulerian m.**, movement of the geographical pole in a circle of 0.15° radius in a period of about 429 days.—**head m.**, that part of a loom that determines the pattern of a fabric by operating the warp-harnesses and shuttle-boxes.—**jack-in-a-box m.** (*Mech.*), differential motion.—**lacking m.**, same as **JACKING**, *n.*—**latent motions**, motions of a cyclic or gyrostatic nature assumed to take place in the ultimate particles of a substance.—**lateral m.** (*Mech.*), a side-wise motion, particularly side-motion that is of no value; the side-play of a moving portion of a machine.—**lost m.** *Mech.* 1. Motion of a part of a machine producing no useful work. 2. The return movement of part of a machine.

—**mere m.** *Law*. 1. An act of the king by which he granted letters patent and charters of his own mere motion (*ex mero motu*) without petition. 2. The act of the court in granting to parties concerned privileges which they can not strictly demand, but which are meant to prevent injustice.—**motion-bar**, *n.* **Steam-engine**. A guide-bar.—**m. block**, *n.* *Mach.* A crosshead block which runs against a guide-bar.—**m. curve**, *n.* A curve showing the successive positions of the link or of the slide-valve of a steam-engine, particularly of a locomotive.—**m. distortion**, *n.* A distortion in a spectrum-line, caused by movements in the source of light.—**m. frame**, *n.* A motion-plate.—**m. indicator**, *n.* A speed-indicator, as a tachometer, showing the number of rotations in a specified time.—**m. man**, *n.* A showman.—**m. plate**, *n.* *Mach.* A transverse plate of steel, between the cylinders and driving-axle of an inside-cylinder engine to which are attached the guides of certain sliding parts of the mechanism.—**m. shaft**, *n.* Same as **ROCK**

MOTOR-VEHICLES.—I. Standard Body-Types of Passenger-Cars.

mo'tive, } 1 mō'tiv; 2 mō'tiv, *vt.* [MO'TIVED, MO'TIVED;
mo'tive, } mo'tiv-ing.] 1. To act as a motive for;
 prompt; as, a desire for justice *motive* his actions. 2.
 To base upon something as a motive; to relate to the
 leading idea as in a work of art, etc.

mo'tive, *a.* 1. Having power to move, or tending to
 move; causing motion.

Gravity is a *motive* quality. W. WHEWELL *Hist. Inductive
 Sciences* vol. i, bk. iv, p. 324. [J. W. R. 1837.]

2. [Rare.] Relating to a motive or motives. [< LL.
motivus, < L. *motus*, pp. of *moveo*, move.]

— **motive column**, in ventilating mines, a column of air
 replacing and expelling warmer air from the lower levels.—
m. power. 1. The power, or means of generating power,
 by which motion is imparted to an object, machine, etc.;
 specifically, in railroad affairs, the locomotives of a road, collec-
 tively. 2. Figuratively, any impelling force.—**m. tem-**
perament (*Piren*), that temperament in which the frame-
 work of the system, the bones and the muscles, predominate;
 indicated also by strong dark hair, dark complexion, firm and
 often rough texture, and great endurance.—**m. theme**, a
 musical theme proposed for development.

mo'tive, *n.* 1. That which causes or tends to cause
 motion, or to incite to change or to action; moving or
 impelling force, whether in a literal or figurative sense.
 2. *Ethics*. That which acts as an inducement to prefer-
 ence or choice; that which, speaking figuratively,
 tends to move the will; a strong or impelling influence
 toward some particular object to be obtained or end to be
 secured. In this meaning of the word reference is
 always had to some subjective precondition or tendency,
 and never to an external force or cause. Compare
 FREE; FREEDOM.

The motives of men are intricate and complicated. . . . It suf-
 fices to the wise to profit by the actions, and leave the motives in
 shade. BULWER-LYTTON *My Novel* bk. xi, p. 297. [L. 1852.]

3. A predominant idea, conception, or design. Specif.:
 (1) In the fine arts, the artist's ideal of his subject, the de-
 sire for the realization of which governs all the details of
 his work; also, a feature, design, or figure that prevails in
 varying forms throughout the composition of a work.

Almost everything is a subject, but it only becomes a *motive*
 when an artist is moved.

HAMPTON *Etching and Etchers* bk. i, p. 67. [n. pros. 1876.]

(2) In music, the subject or theme of a composition.

4. One who or that which causes or instigates; a mov-
 ing cause. 5†. Movement; also, motion; proposition.

[< F. *motif*, < LL. *motivum*, < *motus*; see *MOTIV*, *a.*]

Syn.: consideration, ground, incentive, incitement, in-
 ducement, influence, reason. *Motive* may signify either a
 mental impulse, or something external that is an object of
 desire, and so an *inducement* or *incitement* to action; thus,
 we can say "his *motive* was hatred," or "his *motive* was
 money." Compare *CAUSE*; *IM-*
PULSE.—**Prep.**: the motive of or
 for the act.—**economic motive**
 (*Polit. Econ.*), a motive based on
 money interest.—**leading m.**, a
 musical phrase typical of some
 character, place, or principle in-
 volved in the action of a musical
 drama, introduced always in con-
 nection with that which it typi-
 fies; used especially in Wagner's
 operas.—**mo'tive-less**, *a.*—**mo'-**
tive-less-ly, *adv.—**mo'tive-less-ness**, *n.—**mo'tive-ness**,
n. [Rare.]**

mo'tiv-i-ty, 1 mō'tiv-i-ti; 2 mō'tiv-i-ty, *n.* 1. The power
 of producing motion; motive energy.

That Matter . . . which cannot think, will, or originate
 motions, should communicate thought, volition, and *mota-ty* is
 plainly impossible. DWIGHT *Theology* vol. i, p. 98. [n. 1845.]

2. [Rare.] The quality of being influenced by motives.

3. [Rare.] *Physics*. Availability for work; said of heat.

mot'ley, 1 mō'tl; 2 mō'tly, *a.* 1. Variegated in color;
 consisting of various colors; party-colored; dappled;
 as, a *motley* coat. 2. Clothed in variegated garments;
 as, a *motley* fool. 3. Composed of heterogeneous or
 inharmonious elements; as, a *motley* crowd. [< OF.
matellé, clotted, < *matte*, < prov. G. *matte*, curds.]

mot'ly—**motley dandruff** (*Pathol.*), a dandruff which
 causes a mottled appearance of the skin.—**mot'ly-ness**, *n.*

mot'ly, *n.* 1. A dress of various colors, such as was
 formerly worn by court jesters. 2. A jester or fool in
 motley garments. 3. A medley, as of colors. **mot'ly**†.

—**mot'ly-mind'ed**, *a.* Possessed of a mind resembling
 motley in the diversity or inconsistency of its ideas.

Mot'ley, *n.* 1. John Lothrop (1814-1877), an Amer-
 ican historian; *The Rise of the Dutch Republic*. 2. A county
 in N. W. Texas; 984 sq. m.; county-seat, Matador.

mot'mot, 1 mō'tmōt; 2 mō'tmōt, *n.* A momotoid bird
 of the warmer parts of America, related
 to the kingfishers, having feathers
 with aftershoots and man-
 dibles with serrated edges;
 a sawbill. The middle pair of
 tail-feathers are usually elon-
 gated and spatulate or racket-
 shaped, a peculiarity supposed
 by some to be caused by the
 bird nibbling off the barbs.
 Motmots feed mostly on in-
 sects, snails, and small rep-
 tiles, and are commonly
 greenish or bluish. The blue-
 crowned motmot (*Myiobus*
caruleiceps) reaches the Mexi-
 can border of the United
 States. [Probably named from
 its cry.]

mo'to, 1 mō'to; 2 mō'to, *n.* [It.] 1. The common
Mus. Motion; movement.

mo'to, *n.* 1. Motion; movement. 2. A motto, with more
 rapid movement.

mo'to-car', *n.* Same as *mo'-showing* serrated man-
 dibles. 3. Central tail-
 TOR-CAR.

mo'to-graph, 1 mō'to-graf; 2 mō'to-graf, *n.* *Elec.* A
 device in which friction between two relatively moving
 conductors is diminished periodically by an electric cur-
 rent passed through them at their point of contact;
 used as a telephone-receiver, as a telegraphic receiver,
 and as a substitute for an electromagnet in various
 machines. [< L. *motus*, motion (< pp. *motus*; see
 MOTION), + Gr. *graphō*, write.]—**mo'to-graph'ic**, *a.*

mo'to-mag-net'ic, 1 mō'to-mag-net'ik; 2 mō'to-māg-
 nē'tic, *a.* *Elec.* Of or relating to a motor-interrupter

which has for its motor a star-shaped device, the points
 of which are acted upon in turn by an electromagnet.

mo'tom'e-ter, 1 mō'tom'e-tar; 2 mō'tom'e-ter, *n.* A
 machine for measuring the revolutions made by an en-
 gine or shaft.

mo'ton'g, *n.* Defensive armor for the arm and shoulder.

mo'to-neu'ron, 1 mō'to-niū'ron; 2 mō'to-niū'ron, *n.* *Elec.*
 A neuron which also combines a motor power.

mo'to-phone, 1 mō'to-fōn; 2 mō'to-fōn, *n.* *Elec.* A
 device in which a diaphragm vibrated by sound-waves
 is made to rotate a ratchet-wheel; a sound-engine. [<
 L. *motus* (see MOTOGRAHY) + Gr. *phōnē*, voice.]

mo'tor, 1 mō'tor or -tor; 2 mō'tor, *n.* 1. *L. t.* To convey in
 an automobile. 2. To travel or drive in an auto-
 mobile.

mo'tor, *a.* 1. Causing, producing, or imparting motion.
 2. Transmitting impulses from the nerve-centers to the
 muscles; opposed to *sensor*. Compare *EFFERENT*. 3.
 Of or pertaining to the motor nerves.

— **motor area**, the convolutions about the fissure of
 Rolando, regarded as the motion-controlling portion of the
 brain.—**m. automatism**, repeated execution of certain
 movements without intention or will.—**m. fluid**, any fluid
 used to convey energy, as heat, power, etc., from one point
 to another.—**m. nerve**, a nerve that transmits impulses to
 the muscles.—**m. paralysis**, a condition in which the volun-
 tary muscles are paralyzed.

mo'tor, *n.* 1. One who or that which produces or im-
 parts motion or mechanical power. Specif.: (1) A
 machine for transmitting some other kind of energy into
 mechanical energy, as a steam-engine, windmill, water-wheel,
 or reversed dynamo. See *ILLUS.* under *ELECTRIC MOTOR*.
 (2) A motor nerve. (3) *Math.* An operator denoting the
 displacement of a rigid body in space. (4) Same as *MOTILE*.
 2. A small, powerful engine, generally a gasoline en-
 gine, as for an aeroplane, automobile, or motor-boat.
 3. An automobile or motor-car. [< L., one who moves,
 < L. *motus*, pp. of *moveo*, move.]

— **absolute motor field** (*Anat.*), that part of the cortex
 of the cerebrum in which impaired motion always follows
 an injury; distinguished from *relative m. field*, where
 a lesion is not necessarily followed by such loss of power.

— **air-mo'tor**, *n.* A motor-vehicle propelled by com-
 pressed air.—**asynchronous m.** (*Elec.*), an alternating-
 current motor in which the frequency of alternation does not
 rigidly determine the speed, as in induction-motor.—**domes-**
tic m., any small motor for domestic use, as running a sewing-
 machine.—**double-opposed m.**, a mode of connecting the
 cylinders of an internal-combustion engine to cranks 180
 degrees apart on opposite sides of the crankshaft; used in
 horizontal engines for motor-cars.—**fan-m.**, *n.* *Elec.* See

For the distinction between *mountain* and *hill*, see HILL.

There are four leading and distinct types of elevation which are all popularly termed *mountains*, and each of which is susceptible of subdivision into further groups.

(a) *Volcanic mountains*, formed by the accumulation of material ejected from the earth's interior and piled up into a conical mass round the vent from which they proceed.

(b) *Outlier mountains*, produced by the isolation of large, more or less conical or flat-topped masses during the course of prolonged denudation.

(c) Closely connected with the last-named type is that of *Denudation ridges*. These consist of eminences, often hundreds or thousands of feet in height, connected at the sides or base, and forming long lines of winding ridges or chains of uplands, resulting from the unequal effects of denudation.

(d) *Tectonic mountains*, consisting of chains of ridges that rise into a succession of more or less distinct summits, and are separated by lines of valleys. The broad distinction of this type is that it has been produced by the plication and elevation of the earth's crust.

mourn'ing, *n.* 1. The act of sorrowing or expressing grief; lamentation; sorrow. 2. The symbols or outward manifestation of grief, as the use of symbolical colors in dress, the draping of buildings or doors, and the half-masting of flags. In dress, the symbols vary in different countries. In America and Europe black is the prevailing color, and it is displayed in dress and in the bordering of stationery, visiting-cards, and handkerchiefs. In China the mourning color is white, in Egypt yellow, in Ethiopia brown, in Turkey violet. The term *mourning* is also used to signify the period during which signs of bereavement are displayed; it varies in length according to the closeness of relationship to the deceased. The duration of court mourning in England for a sovereign is a year, and for princes and other royal personages, both native and foreign, is for lesser periods.

She was already out of *mourning*, for she said nobody here could tell how long she had been a widow.

(2) Personal property, as distinguished from real or fixed property; chattels personal. (3) *Scots Law*. Property that does not pass by inheritance; distinguished from *heritable*. Things movable by their nature are such as may be carried from one place to another, whether they move themselves, as cattle, or cannot be removed without an extraneous power, as inanimate things. *Movables* are further distinguished into such as are in possession, or which are in the power of the owner, as a horse in actual use, a piece of furniture in a man's own house, and such as are in the possession of another, and can only be recovered by action, which are therefore said to be in action, as a

Some Consecutive Phases of the Walk.

In the execution of a single complete stride there is a recurrence of phase 1 in phase 11. Phase 12 is virtually a repetition of phase 2.

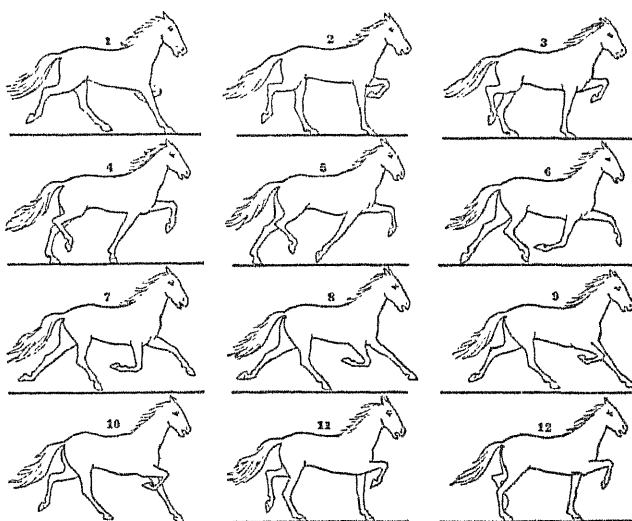

Some Consecutive Phases of the Canter.

With a virtual repetition of phase 1 in phase 10, a complete stride is executed. Phases 11 and 12 are parts of the stride following.

Some Consecutive Phases of the Amble.

The stride beginning with 1 is completed by a phase that occurs between phases 10 and 11. Phases 11 and 12 are parts of the stride following.

Some Consecutive Phases of the Trot.

Figures 1 to 10 are phases of one-half of a complete stride of a trotter going at a high rate of speed; the full round movement is completed in 10 additional phases, of which 11 and 12 are the first two. The time-intervals are identical throughout.

Some Consecutive Phases of the Rack or Pace.

In the execution of a single complete stride there is a practical recurrence of phase 1 in phase 10. Phases 11 and 12 are parts of the stride following.

Some Consecutive Phases of the Gallop.

A complete stride of a thoroughbred horse, as photographed while galloping at a high rate of speed, is illustrated by phases 1 to 12.

See *AMBLE*, *CANTER*, *GALLOP*, *PACE*, *TROT*, *WALK*, and the plate of *MOVEMENTS OF THE HORSE*, on preceding page. See *ILUS.* under *DOG*.

The anatomy and physiology of locomotion, and of the hand, the vocal apparatus, and the like, had long been studied and often figured, but it remained for instantaneous photography, in the hands of Eadweard Muybridge and others, to reveal a series of unexpected and almost incredible attitudes in the action of the horse and other animals. The Japanese artists, as if with different organs of vision from ours, had long since caught the remarkable attitudes of animals in motion, especially of birds, and their subtle vision has been verified by photography. The results are important in their scientific aspect, but it adopted too literally in art the effect may be painfully ludicrous.

3. A series of actions, incidents, or ethical impulses tending toward some end; as, the antislavery *movement*; the temperance *movement*.

The strength of the reformation lay entirely in its being a movement towards purity of practice.

mul'ti-fa-ri-ous, 1 mul'tī-fā-rī-ous; 2 mul'tī-fā-rī-ūs, a. 1. Having great diversity or variety; multiplex. 2. *Lav.* Characterized by multiplicity and diversity: said of a bill in equity in which unconnected matters are joined. 3. Bot. & Zool. Many-ranked; arranged in several vertical rows or ranks. [*< L. multifarius, < L. multus, many, + (perhaps) for, speak.*]

mul'ti-fa-ri-ous, 1 mul'tī-fā-rī-ous; 2 mul'tī-fā-rī-ūs, a. 1. Having great diversity or variety; multiplex. 2. *Lav.* Characterized by multiplicity and diversity: said of a bill in equity in which unconnected matters are joined. 3. Bot. & Zool. Many-ranked; arranged in several vertical rows or ranks. [*< L. multifarius, < L. multus, many, + (perhaps) for, speak.*]

mul'ti-fa-ty, 1 mul'tī-fā-tī; 2 mul'tī-fā-tī, n. 1. The quality or state of being manifold or numerous; multiplicity. 2. That which consists of many individuals or separate parts. [*< L. multus, many.*]

Mul'tek'a, 1 mul'tek'a; 2 mul'tek'a, n. A code formed of the supposed sayings and opinions of Mohammed and of his immediate successors. [*CP. Ar. mul'taka, meeting-place.*]

Mul'te-ni-on, 1 mul'tī-nī-on; 2 mul'tī-nī-on, n. *Math.* A multifold quantity formed on the principle of a quaternion. [*< L. multus, many.*]

mul'ter, 1 mul' or mul'ter; 2 mul' or mul'ter, n. [*Scot.*] Multure.

mul'ti, 1 mul'ti; 2 mul'ti, v. From Latin *multus*, many or much; combining forms.—**mul'ti-ac'ite**, n. Having many actives, as in sponges-spicules.—**mul'ti-an-gu-lar**, a. Same as MULTANGULAR.—**mul'ti-ar-tic-u-late**, a. Comprising or consisting of numerous small spaces.—**mul'ti-ar-tic-u-lar**, a. Affecting many articulations or joints.—**mul'ti-ax'i-ate**, a. Having many axes or lines of growth.—**mul'ti-blad'ed**, a. Having many blades.—**mul'ti-brach'i-ate**, a. Having numerous arms, as the *Crinoidae*.—**mul'ti-break**, a. *Elec.* Relating to or designating a form of switch by means of which a circuit may be broken at several points of contact simultaneously.—**mul'ti-cam'er-ate**, a. Having many cells or chambers; many-chambered.—**mul'ti-cap'i-tate**, a. Many-headed.—**mul'ti-cap'su-lar**, a. Bot. Producing or having many capsules.—**mul'ti-car'i-nate**, a. Having many ridges, as certain shells.—**mul'ti-cau'tin'ous**, a. Having many stems.—**mul'ti-ca'vous**, a. Having many cavities.—**mul'ti-cel'l'u-lar**, a. Many-celled.—**mul'ti-cent'ral**, a. Having or depending upon many centers; as, *multicentral* development.—**mul'ti-charge**, a. Having several charges fired in quick succession, each increasing the velocity of the projectile; as, a *multicharge* gun.—**mul'ti-cl'i-l'at'ed**, a. Having numerous processes or clia.—**mul'ti-cl'i-l'at'ed**, a. Having numerous processes or clia.—**mul'ti-cl'i-l'at'ed**, a. Having a plurality of mutually connected circuits.—**mul'ti-cl'euit**, a. *are-dynamo*, a dynamo which supplies current in parallel to a plurality of series are-lighting circuits.—**mul'ti-cl'euit**, a. generator which supplies current to a plurality of parallel circuits: sometimes indicating one with a plurality of parallel armature circuits.—**mul'ti-coe'ous**, a. Having numerous coed or cells.—**mul'ti-col'or**, **mul'ti-col'our**, 1. a. Having or using many colors; party-colored. **mul'ti-col'ored**; **mul'ti-col'or-ous**. **II. n.** 1. The state of being multicolored or variegated; as, the *multicolor* of the poppy. 2. Many or varied colors; as, embroidery in *multicolor*.—**mul'ti-con'stant**, a. Employing many constants: said of certain physical theories: opposed to *variable*.—**mul'ti-cor'ne-al**, a. Having numerous corneas.—**mul'ti-cos'tate**, a. Having many ribs or costae, as leaves, shells, etc.—**mul'ti-cus'pid**, 1. a. Multicuspidate. **II. n.** A multicuspidate tooth.—**mul'ti-cus'pidate**, a. Having more than two cusps or points; as, *multicuspidate* teeth.—**mul'ti-cy'cle**, n. 1. A velocipede having four or more wheels; specif., such a velocipede built for military use, driven by several men, and carrying light artillery, military equipments, etc. 2. A bicycle for carrying two or more riders.—**mul'ti-cy'l'in-der**, a. Having several cylinders: said of steam-engines, etc.—**mul'ti-cy'l'in-dered**, a.—**mul'ti-den'tate**, a. Having many teeth or tooth-like processes.—**mul'ti-den-tic'u-late**, a. Having many fine teeth or tooth-like processes.—**mul'ti-dig'i-tate**, a. Having many digits or finger-like processes.—**mul'ti-di-men'sion-al**, a. Having more than three dimensions.—**mul'ti-faced**, a. Many-faced, as some crystals.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.
mul'ti-fa-ri-ous, 1 mul'tī-fā-rī-ous; 2 mul'tī-fā-rī-ūs, a. 1. Having great diversity or variety; multiplex. 2. *Lav.* Characterized by multiplicity and diversity: said of a bill in equity in which unconnected matters are joined. 3. Bot. & Zool. Many-ranked; arranged in several vertical rows or ranks. [*< L. multifarius, < L. multus, many, + (perhaps) for, speak.*]

mul'ti-fa-ri-ous, 1 mul'tī-fā-rī-ous; 2 mul'tī-fā-rī-ūs, a. 1. Containing or consisting of more than one; repeated more than once; manifold. 2. *Elec.* Having two or more conductors or pieces of electrical apparatus, such as lamps, battery couples, etc., connected in parallel. [*< L. multiplex, manifold, < L. multus, many, + -plus, fold.*] —In *multiple* (*Elec.*), the condition of circuits so connected as to divide the current between them in inverse proportion to their impedances.—In *m. series* (*Elec.*), connected in a certain number of groups arranged in series, which groups are then connected in parallel, as lamps or battery-cells.—*law of m. proportions* (*Chem.*), the law that when the same amount of one substance combines with more than one amount (by weight) of a second, all the quantities of the second so combining are multiples of the smallest.—*m. circuit*, a compound electric circuit in which each of several separate sources, as cells, or receptive apparatus, as lamps, has one pole or electrode connected to a single positive conductor that communicates with them all, and the other to a single negative conductor. *m. arc; mul'ti-ple-col'or, a.* Using two or more colors; as, a *multiple-color* printing machine.—*m. connection, 1.* Same as MULTIPLE CIRCUIT. 2. The nature of a multiple-connected surface.—*m. cropping, n.* Harvesting two or more crops from the same ground in a year.—*m. cylinder, a.* Same as MULTICYLINDER. *m. effect* (*Sugar-manuf.*), that obtained by a system of vacuum-pans so arranged that the vapor from each pan, with the exception of the last, is employed to heat the next, in which the exhaustion is more effectively accomplished.—*m. integral* (*Math.*), that obtained by the multiplication together of several definite integrals.—*m. lines*, in fortification, detached lines of defensive works.—*m. offer* (*Mech.*), a lubricating contrivance operated by gravity or air-pressure in which the lubricant is led from a reservoir by different pipes to each part of the mechanism to be lubricated: used for internal-combustion engines, etc.—*m. personality*, see PERSONALITY. *n.—m. pointing* (*Scots Law*), a judicial proceeding corresponding to the bill of interpleader for compelling rival claimants to contest their respective rights to the same fund.—*m. point, 1. Phys. Chem.* In a diagram showing the circumstances of a thermodynamic system, a point in which two or more curves intersect. 2. *Geom.* A point on a surface through which pass three or more nappes of the surface; also, a point on a curve through which pass two or more branches of the curve.—*m. pregnancy*, a state of pregnancy with more than one fetus.—*m. press*, a gang-press. See GANG.—*m. reversal* (*Spectroscopy*), the simultaneous reversal of several portions of a bright line of the spectrum of the electric arc, probably due to sudden variations of pressure and temperature.—*m. rod*, a series of transparent glass rods colored red and arranged one above another; employed in testing for heterophonia.—*m. spectra*, spectra

pertaining to the same substance, but varying as to arrangement, number, and position of their lines or bands.—*m. switch* (*Elec.*), a switch for starting motors, so arranged as to cut out successive sections of resistance one after the other.—*m. thread*, a screw-thread consisting of two or more parallel intertwined helices.—*m. threaded, a.—m. unit system*, a system of control for an electric-railway train in which two or more cars, each having independent motors and controllers, are combined in a train, regardless of end-relation or succession of cars, and operated as a unit, through a secondary train-line, from one or more master switches.—*m. vision*, same as POLYPIA.—*m. voting* [*Brit.*], voting by the same person at the same election in different places in which he may possess the necessary legal qualifications.—*m. wheel*, a mechanical movement consisting of a large wheel with diametrical slots in the sides of its face or arms, and a smaller wheel, having rollers engaging in the slots: a variety of the trolley-wheel.—*series m.*, same as MULTIPLE SERIES. **mul'ti-ple, n.** 1. *Math.* A resultant of multiplying a quantity by whole numbers; as, 14, 21, 28, and 35 are multiples of 7; opposed to *divisor*. 2. A manifold with reference to one of its elements or parts. 3. *Elec.* The totality of multiple jacks in a telephone switchboard. 4. Same as MULTIPLE CIRCUIT.—*common multiple*, a multiple of each of two or more numbers; as, 100 is a common multiple of 2, 5, and 4.—*least common m.*, the smallest number which contains each of two or more separate numbers without remainder; as, 20 is the least common multiple of 2, 5, and 4.—*m. of gearing*, a train of gearing to reduce or increase the ratio of velocity. **mul'ti-plex, 1 mul'ti-plex; 2 mul'ti-plex, n.** [*Collon.*] To cause to be manifold. **mul'ti-plex, a.** 1. Made up of many parts; manifold. General laws are necessarily *multiple*, and are not the cause but the results of a vast number of arrangements. McCosm Divine Government bk. ii, p. 83. [*c. a. 1883*] 2. Same as MULTIPPLICATE. 3. *Elec.* Characterizing or designating a system of telegraphy or telephony in which a plurality of messages may be simultaneously transmitted over a single wire. [*< L. multus, many, + plex, fold.*]—**mul'ti-pli'cious, a.—mul'ti-pli'cious-ly, adv.** **mul'ti-plex, n.** *Math.* A set of objects. [*C.*] **mul'ti-pli'a-bl'e, 1 mul'ti-pli'a-bl'e; 2 mul'ti-pli'a-bl, a.** That may be multiplied; capable of multiplication. **mul'ti-pli-ca-bl'e; mul'ti-pli'a-bl'e-ness, n.—mul'ti-pli-ca-bl'i-ty, n.** **mul'ti-pli-cand, 1 mul'ti-pli-cand; 2 mul'ti-pli-cind, n.** *Math.* A number or term to be multiplied by another. [*< L. multiplicandus, gerundive of multiplico; see MULTIPLY.*] **mul'ti-pli'cate, 1 mul'ti-pli-cat; 2 mul'ti-pli-cat' (XIV), a.** 1. Consisting of many or more than one. 2. *Bot.* Folded in many plaits: said of the petals of some flowers in estivation. 3. Having many folds or ridges, as a gastropod shell. [*< L. multiplicatus, pp. of multiplico; see MULTIPLY.*]—**multiple ratio** (*Math.*), the ratio of like powers of two magnitudes.—**multiplying glass, a convex lens with many facets that produce many images. **mul'ti-pli-ca'tion, 1 mul'ti-pli-ca'tion; 2 mul'ti-pli-ca'tion, n.** 1. The act or process of multiplying, or the state of being multiplied or increased in number. The unnecessary multiplication of articles of faith gives a character of littleness to Christianity. R. HALL Works, Address, Jan. 19, 1881, in vol. i, p. 172. [*n. 1849.*] 2. *Math.* (1) *Arith.* The process of finding the sum of a number called the multiplicand repeated as many times as there are units in another number called the multiplier, or, in case the multiplier is fractional, of finding the same fractional part of the multiplicand as the multiplier is of unity. The symbol of multiplication is \times , written between the factors, but in algebra the quantities are usually placed side by side, with or without a dot between them, as ab or $a.b$. For most purposes the operation of multiplication has been much abbreviated by the use of logarithms, and is mechanically performed with great accuracy by means of the slide rule, or by computing-machines. (2) By extension, in higher mathematics, the performance of any operation by one quantity upon another quantity b such that, if either a or b is increased or diminished in any ratio, the result ab will be changed in the same ratio. In general, multiplication in the higher mathematics is considered as the process of bringing an operand under an operator. Thus, in quotations, the operation of turning a line in a given direction through a given angle, followed by a similar turning through another, is known as the *multiplication of versors*; similarly, in the theory of differential equations, the operation of differentiating first relatively to one variable and then relatively to another is regarded as a process of multiplication; in other cases the act of specifically conjoining each unit of the multiplier with each unit of the multiplicand according to some definite system is characterized as multiplication. 3. *Bot.* Augmentation; an increased number of organs, either by the addition of whole circles or by the increase in the parts of any circle. 4. *Symbol. Logic.* The operation of uniting two or more terms to form an expression indicating their common denotation only. 5. A game of dice in which each player makes three throws, the first with three dice, the second with two, and the last with one, the pips on the highest die in each of the first two throws being added together and multiplied by those of the last die thrown. 6. The supposed alchemic art of increasing gold and silver. The Constitution of the United States, in regard to the various municipal regulations and local interests, has left the States individual, disconnected, isolated. *Winstanley Works, Landing at Plymouth* in vol. ii, p. 205. [L. B. & Co. 1888.]

Among the Romans, cities were called *municipia*; those cities voluntarily joined the Roman republic in relation to their sovereignty only, retaining their laws, their liberties, and their magistrates, who were thence called *municipal* magistrates. With us this word has a more extensive meaning; for example, we call *municipal* law not the law of a city only, but the law of the state. 1 *Bla. Com.* 44. *Municipal* is used in contradistinction to international; thus we say an offense against the law of nations

is an international offense, but one committed against a particular state or separate community is a *municipal* offense.

Boz v. Law Dict. Rawle's revision, p. 452.

Among the Romans, cities were called *municipia*; those cities voluntarily joined the Roman republic in relation to their sovereignty only, retaining their laws, their liberties, and their magistrates, who were thence called *municipal* magistrates. With us this word has a more extensive meaning; for example, we call *municipal* law not the law of a city only, but the law of the state. 1 *Bla. Com.* 44. *Municipal* is used in contradistinction to international; thus we say an offense against the law of nations

is an international offense, but one committed against a particular state or separate community is a *municipal* offense.

MUSK, *n.* 1. A soft, unctuous, reddish-brown powdery substance of a strong, penetrating, and diffusive odor, and slightly bitter taste.

It is imported in the pod, a sac situated in front of the prepuce of the male musk-deer, which, after the animal is killed, is cut off and dried, or as *grain-musk*, found chiefly on stones where the animal has secreted it. *Musk* is used by perfumers, and to a small extent in medicine as a stimulant and antispasmodic. A resinous substance with a musk-like odor, formerly called artificial musk, is made by treating reasified oil of amber with cold fuming nitric acid.

Geneva is no grain of sand; 'tis a grain of musk that perfumes all Europe. J. MONLAR *Rousseau* vol. i, p. 195. [c. & n. 1872.]

mus'kel, 1 *mus'kel*; 2 *mus'kel*, *n.* 1. Any form of smooth-bore military hand-gun; specif., a hand-gun for infantry, now superseded by the rifle.

About 1540 the Spaniards invented a musket of the matchlock type, using a ball weighing one-tenth of a pound; it became common in England during the first part of the 16th century. The matchlock was gradually replaced by the wheel-lock, a lighter weapon, and in course of time the rifle was evolved. During the 18th century the term indicated guns other than the froleck and fuser; later it came to mean any infantry gun, and this sense it still retains. For accurate fire the old musket range was 100 yards, whereas the Martin-Henry range is 1,200 yards; for efficiency against massed troops the musket range was 200 yards, whereas the Martin-Henry is effective at 1,500 yards. See *PISTOL*; *PISTOL*; *PISTOL*; *PISTOL*; *PISTOL*; *PISTOL*.
2. A male sparrowhawk. [*< OF. mousquet, gun, hawk, < It. moschetto, lit. a kind of hawk, < L. musca, fly.*]
